

#### **VISION**

Sekhukhune District Municipality – **An innovative** leader in integrated economic development and sustainable service delivery.

#### **MISSION STATEMENTS**

To improve the quality of life for all communities through:

- provision of a democratic and accountable government;
- promotion of inclusive and egalitarian economic transformation;
  - promotion of a safe and healthy environment;
- fostering of community involvement and stakeholder engagement; and
  - Strengthening institutional capacity.
    - Promotion of social cohesion

# FINAL IDP/BUDGET REVIEW FOR 2025/2026

## ADOPTED BY COUNCIL ON THE 29 MAY 2025

**COUNCIL RESOLUTION NO. SC06/05/25** 

The promise of a better life for all the residents of Sekhukhune District Municipality is fundamentally linked to the developmental mandate of the district municipality as stipulated in the Constitution of the Republic of South Africa and other various Local Government legislations. The long legacy of inherited uneven and unequal development of our communities continues to be experienced in our communities through the triple challenges of poverty, inequality and unemployment

The IDP is a critical strategic document that outlines the strategic path and direction of Sekhukhune District Municipality and crystalise the operational planning core focus area. Through the development of the IDP, the District municipality envisions the desired state of the municipality and provides for the identification of preferred options and mechanisms for progressively moving towards the aspired state.

As an overarching institutional plan, the IDP provides the organising framework for development and planning of the district municipality in an interactive and participatory partnership with the community and key stakeholders across the length and breadth of the District.

It is against this background that during the process leading to the adoption of this 2025/26 Integrated Development Plan (IDP), we embarked on an extensive consultation process, soliciting the views of various stakeholders and ratepayers, including traditional leaders, businesses, special groups, and community members.

This was done to enhance participatory democracy as we seek to deepen the District Development Model (DDM), which requires that all stakeholders be involved in the planning, budgeting, and implementation of government programs.

This IDP is, therefore, a social contract between this 5th administration and the communities and other stakeholders of our district, to fast-track the provision of basic services and improve the local economy over the next five years.

As the executive arm of the district municipality, we are pursuing an integrated developmental agenda anchored on the following Six Mayoral Priorities:

- 1. Provision of water and sanitation services in a sustainable manner,
- Local economic development, growth, and job creation through agrarian reform, mining, tourism, and repositioning of the Sekhukhune Development Agency,
- 3. Good governance and sound financial management,
- 4. Sustainable land use management and spatial transformation,
- Community development, social cohesion, and nation building, and
- 6. Public participation, stakeholder engagements, and partnerships.

The implementation of innovative solutions to the resource and capacity constraints of the district municipality will require lasting partnerships with stakeholders and the community. The introduction of the District Development Model presents an opportunity for integrated solutions driven partnerships within the intergovernmental system of the country.

For this reason and in the spirit of inter-governmental relations, we have worked towards ensuring that this 2025/26 IDP incorporates the activities of the four local municipalities within our district. It also provides for the mining, tourism, and agricultural sectors to play an increasingly meaningful role in the development of our district.

Though this IDP we have outlined our plans and strategies regarding the provision of water and sanitation services, combating poverty, unemployment, and inequality in our communities. These objectives will be achieved through the implementation of strategic economic plans and programs that will reposition our district as an investment destination.

Plans for the next financial year, include but not limited to community-based water projects, social welfare initiatives, attaining a Clean Audit and making sure that the Fetakgomo Tubatse Economic Zone process and the relocating of Sekhukhune district offices from Capricon district are finally completed.

The challenges facing our people calls upon all of us not to conduct business as usual. We need to be more creative and innovative in how we best address the triple challenges of poverty, unemployment, and inequality. Building a resilient municipality with common purpose is the responsibility of all stakeholders of the district municipality. We reaffirm our commitment to the people of this district to continue working even harder to resolve their challenges, particularly in the provision of sustainable clean drinking water and sanitation. The people of Sekhukhune deserve better.

The Executive Mayor Cllr Minah Bahula

## SEKHUKHUNE DISTRICT MUNICIPALITY DISTRICT DEVELOPMENT MODEL

#### MUNICIPAL MANAGER'S OVERVIEW

The Municipal Systems Act, Act 32 of 2000, mandates that municipalities develop and review their five-year Integrated Development Plans (IDPs) to guide them in fulfilling their constitutional responsibilities as developmental local government institutions and delivering effective services to communities. The IDP is reviewed annually to adapt to shifting socioeconomic conditions, evolving policy priorities, and the expressed needs of our people at national, provincial, and local levels.

This 2025/2026 Review takes place within the context of ongoing institutional transformation driven by the Municipal Staff Regulations, Gazetted on 21 September 2021 (Gazette No. 45181) and implemented. These regulations aim to improve municipal performance by responding to systemic governance issues identified in earlier assessments by the Department of Cooperative Governance (DCoG), including:

- · The bloating of administrative structures in non-core functions,
- · Incoherent HR practices resulting in critical skills imbalances,
- · A high prevalence of irregular and inappropriate appointments,
- Weak skills development programmes and poor institutional performance,
- · Ineffective performance management and limited accountability,
- · Unclear and inconsistent disciplinary procedures.

#### The objectives of the Regulations are to:

- Build a developmental local public administration grounded in sound HR practices and career development systems.
- Foster professional ethics, accountability, and community responsiveness in municipal governance,
- · Ensure recruitment and appointment of suitably qualified individuals,
- Standardise performance management and policy enforcement through a coherent HR governance model.
- In line with these reforms, the municipality has revised its policies
  and systems to strengthen institutional integrity, improve capacity,
  and promote ethical, performance-based leadership. The strategic
  planning session held in February 2025, followed by ward-based
  community consultations during April 2025, enabled reflection on both
  progress and remaining gaps. Inputs were received across all 117 wards
  and 811 villages, confirming that access to reliable water, improved
  sanitation, strengthened health systems, job creation, and enhanced
  municipal responsiveness remain top priorities for our communities.

In this regard, the municipality upholds its vision:

## "An innovative leader in integrated economic development and sustainable service delivery."

This vision is anchored by our institutional values—HEART + EAR:

- H Honesty
- E Excellence
- A Accessibility
- R Respect
- T Transparency
- .
- E Ethical Leadership
- A Accountability
- R Responsiveness

The six Key Performance Areas continue to guide our developmental agenda:

- 1. Basic Service Delivery and Infrastructure Development
- 2. Spatial Rationale
- 3. Local Economic Development
- 4. Institutional Transformation and Organisational Development
- 5. Financial Viability
- 6. Good Governance and Public Participation

#### Key Priorities for 2025/2026:

- Accelerating water services through improved infrastructure, borehole recovery, tanker management, and human resource investment in operations and maintenance.
- Expanding sanitation coverage and improving environmental health services to ensure dignified living standards.
- Strengthening institutional capacity by implementing reforms aligned to Gazette 45181 and prioritising strategic recruitment.
- Enhancing financial accountability through improved internal controls, audit compliance, and revenue management.
- Driving inclusive local economic development, particularly through the Sekhukhune Development Agency (SDA), agricultural support, tourism promotion, and SMME empowerment.
- Supporting the Fetakgomo-Tubatse Special Economic Zone (FTSEZ), with licensing efforts ongoing through the Department of Trade, Industry and Competition (DTIC), and a tripartite governance structure ensuring resourcing and alignment.
- Improving risk preparedness and emergency response through expanded capacity of the District Disaster Management Centre.

The IDP also reflects alignment with broader development frameworks, including the District Development Model (DDM), the Limpopo Development Plan 2025–2030, the Medium-Term Development Plan 2024–2029, and the Sustainable Development Goals (SDGs).

#### In Conclusion:

The 2025/2026 IDP/Budget Review was conducted in full compliance with legislative and policy frameworks. It reflects the lived realities of our communities, aligns institutional efforts to national priorities, and sets out practical steps for implementation. On behalf of the municipality, I extend my appreciation to all communities, councillors, traditional leaders, government partners, and civic organisations who contributed to this review process. Let us now focus on delivery and impact.

Mr. Meshack Kgwale Municipal Manager

## **CHAPTER 1:**

# INTRODUCTION AND CONTEXT

#### 1.1. INTRODUCTION

Integrated Development Planning (IDP) is a strategic development tool to assist the municipality to achieve its developmental imperatives. The review of the 2025-2026 IDP document for Sekhukhune District Municipality has followed an extensive internal and external consultation of stakeholders and communities within the parameters of the district's sphere of operation. This document is a legislative mandate and a strategic planning instrument that guide and inform planning and development as well as decisions with regard to planning, management and development throughout the district. The Municipal Systems Act (2000) provides the legal framework for municipal development planning to assist Local Government to discharge its mandates.

#### 1.2. POLICIES AND LEGAL PARAMETERS

In formulating the IDP cognizance ought to be given to Global, National, Provincial and Local policy and legislative imperatives.

#### 1.2.1. GLOBAL IMPERATIVES

#### SUSTAINABLE DEVELOPMENT GOALS (SDGs)

During 2015, South Africa presented its final Millennium Development Goals (MDGs) report on the state of the progress that the country has made in rolling back poverty in all its forms, as agreed upon globally and initiated in 2000. This 15-year process covered the tracking of eradication of poverty in a number of dimensions, measured across 8 basic areas or goals. Since then, the global community has adopted a further set of development issues to continue and expand the work of the MDGs. This set of aspirations is termed the Sustainable Development Goals (SDGs) and will come to fruition in 2030. The SDGs are both an extension and an expansion of the work done under the MDGs; in particular, the number of goals increased from 8 to 17, the number of targets increased from 20 to 169 and the indicator suite increased from 60 to 230.

#### **GOAL 1: END POVERTY IN ALL ITS FORMS EVERYWHERE**

Recent data shows that the war on poverty is far from over and that efforts to combat it must be expanded and accelerated as the country experienced increased levels of poverty between 2011 and 2015. Women, children, black Africans, those living in rural areas, and people with little or no education remain the biggest victims of poverty in South Africa and these groups require special focus and targeted interventions if poverty levels are to drop to the SDG target of 20,0% by 2030 (from 40,0% in 2015) based on the LBPL.

## GOAL 2: END HUNGER, ACHIEVE FOOD SECURITY AND IMPROVED NUTRITION AND PROMOTE SUSTAINABLE AGRICULTURE

Food security is more than just the availability of food; it also encapsulates issues of affordability, nutrition/food utilisation and stability of food supply into the future. The NDP indicates that food

security exists when everyone has access to sufficient, nutritious, and safe food at all times. This implies that food must be available and that people must have the means to access it.

#### GOAL 3: ENSURE HEALTHY LIVES AND PROMOTE WELL-BEING FOR ALL AT ALL AGES

The NDP envisages South Africa having a health system that works for everyone and produces positive health outcomes by 2030. Provision of universal health coverage through implementation of national health insurance, addressing the social determinants of health and promoting healthy behaviours and lifestyles are identified as key prerequisites for achieving this vision. The national health system needs to be strengthened by improving governance and eliminating infrastructure backlogs.

#### **GOAL 5: ACHIEVE GENDER EQUALITY AND EMPOWER ALL WOMEN AND GIRLS**

This Goal can be viewed as a vehicle which will move South Africa further along the trajectory towards the achievement of the gender equality imperatives outlined in both the Constitution of the Republic, as well as the NDP.

Therefore, significant efforts must be made towards mainstreaming a gender perspective in the implementation of the SDGs; closing or narrowing persisting gender gaps; and strengthening support to our institutional mechanisms for women's empowerment and gender equality in the country.

## GOAL 6: ENSURE AVAILABILITY AND SUSTAINABLE MANAGEMENT OF WATER AND SANITATION FOR ALL

Water is identified as a strategic resource critical for social and economic development in South Africa. The NDP states that "by 2030 all South Africans will have affordable access to sufficient safe water and hygiene sanitation to live healthy and dignified lives". The National Water Policy, the National Water Act (Act 36 of 1998) and the Water Services Act (Act 108 of 1997) provide the legal framework for government to fulfil its responsibility of ensuring that all South Africans have access to adequate water supply services and sanitation services.

Since South Africa is a water-scarce country (30th driest country globally), greater attention will have to be paid to management and use of water. There is a growing concern over the potential impact of water-related risks of which some are predicted to increase in future as a result of impacts of climate change on the water resource. It is important that South Africa, together with riparian states, manages impacts of hydrological extremes through transboundary agreements. This will require strengthening of existing water monitoring networks across the entire shared basins and timely exchange of data and information between and among riparian states. The exchange of data and information among riparian states will not only assist in monitoring the riparian countries' achievement of SDG targets but will also assist the countries to expedite the achievement of the set targets.

## GOAL 7: ENSURE ACCESS TO AFFORDABLE, RELIABLE, SUSTAINABLE AND MODERN ENERGY FOR ALL

South Africa ratified the Paris Agreement which is based on three main objectives. These objectives aim to limit the increase in global average temperature to well below two degrees Celsius from now until 2100, to increase the ability to adapt to the adverse impacts of climate change and to make finance flows consistent with a pathway towards low greenhouse gas emissions and climate-resilient development. These objectives resonate with our own objectives for the growth and development of Africa and indeed South Africa.

## GOAL 8: PROMOTE SUSTAINED, INCLUSIVE AND SUSTAINABLE ECONOMIC GROWTH, FULL AND PRODUCTIVE EMPLOYMENT AND DECENT WORK FOR ALL

South Africa will continue to promote inclusive and sustainable economic growth as a prerequisite for global prosperity. Goal 8 aims to provide opportunities for full and productive employment and decent work for all while eradicating forced labour, human trafficking and child labour. According to the NDP, South Africa must find ways to urgently reduce the alarming levels of youth unemployment and to provide young people with broader opportunities.

## GOAL 9: BUILD RESILIENT INFRASTRUCTURE, PROMOTE SUSTAINABLE INDUSTRIALISATION AND FOSTER INNOVATION

Goal 9 encompasses three important aspects of sustainable development: infrastructure, industrialisation and innovation. Infrastructure provides the basic physical systems and structures essential to the operation of a society or enterprise. Industrialisation drives economic growth, creates job opportunities and thereby reduces income poverty. Innovation advances the technological capabilities of industrial sectors and prompts the development of new skills.

#### **GOAL 10: REDUCE INEQUALITY WITHIN AND AMONG COUNTRIES**

Inequality manifests itself in many forms, but the most pressing area of inequality that needs to be addressed is the inequitable distribution of resources and income. Both the NDP and SDG agendas make this a central priority. By reducing income inequality, we ensure that households have the ability and capacity for shaping their own futures. Interestingly, while the NDP has set a much more aggressive approach on poverty and its targets for 2030 compared to the SDGs, its inequality objectives and targets are slightly more modest and are on par with the SDG ambitions.

## GOAL 11: MAKE CITIES AND HUMAN SETTLEMENTS INCLUSIVE, SAFE, RESILIENT AND SUSTAINABLE

Sixty-three percent of South Africans already live-in urban areas. Over 55% of the population are found in the 25 largest municipalities, with over 200 municipalities having less than 45% of the population. The contribution of these 25 largest municipalities to the GDP is over 70%, and they also have a very high proportion of job opportunities. The result of this is that on average, the population of these major urban centres grew by over 20% between 2001 and 2011.

In the South African context, informal settlements present a particular challenge. Most job-seeking migrants moving to cities first live in informal settlements, which are an affordable entry to the city. Many migrants cannot break into the urban labour market and find it difficult to move out of shacks into more formal accommodation. The average residence period within urban informal settlements has increased from about two to four years in the early 1990s to 10 years currently. Despite this challenge, cities have begun to take the lead in developing partnerships that contribute to the sustainable delivery of services.

#### **GOAL 12: ENSURE SUSTAINABLE CONSUMPTION AND PRODUCTION PATTERNS**

As defined by the Oslo Symposium in 1994, sustainable consumption and production (SCP) is about:

"The use of services and related products, which respond to basic needs and bring a better quality of life while minimizing the use of natural resources and toxic materials as well as the emissions of waste and pollutants over the life cycle of the service or product so as not to jeopardize the needs of further generations".

South Africa is the 27<sup>th</sup> largest economy in the world, but the 12th largest carbon dioxide emitter. This is mainly because the energy- intensive economy is largely dependent on carbon-based fuels. As the world takes steps to cost the negative effects of carbon, South Africa is likely to face challenges (and opportunities) in reducing emissions. South Africa is also a dry country with limited freshwater resources. It will have to find ways of using water more sensibly and improving both the water and energy efficiency of industry.

#### **GOAL 13: TAKE URGENT ACTION TO COMBAT CLIMATE CHANGE AND ITS IMPACTS**

It is anticipated that the competition for land, water and energy will intensify as the effects of climate change become apparent, potentially increasing the scarcity and pollution of water, and accelerating soil erosion and degradation. However, the NDP states that whilst climate change is a major threat, developments in science and technology will enable countries to mitigate the effects, without undermining growth and that by 2030, South Africa's transition to an environmentally sustainable, climate-change resilient, low-carbon economy and just society will be well under way.

To meet the stated objectives and the need for improved disaster-risk reduction, South Africa's National Climate Change Response White Paper highlights a suite of sectors that need to consider climate change impacts in their planning, namely water, agriculture and commercial forestry, health, biodiversity and ecosystems, and human settlements (urban, coastal and rural). Amongst others, the NDP proposes the inclusion of climate-change risks in the national disaster management plan and in the communication strategies.

SDG target - to strengthen resilience and adaptive capacity to climate-related hazards and natural disasters in all countries.

## GOAL 14: CONSERVE AND SUSTAINABLY USE THE OCEANS, SEAS AND MARINE RESOURCES FOR SUSTAINABLE DEVELOPMENT

The NDP states that "Market and policy failures have resulted in the global economy entering a period of 'ecological deficit', as natural capital (ground water, marine life, terrestrial biodiversity, crop land and grazing) is being degraded, destroyed, or depleted faster than it can be replenished". Given the vast marine resources South Africa has and a long coastline that forms the basis of the livelihoods of many coastal communities, it becomes imperative that this resource be used in a manner that addresses South Africa's developmental challenges and at the same time is protected and used in a manner that is consistent with the principles of sustainable development.

# GOAL 15: PROTECT, RESTORE AND PROMOTE SUSTAINABLE USE OF TERRESTRIAL ECOSYSTEMS, SUSTAINABLY MANAGE FORESTS, COMBAT DESERTIFICATION, AND HALT AND REVERSE LAND DEGRADATION AND HALT BIODIVERSITY LOSS

Long-term planning to promote biodiversity and the conservation and rehabilitation of natural assets is critical and should be complemented by a strategy for assessing the environmental impact of new developments as an important component of overall development and spatial planning.

The NDP highlights the need for programmes to conserve and rehabilitate ecosystems and biodiversity assets. South Africa should implement the protected areas expansion strategy and promote the biodiversity stewardship programme to build conservation partnerships around privately-owned land and introduce incentives to protect and rehabilitate ecosystems, such as rebates and tax reductions.

# GOAL 16: PROMOTE PEACEFUL AND INCLUSIVE SOCIETIES FOR SUSTAINABLE DEVELOPMENT, PROVIDE ACCESS TO JUSTICE FOR ALL AND BUILD EFFECTIVE, ACCOUNTABLE AND INCLUSIVE INSTITUTIONS AT ALL LEVELS

Crime in South Africa affects everyone and addressing the challenge of crime and corruption is one of the government's priorities. The fight against crime and corruption is part of the Justice, Crime Prevention and Security (JCPS) cluster's integrated approach to accomplish the goal of a better life for all and ensure that all people in South Africa are and feel safe.

The NDP states that the high crime levels have slowed South Africa's social and economic development. It further states that an integrated approach to safety and security will require coordinated activity across a variety of departments, the private sector and community bodies.

It further alludes to the fact that all should enjoy equal protection without fear of crime. The NDP draws attention to the link between, on the one hand, crime and on the other hand, high levels of unemployment and poor quality of education. Addressing these inequities requires higher levels of inclusive economic growth and sustained employment creation.

Economic growth and higher levels of employment partly depend on the enhancement and better utilisation of South Africa's export earnings. It further refers to the negative effect that corruption has on good governance and proposes that the country needs an anti-corruption system that enhances public servants' accountability, protects whistle-blowers, and closely monitors procurement. It further believes that a strong and independent judiciary is required to ensure the rule of law and good governance.

## GOAL 17: STRENGTHEN THE MEANS OF IMPLEMENTATION AND REVITALIZE THE GLOBAL PARTNERSHIP FOR SUSTAINABLE DEVELOPMENT

In a society with deep societal and economic divisions, neither social nor economic transformation is possible without institutions and infrastructure that enable the economy and society to operate; and its ability to carry out these functions, has a profound impact on the lives of all South Africans.

An efficient and progressive tax system is the cornerstone of South Africa's democracy, supporting the values of social solidarity as reflected in the Constitution. The below par revenues for 2016/17 mirrors a deteriorating GDP growth over the past year, and this is expected to continue over the medium term. Tax revenue shortfalls directly lead to either higher government borrowing or reductions in government expenditure. It is critical that government is able to raise additional tax revenues when required to ensure the sustainability of social programmes and public investment.

It is envisioned that by 2030, ICT will underpin the development of a dynamic and connected South African information society and a vibrant knowledge economy that is more inclusive and prosperous. In view of that, Cabinet approved the National Integrated ICT Policy White Paper (2016) which provides a framework to guide interventions towards bridging the digital divide. Cabinet further approved a broadband policy aimed at ensuring universal access to broadband infrastructure and services by 2020. The vision for broadband is that by 2020, 100% of South Africans will have access to broadband services. (Source: STATSSA 2017- Indicator Baseline Report 2017: South Africa)

#### 1.2.2. NATIONAL POLICIES AND IMPERATIVES

#### 1.2.2.1. Constitution of the Republic of South Africa (Act 108 of 1996)

Section 151 of the Constitution states that developmental local government should make provision for a democratic and accountable government for local communities. Local government must promote a safe and healthy environment and encourage community involvement in matters of local government such as municipal health services, municipal transport, municipal roads, municipal parks and recreation.

Section 152 states that local government should ensure the provision of services to communities in a sustainable manner and encourages the involvement of communities and community organizations in matters of local government.

Section 153 states that each municipality should structure and manage its administration, budgeting and planning processes to give priority to the basic needs of the community.

#### 1.2.2.2. White Paper on Local Government (1998)

It views the IDP as a way of achieving developmental local government. It establishes a basis for developmental local government in which "local government is committed to working with citizens and groups within the community to find sustainable ways to meet their social, economic and material needs and improve the quality of their lives". It also encourages public consultation in policy formulation and in monitoring and evaluation of decision-making and implementation.

#### 1.2.2.3. Municipal Structures Act, 1998 (Act 117 of 1998)

Municipal Structures, Act 117 of 1998 provides for the establishment of municipalities, their internal structures and the division of powers between local and district municipalities. It gives district municipalities the responsibilities for IDP for the entire district area, including a framework for all local municipalities. District municipalities have a responsibility for inter-local co-ordination, and for links with provincial and national departments. Local municipalities should produce plans that are aligned to the district plan. Sekhukhune District Municipality is responsible to the planning activities of its local municipalities.

#### **1.2.2.4.** Municipal Systems Act (Act 32 of 2000)

It regulates the IDP. It requires the municipality to undertake developmental oriented planning to ensure that it strives to achieve the objectives of local government set out in Section 152 and 153 of the Constitution of the Republic of South Africa. Section 25 (1) requires the Municipal Council, within a prescribed period after the start of its elected term, to adopt a single, inclusive and strategic plan for the development of the municipality. Section 26 of the Act further outlines the core components of the IDP of a municipality.

#### 1.2.2.5. Municipal Finance Management Act (Act 56 of 2003)

The Municipal Finance Management Act 9 MFMA) was promulgated to sustain the finances of both the municipalities and other spheres of government. The Act also gives mandatory obligations on the performance management system. Section 2 of the Act's objectives is to secure sound and sustainable management of the financial affairs of the local government institutions to which this Act applies by establishing norms and standards.

Sekhukhune District Municipality (SDM) budget process endeavours to comply to the provision of the MFMA. It is pertinent that the development of the IDP and the budget process are integrated and aligned as per legislation.

#### 1.2.2.6. Inter-Governmental Relations Framework Act (Act 13 of 2005)

This Act responds to the limited successes of alignment amongst the three spheres of government. The Act creates a framework to support intergovernmental cooperation and

coordination as required by the Constitution in its definition of "cooperative governance". It compels all the three spheres of government to participate in the planning processes of the municipalities and in turn allow their own planning processes to be influenced by the municipal IDPs.

Municipal IDPs are therefore the centres of planning for both provincial and national programmes in a specific local area. Municipalities participate in District-planning for a Municipal Manager's FORA and Mayor's FORA as well as in the Premier's Intergovernmental FORA to ensure proper alignment and coordination of Local, District, Provincial and National plans. The Act establishes and monitoring processes that enhance intergovernmental planning and monitoring processes for Local, Provincial and National spheres of government.

#### 1.2.2.7. Development Facilitation Act (DFA) (Act 65 of 1995)

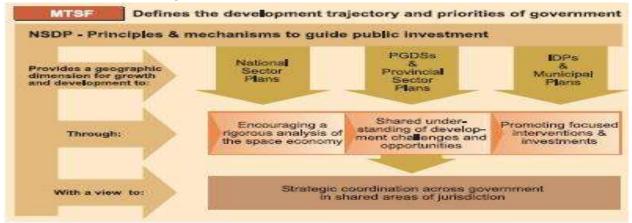

The DFA has formalized the restructuring of urban settlements and planning in South Africa. Its aim has been to expedite land development projects and to promote efficient and integrated land development. It states that municipalities should prepare the land Development Objectives (LDOs) on an annual basis.

#### 1.2.2.8. The National Spatial Development Perspective (NSDP)

The National Spatial Development Perspective (NSDP) (Presidency, 2006) is the primary spatial lens through which policymakers view socio-economic development in the country as a whole. It presents a wide variety of socio-economic trends emerging in South Africa, and then draws inferences about how that emerging space economy should affect public investment (expenditure) in the immediate future.

#### The diagram below illustrates

Figure 1 - The NSDP principles and perspective informing the basis for robust analysis for the three spheres of government

Source: National Spatial Development Perspective. The Presidency (2006)

The NSDP indicates that each sphere of government has its own distinct development tasks and related planning frameworks corresponding to the scale of operations and the area of jurisdiction. For these frameworks to be coordinated and strategically aligned, each sphere will have to adopt the NSDP methodology and approach.

#### 1.2.2.9. The Medium-Term Development Plan (MTDP): 2024 – 2029

The adoption of the Medium-Term Development Plan (MTDP) 2024–2029 provides a clear pathway for the 7th Administration to build an inclusive society and deliver on the National Development Plan (NDP) Vision 2030's aspiration for the elimination of poverty and the reduction of unemployment and inequality.

The MTDP will guide the work of the Government of National Unity for the next five years in pursuit of three strategic national priorities:

- Driving inclusive growth and job creation;
- · Reducing poverty and tackling the high cost of living, and
- Building a capable, ethical and developmental state.

The MTDP gives effect to government intention to pursue every action that contributes to sustainable, rapid economic growth and removes obstacles that stand in the way of growth. It asserts that growth must be inclusive and transformational and must drive the redistribution of wealth and opportunity. The policy framework and its implementation plan build on progress made in institutionalizing planning and seek to address gaps such as the fragmentation of planning, inadequate capabilities and ensure improved coordination and the modernization of the planning system towards the achievement of development and better results. This includes ensuring the mainstreaming of the rights of women, youth and persons with disabilities in the planning system to achieve an inclusive society and economy and leave no one behind.

The MTDP outlines an integrated and comprehensive poverty alleviation strategy to provide support to the most vulnerable in society and to provide pathways into employment and other economic activity, especially for the youth. The plan outlines the actions we need to take to build state capacity and create a professional and ethical public service. It prioritises the strengthening of law enforcement agencies to address crime, corruption and gender-based violence and to reinforce national security capabilities. The MTDP reflects government shared commitment to strengthening social cohesion and nation-building and encouraging an active citizenry.

#### 1.2.2.10. GOVERNMENT'S PROGRAMME OF ACTION: THE OUTCOMES APPROACH

The outcomes approach is designed to ensure that government focuses on achieving the real improvements in the life of all South Africans.

The Outcomes approach emphasizes improved coordination of government activities across the spheres for common objectives, thereby discouraging working in compartments as experienced in the past. In creating a single window of coordination, the outcomes-based approach advances a common approach to service delivery challenges. This approach seeks to improve

accountability of different role players in the service delivery chain through the efficient and effective use of human and financial resources.

- 1. **Basic Education**: Improve the quality of basic education
- 2. **Health**: Improve health and life expectancy
- 3. Safety and Security: All people in South Africa protected and feel safe
- 4. **Employment**: Decent employment through inclusive economic growth
- 5. **Skills**: A skilled and capable workforce to support inclusive growth
- 6. **Infrastructure**: An efficient, competitive, and responsive economic infrastructure network
- 7. **Rural Development**: Vibrant, equitable and sustainable rural communities and food security
- 8. **Human Settlement**: Sustainable human settlements and improved quality of household life
- 9. **Local Government**: A response and, accountable, effective, and efficient local government system
- 10. **Environment**: Protection and enhancement of environmental assets and natural resources
- 11. International Relations: A better South Africa, a better and safer Africa and World
- 12. **Public Service**: A development-oriented public service and inclusive citizenship

#### 1.2.2.11. Expanded Public Works Programme (EPWP)

The principal objective of this program is to launch and expand labour intensive projects that will provide opportunities for skills development to create an enabling environment for employment and self-employment. It will also assist in building capacity for the maintenance of infrastructure; provide community service and the development of a programme for Early Childhood Development (ECD). SDM, like other districts in Limpopo, is gearing towards the effective implementation of EPWP programme and even expanding it to other sectors of the economy.

#### 1.2.2.12. Development of Small and Micro-Enterprises

The enabling environment should be created through legislation to harness the entrepreneurial capabilities available in local communities. These capabilities would encourage self-employment and the employment of other job seekers. Sekhukhune District Municipality has come up with interventionist measures through LED Strategy to deal with the problem of unemployment.

#### 1.2.2.13. Alignment with National Development Plan

The National Development Plan has strategies outlined according to following areas, which should be considered by municipalities for alignment.

#### **WATER AND SANITATION MANAGEMENT STRATEGIES PROPOSED:**

Establish a national water-resources infrastructure agency

The Department of Water Affairs has identified the actions necessary to reconcile the water demands of major urban and industrial centres with potential supplies up to 5 2030. These plans need to be translated into well timed investment programmes to avoid supply constraints. Large investments in regional systems could be undertaken by a national water-resources infrastructure agency, perhaps modelled on the South African National Roads Agency Limited.

This agency would build on the foundation provided by the Trans-Caledon Tunnel Authority, which is already supporting implementation of several large projects, and help to resolve the organisational challenges faced by the department's Water Trading Entity. However, the national government, through the Department of Water Affairs, should continue to lead the planning process, reviewing these programmes every five years to ensure coordination with other long-term economic and infrastructure plans.

#### Reduce demand

Reducing growth in water demand is just as important as increasing its supply. Current planning assumes it will be possible to achieve an average reduction in water demand of 15 percent below baseline levels in urban areas by 2030. Detailed targets have been set for different areas. Achieving demand reductions on this scale will require programmes to reduce water leakage in distribution networks and improve efficient domestic and commercial water use.

The Commission proposes running a national programme to support local and sectoral initiatives to reduce water demand and improve water-use efficiency. Demand-management projects with merit should be given priority and regarded as being on par with water-supply expansion projects in terms of importance.

#### Manage agricultural use better

Agriculture uses the largest volume of water (even though agricultural water supplies are less reliable than those supplied to urban and industrial users). The farming sector will have to increase its water efficiency to improve production and allow for water to be transferred to new users in water scarce areas, to compensate for the expansion of irrigated agriculture, which has high job-creation potential. The Commission proposes a dedicated national programme to provide support to local and sectoral efforts to reduce water demand and improve water-use efficiency. Water-saving and demand-management projects should be considered as part of the overall range of water supply investment programmes. These can be compared with supply expansion projects, and should be prioritised accordingly, based on their merits.

#### Investigate water reuse and desalination

There is already extensive indirect reuse of water in inland areas, where municipal and industrial wastewater is reintroduced into rivers after treatment. However, there is considerable scope for further water reuse. Many municipalities lack the technical capacity to build and manage their wastewater treatment systems. As a result, a regional approach to wastewater management may be required in certain areas. Water infrastructure investment should include projects to treat

and reuse water, selected on their merits. Research into water reuse and desalination and the skills to operate such technology should be developed, perhaps under the auspices of a national water-resource infrastructure agency (discussed below) or the Water Research Commission.

#### **AGRICULTURE AND AGRO-PROCESSING STRATEGY PROPOSALS:**

- Substantial investment in irrigation infrastructure, including water storage, distribution and reticulation throughout the country where the natural resource base allows, as well as in water-saving technology. A 50 percent increase in land under irrigation would cost R40 billion in off-farm infrastructure over a 10-year period.
- Greater investment in providing innovative market linkages for small-scale farmers in communal and land-reform areas.
- As part of comprehensive support packages for farmers, preferential procurement mechanisms to ensure that new agricultural entrants can also access these markets.
- Tenure security. Farmers will only invest in these areas if they believe that their income streams from agriculture are secure. Tenure security will secure incomes for existing farmers at all scales, for new entrants into agriculture, and for the investment required to grow incomes.
- Technology development. Growth in agricultural production has always been fuelled by technology, and the returns to investment in agricultural research and development are high.
- Policy measures to increase intake of fruits and vegetables, and reduce intake of saturated fats, sugar, and salt, as recommended in the South African food dietary guidelines, to accompany strategies to increase vegetable and fruit production.
- Exploration of innovative measures, such as procurement from small-scale farmers to create local buffer stocks and community-owned emergency services.

#### **MINERALS CLUSTER STRATEGY PROPOSALS:**

- Address the major constraints impeding accelerated growth and development of the mining sector in South Africa. The main interventions include ensuring certainty in respect of property rights; passing amendments to the Minerals and Petroleum Resource Development Act (2002) to ensure a predictable, competitive, and stable mining regulatory framework; secure reliable electricity supply and/or enable firms to supply their own plant with an estimated potential of 2 500MW by 2015; and secure, reliable rail services, potentially enabling private participation.
- Develop, deepen, and enhance linkages with other sections of the economy. This
  includes linkages with both manufacturers of inputs (capital goods and consumables)
  and suppliers of mining-related services; and downstream producers, especially for
  platinum-group metals and chrome ore. In this regard, an export tax could be considered.

- Provide focused research and development support to enable improved extraction methods that lengthen mine life; better energy efficiency and less water intensity; and alternative uses of South Africa's extracted minerals, especially platinum-group metals, titanium and others that have potential for application in new energy systems and machinery.
- Identify opportunities to increase regional involvement and benefit in the whole minerals cluster. This could include encouraging the establishment and development of alternative providers of partially processed intermediate inputs in other countries in the region.
- Ensure active engagement on, and resolution to, issues raised through the Mining Industry Growth and Development Task Team process.
- Improve alignment of mining charter requirements to ensure effectiveness in local communities.

#### Construction/Infrastructure

- Address government's ability to spend its infrastructure budget, particularly about project-management capacity, long-term planning, and monitoring and evaluation of both expenditure patterns and construction work.
- Support the civil construction and the supplier industries in their export efforts with the establishment of a Financial Centre for Africa, and more support in commercial diplomatic relations.
- Intensify support to supplier industries such as building supplies, steel, glass and cement.
- Create conditions for a less cyclically volatile industry by emphasising numerous, smaller scale, regionally dispersed projects to address backlogs, which are more accessible to smaller firms and new entrants.
- Expand public funding for alternative types of low-income housing that would generate more demand directly and in supplier industries.
- Promote a simultaneous focus on more energy-efficient buildings and building techniques to reduce demands on electricity supply in the longer term. Home insulation and the installation of solar water heaters are labour-intensive activities that have strong backward linkages to supplier industries.

#### **Tourism and Culture**

Emphasis will be placed on increasing the total number of tourists entering the country, and the average amount of money spent by each tourist.

Ease of doing business, as well as availability of appropriate levels of tourism infrastructure (particularly transport, tourism offerings/ products and accommodation), will play an important role in attracting different types of tourists.

Foreign business tourists arriving by air generate the most significant multipliers. South Africa will be positioned as the business and shopping centre for the region.

South Africa can do more to develop the region as an international tourist destination by emphasising the broader biodiversity, cultural diversity, scenic beauty, and range of tourism products, and making it easier for tourists to travel between countries in the region. A Schengentype visa for the region will be considered.

#### **Overarching Principles for Spatial Development**

"All spatial development should conform to the following normative principles and should explicitly indicate how they would meet the requirements of these principles (National Planning Commission; The Presidency, RSA, 2012: 277):

**Spatial justice:** The historic policy of confining particular groups to limited space, as in ghettoization and segregation, and the unfair allocation of public resources between areas, must be reversed to ensure that the needs of the poor are addressed first rather than last.

**Spatial sustainability**: Sustainable patterns of consumption and production should be supported, and ways of living promoted that do not damage the natural environment.

**Spatial resilience:** Vulnerability to environmental degradation, resource scarcity and climatic shocks must be reduced. Ecological systems should be protected and replenished.

**Spatial quality:** The aesthetic and functional features of housing and the built environment need to be improved to create liveable, vibrant, and valued places that allow for access and inclusion of people with disabilities.

**Spatial efficiency**: Productive activity and jobs should be supported, and burdens on business minimised. Efficient commuting patterns and circulation of goods and services should be encouraged, with regulatory procedures that do not impose unnecessary costs on development.

#### 1.2.2.14. ALIGNMENT WITH NATIONAL INFRASTRUCTURE PLAN

#### **Purpose of National Infrastructure Plan**

The South African Government adopted a National Infrastructure Plan in 2012 whose purpose is to transform economic landscape while simultaneously creating significant numbers of new jobs, and to strengthen the delivery of basic services. The plan also supports the integration of African economies.

The National Infrastructure Plan contains 18 strategic Infrastructure Plans, out of which those with relevance to local government are summarised below:

#### SIP 18: Water and sanitation infrastructure

A 10-year plan to address the estimated backlog of adequate water to supply 1.4 m households and 2.1 m households to basic sanitation. The project will involve provision of sustainable supply of water to meet social needs and support economic growth.

Projects will provide for new infrastructure, rehabilitation and upgrading of existing infrastructure, as well as improve management of water infrastructure.

#### SIP 11: Agri-logistics and rural infrastructure

Improve investment in agricultural and rural infrastructure that supports expansion of production and employment, small-scale farming, and rural development, including:

- facilities for storage (silos, fresh-produce facilities, packing houses)
- transport links to main networks (rural roads, branch train-line, ports)
- fencing of farms
- irrigation schemes to poor areas
- improved R&D on rural issues (including expansion of agricultural colleges)
- processing facilities (abattoirs, dairy infrastructure)
- aquaculture incubation schemes
- rural tourism infrastructure.

#### SIP 6: Integrated municipal infrastructure project

Develop national capacity to assist the 23 least resourced districts (19 million people) to address all the maintenance backlogs and upgrades required in water, electricity, and sanitation bulk infrastructure.

The road maintenance programme will enhance service delivery capacity thereby impacting positively on the population.

#### SIP 10: Electricity transmission and distribution for all

Expand the transmission and distribution network to address historical imbalances, provide access to electricity for all and support economic development.

Align the 10-year transmission plan, the services backlog, the national broadband roll-out and the freight rail line development to leverage off regulatory approvals, supply chain and project development capacity.

#### SIP 1: Unlocking the northern mineral belt with Waterberg as the catalyst

- Unlock mineral resources.
- Rail, water pipelines, energy generation and transmission infrastructure.
- Thousands of direct jobs across the areas unlocked.
- Urban development in Waterberg first major post-apartheid new urban centre will be a "green" development project.
- Rail capacity to Mpumalanga and Richards Bay.
- Shift from road to rail in Mpumalanga.

Logistics corridor to connect Mpumalanga and Gauteng.

| PRIMARY MINERAL RESERVES |            |  |  |  |  |  |
|--------------------------|------------|--|--|--|--|--|
| Coal                     | 18 bn tons |  |  |  |  |  |
| Chromite                 | 5,5 tons   |  |  |  |  |  |
| Platinum                 | 6 323 tons |  |  |  |  |  |
| Palladium                | 3 611 tons |  |  |  |  |  |

#### 1.2.3. PROVINCIAL IMPERATIVES

#### 1.2.3.1. LIMPOPO DEVELOPMENT PLAN (LDP): 2025 - 2030

The Limpopo Development Plan (LDP) is a 5-year overarching Growth and Development Plan that outlines the contribution of the province to the National Development Plan (NDP) Vision 2030 imperatives and the execution of the 5-year NDP Implementation Plan and Medium-Term Development Framework (MTSF) priorities and targets of the current Term of Administration of Government of National Unity. The 2025-2030 Limpopo Development Plan (LDP) builds on the achievements and lessons learned from the implementation of the 2020-2025 LDP.

The LDP is designed to marshal resources from all sectors, both public and private, towards addressing economic growth and integrated development in Limpopo. It thus creates a platform for the constructive and active participation of the private sector, civil society and organised labour towards the achievement of provincial growth and development objectives to promote higher standards of living for citizens of Limpopo.

The LDP seeks to ensure that government resources, efforts and energy are channelled towards creating an enabling environment, offering opportunities to the people of the Limpopo Province to be active beneficiaries of sustainable growth and development, which can improve their quality of life.

Equally, the LDP serves as a blueprint and framework for Strategic Plans and Annual Performance Plans of provincial departments, District-Wide IDPs or One Plans and Integrated Development Plans of districts and local municipalities, as it delineates the provincial contribution towards the implementation of goals and targets spelled out in national strategies and sector plans.

The LDP is also an elaboration of the adopted international and national policy frameworks that provide a clear vision for growth and development. It espouses the need for meaningful partnership amongst all stakeholders if growth and development are to be realised in the province.

Development is defined as broad-based improvements in the standard and quality of people's living in Limpopo, to which all institutions, including government, business, organised labour and citizens contribute. Growth in the economic output, the provision of infrastructure capital assets for social and economic development, job creation, production and income access to adequate

public services, and environmental management are all essential instruments to achieve sustainable development, the outcome of which will result in the reduction of unemployment, poverty and inequality.

Limpopo is bracing itself to consolidate the gains brought about by the democratic dispensation and achievements registered during the 7<sup>th</sup> Term of Administration by further enhancing economic growth focusing on industrialisation and value-adding, implementing measures that promote job creation and addressing social development through the implementation of the 2025-2030 LDP.

#### Purpose of the LDP

The purpose of the LDP 2025-2030 is to outline the contribution of the Limpopo Province to the NDP, provide a framework for the strategic plans of provincial government departments and municipalities, and to create a structure for the constructive participation of private-sector business and organised labour and citizens towards the achievement of the provincial growth and development objectives.

The people of Limpopo desire a future state that is peaceful and prosperous and contributes towards improved quality of life. This can be achieved through the implementation of social and economic programmes that result in the achievement of the development objectives as follows:

- Create decent employment through inclusive economic growth and sustainable livelihood;
- Improve the quality of life of citizens;
- Prioritise social protection and social investments:
- Promote vibrant and equitable sustainable rural communities;
- Raise the effectiveness and efficiency of a developmental public service;
- Ensure sustainable development.

The 2025-2030 LDP is an integrated socio-economic planning and delivery document for the province. It encapsulates the realities and the aspiration of the provincial citizens. The plan aims to transform the productive potential of the province while addressing the inherent socio-economic challenges with the aim of ensuring sustainable livelihoods.

#### 1.2.4. LOCAL IMPERATIVES

#### 1.2.4.1. Sekhukhune District Development Model (One Plan) – 2025/2026

The IGR Framework Act (IGRFA) sets out the general principles and objects of intergovernmental relations. The focus is primarily on the outcomes that the system must achieve coherent government, effective provision of services, monitoring implementation of policy and legislation as well as the realization of national priorities. The local government is the closest sphere to communities and represents all spheres of government at the local level. A

functional and developmental LG is a necessary requirement for an effective Developmental State.

The District Development Model, as announced by the President seeks to encourage better coordination and cooperation in government to improve coherence in planning and implementation across all spheres of governance.

The District Development Model seeks to address silo planning at a horizontal and vertical level. It will also narrow the distance between the people and government by strengthening the coordination role and capacities at the district level as it is the penultimate sphere closer to the people after Ward and Local Spheres. It is aimed at delivering Integrated Services whilst strengthening Monitoring and Evaluation and impact at district and local levels.

The Sekhukhune District Municipality is located in the south-eastern part of Limpopo, which is South Africa's most Northern Province. The district was formed during the year 2000 and is one of the five District Municipalities in the Limpopo Province. It shares boundaries with Capricorn and Mopani Districts in the north, Mpumalanga in the south and east, and the Waterberg District in the west.

The district is largely rural in nature and is made-up of four Local Municipalities, namely; Elias Motsoaledi, Ephraim Mogale, Makhuduthamaga and Fetakgomo Tubatse. The district is made up of 117 wards with a total of 811 villages.

There are 81 traditional leaderships within the district. These are mostly concentrated in Fetakgomo Tubatse, Makhuduthamaga, the eastern extents of Ephraim Mogale and the southwestern extents of Elias Motsoaledi municipality (the former Moutse area in KwaNdebele).

Sekhukhune District Municipality accounts for a total population of 1.2 million, or 20.4% of the total population in the Limpopo Province, with the Vhembe District being the most populous region in the Limpopo Province for 2018. Sekhukhune increased in importance from ranking fourth in 2008 to third in 2018. In terms of its share the Sekhukhune District Municipality was slightly larger in 2018 (20.4%) compared to what it was in 2008 (19.6%). When looking at the average annual growth rate, it is noted that Sekhukhune ranked highest (relative to its peers in terms of growth) with an average annual growth rate of 1.4% between 2008 and 2018.

According to IHS Markit Regional eXplorer version 1750, in 2018, the population group with the highest percentage of people living in poverty was the African population group with a total of 82.6% people living in poverty, using the upper poverty line definition. The proportion of the African population group, living in poverty, decreased by 7.66 percentage points, as can be seen by the change from 82.60% in 2008 to 74.93% in 2018. There has been a rise in unemployment between 2008 and 2018. In 2018, there were a total number of 93 900 people unemployed in Sekhukhune, which is an increase of 6 360 from 87 600 in 2008. The total number of

unemployed people within Sekhukhune constitutes 28.17% of the total number of unemployed people in Limpopo Province.

There are approximately 187 161 people of 20 years or older in the district who have no schooling. Only 4 % of the population have higher education. This will likely constrain the ability of the district to improve its socio-economic conditions significantly in the short to medium term.

This plan has utilised statistics received mainly from the Department of Economic Development, Environment and Tourism (LEDET), which they obtained from different sources, i.e. Stats SA, Global Insight /IHS Markit Regional Explorer, Geoscience Councils, IEC, Universities, Internal (Record of Decision), etc. It analyses a combination of stats obtained mainly from Stats SA and Global Insight/IHS Markit Regional Explorer which brings together the deepest and timely intelligence at district level. LEDET officially subscribes to Global Insight /IHS Markit Regional Explorer.

The main sectors of Sekhukhune District that contribute to the growth of economy in the district are Agriculture, Mining and Community Services. Mining is the biggest contributor in the economy of the district and it is forecasted to grow fastest at an average of 5.64% annually from R 12.4 billion in Sekhukhune District Municipality to R16.3 billion in 2023. The mining sector is estimated to be the largest sector within the Sekhukhune District Municipality in 2023, with a total share of 53.0% of the total GVA (as measured in current prices), growing at an average annual rate of 5.6%. The sector that is estimated to grow the slowest is the construction sector with an average annual growth rate of 0.21%.

The District Municipality remains focused and committed to the vision "Sekhukhune District Municipality – **an innovative leader** in integrated economic development and sustainable service delivery". The institutional projects included in the Development Plan will be aligned to the institutional budget. The Development Plan will include the plans/programmes which should be implemented by different spheres of government (including Municipalities) and Private Sector to ensure that people within Sekhukhune District experience integrated and inclusive development. Different Stakeholders were consulted on the Socio-economic Profile after its approval by Council in February 2020. The District Development Model was officially inaugurated by the deputy minister in the Department of Planning, Monitoring and Evaluation (DPME) on the 20<sup>th</sup> November 2020 and subsequently launched by the Premier of Limpopo on the 23<sup>rd</sup> of April 2021.

#### 1.2.4.2. Powers and Functions

The establishment of the district municipality is fulfilled in line with the local government transformation process as articulated by the White Paper on Local Government, 1998. The White Paper envisaged the form and nature of new local government structures in the country. The Sekhukhune District Municipality is as such classified under category C municipality and these municipalities are predominantly rural municipalities that serve sparsely populated areas, remote villages, and agricultural regions. These municipalities often have the least resources and administrative capacity among the three categories, as they primarily focus on providing essential services. Below is Sekhukhune District Municipality's powers and functions conferred

upon it by the Constitution of South Africa in terms of section 156(1) and the division of powers and functions:

- Water
- Sanitation
- Fire fighting
- Disaster Management
- Local Tourism
- Municipal Airport except for Ephraim Mogale and Elias Motsoaledi
- Municipal Planning
- Municipal Health Services
- Municipal Public Transport
- Markets
- Municipal Abattoirs

The powers and functions are reviewed annually after capacity assessments by the Municipal Demarcation Board, which informs MEC Adjustment Report.

Municipal Demarcation Board is currently reviewing the whole Capacity Assessment Model, considering the following limitations:

Clarity on underlying processes and drivers of the model: a primary concern relating to the approach is that the detail underlying the model is not fully explained. The reader or user of the model (which could include the MEC or other provincial representatives) is not provided with the relevant information to fully understand which variables inform the determination of whether a municipality has capacity or not. Furthermore, it is not clear what processes were followed in reaching the determination of capacity levels.

**Limitations related to the conceptualisation of capacity:** the concern with this approach is that the model lacks a robust and comprehensive basis upon which to inform a) the assessment and understanding of capacity levels within and across municipalities and b) make recommendations for the adjustment of powers and functions.

**Measurement and interpretation issues:** it fails to assess the ability to spend, which is one indicator of a municipality's capacity to deliver services and perform functions, insufficient understanding of the extent of capacity shortcomings, there is a need to assess actual capacity levels in addition to asking about perceived access to resources.

**Assessing performance:** lack of benchmarks against which to assess, lack of differentiation, insufficient scope for understanding the 'why'

**Limitations of quantitative assessments:** The quality of the data is highly dependent on the measurements used and the extent to which the indicators link to a clearly defined conceptual framework.

The explanatory power of quantitative data is limited to the variables being tested in the survey. Because surveys focus on narrow, highly specified areas of inquiry and rely on structured responses mainly, they are highly limited in terms of the detail they provide and by their very design are not meant to provide depth and breadth.

It is therefore prudent that powers be approached cautiously as a guide than being instructive.

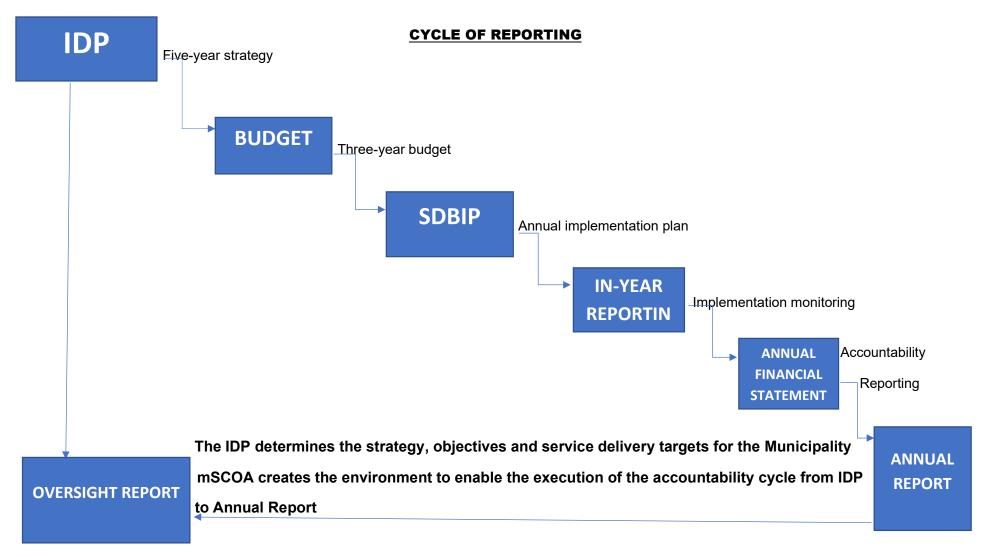

#### 1.2.4.3. BASIS OF IDP REVIEW PROCESS

The development process address recommendations from different stakeholders and role players together with comments from the MEC' assessment of the district. It also takes into cognizance the assessment of the district's performance against the organizational objectives, the recommendations during public participation, IDP engagement processes and also any new information or any change in circumstances that might have arisen subsequent to the adoption of 2025-2026 IDP.

The development process is undertaken through implementation of Process Plans which all local municipalities must prepare as per legislation. The Process Plans must comply with the District IDP Framework to ensure proper implementation, alignment and coordination between the district and local municipalities as outlined in Section 27 of the Municipal System Act (MSA) of 2000. Proper alignment between the district and its local municipalities was done when IDP Framework at the District level and subsequently process plans for all Local Municipalities were compiled and adopted between July and August 2024 respectively. The process and schedule followed during the development process as stipulated in the District IDP Framework is outlined in the tables below.

Figure 2 – Key activities and time frames for IDP Process

|  | July | August | September | October | November | December | January | February | March | April | May | June |
|--|------|--------|-----------|---------|----------|----------|---------|----------|-------|-------|-----|------|
| Adoption phase of Process  |      |        |           |         |          |          |         |          |       |       |     |      |
| Plan/Framework plan  |      |        |           |         |          |          |         |          |       |       |     |      |
| Identification of community needs  |      |        |           |         |          |          |         |          |       |       |     |      |
| Consolidation/Presentation of community needs  |      |        |           |         |          |          |         |          |       |       |     |      |
| Mid-year performance review/tabling of adjustment budget   |      |        |           |         |          |          |         |          |       |       |     |      |
| Determination of strategic objectives for service delivery and development consolidation of projects   |      |        |           |         |          |          |         |          |       |       |     |      |
| Submission of the Draft IDP/Budget to<br>Executive Mayor, Portfolio Committees<br>Mayoral Committee and Council  |      |        |           |         |          |          |         |          |       |       |     |      |
| Community participation and stakeholders' consultation on the Draft IDP/Budget. Public comments and comments from other organs of state are taken into cognizance and where need be, amendments are effected to the IDP. |      |        |           |         |          |          |         |          |       |       |     |      |
| Tabling of IDP/Budget to Council for final approval  |      |        |           |         |          |          |         |          |       |       |     |      |
| Executive Mayor signs SDBIP and performance contracts of Municipal Manager and Senior Managers   |      |        |           |         |          |          |         |          |       |       |     |      |
| Budget Process   |      |        |           |         |          |          |         |          |       |       |     |      |

## Specific dates on the IDP process are listed as follows:

The table below reflects key deadlines which are followed according to the normal IDP/Budget

Table 1: Important Dates on IDP Process

| Action   | Responsibility  | Legislative background   | Deadline          |
|--|---|--|-------------------|
| Preparatory Phase  | · · · · · · · · · · · · · · · · · · ·   |  |                   |

| Approval of SDBIP and Performance agreements of senior managers-within 28 days after budget approval  | The Executive Mayor   | MFMA s 53   | 28 June 2025  |

#### Stakeholder Engagements and Community Participation

Community participation is a legislated requirement for development and review of a municipal IDP. Section 16 of the Municipal Systems Act, No. 32 of 2000, requires municipalities to develop a culture of municipal governance that complements formal representative government with system of participatory government, and must for this purpose encourage and create conditions for local community to participate in preparation, implementation, and review of its Integrated Development Plan. It also requires municipalities to encourage and create conditions for the local community to participate in the affairs of the municipality.

The organizational structures as outlined above will form part of the methods of community participation in the IDP processes. In addition to this, community consultative meetings are also held across the area of the District Municipality.

Public consultations are sometimes held in each half of the financial year – during analysis phase and after adoption of the draft IDP:

- ✓ First round documenting priority needs of communities. These are commonly done by the LM's visiting their own wards to record priority development needs raised by their local community, and the
- ✓ Second round focuses on presenting the Draft IDP/Budget to communities (required by legislation for all municipalities).

#### **SUMMARY OF COMMUNITY NEEDS CAPTURED DURING APRIL 2025**

Table 2: Summary of community needs captured during April 2025

| ITEM | ISSUES RAISED  |
|------|--|
| 1    | Water  |
| 2    | Sanitation   |
| 3    | Roads/Stormwater Drainage                                    |
| 4    | Electricity  |

| 17   | Cemeteries   |
| 18   | Staff/Human Resources  |
| 19   | Tourism  |
| 20   | Agriculture  |

#### Synopsis of community contribution towards IDP/Budget of 2025/2026

Being a Water Services Authority (WSA) and Water Services Provider (WSP) on behalf of its local municipalities, SDM is more under pressure to deliver water to the households within its area of jurisdiction. Water being the highest basic need of the local communities, may imply that SDM has not been making notable impact in reducing the water backlog in its area.

The high needs for water supply vary from total lack of municipal water supply; to intermittent water supply; boreholes that have dried up; broken pumping machines; pump operators who are unskilled or insufficient in numbers; and water tankers who visit deprived villages inconsistently. Given the length of period through which SDM held the powers of being a WSP, it suggests that the municipality may be struggling to fulfil its mandate of delivering water to communities. The main implication for its future planning is that SDM should invest most of its resources into the effort of delivering water to its households - which includes human resources and budget. Forward planning in terms of water delivery should also be improved.

Local Municipalities should uphold their mandate on service delivery as required by the Constitution of the Republic of South Africa by ensuring that all communities have access to basic services in their municipal area of jurisdiction in accordance with their powers and functions. Sector Departments should also play their role in service delivery by ensuring that local communities have access to services rendered by their sector, ensuring that they contribute towards the achievement of aspiration of National Development Plan, Limpopo Development Plan and Millenium Developments Goals.

## CHAPTER 2:

# ANALYSIS PHASE

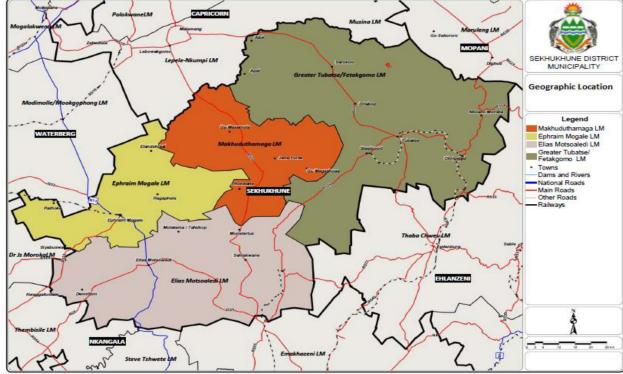

#### 2.1. OVERVIEW OF MUNICIPALITIES WITHIN SEKHUKHUNE DISTRICT

#### 2.1.1. Sekhukhune District Municipality

Sekhukhune District Municipality is a Category C municipality and is situated in the Limpopo Province. It is the smallest district in terms of geographic location in the province and it is comprised of four Local Municipalities: Ephraim Mogale, Fetakgomo Tubatse, Elias Motsoaledi and Makhuduthamaga It is a mainly rural district with approximately 811 villages. Sekhukhune is an area with a long and proud history, a place of majestic beauty with legal mountains, lush valleys and meandering rivers. Under its soil, lie vast deposits of precious metals – so vast that they today contain the largest reserves of platinum group metals in the world.

The Sekhukhune District covers approximately 1,358 million hectares of land and has a total of 1 336 805 people in 340 753 households. This district has a median age of 24, which is a 90 percent of the figure in South Africa which is 28. This means that programmes that are geared towards youth population should be maximised to ensure that challenges affecting this age group are addressed. These programmes include job creation projects, specialised education, safety related measures to combat crime etc.

The dominant home language in Sekhukhune District is Sepedi with 83%, followed by IsiNdebele with 4.4%. The SDM Sepedi speaking inhabitants contribute 1.5 times the total percentage of Bapedi people in Limpopo which is 54.71%. With these different languages and cultures, there should be deliberate efforts to promote diversified cultural activities that will enhance tourism attraction within the district.

Map 1: The Sekhukhune District Map

Source: SDM 2024/2025

Sekhukhune District Municipality is both a Water Services Authority and a Water Services Provider, therefore its primary function in terms of service delivery is the provision of water. According to Stats SA (CS 2022), 66% of households in the district have access to safe drinking water (e.g. 25% inside dwellings, 22.2% inside the yard and 18.9% in communal stands). When it comes to access to piped water inside the dwelling, only 25% of the households are reported as having access.

#### 2.1.2. Fetakgomo Tubatse Local Municipality

The Fetakgomo Tubatse Local Municipality is located North of N4 highway, Middleburg, Belfast and Mbombela; and East of the N1 highway; Groblersdal and Polokwane. The municipality is largely dominated by rural landscape with only 06 (six) proclaimed townships. The Fetakgomo Tubatse LM is situated on fertile soils alongside the Lepelle, Leppellane and Spekboom Rivers, offering great

agricultural potential. Furthermore, the Municipality is surrounded by beautiful mountains, and boasts a rich cultural history. It generally features a dispersed settlement structure, with a few secondary/ gravel roads serving these. Atok and Apel represent the most prominent settlement areas in the western extents of the municipality and Driekop, Burgersfort, Steelpoort and Orichstad in the eastern parts. Due to the concentration of mining activities along the R37 and R555 (Dilokong Corridor), the Municipality functions as a strong economic centre within the SDM. As such, mining is not only the major source of employment and economic growth within the municipality, but also the district.

Minerals found within the Municipality include platinum, chrome, vanadium, andalusite, silica and magnetite. The current and planned expansion of mining activities within the LM is placing extreme pressure on the environment and is resulting in land use conflicts with other uses such as agriculture. Retail, trade, services, and agriculture also contribute to the municipal economy. Agricultural products cultivated in this area include citrus, vegetables, corn, and maize. Livestock farming includes cattle, goats, and game. The Municipality generally features a dispersed settlement structure, with a greater concentration of settlements within the western extents. Although featuring several major roads (R37, R36 and R555), the LM's numerous settlements are only accessible via secondary gravel roads.

#### 2.1.3. Elias Motsoaledi Local Municipality

The Municipality borders Makhuduthamaga local municipality in the south, Ephraim Mogale local municipality in the east, Fetakgomo Tubatse local Municipality and Mpumalanga's Dr JS Moroka, Thembisile Hani, Steve Tshwete, Emakhazeni and Thaba Chweu local municipalities. Its main town Groblersdal is the centre of a progressive commercial farming community because of the town's fortunate location in the Olifants River irrigation area below Loskop Dam. Intensive agricultural activities (under 5 irrigation schemes) cover a total land surface area of 28 800 ha. The agricultural produce includes grapes, wheat, tobacco, maize, soya beans, citrus fruits, cotton, and vegetables.

Apart from Groblersdal, which is located within the central extents of the LM, most of the LM's residential areas are concentrated within the eastern and western extents of the LM, around the prominent settlements' areas of Monsterlus and Dennilton/Elandsdoorn, respectively. Generally, settlements located within Elias Motsoaledi LM are better served by road infrastructure than other settlements located within the DM. Prominent roads include the N11, R25, R33 and R579. The municipality contributes about 29% to the Sekhukhune District Municipality economy, which makes it the second highest contributor below the Fetakgomo Tubatse Local Municipality.

#### 2.1.4. Ephraim Mogale Local Municipality

The Municipality generally features a dispersed settlement structure, with a greater concentration of settlements towards the eastern and western extents. Marble Hall and Moganyaka represent the two most prominent settlement areas within the LM. Although the N11 serves to connect the town of Marble Hall with Mookgopong to the north and Groblersdal to the south, the numerous settlements within the eastern and western extents of the LM are only accessible via secondary gravel roads. And its economy remains the lowest contributor to the Sekhukhune District Municipality economy.

#### 2.1.5. Makhuduthamaga Local Municipality

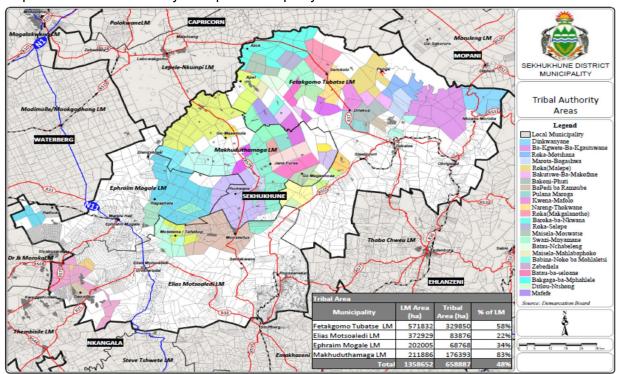

The Makhuduthamaga Local Municipality is bordered by the Capricorn District in the north, Elias Motsoaledi Local Municipality in the south, Fetakgomo Tubatse Local Municipality in the east, and Ephraim Mogale Local Municipality in the west. It accounts for 16% of the district geographical area and comprises of the central extents of the SDM. It boasts agriculture, tourism and mining as its key growth sectors. Currently, several new mining exploration initiatives are taking place within the Municipality, which could provide for much needed employment opportunities and the growth of the economy in general.

The agricultural and tourism potential has also not yet been fully exploited. Only limited forms of agricultural and tourism activities are present. It features a dispersed settlement structure, with a greater concentration of settlements within the central and eastern extents of the LM, along the R579 which connects the two most prominent settlement areas, namely Jane Furse and Monsterlus. Apart from the R579, the numerous settlements located throughout the LM are only accessible via

secondary gravel roads. The decision to locate the main District Municipal Offices in Jane Furse will provide substantial growth impetus, perhaps at the cost of Elias Motsoaledi Local Municipality.

#### 2.1.6. Traditional Authorities

There are 81 traditional leaderships within the district. These are mostly concentrated in Fetakgomo Tubatse, Makhuduthamaga, the Eastern extents of Ephraim Mogale and the South-Western extents of Elias Motsoaledi municipality (the former Moutse area in KwaNdebele). With this number of Traditional leaderships, it is required that healthy relationships relating to land development be established between government and traditional authorities. The implementation of SPLUMA particularly in the rural parts of the district should be well articulated to the traditional leaders and communities in order to have a common understanding of the development.

Map 2: Traditional authority land per Municipality

Source: Sekhukhune IDP, 2021/2022

The extent of traditional authority land per Municipality is also shown on the map above as summarised below: In Fetakgomo Tubatse it covers about 329 850 ha of land which represents 58% of the municipal area. In Makhuduthamaga the land under traditional leadership totals 176 393 ha which accounts for 83% of all land in the municipality.

The land under traditional leadership in Elias Motsoaledi amounts to 83 876 ha which is 22% of all land in the municipality. In Ephraim Mogale about 68 768 ha of land (34% of total land) is under traditional authority. In total, an estimated 658 887 ha of land in Sekhukhune District is under tribal authority. This represents about 48% of the total district area.

#### SDM TRADITIONAL AUTHORITIES: STATUS OF BASIC SERVICES

#### 2.2. DEMOGRAPHICS IN SDM

#### 2.2.1. Sekhukhune District villages

Figure 3: Number of villages in the district

LMs IDPs - 2022/2023

There are 811 (LMs IDPs -2022/2023) villages in Sekhukhune District Municipality. 44% (387) of the villages are found in Fetakgomo Tubatse Local Municipality; 25% (189) in Makhuduthamaga Local Municipality; 21% (157) in Elias Motsoaledi Local Municipality; and finally, 10% (78) are found in Ephraim Mogale Local Municipality. Fetakgomo Tubatse Local Municipality has the highest number of villages and Ephraim Mogale being the lowest.

After the amalgamated municipalities of Fetakgomo and Tubatse, there are a total of 117 wards in the SDM. The wards in the district are as follows: Makhuduthamaga (31); Fetakgomo Tubatse (39); Elias Motsoaledi (31) and Ephraim Mogale (16).

The only issue which remains a concern regarding villages is names of these villages. There is a need to rationalise the naming and renaming of villages as they change every day. The District Geographic Names Council can investigate this matter.

#### **WARDS AND VILLAGES**

| District          | Elderly  | 6,7%        | 6,9%        |

(Source - District, Census Data 2022)

The data from the 2011 and 2022 censuses reveals significant shifts in the demographic composition of various municipalities. In 2011, there was a notable presence of children across all municipalities, ranging from 35.5% to 38.1%. This indicated a youthful population in need of investments in education, healthcare, and social services to support their growth and development.

However, by 2022, there was a decrease in the percentage of children in all municipalities, now ranging from 31.5% to 34%. Conversely, the percentage of elderly populations either remained stable or slightly increased, suggesting an aging trend. As such the district is losing out on window opportunities due to higher percentage of children in the district, this is despite the reduction in children % observed through all the LMs and the district. The overall understanding and responding

to these demographic changes are crucial for municipalities to ensure sustainable development and enhance the well-being of all residents, both young and old.

(Source – District, Census Data 2022)

The table above depicts the Youth Population by Gender and Working-Class Population (>35yrs) by Gender. In terms of the youth population both male and female percentages decreased slightly from 2011 to 2022, females consistently represented a slightly larger portion. While, the working class (those over 35), females showed a higher percentage than males in both years. Additionally, there was an increase in the percentage of both males and females in this category over the decade. Looking at the total working-age population, females again held a higher percentage than males in both years, with both genders showing an increase from 2011 to 2022. There's a consistent trend of higher female participation in the working-age population, particularly in the working class, with both genders showing an increase in participation over the decade.

The trends are good for demographic dividends analysis, as they suggest a potential shift in workforce dynamics, particularly women who are playing an increasingly significant role in the workforce.

#### 2.2.2. Sekhukhune District Households

Table 7: Households in the district

| MUNICIPALITY      | HOUSEHOLDS 2022 | HOUSEHOLDS 2011 | AS PERCENTAGE |
|-------------------|-----------------|-----------------|---------------|
| Fetakgomo Tubatse | 147 167         | 106 050         | 43%           |
| Makhuduthamaga    | 78 497          | 65 217          | 22%           |
| Elias Motsoaledi  | 79 136          | 60 251          | 23%           |
| Ephraim Mogale    | 35 953          | 32 284          | 12%           |
| Sekhukhune        | 340 753         | 263 802         | 100%          |

Source: Census (2022/2011)

Since 1996, the number of households in the district has been on an upward trend. According to Census 2022, there are 340 753 households in the district. The average household size has gone down to 3.9 in 2022 as compared to the previous census which was 4.1 in 2011 and was 5.3 in 1996. This means that the extended family set up is beginning to change daily with modern lifestyles. The provincial household average size is 3.6 which mean Sekhukhune household average size is still relatively high by comparison.

#### Housing type main dwelling

In 2011, 234 095 households were living in formal dwellings. In 2022 325 101 (95%) households are living in formal dwellings, there are also 5215 (1.5%) households who still reside in traditional dwellings such as mud houses. Informal dwellings are also found in the district which stands at 8 947 according to Census 2022. There is a need to formalise the informal dwellings (shacks) especially those found around main towns in the district.

Table 8: Main dwellings

| MUNICIPALITIES   | Formal dwellings |        |        | Traditio | Traditional dwellings |      |       | Informal dwellings |      |      |

Source: Census (2011), Census (2022) and Community Survey (2016)

#### Household tenure status

The rental housing market is growing rapidly in Sekhukhune District Municipality. 28 827 households were recorded to be living in rented houses in the district. Not surprisingly, the majority of these households are found in Fetakgomo Tubatse Local Municipality especially with migrants into the mining industry. Ephraim Mogale and Elias Motsoaledi also recorded markedly improved numbers for rental stock.

Table 09: Household tenure status

| MUNICIPALITIES    | Owned and fully paid off |       | Owned but fully paid of |         | Rented |        |  |
|-------------------|--------------------------|-------|-------------------------|---------|--------|--------|--|

Source: Census 2011

The number of households who have radio ownership have increased from 132 214 in 2001 to 157 631 in 2011. Television ownership have improved from 73 975 in 2001 to 178 607 in 2011 which is more than double. Refrigerator ownership have also improved from 74 288 in 2001 to 176 499 in 2011. Cell phone ownership have also shot up from 38 613 in 2001 to 227 439 in 2011. The trends tell a story that access to communication in the district has improved. The rise in average household incomes has also implied that there was disposable income to buy other products such as television, fridges and cell phones.

The implication is that there is a chance for the district to start offering better services to the residents and opportunities for cost recovery are abound. Unemployment has shifted from 61.6% in 1996 to 50.9% in 2011 and therefore there is real change in economic dynamics.

#### 2.2.3. Population

The population of Sekhukhune District Municipality has been growing at an average of 1,1% per annum from 1996 to 2016. According to Census 2022, the population of the district is now standing at 1, 336 805 persons. This compares to population growth numbers in 2011 at 1 076 840; 2001 at 967 185 as well as 1996 which stood at 914 492. On the whole, the population growth numbers in the district have been growing moderately and this can be ascribed to a number of factors as will be indicated when comparing data from the local municipalities in the district.

Table 11: Population Growth Rate in Sekhukhune

| Municipality     | POPULATION |           |           |         | H AND CHIL |         |
|------------------|------------|-----------|-----------|---------|------------|---------|
|                  | 2022       | 2016      | 2011      | 2022    | 2016       | 2011    |
| Fetakgomo        | 575 960    | 490 381   | 429 471   | 378 381 | 223 214    | 160 413 |
| Tubatse          |            |           |           |         |            |         |
| Makhuduthamaga   | 340 328    | 283 956   | 274 358   | 218 332 | 107 577    | 88 663  |
| Ephraim Mogale   | 132 468    | 127 168   | 123 648   | 84 911  | 51 829     | 42 964  |
| Elias Motsoaledi | 288 049    | 268 256   | 249 363   | 185 878 | 109 022    | 86 165  |
| Sekhukhune       | 1 336 805  | 1 169 762 | 1 076 840 | 867 503 | 491 642    | 378 205 |

Source: Census (2022/2011), Community Survey (2016)

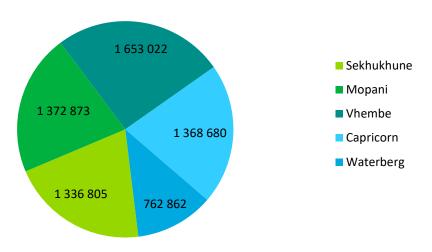

If one compares the growth rate in the district with a neighbouring District (Waterberg) there are stark realities. Waterberg have similar features in terms of drivers for economic development around mining developments. In 2001, Waterberg growth rate was at 2, 6% (604 938 persons) and 1, 2% in 2011 (679 336 persons). It will be interesting for Sekhukhune District to start comparing itself and working together with Waterberg simply because they are both in Limpopo and are exposed to almost similar economic conditions.

In 2016 the Youth population constituted 491 642 as compared to 378 205 in 2011. According to Census 2022, youth population has increased to 867 503 in Sekhukhune District. This increase in Youth Population requires that a specific focus be accelerated in terms of job creation opportunities and other youth empowerment programmes as well as education.

The following tables, however, provide population information at National, Provincial and District levels between 2008, 2018 and 2022:

#### Population of Sekhukhune at a Provincial Level

Figure 5: Total population - Sekhukhune and the rest of Limpopo, 2022

Source: 2022 Census

When compared to other regions, the Sekhukhune District Municipality accounts for a total population of 1.3 million, or 20.4% of the total population in the Limpopo Province, with the Vhembe being the most populous region in the Limpopo Province for 2022. Sekhukhune increased in importance from ranking fourth in 2008 to third in 2018 and back in the 4<sup>th</sup> spot in 2022. In terms of its share the Sekhukhune District Municipality was slightly larger in 2018 (20.4%) compared to what it was in 2008 (19.6%). When looking at the average annual growth rate, it is noted that Sekhukhune ranked highest (relative to its peers in terms of growth) with an average annual growth rate of 1.4% between 2008 and 2018.

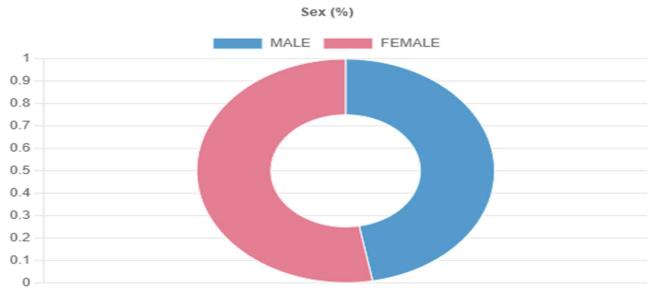

The increase in the population annual growth rate is attributed to the increasing number of the mining developments (particularly in Fetakgomo Tubatse Local Municipality) which serve as an attraction of people for job opportunities, especially the male population. This increase in the population means that more services should be planned by government/Municipalities for the expanded settlements and households. Water provision remains a critical service that the District Municipality should provide.

#### Implications of population growth trends for the district

The population growth trends suggest that there are more persons coming into Fetakgomo Tubatse and Elias Motsoaledi Local Municipalities. There is also a moderate increase in population numbers into Makhuduthamaga local municipality. Regarding allocation of resources and services, the district municipality should ensure that the three municipalities receive much attention in terms myriad of services such as water and sanitation services but also for services that are rendered by other spheres of government.

These municipalities where there are high growth numbers need to plan adequately for services provision so that there is no collapse on the current level of service in the communities. Ephraim Mogale also need to be assisted so that the growth numbers increase in the next 10 years at least to 1% per annum. There should also be deliberate efforts to accelerate job creation opportunities and other youth empowerment programmes across the district.

Figure 6: Gender Profile

Census 2022: Males (47.1%) and Females (52.9%)

Table 12: Gender Profile: Males and Females

| Municipality                   | 2       | 2022    | 20      | )11     |
|--------------------------------|---------|---------|---------|---------|
|                                | Males   | Females | Males   | Females |
| Fetakgomo Tubatse              | 275 658 | 300 302 | 202 656 | 227 814 |
| Makhuduthamaga                 | 155 771 | 184 557 | 121 282 | 153 075 |
| Ephraim Mogale                 | 62 367  | 70 101  | 58 207  | 65 442  |

| Sekhukhune                     | 629 558 | 707 247 | 497 648 | 579 191 |
| Sekhukhune Total<br>Population | 1 3     | 36 805  | 1 07    | 6 839   |

Source: Census (2011), Census (2022)

Since 1996, sex ratios have not changed much. In 2011, there were 497 428 males compared to 579 191 females. The imbalance can be attributed to large numbers of males who migrate to other provinces to look for work opportunities. As a result of the rural nature of the district of Sekhukhune, there are still persons who work in other provinces such as Gauteng and only come back home monthly or bi-monthly to see their families.

This scenario also tells a picture that there might high presence of female headed households in the district. The implication for the district is that there is a need to develop programmes that target women in particular to create self-employment and educational opportunities where possible.

Table 13: Population by Gender - Sekhukhune and the rest of Limpopo Province, 2022

| District Municipalities | Male      | Female    | Total     |
|-------------------------|-----------|-----------|-----------|
| Sekhukhune              | 629 558   | 707 247   | 1 336 805 |
| Mopani                  | 634 524   | 738 349   | 1 372 873 |
| Vhembe                  | 773 840   | 879 182   | 1 653 022 |
| Capricorn               | 686 501   | 760 602   | 1 447 103 |
| Waterberg               | 374 965   | 387 897   | 762 862   |
| Limpopo                 | 3 099 416 | 3 473 304 | 6 572 721 |

Source: Census 2022

Sekhukhune District Municipality's male/female split in population was 90.3 males per 100 females in 2018. The Sekhukhune District Municipality has significantly more females (52.9%) than males, when compared to a typical stable population. This is most probably an area with high male out migration to look for work elsewhere. In total there were 707 247 (52.9%) females and 629 558

(47.1%) males. This is different from the Limpopo Province as a whole where the female population counted 3 473 304 million which constitutes 52.8% of the total population of 6 572 721 million.

The rural nature of the district, with less job opportunities requires that males migrate to the big cities in search for work. While the district experiences new mining developments, they are concentrated in one local municipality (Fetakgomo Tubatse), and other parts of the district still suffer poverty. The programmes with high economic impact should be planned and implemented in order to reduce the scourge of unemployment and poverty.

Table 14: Population by age and gender

| Name  | Male    | Male (%) | Female  | Female (%) | TOTAL     | TOTAL (%) |
|-------|---------|----------|---------|------------|-----------|-----------|
| 85+   | 2 050   | 0,2%     | 7 980   | 0,6%       | 10 030    | 0.8%      |
| 80-84 | 3 184   | 0,2%     | 6 807   | 0,5%       | 9 991     | 0.7%      |

Source: Census (2022)

Figure 7: Population Pyramid - Sekhukhune District Municipality (2022)

Source: Census (2022)

By comparing the population pyramid of the Sekhukhune District Municipality with the national age structure, the most significant differences are:

- There is a significantly larger share of young working age people aged 20 to 34 (28.6%) in Sekhukhune, compared to the national picture (27.5%).
- Fertility in Sekhukhune is significantly higher compared to South Africa as a whole. This aspect
  can be attributed to high poverty and low education levels which in turn give rise to high
  childbearing within the district. More education on the general health issues should be provided
  to communities.

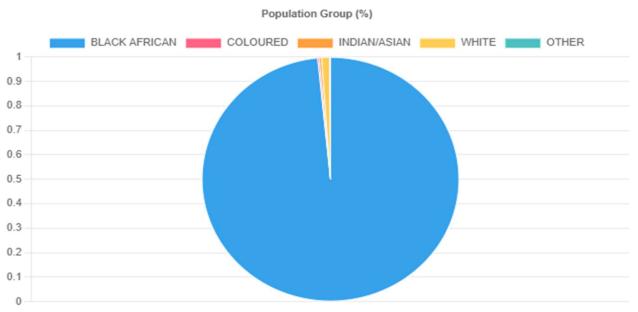

The share of children between the ages of 0 to 14 years is significantly larger (35.4%) in Sekhukhune compared to South Africa (29.0%). Demand for expenditure on schooling as percentage of total budget within Sekhukhune District Municipality will therefore be higher than that of South Africa. This requires that the district in collaboration with other stakeholders be able to provide support mechanisms towards basic education as per the norms and standards of education. This includes adequate schools to avoid overcrowding and to also provide transport in areas that fall outside the acceptable norm of 5km radius to public schools. Proper school facilities and improved equipment's to enhance sound and effective learning should also be provided e.g., Computers and Tablets. The learners should have access to minimum sets of textbooks and should also have access to learner ratio 1:40 and 1:35 in Primary and secondary schools respectively.

The district does not have higher education institutions except for the former educational colleges that are mainly used for Further Education and Training (FET's). With a population of over a million people, the district must consider working with education authorities to explore possibility of establishing an arm/satellite of University of Technology or University in the district.

#### Population group by race

The figure below indicates that 98.4% of the population in Sekhukhune District Municipality is made up of Africans. The remainder 1.6% comprises Whites, Indians, Coloureds and others. It is not a surprising trend because a large part of Sekhukhune District Municipality comprises villages under tribal authorities. The 1.6% of the Whites, Indians and Coloureds are confined to the main towns in the district and mining areas.

Figure 8: Population by race

| Other                                | -       | -       | -         | 1 481     | 0,1%   |

Source: Census (2022)

#### Home language

The dominant home language in SDM is Sepedi with 83% followed by IsiNdebele in 4.4%. According to statistics (Census 2011), the areas that are predominantly Pedi speaking are Makhuduthamaga and Fetakgomo Tubatse. In Comparing English and Afrikaans speakers, there are few English speakers in 0.22% while the Afrikaans speakers in 0.83%. Most Afrikaans speakers are in our former white only towns of Groblersdal, Marble Hall, and Burgersfort.

#### 2.2.4. Out-migration and male absenteeism in Sekhukhune

A striking characteristic of the Sekhukhune population is the high levels of male absenteeism in the district. This is the result of most males being forced to seek work outside Sekhukhune. The table below is based on a sample survey in the area and attempts to characterize the types of migrants that leave Sekhukhune households to seek work in other parts of the country.

Table 16: Categories of migrants from Sekhukhune households

| Category   | Number  | %    |
|--|---------|------|
| Regular migrants (return every week or month)        | 70,257  | 56,8 |
| Seasonal migrants (for a limited period each year)   | 34,005  | 27,5 |
| Prolonged period away (more than 6 months at a time) | 19,496  | 15,7 |
| Total number of absentee migrants                    | 123,759 | 100  |

Economic migration clearly affects both current population figures and projected population growth in the district. As subsequent sections of this chapter will show it also fundamentally affects economic planning in Sekhukhune. Current discussions on augmenting rail transport in the area, for example, are underpinned by analyses of the number and types of migrants who travel in and out of the area. What is undisputed is that the remittances sent back to Sekhukhune households by workers elsewhere contribute significantly to livelihoods in the district. The table below, also based on a sample survey, attempts to quantify the remittances received by households in the district.

According to the NSDP, the Sekhukhune District has the 4<sup>th</sup> largest out-migration (people migrating out of the district) in the country with 6.69% of its total population opting to leave Sekhukhune (The Presidency, 2006). The volume and nature of migration is clearly a factor that development planners in the district need to consider in their medium-term planning.

#### 2.3. SPATIAL RATIONALE

#### 2.3.1. Policy Context

The Spatial Rationale chapter represents the Spatial Development Framework (SDF) for Sekhukhune District Municipality as contemplated in section 12 of the Spatial Planning and Land Use Management Act (Act 16 of 2013). The General principles endorsed by the Spatial Planning and Land Use Management act is that Spatial Planning, Land Use Management and Land Development must promote and enhance the following five main development principles: Spatial Justice, Spatial Sustainability; Spatial Efficiency; Spatial Resilience and Administration. The SDF will facilitate implementation of the IDP and all government intentions to fight poverty and facilitate balanced urban and rural development throughout the district area. More specifically, it aims towards achieving the following objectives:

- Providing a spatial representation of the land development policies, strategies and objectives of the municipality in the context of local, district, provincial and national directives.
- The SDF will update all relevant socio-economic information and associated trend analysis for the municipal area to 2022 as base year (based on 2022 Census as conducted by Central Statistical Services);
- Coordinating and integrating the spatial expression of the sectoral plans of the local and/ or provincial sector departments,
- Addressing inefficient, impoverished and scattered land use patterns where the poor is generally located far away from places of socioeconomic opportunities.

- Indicate the desired and intended pattern of land use development in the urban and rural parts in the district municipality, including the delineation of areas in which development in general or development of a particular type would not be appropriate;
- Managing the conflicting demand between agriculture/ mining, urban expansion, and biodiversity conservation areas (tourism focus areas).
- Providing mechanisms for the establishment of a functional relationship between urban and rural areas – both spatially and economically;
- Identifying priority investment areas in urban and rural parts of the municipality;
- Focusing on defining the economic footprint of the district and formulating strategies on how this can be enhanced in a sustainable manner;
- Coordination and alignment of the district SDF with the municipal and provincial SDFs and any other regional plans applicable;
- Spatial targeting will serve to channel public and private investment into priority areas and align the capital investment programmes of the district municipality and different government departments into these areas in pursuit of the five SPLUMA principles;
- And link all of the above to the District Budget via the Sekhukhune Integrated Development Plan (IDP).

The Sekhukhune District Municipality (SDM) Spatial Development Framework was adopted by Council in 2018 and will be reviewed every 3-5 years. The SDF is aligned to the most important national, provincial and district policies and strategic plans: The National Development Plan provides for the spatial development proposals as part of the national spatial development interventions, The Medium Term Strategic Framework (MTSF) for Radical Economic Transformation and Improving Service Delivery; The Industrial Policy Action Plan (IPAP) 2018/2019 to 2020/2021 places special focus on minerals and beneficiation, agriculture and agro-processing, energy, attracting investments and growing the oceans economy.

The Comprehensive Rural Development Programme (CRDP) (2009) for poverty alleviation and food insecurity by creating "vibrant, equitable and sustainable rural communities"; The Limpopo Development Plan (2020-2025) builds on the Limpopo Provincial Growth and Development Strategy (PGDS) and the Limpopo Economic Growth and Development Plan (2009-2014) to improve the general condition of all facets of development in the province; The Limpopo Green Economy Plan, completed in 2013 for local production and consumption, efficient use of energy and water, and care of natural and man-made resources giving everyone the opportunity to participate in economic activities.

The Limpopo Spatial Development Framework (LSDF) to promotes social, economic, and environmental sustainability throughout the Province and The Sekhukhune 2025 Development Strategy for the longer-term strategic direction to be pursued by the district in order to accelerate economic growth and enhance development.

#### **Spatial Development Objectives**

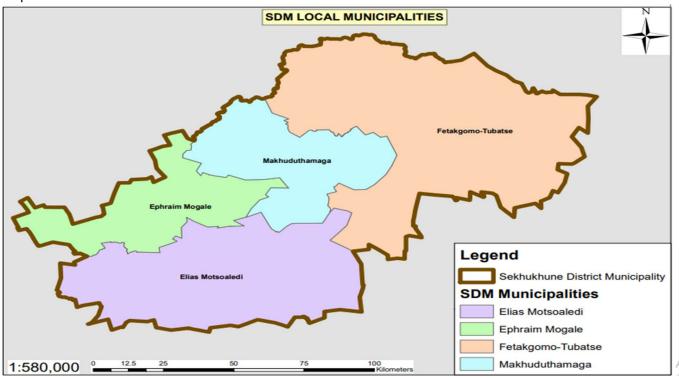

The following are the development objectives from the directives identified in national and provincial policies and sector plans and the local and regional spatial challenges and opportunities identified to be achieved as part of the Spatial Development Framework for the Sekhukhune District Municipality:

- To actively protect, manage and rehabilitate the natural environmental resources in the district in order to ensure a sustainable equilibrium between the competing mining, tourism and agricultural industries.
- To establish a functional system of economic and service delivery nodes in the urban and rural parts of the district.
- To optimise connectivity and access by way of a comprehensive district movement network linking all urban and rural nodes to one another, and to significant destinations in the broader region.
- To ensure equitable access to social facilities and promotion of Local Economic Development by way of targeted investment based on a spatial logic (MPCC) at all the priority nodes within the district.

- To consolidate human settlement projects in sustainable Priority Housing Development Areas at the identified urban and rural nodes.
- To direct engineering infrastructure investment aimed at social and economic development towards the priority nodes and provide at least basic services to communities experiencing excessive service backlogs (in line with Constitutional obligation).
- To utilise the natural environmental and cultural historic features in the district as anchors from which to promote ecotourism and conservation.
- To further enhance agricultural development and food production by establishing the Agri Park concept in the district.
- To facilitate up-scaling of subsistence farming to commercial farming in all the identified Rural Intervention Areas within the Sekhukhune Agri Park.
- To optimally utilise the mining potential in the district with due consideration to the continuous rehabilitation of mining land.
- To promote industrial/commercial development in the district with specific emphasis on Agriprocessing at the Agri Hub (Groblersdal), and minerals beneficiation in the Special Economic Zone: SEZ (Tubatse).
- To promote formal and informal business development at all activity nodes in the district and to continuously provide opportunities for upscaling.

#### 2.3.2. Geographic location of the district

Map 4 - SDM Location

#### 2.3.3. Spatial Vision

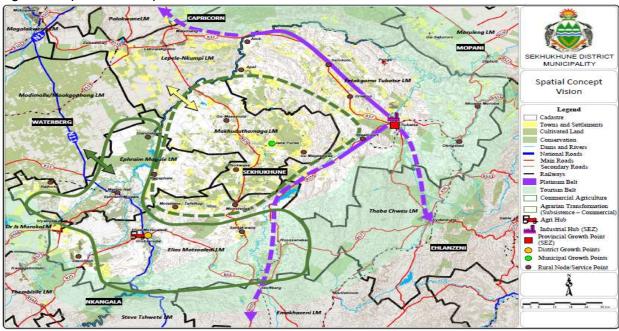

Based on the information emanating from existing legislation, policies, and plans at national, provincial and surrounding district level, the following Spatial Vision for the Sekhukhune District has been derived.

The Spatial Vision revolves around the following main principles:

- Consolidating government investment (spatial targeting) around several prioritised urban and rural nodes.
- Linking into the commercial opportunities offered by the tourism meander bordering the district to the north, east and south.
- Intensifying commercial agriculture in the southern extents of the district and focusing on agrarian transformation in the central parts.
- Promoting agrarian downstream beneficiation at the Groblersdal Agri Hub and at several local markets and processing areas at rural nodes.

- Maximising the economic benefits to be derived from the Dilokong platinum Belt and consolidate mining beneficiation industries around Burgersfort nodal point.
- Enhance inter- and intra-district transport linkages.

Figure 9: Spatial Concept Vision

#### 2.3.4. Spatial Concentrations of Population

The Sekhukhune DM represents 20.2% of the Limpopo Province total Population (2016). It is evident that the total population increased by 92 922 from 1 076 840 in 2011 to 1 169 762 in 2016. According to Census 2022 the population of Sekhukhune District increased by 167 043 to 1 336 805. In term of the local municipalities, the Fetakgomo Tubatse LM has the highest population concentration (41.9% - 2022) and experienced the highest increase in population growth (147 012) from 2011 to 2022 Census and is ranked the highest in Sekhukhune District out of 4 Local Municipalities.

The SDM features approximately 811 sparsely populated and dispersed rural settlements, with Groblersdal, Marble Hall, Burgersfort, Jane Furse, Ohrigstad, Steelpoort and Driekop constituting the main/first order urban centres. The spatial location of these first order centres generally coincides with the district's two dominant economic activity areas.

Essentially, apart from having been influenced by the spatial demarcation of the former homeland areas, the spatial occurrence of settlements has been influenced by:

- The spatial location of major agricultural and mining activity areas;
- The spatial location of major rivers traversing the district; and
- The spatial location of major roads such as the R37 and R579.

#### 2.3.5. Existing Land Use and Related Potential

Land use is a complex issue and is partially the result of the physical planning policies of the former apartheid government, which split the district between former homeland areas, private farms and small towns. Today, apart from issues pertaining to land ownership patterns, mining, agricultural and tourism activities bring distinctive spatial challenges of their own to the district.

Presently, land use within the SDM is dominated by commercial and subsistence farming. This is especially true in the Fetakgomo Tubatse, Makhuduthamaga, and Ephraim Mogale Local Municipal areas. The second most significant land use is the potential conservation areas, especially within the Elias Motsoaledi and Ephraim Mogale Municipal areas. These potential conservation areas may eventually encompass roughly one third of Elias Motsoaledi and Ephraim Mogale. The different land use patterns in the Sekhukhune District are captured in Table 18 below.

Table 17: Land Use Patterns in the SDM

| Land use type             | Area in sq km | % of total |  |
|---------------------------|---------------|------------|--|
| Agricultural: Commercial  | 1,135         | 7,7        |  |
| Agricultural: Subsistence | 2,683         | 18,1       |  |
| Potential conservation    | 3,484         | 23,5       |  |
| Active conservation       | 463           | 3,1        |  |
| Active mining             | 37            | 0,2        |  |
| Other                     | 7,030         | 47,4       |  |
| Total                     | 14,832        | 100        |  |

Source: Department of Land Affairs (2006). Land Cover Map cited in M Maila (2006)

Disconcertingly, land is becoming an increasingly scarce commodity within the district. This is equally true of rural, semi-rural / semi-urban areas. This is a particularly significant situation, given the growing importance of agriculture, mining and tourism (all potentially conflicting land uses) to the district's economy. Furthermore, the District's developing economic nodes appear to be attracting an increasing number of people, thereby creating higher population concentrations in certain parts of the district. This is especially true of the Jane Furse — Phokwane development node in Makhuduthamaga, and the Bothashoek-Praktiseer and Atok Area (Fetakgomo Tubatse).

#### **Human Settlements**

Integrated Sustainable human settlement in Sekhukhune District is vital to bridge the imbalances between rural and urban settlements. The fast growing of the mining sector within the district, particularly in Fetakgomo Tubatse, requires that integrated human settlements be established to address the housing demand. Currently there are processes for integrated human settlements by both CoGHSTA and Municipalities within the district, for example, in Apel, Burgersfort and Jane Furse. In Elias Motsoaledi, the Township Establishment is currently being undertaken in Groblersdal and Roosenekaal. However, the Municipality is unable to complete these processes due to financial constraints. Provision of infrastructure and bulk services is core to the success of all the proposed developments within these Municipalities. The inability to conclude the township establishment processes in these Municipalities is due to financial constraints and lack of basic infrastructure services. The delays in concluding these township establishments have led to land invasions and poor investment attractions.

In Elias Motsoaledi, there are 3 land tenure upgrading projects that were abandoned by the then Mpumalanga Land Affairs Dept. All these projects were abandoned at general plan levels. The areas were to be upgraded into 1 350, 1 500 and 1 450 units. To date all relevant information regarding these projects have been referred to CoGHSTA for finalisation. Within the same Municipality, Masakaneng and Stadium View (Hlogotlou) informal settlements were subjected to the formalisation process through the assistance of Coghsta. These projects were not concluded due to financial setbacks, which led to the development of further informal settlements of Congo, Rangers, Morula View and Ditakaneng. All these informal settlements led to illegal water connections to the Municipal grid. The entire situation has resulted in the severe burden to the existing sewer plant and water pressure to the formal part of the township.

#### **Challenges for Human Settlements**

- Increased number of informal settlements.
- Inadequate land for development
- Land claims processes take long
- Security of tenure
- Dispersed rural settlements making bulk infrastructure provision expensive
- Sprawled development
- Incomplete RDP houses

#### **Interventions for Human Settlements**

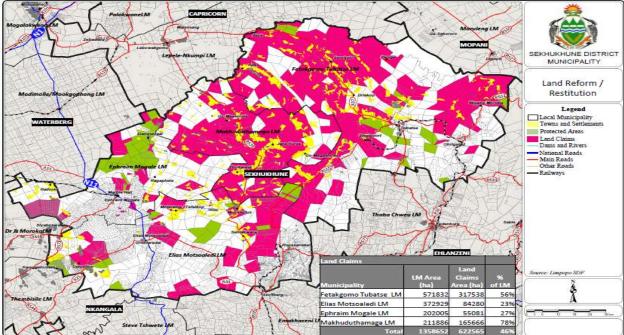

- Formalization of settlements
- Township establishment

- Land acquisition
- Development of precinct plans
- Upgrading of land tenure
- Human settlement Master Plan
- Demarcation of sites
- Enforcement of SPLUM by law
- ♣ Development and implementation of wall-to-wall land use scheme.
- Implementation of SDFs
- Development and implementation Water Master Plan
- ♣ Awareness to traditional authorities on land use management

#### 2.3.6. Land Claims

**Figure 10** depicts the land areas within the SDM which are subject to land reform/ restitution claims as contained in the Limpopo SDF (2016). A total of 622 565 ha of land is subject to land claims. This represents about 46% of the total area of the SDM. About 56% of the Fetakgomo Tubatse area is subject to claims (317 538 ha), followed by Makhuduthamaga (165 666 ha or 78%); 8428 ha (23%) of Elias Motsoaledi and 55 081 ha (27%) of Ephraim Mogale. Notably, there is a strong correlation between the land claimed and the land under traditional authority. The exception in this regard is the far-eastern extents of Elias Motsoaledi Municipality where there is a large cluster of claims between routes R579 and R555 on land which does not fall under traditional authority.

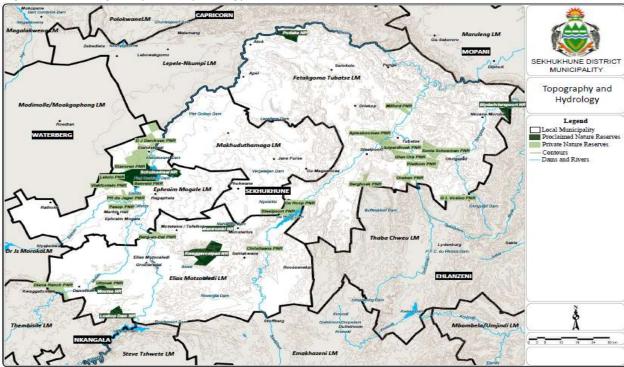

#### 2.3.7. Environmental Features

As illustrated on **Figure 11** the general topography of Sekhukhune District is that of strongly undulating plains which link into the Springbok Flats of the Waterberg District towards the west. The Klein Drakensberg Mountain range covers the entire north-eastern and eastern extents of the Municipality. This mountain range is a very strong structuring element in the Sekhukhune District as it limits east-west movement in the central and northern parts of the district – especially between areas like Burgersfort, Jane Furse, Groblersdal, and Marble Hall. The Olifants, Moses and Elands Rivers enter the district from the southwest from where these converge and run in a north-north-eastern direction along the District Municipality border as the Olifants River.

The Tubatse (Steelpoort) and Ngwaritsi (Spekboom) Rivers traverse the eastern and central extents of the district before linking into the Olifants River further to the north. Prominent dams fed by these rivers include the Rooikraal, Piet Gouws and Flag Boshielo in the Olifants System, and the new De Hoop Dam in the Tubatse River. These rivers also constitute the lifeline of the Loskop and Ohrigstad Irrigation Schemes. The district is characterised by the hot and fairly dry (semi-arid) climate of the Olifants River Valley. The average temperature shows moderate fluctuation, with average summer temperatures of 23°C, and an average winter temperature of 13.5°C. The southern and south-eastern

extents of the district receive the most rain (approximately 600-800mm annually). These areas also represent the bulk of commercial agricultural areas of the district. In terms of annual rainfall, the northern and central-northern extents of the area are not well suited to intensive commercial agriculture. There is considerable variability in terms of rainfall intensity, duration, and frequency. This exacerbates the water shortage problem, which is a key developmental constraint in the district. Furthermore, increasingly sparse rainfall, coupled with a high evaporation rate, is currently limiting subsistence farming in the district – a situation that has contributed to food insecurity.

Figure 11: Topography and Hydrology

Sekhukhune's vegetation is mostly tropical bush and savannah. More specifically, the dominant vegetation type (which has also been classified as sensitive) is Sourish Mixed Bushveld which contains the false grassveld types. As shown on Figure 18 a number of nature reserves, conservation areas and private nature reserves are found throughout the district. These include the Schuinsdraai Nature Reserve at Flag Boshielo Dam, the Potlake Nature Reserve to the north, the Kwaggavoetpad Nature Reserve centrally located in Elias Motsoaledi, the Moutse and Loskop Dam Nature Reserves to the south, and Blyderivierspoort Nature Reserve at the north-eastern end of the district. There are also several small clusters of Private Nature Reserves along the Olifants River in the eastern parts of Ephraim Mogale, a cluster in the south-western extents of Elias Motsoaledi (forming part of a larger cluster located in the Nkangala District (Loskop Dam to Rust de Winter), around the new De Hoop Dam along the Steelpoort/ Tubatse River in the east and another cluster around Burgersfort/ Tubatse.

**Figure 12** depicts the extent of Critical Biodiversity Areas (CBA's) located in the SDM. It shows that almost the entire eastern escarpment is classified as CBA1 as well as the areas around the Schuinsdraai, Kwaggavoetpad and Loskop Dam Nature Reserves in the southern parts of the district. The northern and north-eastern extents of the district (in the vicinity of the R37 and Steelpoort), are characterised by a relatively high occurrence of Red Data plant species and Key Vegetation Communities. Problematically, these are the same areas that feature a high occurrence of human settlements and mining activity. It is also important to note the CBA2 corridors which link the CBA1 areas to one another which are aimed at facilitating migration of fauna and flora along the Critical Biodiversity Network.

Figure 12: Critical Biodiversity Areas

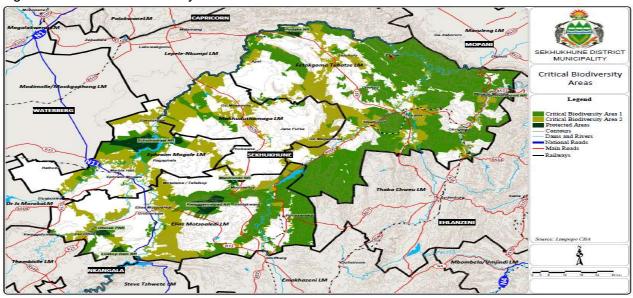

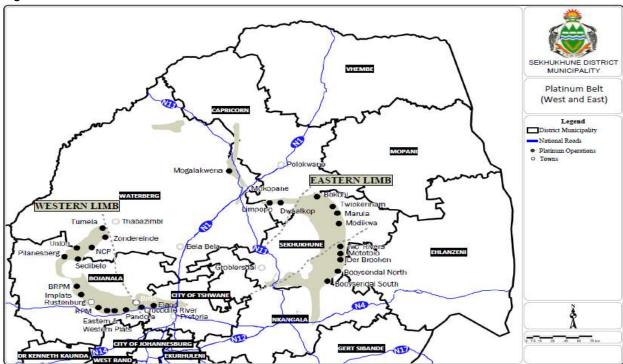

Figure 13: Platinum Belt

The Sekhukhune District holds one of the largest reserves of Platinum Group Metals (PGMs) in the world. The renowned Bushveld Complex which features the eastern limb of the Merensky Reef is found towards the north and north-eastern parts of the district. (The western limb is found in the area between Rustenburg and Northam in Northwest Province) (See **Figure 13**). Furthermore, the Springbok Flats coal fields are found along the western boundary of the SDM. Figure 18 indicates that the majority part of land (soil) located along the eastern escarpment of the district is deemed to be highly sensitive. Although the District features a substantial availability of land comprising of good arable soils (see **Figure 12**), the hot and dry climate limits the extent of agricultural production within the district to areas adjoining the Olifants, Elands, Ngwaritsi, and Tubatse Rivers. Consequently, land adjoining these rivers should be reserved for agricultural purposes.

#### 2.3.8. Spatial Structure and Settlement pattern

The spatial structure and settlement pattern of the SDM is a complex one and is essentially the result of the spatial policies promoted by the former apartheid dispensation. As a result, the space economy of SDM is characterised by a geographical split between former homeland areas (Lebowa and KwaNdebele), and areas which fell outside of the former homelands. Furthermore, the potential burgeoning of mining, agricultural, and tourism activities within the district presents spatial challenges of its own, amidst the inherited spatial challenges. Figure 21 depicts the settlement spatial structure and movement network of the Sekhukhune District. Evident from this is the fact that the majority of the population reside in the central and north-western parts of the district due to the topographical

constraints (eastern escarpment) located along the eastern border of the district, and the commercial agriculture characterising the southern parts of the district.

There are approximately 811 sparsely populated and dispersed settlements, accommodating approximately 95% of the district's total population. The majority of these "dispersed settlements" are found within the central (Ephraim Mogale and Makhuduthamaga), northern and North-Eastern extents (Fetakgomo Tubatse) of the district. Only 5% of the district's population reside within urban areas, with the main urban centres being Groblersdal, Marble Hall, Burgersfort, Jane Furse, Ohrigstad, and Steelpoort. Apart from having been influenced by the spatial demarcation of the former homeland areas, the spatial occurrence of settlements has been influenced by: The spatial location of major agricultural and mining activity areas. The spatial location of major rivers traversing the district; and the spatial location of major roads such as the R37 and R579.

#### Road and Rail Transport

Economic Activity is predominantly concentrated in two functional areas: The south-western economic activity area which is primarily centred on intensive commercial agricultural and the north-eastern economic activity area which is primarily centred on platinum mining activities associated with the Merensky Reef along the Dilokong Corridor (R37). With less than ten percent of the total capacity of the Reef having been unlocked to date, the platinum economy is still within its infant stage. Tourism activities forming part of both economic activity areas are primarily related to nature tourism, game farming and hunting

Regional accessibility is predominantly facilitated via three roads traversing the district in a Northwest – Southeast alignment (N11, R579 and R37). Route R555 traverses the district from south to north along the eastern border of the district. Together these roads constitute the main freight and logistics corridors connecting the district's economic activity areas to prominent provincial nodes and economic activity areas e.g., Mookgopong, Mokopane, Polokwane, Lydenburg and Middelburg.

The presence of the Klein Drakensberg and Strydpoortberge hinders connectivity to the north into Maruleng and parts of Lepelle-Nkumpi. More specifically, the N11 Freeway connects the towns of Marble Hall and Groblersdal with Mookgopong and the N1 Freeway towards the north-west. From here it leads to Mokopane and eventually links to Botswana via the Groblersbrug border post. To the south, the N11 connects Marble Hall and Groblersdal with Middelburg, which is situated along the N4 Maputo Corridor. The R579 traverses the central extents of the district and serves to connect Jane Furse and Monsterlus with Lebowakgomo towards the north, and Sehlakwane and Stoffberg towards the south.

The R37 traverses the northern extents of the district and serves to connect Burgersfort with Lebowakgomo towards the north-west and Lydenburg towards the south-east. The R555 traverses the eastern extents of the district and serves to connect Steelpoort and Burgersfort with Stoffberg towards the south-east. Routes R37 and R555 form the Dilokong Platinum Corridor. Route R36 serves to connect the Burgersfort/ Steelpoort area with Ohrigstad, and down to Lydenburg to the South and to Hoedspruit in Maruleng to the north. Although most of the urban centres and smaller towns are located along these roads, a vast number of settlements within the western, central, and eastern extents of the district are only accessible via secondary gravel roads (see **Figure 13**).

The general condition of roads within the SDM is poor. Severe damage such as potholes, cracks, and rutting can be observed along most roads. Road damage is particularly prevalent along the following sections of road:

- The R33 between Groblersdal and Stoffberg;
- The R555 between Stoffberg and Roossenekal;
- The R579 between Nebo and Stoffberg; and
- The R25 between Dennilton and Groblersdal.

To ensure continued economic growth the district has prioritised the stretches of road forming part of the proposed Dilokong and Phalaborwa Corridors which fall within the boundaries of the district. These include:

- The Dilokong Corridor
- Polokwane to Burgersfort (P33/1 and P33/2), via Mafefe.
- Flag Boshielo Dam through Lebowakgomo and Mafefe, linking the
- District with the Phalaborwa and Kruger National Park areas.
- Chueniespoort via Boyne to Mankweng.
- The Phalaborwa Corridor
- Ohrigstad via the JG Strijdom Tunnel (R36).
- Burgersfort to Oaks (P181/1).

Other roads important to the economic well-being of the district include the N11 and R579. Apart from its road network, the SDM is served by three railway lines which were originally developed to support the mining activity within the district.

#### The three railway lines include:

- The railway line entering the SDM from the south, next to Stoffberg, from where it continues northwards for approximately 30km, eventually ending at an abandoned mine near Mapochs Mine.
- The railway line entering the SDM from the west, near Nutfield, from where it continues eastwards to Marble Hall.
- The railway line entering the SDM from the east, passing near Ohrigstad and Burgersfort, and terminating near Steelpoort (near the Tubatse mine).

Unfortunately, these railway lines have not yet been extended or re-routed to serve later/ new mining operations (such as those along the Merensky Reef and Chrome layers). Consequently, shortcomings in the railway network are resulting in extreme pressure being placed on the road network. Favourably, a new commuter rail link between Pretoria and the south-west of the SDM (along the Moloto Road) is being considered. This rail link will improve accessibility to Gauteng, which represent an employment area for many residing within the south-western extents of the district. In addition to the road and railway network of the district, two registered airfields are also found within the district. The airfields are located in Marble Hall and Groblersdal respectively, and primarily support crop spraying activities.

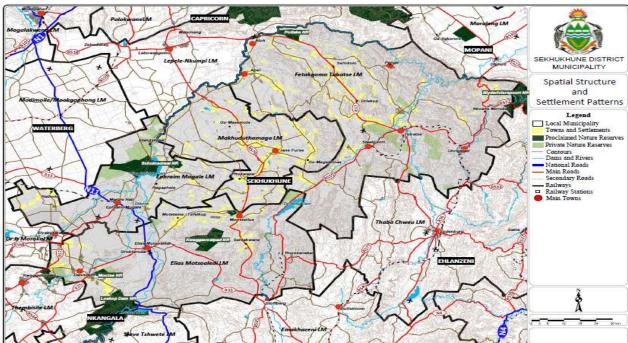

Figure 14: Spatial structure and Settlement Patterns

#### **Public Transport**

With low levels of car ownership and no commuter rail services, commuters depend heavily on road-based public transport services. According to the Limpopo Integrated Transport Plan (ITP), the most common forms of public passenger transport are buses and taxis. Unfortunately, transport routes in the district are often limited by deteriorating road conditions, as well as local stormwater problems

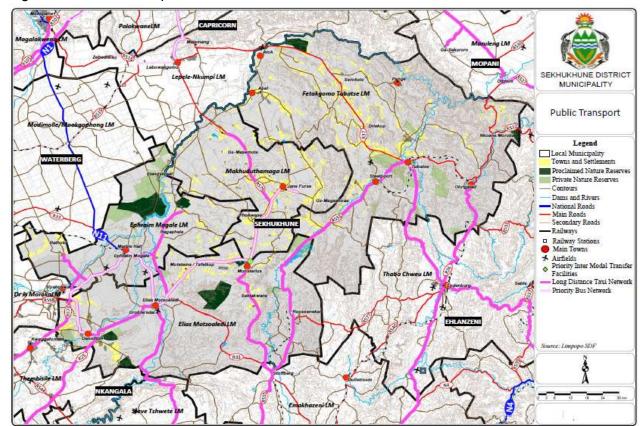

caused by rainy seasons. Public transport services (Long Distance Taxi) are being provided along the following important public transport corridors as depicted on **Figure 15**:

- R579 in the central parts of Makhuduthamaga towards Jane Furse;
- R573 (Moloto Road) past Siyabuswa;
- R25 between Dennilton and Groblersdal;
- N11 between Middelburg and Groblersdal;
- R579 from Stoffberg to Jane Furse;
- R555 from Stoffberg to Burgersfort;
- R37 from Burgersfort to Lydenburg;
- R36 from N4 (Belfast to Lydenburg and up to Ohrigstad).

The Priority Bus Network links the following areas to one another: Dennilton, Siyabuswa, Marble Hall, Groblersdal, Moletema, Tafelkop, Monsterlus, Phokwane and Jane Furse. Priority locations for intermodal public transport facilities are at the following strategic nodal points:

- Burgersfort;
- Marble Hall;
- Groblersdal;
- Ohrigstad;
- Driekop;
- River Cross; and
- Steelpoort

Figure 15: Public Transport

#### Spatial distribution of economic activities

The section below briefly discusses several existing business and industrial establishments within the SDM. Several business activities are entrenched in the following areas in the district:

- Groblersdal Town comprises a range of retail, hardware /commercial and several industrial activities, and as a result, it is the main business node of Elias Motsoaledi LM;
- Marble Hall Town holds a prominent L-shaped business node in Ephraim Mogale municipality, Industrial activities are clustered to the south.
- The neighbourhood node of Moteti/Dennilton Business Area comprises of mainly a shopping centre and few surrounding local businesses,

- The neighbourhood business area in Phokwane/Phatametsane in Makhuduthamaga LM which largely serves the surrounding settlements/villages.
- The Jane Furse business area which holds the bulk to economic activity within the Makhuduthamaga LM.
- Burgersfort Town contains the largest cluster of business establishments within Fetakgomo-Tubatse LM. It is shaped by a substantial number and size of shopping centres. Business varies from retail, hardware/ commercial and industrial activity. The town is the fastest growing CBD's in the district due to the influence of mining activity.
- Mining activity in the Steelpoort area located south of Burgersfort town.
- Another mining activity (Bokoni Platinum Mine) located near the settlement areas of Atok / Sefateng.

#### **Spatial distribution of Mining activities**

Mining activity has been practised in Sekhukhune for well over a century and typically involved (as is still the case today) the extraction of andalusite, asbestos, chromite, and platinum deposits from the Merensky Reef, which forms part of the mineral rich Bushveld Complex.

The district features the world's largest deposit of the platinum group metals (PGMs). What is striking about previous bouts of mining activity in the area is how changing commodity prices affected the opening, closing and, occasionally, reopening of mines. When prices rose, new exploration and development took place in the Sekhukhune mining sector. Conversely, when prices fell, mines in the area closed. This is an important characteristic to take into consideration when providing infrastructure and housing to support expanding mining operations. Currently, 17 operational mines are found within the district, with most of the activity situated along the Dilokong Corridor (R37 and R555). The Dilokong corridor stretches across the Fetakgomo Tubatse LM respectively (see **Figure 16**). Some isolated activities are found within then Greater Marble Hall LM. Major mining companies operating in the SDM include Anglo Platinum, Xstrata, BHP Billiton, Implats, ASA Metals and Marula Platinum. Despite the involvement of major mining companies, mining in the district has not yet reached production limits.

New mining activities within the Ephraim Mogale and Elias Motsoaledi LMs could potentially create land use conflicts between mining and agricultural activities. Furthermore, new mining activities may result in increasing pressure being placed on environmentally sensitive areas found within the north-eastern and south-eastern extents of the district.

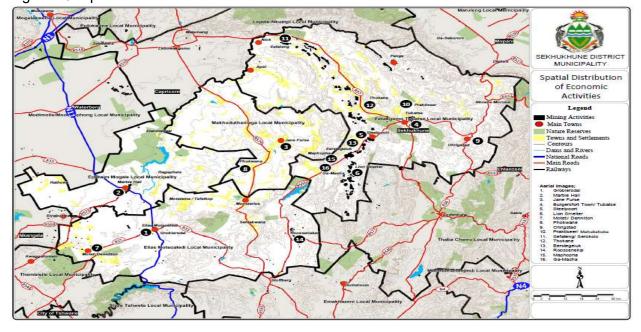

Figure 16: Spatial Distribution of Economic Activities

#### Spatial distribution of Agricultural activities

Agriculture in the SDM is a mixture of both commercial and subsistence farming. Agriculture is the second largest source of employment, accounting for over 16% of all jobs held by nodal residents. A variety of products are produced in the area, including citrus fruit, table grapes, vegetables, maize,

wheat, potatoes (both Irish and sweet), cotton and livestock. Furthermore, it has substantial availability of arable land, but the hot and dry climate limits the extent of agricultural production in the area. The scarcity of water in the area makes costly irrigation infrastructure a necessity for high quality, high output farming. However, a variety of products are produced in the district, including citrus fruit, table grapes, vegetables, maize, potatoes (both Irish and sweet) wheat, cotton, sorghum, millets, and livestock. It is estimated that about 70% of farmers in Sekhukhune are subsistence farmers, with many of them lacking the skills required to reach their potential.

The main challenge as indicated above is for the district to raise the potential of emerging farmers in line with that of the established commercial farmers. This will require support for training and access to inputs and markets, as well as addressing water shortages. Unfortunately, coupled with the above-mentioned constraints, the sector is further depressed by global economic recession, environmental constraints, and lack of access to sustainable market both local and internationally. These challenges call for farmers to be better organised and resourced with capital, technology, new skills, and creative leadership for them to succeed. They need to produce high value commodities which provide the greatest opportune for increasing household income. Further, they need integrated institutional support to facilitate their capacity building and participation in the competitive markets. And finally, they need to have good business acumen and astute to capitalize on opportunities presented in the local and global markets because most of FBO still operating at as non-legal business entities with cooperative still at the primary stage.

The future success of agricultural industry in this district will depend on a clear vision and specific plans to realize that vision. Essentially, commercial agriculture in the SDM is concentrated in two main areas: The south-western part of the district (near Groblersdal and Marble Hall), which is served by the Loskop Irrigation Scheme; and the Eastern section of the district (near Burgersfort and Ohrigstad), which is served by the Ohrigstad Irrigation Scheme). The Loskop Scheme

The towns of Groblersdal and Marble Hall are found within the Loskop Valley. The commercial agricultural schemes in this valley are serviced by the Loskop Dam. In addition to the Loskop scheme, there are 5 smaller schemes within the Loskop agricultural area, namely: The Moosrivier Scheme; The Hereford Scheme; The Olifants River Scheme; The Elands River Scheme; and The Selons River Scheme. Collectively, these contribute significantly to commercial agriculture in the area.

#### The Ohrigstad scheme

The Ohrigstad Scheme is supplied with irrigation water from the Ohrigstad Dam along the Ohrigstad River. The total area currently being irrigated is estimated at roughly 4,500 hectares.

Alternatively described, the agricultural activities within the SDM tend to be concentrated along the following routes: The entire length of the N11 throughout the District; The R573 from Marble Hall to the District boundary; the R25 between Dennilton and Groblersdal; The minor road linking the R573 and R25 between Groblersdal and Marble Hall; The R36 as far north as Branddraai; and the southern section of the R37 as far north as Burgersfort.

#### Three potential tourism routes have been identified for Sekhukhune:

#### The Mafulo a Matala Route

Mafulo a Matala, literally translated into "animals grazing on green land", is a route that will take tourists to all the natural beauty and wildlife of Sekhukhune Land. This route is for persons drawn to the African wilderness. The route combines the scenic beauty and wildlife of the area with adventure activities and attractions along the route. The Flag Boshielo dam together with the Schuinsdraai Nature Reserve is one of the most significant attractions on the Mafulo a Matala route. Schuinsdraai Nature Reserve is a popular water-recreation destination for families, where anglers can relax at the shores of the Flag Boshielo Dam.

#### The Marota Route

The Sekhukhune District is named after King Sekhukhune who was the King of the Marota tribe (today commonly known as the Bapedi) in Sekhukhune Land during the 18th century. Sekhukhune Land has a rich cultural heritage that offers a gateway to authentic Africa. Every corner of Sekhukhune has an amazing tale to tell of this land of myths and legends, a true treasure indeed with world renowned Heritage sites like Tjate, Lenao la Modimo, Ledingwe Cultural Village and many more. The Marota Route affords the tourists the opportunity to experience the cultural heritage of the fascinating Sekhukhune area, reflecting the diverse cultures of the present day inhabitants of the area, intrepid adventures from a colourful past and ancient civilisation of which only archaeological evidence remains.

#### The Platinum Stream Route

The Platinum Stream is a tourist route designed to unite Sekhukhune's natural beauty and rich heritage with the mining activities in the area for those mining and history enthusiasts. The Platinum Stream flows along the R555 and the R37, giving tourists the opportunity to visit some of Sekhukhune's significant mines.

#### Strategic Development Areas

An analysis of the district's socio-economic profile reveals that consolidation of the district's dispersed settlement structure will be required, if the general living standards of its population are to be improved, and environmental degradation reduced. Essentially, consolidation of the urban structure will help to:

- Create higher densities, thereby stimulating purchasing power and economic development, which eventually leads to higher levels of asset ownership and living standards.
- Create the critical densities needed for the sustainable provision of communication and services infrastructure. As is, the dispersed settlement structure prevents the majority of Sekhukhune households from taking advantage of ever-expanding internet and etelecommunication.
- Facilities, especially for business and educational purposes. Facilitate targeted infrastructure spending, thereby avoiding unnecessary and costly duplication of infrastructure such as telecommunication towers and radio and television masts.

The establishment of the system of urban and rural nodes holds the following advantages:

- Contributes towards urban-rural restructuring and environmental protection by means of promoting nodal development. Nodal development is conducive to targeted infrastructure spending, local economic development, and corridor development.
- Helps to direct infrastructure development and service delivery to most cost efficient and sustainable areas;
- Reduces the levels of inequality in living standards and access to basic services between rural and urban areas ensures that all communities (even in rural areas) have access to at least the minimum levels of services as enshrined in the Constitution;
- Provides government with a platform from which to develop sustainable energy centres, telecentres, and information technology infrastructure within rural areas;
- Provides a platform for entrepreneurship and small business development (LED) by creating the required "critical mass" at these points;
- Informs investment decisions pertaining to prioritising upgrading of road infrastructure which
  connect nodes to one another, provision of multi-modal transport facilities, and determining
  optimal public transport routes;
- Multi-functional (one stop) nodal development reduces travelling costs between place of residence and social facilities and economic opportunities for the rural poor.

The function of a node is to provide local residents, as well as those from surrounding rural areas, with goods and services in an efficient manner – preferably as a 'one stop' point. Such an approach

will – in time – strengthen agglomeration economies, support effective public transport, and create a network of strong nodes that discourage unsustainable low density sprawl.

**Table 18** below lists the priority nodal points identified from the Spatial Development Frameworks of local municipalities in Sekhukhune District Municipality as well as the Limpopo SDF. There are two Provincial Growth Points (Burgersfort/Tubatse and Groblersdal); three District Growth Points and eight Municipal Growth Points. A total of 21 Rural Nodal/ Service Points has also been identified bringing the total number of nodes in the SDM to 34.

Table 18: SDM Growth Points

| Nodal Hierarchy         | Local Municipalities  |   |                               |   |
|-------------------------|---|---|-------------------------------|---|
|                         | Fetakgomo-<br>Tubatse   | Ephraim<br>Mogale   | Makhuduthamaga                | Elias<br>Motsoaledi   |
| Provincial Growth Point | Burgersfort   |   |                               | Groblersdal   |
| District Growth Point   | Steelpoort  | Marble Hall   | Jane Furse<br>(Institutional) |   |
| Municipal Growth Point  | Ohrigstad<br>Driekop  |   | Apel Cross<br>Glen Cowie      | Roosenekal  |
|                         | Mecklenburg<br>Atok<br>Apel   |   |                               |   |
| Rural Nodes             | Praktiseer Kgautswane Mampuru and Extension Malokela A and B Mphanama | Elandskraal Letebejane Regaphela/ Ga-Rakwadi Moganyaka /Leeuwfontein Zamekomst/ Rathoke Letebejane/ Ditholong |                               | Elandsdoring/<br>Dennilton<br>Motetema<br>Hlogotlou<br>Sehlakwane |

The proposed Sekhukhune nodal system should form the basis for national, provincial, and municipal infrastructure investment prioritisation (budgets, programming etc.). This includes the provision of engineering infrastructure, social/community infrastructure, and economic infrastructure. Its strategic intent is to maximise the benefits to be derived from spending the limited public budget, while creating a just and efficient spatial structure from which both urban and rural communities in the SDM will benefit.

Most of these nodal points lie along main routes where they are easily accessible. An established system of nodes will not only make service delivery more efficient but also make the area more legible and help to direct private sector investment throughout the SDM. Notably, with Jane Furse's new status as the institutional headquarters of the SDM, all district government functions should be consolidated within Jane Furse Node.

It is furthermore recommended that a legally binding Precinct Plan/ Local Plan be compiled for each of the nodal points in the Sekhukhune District in line with the provisions of Section 21(I) (i) of the Spatial Planning and Land Use Management Act (SPLUMA). In cases where nodes fall within the area of jurisdiction of Traditional Leaders, such plans should be compiled in consultation with the Traditional Leaders.

These Precinct/Local Plans should comprise detailed land use proposals at erf level to guide the future development of the area – and specifically the areas where future public investment in the form of community facilities, housing and engineering infrastructure should be consolidated. Each Precinct Plan should also comprise an Implementation Programme highlighting the sequence/priority of actions/ investments to be initiated in the area. Precinct Plans should also demarcate the areas where Government should acquire the land for future public investment (e.g., community facilities) in order to prevent these areas from being occupied/ allocated to people.

**Figure 17** shows the spatial distribution of these nodes in the district and also how communities within a 10-kilometre radius around the respective nodes will be served. Approximately 80% of the district population reside within 10 kilometres from an activity node/ growth point.

#### 2.3.9. Land Use

Land use within the Sekhukhune District is dominated by subsistence farming. This is especially true in the Fetakgomo Tubatse, Makhuduthamaga, and Ephraim Mogale municipal areas.

The second significant land use is the potential conservation areas, especially within the Elias Motsoaledi and Ephraim Mogale municipal areas. These potential conservation areas may eventually encompass roughly one third of Elias Motsoaledi and Ephraim Mogale. The different land use patterns in the Sekhukhune District are captured in the table below:

Table 19: Land use patterns in Sekhukhune

| Land use types            | Area in sq km | % of total |  |
|---------------------------|---------------|------------|--|
| Agricultural: Commercial  | 1,135         | 7,7        |  |
| Agricultural: Subsistence | 2,683         | 18,1       |  |
| Potential conservation    | 3,484         | 23,5       |  |
| Active conservation       | 463           | 3,1        |  |
| Active mining             | 37            | 0,2        |  |
| Other                     | 7,030         | 47,4       |  |
| Total                     | 14,832        | 100        |  |

Source: Department of Land Affairs (2006). Land Cover Map. Cited in M Maila (2006), op cit

It is also becoming apparent that land is growing increasingly scarce in the district, within the urban, rural and semi-rural areas equally. District Municipality and Local Municipalities have recognized this as a challenge and have prioritized the issue. This is particularly significant given the growing importance of agriculture, mining, and tourism – all potentially conflicting land uses – to the Sekhukhune economy.

#### Land Use Management

An even more complex issue within the district, however, is that of land use management. The land issue is a potentially difficult one in Sekhukhune, with the district being governed by a dual system. Under the traditional system, land allocation (and, therefore, land use) is the prerogative of tribal council – and this system dominates in much of the district's formal towns and, to some extent, the adjacent townships.

The traditional system is rendered more complex by the fact that each of the approximately 84 traditional authorities in the area has its own unique land use management system. In general,

however, each traditional authority allocates land to a subject for either residential use or subsistence farming. In addition, subjects would also have unlimited access to communal grazing system, however, is becoming increasingly difficult to maintain, given the growing demand for land (for s range of purposes). Furthermore, the traditional land use management system is unwritten and therefore often subject to interpretation.

In recent years, the boundaries between different traditional authority areas have become increasingly blurred. This has led, in part, to the lodging of competing land claims in many parts of the district<sup>1</sup>. It has also led to the growth of informal settlement activities within some traditional authority areas. This is especially prevalent around district growth points like Burgersfort, Atok and Jane Furse and is undoubtedly a reflection of economic migration towards potential centres of economic activity.

In summary, the land issue is potentially a source of tension in the Sekhukhune area. There is a latent tension between the traditional (tribal council) and modern (legalized) land use management systems. There is also several competing land claims in the area, which have not been resolved by the Department of Rural Development and Land Reform (DRDLR) as yet. Finally, as the Sekhukhune economy boom, there is likely to be competing land demands by the different economic sectors. If the district population grows in response to this foreseen economic boom, domestic demand for (commercial and residential) land will become a competitor in this arena as well.

#### 2.3.10. Challenges

Land ownership patterns are one of the biggest development challenges facing Sekhukhune. Without a resolution of this issue, most socio-economic activities in the district will continue to be thwarted.

The Traditional Leadership and Governance Framework Act 41 of 2003 are in operation and have been implemented in Limpopo Province. The Act has enabled the MEC for CoGHSTA to appoint representatives of the Traditional Leaders in the jurisdiction of the SDM to participate in the SDM Council as provided for in the Systems Act.

Land administration remains a bone of contention between the traditional and the municipal administrations. Land administration needs to be addressed as a matter of urgency for effective development of rural communities. All Local Municipalities remain with a challenge of land allocation for either residential or development priorities because traditional leadership are also having the responsibilities of allocating sites to residents. Traditional leaders allocate sites without engaging the Municipalities to ascertain issues relating to township establishment and land development requirements. Fetakgomo Local Municipality is the case in point that needs to be addressed to effect development. The District, Local municipalities and traditional leadership should devise a system of engagement and cooperation to address some of these challenges.

More specifically, the key land use challenges are:

- Uncertainty about the status of land ownership especially with reference to state and tribal land prohibits future development and investments.
- Unresolved and competing land claims in the area threaten to destabilize future development.
- Increasing number of Informal settlements and housing backlog as mining and agriculture activities intensify
- Competing land uses (i.e. mining and agriculture, Commercial, etc.) may cause spatial, social, environmental and economic constraints in future.
- Lack of environmental management
- Communal land use management
- Sprawled development
- Some nodal points like Jane Furse have not yet been planned and proclaimed thereby limiting the growth potential of the node.
- Water scarcity is a huge development challenge and represents a constraint to both economic and social activity within the district. Water requirements for development (especially agriculture, mining and rural areas) are placing severe stress on the available water supply.

#### 2.4. LOCAL ECONOMIC DEVELOPMENT

Economic growth is one of the main indicators of a progressing and developing district. The main sectors of Sekhukhune District that contribute to the growth of the economy in the district are Agriculture, Mining and Community Services. Mining is the biggest contributor in the economy of the district.

The attainment of the vision set out in this IDP will ultimately be determined by the state of the Sekhukhune economy. This section turns its lens on the principal characteristics of the Sekhukhune economy more specifically. It identifies the municipal economy's main features and describes its dominant sectors. It is therefore an important profile that plays a substantial role in defining the development strategies, projects and overarching socio-economic plans of the Sekhukhune Municipality.

The Sekhukhune economy is a curious mixture of overwhelmingly negative features (such as the highest unemployment rate in Limpopo) and positive opportunities (like the enormous mining potential within the area). Plotting an economic development path therefore requires a careful assessment of the current economic reality in the district. Integrating sustainable development into the current municipal plans to ensure the triple bottom line (people, planet, profit) is accomplished.

#### 2.4.1. Unemployment

The table below depicts unemployment trends in Sekhukhune District from 2012 to 2022 and also in comparison to Limpopo Province and the National total.

Table 20: Unemployment (official definition) - Sekhukhune, Limpopo and National Total, 2012-2022 [Number percentage]

|           | Sekhukhune            | Limpopo | National<br>Total | Sekhukhune as % of Province | Sekhukhune as<br>% of National |
|-----------|-----------------------|---------|-------------------|-----------------------------|--------------------------------|
| 2012      | 65,100                | 261,000 | 4,700,000         | 25.0%                       | 1.38%                          |
| 2013      | 64,300                | 253,000 | 4,850,000         | 25.4%                       | 1.32%                          |
| 2014      | 66,300                | 257,000 | 5,060,000         | 25.7%                       | 1.31%                          |
| 2015      | 73,800                | 284,000 | 5,300,000         | 26.0%                       | 1.39%                          |
| 2016      | 86,100                | 321,000 | 5,670,000         | 26.8%                       | 1.52%                          |
| 2017      | 92,200                | 339,000 | 5,990,000         | 27.2%                       | 1.54%                          |
| 2018      | 94,200                | 340,000 | 6,100,000         | 27.7%                       | 1.55%                          |
| 2019      | 105,000               | 373,000 | 6,450,000         | 28.0%                       | 1.62%                          |
| 2020      | 123,000               | 433,000 | 6,710,000         | 28.5%                       | 1.84%                          |
| 2021      | 155,000               | 539,000 | 7,470,000         | 28.7%                       | 2.07%                          |
| 2022      | 176,000               | 613,000 | 7,810,000         | 28.6%                       | 2.25%                          |
|           | Average Annual growth |         |                   |                             |                                |
| 2012-2022 | 10.44%                | 8.93%   | 5.21%             |                             |                                |

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global.

In 2022, there were a total number of 176 000 people unemployed in Sekhukhune, which is an increase of 110 000 from 65 100 in 2012. The total number of unemployed people within Sekhukhune constitutes 28.63% of the total number of unemployed people in Limpopo Province. The Sekhukhune District Municipality experienced an average annual increase of 10.44% in the number of unemployed people, which is worse than that of the Limpopo Province which had an average annual increase in unemployment of 8.93%.

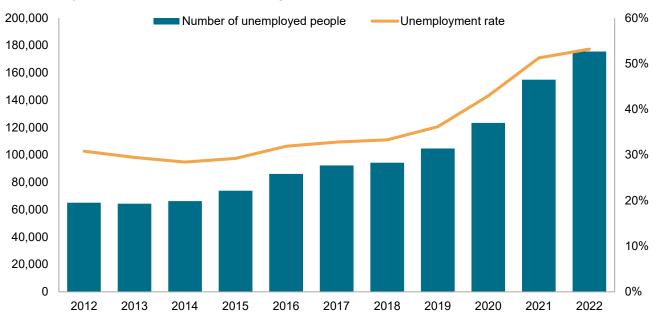

Table 21: Unemployment rate (official definition) - Sekhukhune, Limpopo and National Total, 2012-2022 [Percentage]

|      | SEKHUKHUNE | LIMPOPO | NATIONAL TOTAL |
|------|------------|---------|----------------|
| 2012 | 30.8%      | 20.8%   | 25.1%          |
| 2013 | 29.4%      | 19.3%   | 25.2%          |
| 2014 | 28.4%      | 18.2%   | 25.2%          |
| 2015 | 29.2%      | 18.6%   | 25.5%          |
| 2016 | 31.9%      | 19.7%   | 26.4%          |
| 2017 | 32.8%      | 20.0%   | 27.2%          |

|      | SEKHUKHUNE | LIMPOPO | NATIONAL TOTAL |
|------|------------|---------|----------------|
| 2018 | 33.3%      | 19.7%   | 27.4%          |
| 2019 | 36.2%      | 21.3%   | 28.4%          |
| 2020 | 42.9%      | 25.3%   | 30.3%          |
| 2021 | 51.2%      | 30.8%   | 33.6%          |
| 2022 | 53.2%      | 32.6%   | 33.8%          |

In 2022, the unemployment rate in Sekhukhune District Municipality (based on the official definition of unemployment) was 53.21%, which is an increase of 22.4 percentage points. The unemployment rate in Sekhukhune District Municipality is higher than that of Limpopo. The unemployment rate for South Africa was 33.77% in 2022, which is a increase of -8.63 percentage points from 25.15% in 2012.

## **Gross Domestic Product (GDP)**

The Gross Domestic Product (GDP), an important indicator of economic performance, is used to compare economies and economic states. Gross Domestic Product by Region (GDP-R) represents the value of all goods and services produced within a region, over a period of one year, plus taxes and minus subsidies.

Table 22: Gross domestic product (GDP) - Sekhukhune, Limpopo and National Total, 2012-2022 [R billions, Current prices]

|      | Sekhukhune | Limpopo | National<br>Total | Sekhukhune as % of province | Sekhukhune as % of national |
|------|------------|---------|-------------------|-----------------------------|-----------------------------|
| 2012 | 29.2       | 260.2   | 3,566.4           | 11.2%                       | 0.82%                       |
| 2013 | 31.3       | 281.7   | 3,868.6           | 11.1%                       | 0.81%                       |

In 2022, the Sekhukhune District Municipality achieved an annual growth rate of -0.51% which is a significantly lower GDP growth than the Limpopo Province's 0.97%, and is lower than that of South Africa, where the 2022 GDP growth rate was 1.91%. Similar to the short-term growth rate of 2022, the longer-term average growth rate for Sekhukhune (-0.42%) is also significantly lower than that of South Africa (0.92%). The economic growth in Sekhukhune peaked in 2021 at 4.72%.

Figure 20: Gross domestic product (GDP) - Sekhukhune District Municipality and the rest of Limpopo, 2022 [Percentage]

The Sekhukhune District Municipality had a total GDP of R 53.9 billion and in terms of total contribution towards Limpopo Province the Sekhukhune District Municipality ranked lowest relative to all the regional economies to total Limpopo Province GDP. This ranking in terms of size compared to other regions of Sekhukhune remained the same since 2012. In terms of its share, it was in 2022 (10.5%) slightly smaller compared to what it was in 2012 (11.2%). For the period 2012 to 2022, the average annual growth rate of -0.4% of Sekhukhune was the fourth relative to its peers in terms of growth in constant 2010 prices.

Elias Motsoaledi had the highest average annual economic growth, averaging 1.27% between 2012 and 2022, when compared to the rest of the regions within the Sekhukhune District Municipality. The Ephraim Mogale Local Municipality had the second highest average annual growth rate of 0.96%. Fetakgomo Tubatse Local Municipality had the lowest average annual growth rate of -2.40% between 2012 and 2022.

Figure 21: GDP contribution - local municipalities of Sekhukhune District Municipality, 2022 [Current prices, percentage]

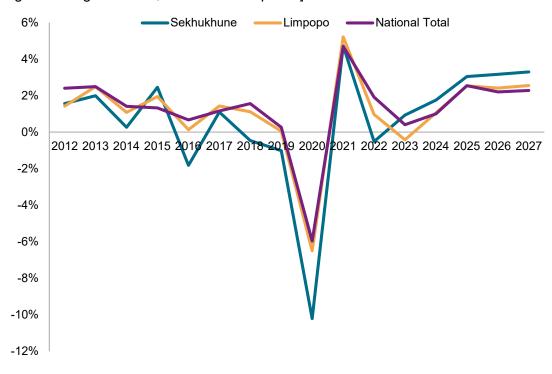

The greatest contributor to the Sekhukhune District Municipality economy is the Fetakgomo Tubatse Local Municipality with a share of 40.21% or R 21.7 billion, increasing from R 12.9 billion in 2012. The economy with the lowest contribution is the Ephraim Mogale Local Municipality with R 6.11 billion growing from R 3.1 billion in 2012.

# **Economic growth forecast**

It is expected that Sekhukhune District Municipality will grow at an average annual rate of 2.43% from 2022 to 2027. The average annual growth rate of Limpopo Province and South Africa is expected to grow at 1.61% and 1.68% respectively.

Figure 22: Gross domestic product (GDP) - Sekhukhune, Limpopo and National Total, 2012-2027 [Average annual growth rate, constant 2010 prices]

Source: South Africa Regional eXplorer v2423.Data compiled on 10 Oct 2023. © 2023 S&P Global.

In 2027, Sekhukhune's forecasted GDP will be an estimated R 35.7 billion (constant 2010 prices) or 10.1% of the total GDP of Limpopo Province. The ranking in terms of size of the Sekhukhune District Municipality will remain the same between 2022 and 2027, with a contribution to the Limpopo Province GDP of 10.1% in 2027 compared to the 9.7% in 2022. At a 2.43% average annual GDP

growth rate between 2022 and 2027, Sekhukhune ranked the highest compared to the other regional economies.

| Fetakgomo Tubatse | 34.65                       | 43.93%                         | 10.77                        | 12.89                        | 3.67%                       |
| Sekhukhune        | 78.89                       |                                | 31.69                        | 35.73                        |                             |

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global.

When looking at the regions within the Sekhukhune District Municipality it is expected that from 2022 to 2027 Fetakgomo Tubatse Local Municipality will achieve the highest average annual growth rate of 3.67%. The region that is expected to achieve the second highest average annual growth rate is that of Elias Motsoaledi Local Municipality, averaging 1.91% between 2022 and 2027. On the other hand the region that performed the poorest relative to the other regions within Sekhukhune District Municipality was the Makhuduthamaga Local Municipality with an average annual growth rate of 1.49%.

## Gross value added by region (GVA-R)

The Sekhukhune District Municipality's economy is made up of various industries. The GVA-R variable provides a sector breakdown, where each sector is measured in terms of its *value added* produced in the local economy. Gross value added (GVA) is a measure of output (total production) of a region in terms of the value that was created within that region. GVA can be broken down into various production sectors.

The summary table below puts the Gross Value Added (GVA) of all the regions in perspective to that of the Sekhukhune District Municipality.

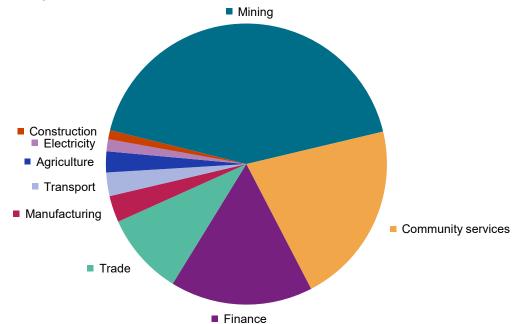

Table 26: Gross value added (GVA) by broad economic sector - Sekhukhune District Municipality. 2022 [R billions, current prices]

|                     | Sekhukhune | Limpopo | National<br>Total | Sekhukhune<br>as % of<br>province | Sekhukhune<br>as % of<br>national |
|---------------------|------------|---------|-------------------|-----------------------------------|-----------------------------------|
| Agriculture         | 1.2        | 15.2    | 187.6             | 7.8%                              | 0.63%                             |
| Mining              | 20.8       | 117.3   | 483.3             | 17.8%                             | 4.31%                             |

In 2022, the mining sector is the largest within Sekhukhune District Municipality accounting for R 20.8 billion or 42.4% of the total GVA in the district municipality's economy. The sector that contributes the second most to the GVA of the Sekhukhune District Municipality is the community services sector at 21.1%, followed by the finance sector with 16.4%. The sector that contributes the least to the economy of Sekhukhune District Municipality is the construction sector with a contribution of R 514 million or 1.05% of the total GVA.

Figure 22: Gross value added (GVA) by broad economic sector - Sekhukhune District Municipality, 2022 [percentage composition]

The community sector, which includes the government services, is generally a large contributor towards GVA in smaller and more rural local municipalities. When looking at the regions within the district municipality, the Elias Motsoaledi Local Municipality made the largest contribution to the community services sector at 47.29% of the district municipality. As a whole, the Elias Motsoaledi Local Municipality contributed R 15.6 billion or 31.79% to the GVA of the Sekhukhune District Municipality. The region within Sekhukhune District Municipality that contributes the most to the GVA of the district municipality was the Fetakgomo Tubatse Local Municipality with a total of R 20.5 billion or 41.74%.

## **Historical Economic Growth**

For the period 2022 and 2012, the GVA in the agriculture sector had the highest average annual growth rate in Sekhukhune at 5.46%. The industry with the second highest average annual growth rate is the finance sector averaging at 2.91% per year. The electricity sector had an average annual growth rate of -4.00%, while the construction sector had the lowest average annual growth of -4.71%. Overall a negative growth existed for all the industries in 2022 with an annual growth rate of -0.22% since 2021.

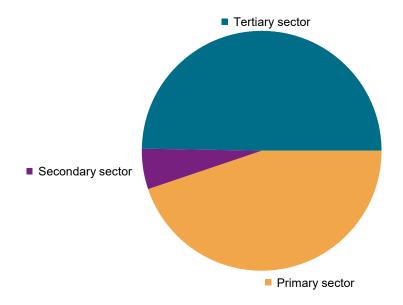

Table 27: Gross value added (GVA) by broad economic sector - Sekhukhune District Municipality, 2012, 2017 and 2022 [R billions, 2010 constant prices]

|                    | 2012  | 2017  | 2022  | Average Annual growth |
|--------------------|-------|-------|-------|-----------------------|
| Agriculture        | 0.56  | 0.76  | 0.95  | <b>5.46</b> %         |
| Mining             | 9.21  | 10.02 | 8.64  | <i>-0.63</i> %        |
| Manufacturing      | 1.18  | 1.12  | 0.97  | -1.95%                |
| Electricity        | 0.51  | 0.42  | 0.34  | -4.00%                |
| Construction       | 0.57  | 0.54  | 0.35  | <i>-4.71</i> %        |
| Trade              | 3.88  | 3.70  | 2.92  | -2.78%                |
| Transport          | 1.14  | 1.20  | 1.10  | <i>-0.33</i> %        |
| Finance            | 4.76  | 5.35  | 6.34  | 2.91%                 |
| Community services | 8.20  | 8.03  | 7.28  | -1.19%                |
| Total Industries   | 30.00 | 31.12 | 28.90 | -0.37%                |

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global

The tertiary sector contributes the most to the Gross Value Added within the Sekhukhune District Municipality at 49.7%. This is significantly lower than the national economy (69.4%). The primary sector contributed a total of 44.8% (ranking second), while the secondary sector contributed the least at 5.5%.

Figure 23: Gross value added (GVA) by aggregate economic sector - Sekhukhune District Municipality, 2022 [percentage]

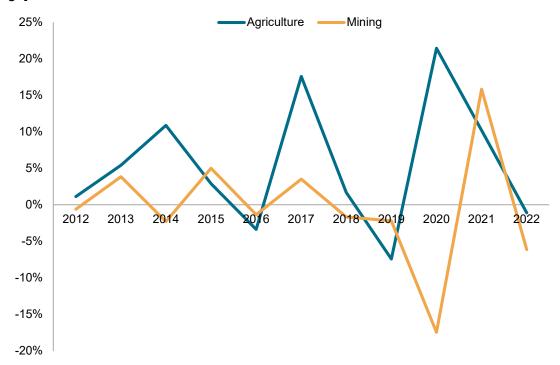

The following is a breakdown of the Gross Value Added (GVA) by aggregated sector:

#### **PRIMARY SECTOR**

The primary sector consists of two broad economic sectors namely the mining and the agricultural sector. The following chart represents the average growth rate in the GVA for both of these sectors in Sekhukhune District Municipality from 2012 to 2022.

Figure 24: Gross value added (GVA) by primary sector - Sekhukhune, 2012-2022 [Annual percentage change]

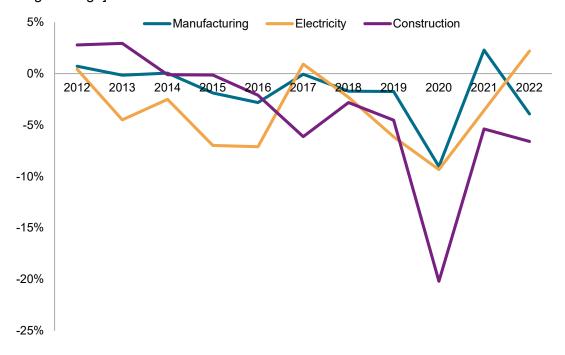

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global

Between 2012 and 2022, the agriculture sector experienced the highest positive growth in 2020 with an average growth rate of 21.4%. The mining sector reached its highest point of growth of 15.8% in 2021. The agricultural sector experienced the lowest growth for the period during 2019 at -7.4%, while the mining sector reaching its lowest point of growth in 2020 at -17.4%. Both the agriculture and mining sectors are generally characterised by volatility in growth over the period.

#### **SECONDARY SECTOR**

The secondary sector consists of three broad economic sectors namely the manufacturing, electricity and the construction sector. The following chart represents the average growth rates in the GVA for these sectors in Sekhukhune District Municipality from 2012 to 2022.

Figure 25: Gross value added (GVA) by secondary sector - Sekhukhune, 2012-2022 [Annual percentage change]

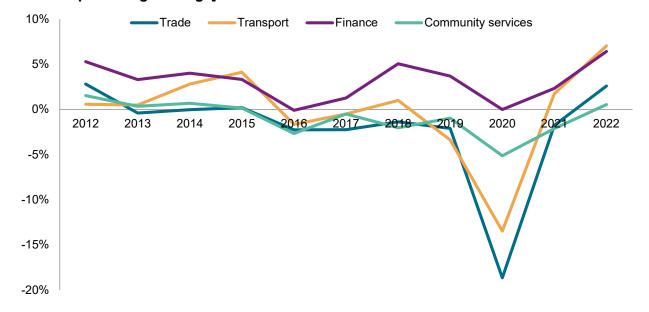

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global

Between 2012 and 2022, the manufacturing sector experienced the highest positive growth in 2021 with a growth rate of 2.3%. The construction sector reached its highest growth in 2013 at 2.9%. The manufacturing sector experienced its lowest growth in 2020 of -9.0%, while construction sector also had the lowest growth rate in 2020 and it experiences a negative growth rate of -20.2% which is higher growth rate than that of the manufacturing sector. The electricity sector experienced the highest growth in 2022 at 2.2%, while it recorded the lowest growth of -9.3% in 2020.

#### **TERTIARY SECTOR**

The tertiary sector consists of four broad economic sectors namely the trade, transport, finance and the community services sector. The following chart represents the average growth rates in the GVA for these sectors in Sekhukhune District Municipality from 2012 to 2022.

Figure 26: Gross value added (GVA) by tertiary sector - Sekhukhune, 2012-2022 [Annual percentage change]

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global

The trade sector experienced the highest positive growth in 2012 with a growth rate of 2.8%. The transport sector reached its highest point of growth in 2022 at 7.0%. The finance sector experienced the highest growth rate in 2022 when it grew by 6.4% and recorded the lowest growth rate in 2016 at -0.1%. The Trade sector had the lowest growth rate in 2020 at -18.6%. The community services sector, which largely consists of government, experienced its highest positive growth in 2012 with 1.5% and the lowest growth rate in 2020 with -5.1%.

## **Sector growth forecast**

The GVA forecasts are based on forecasted growth rates derived from two sources: historical growth rate estimates and national level industry forecasts. The projections are therefore partly based on the notion that regions that have performed well in the recent past are likely to continue performing well (and vice versa) and partly on the notion that those regions that have prominent sectors that are forecast to grow rapidly in the national economy (e.g. finance and telecommunications) are likely to perform well (and vice versa). As the target year moves further from the base year (2010) so the emphasis moves from historical growth rates to national-level industry growth rates.

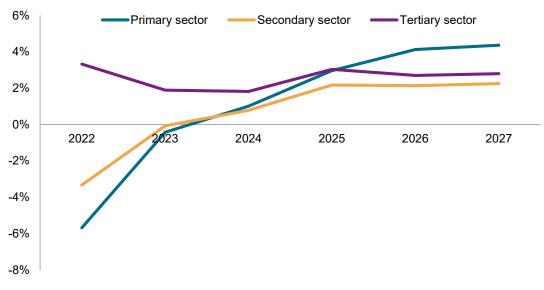

Table 28: Gross value added (GVA) by broad economic sector - Sekhukhune District Municipality, 2022-2027 [R billions, constant 2010 prices]

|                         | 2022  | 2023  | 2024  | 2025  | 2026  | 2027  | Average<br>Annual<br>growth |
|-------------------------|-------|-------|-------|-------|-------|-------|-----------------------------|
| Agriculture             | 0.95  | 0.99  | 0.99  | 1.00  | 1.01  | 1.02  | 1.57%                       |
| Mining                  | 8.64  | 8.56  | 8.66  | 8.93  | 9.33  | 9.77  | 2.48%                       |
| Manufacturing           | 0.97  | 0.98  | 0.98  | 1.00  | 1.02  | 1.03  | 1.28%                       |
| Electricity             | 0.34  | 0.34  | 0.34  | 0.34  | 0.35  | 0.36  | 1.01%                       |
| Construction            | 0.35  | 0.35  | 0.36  | 0.37  | 0.38  | 0.39  | 2.34%                       |
| Trade                   | 2.92  | 2.92  | 2.97  | 3.06  | 3.09  | 3.12  | 1.30%                       |
| Transport               | 1.10  | 1.13  | 1.15  | 1.19  | 1.22  | 1.26  | 2.81%                       |
| Finance                 | 6.34  | 6.64  | 6.87  | 7.19  | 7.48  | 7.77  | 4.15%                       |
| Community               | 7.28  | 7.29  | 7.32  | 7.42  | 7.57  | 7.76  | 1.29%                       |
| services                |       |       |       |       |       |       |                             |
| <b>Total Industries</b> | 28.90 | 29.19 | 29.63 | 30.50 | 31.46 | 32.49 | 2.37%                       |

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global

The finance sector is expected to grow fastest at an average of 4.15% annually from R 6.34 billion in Sekhukhune District Municipality to R7.77 billion in 2027. The mining sector is estimated to be the largest sector within the Sekhukhune District Municipality in 2027, with a total share of 30.1% of the total GVA (as measured in current prices), growing at an average annual rate of 2.5%. The sector that is estimated to grow the slowest is the electricity sector with an average annual growth rate of 1.01%.

Figure 26: Gross value added (GVA) by aggregate economic sector - Sekhukhune District Municipality, 2022-2027 [Annual growth rate, constant 2010 prices]

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global

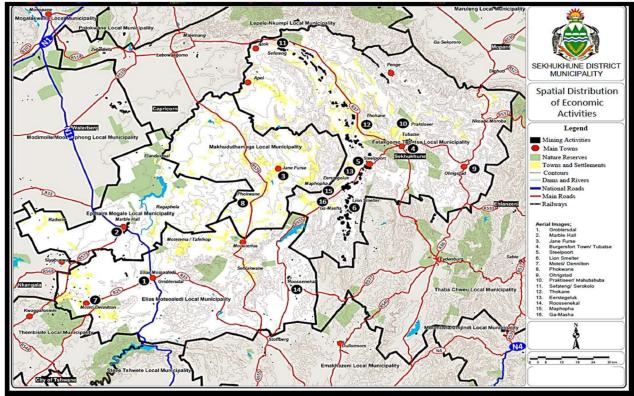

The Primary sector is expected to grow at an average annual rate of 2.39% between 2022 and 2027, with the Secondary sector growing at 1.45% on average annually. The Tertiary sector is expected to grow at an average annual rate of 2.45% for the same period.

### **2.4.2.** Mining

SDM mining cuts across the north-eastern part of the Bushveld Complex, an immense geological structure that contains the largest reserves of platinum group metals (PGM) in the world, of which the platinum group is a family of 6 metals which entail platinum, palladium, rhodium, iridium, osmium, and ruthenium. In SDM the mining sector is dominant in the Burgersfort area were Fetakgomo Tubatse Local Municipality seats. Mining is the economic lifeblood of the area as the sector accounts for 34.5% of the municipality's total GVA and 55% of the municipality's total labour force are traced to the mining sector. In Ephraim Mogale limestone/dolomite are mined in the area, of which limestone and dolomite products are used in five principal industries in South Africa: cement manufacturing, metallurgy (steel refining), agriculture (fertilizers, fungicides, and animal feed), aggregate and lime manufacture.

The mining value chain consists primarily of exploration, extraction, mining, processing, refining, fabrication, and production stages. Sekhukhune District mining participates mostly in the extraction stage and very limited processing operations. Minerals and potential jobs are exported for beneficiation to overseas companies and very little beneficiation in the district and in South Africa as a whole. In order to benefit sustainably on its mineral resources, the district will need to develop its industrial capabilities in the value-creation stages of its core mineral endowments.

For other minerals such as limestone and dolomite, they include construction (mortar, whitewash, building stone) and manufacturing (glass, water treatment, food and rayon processing, papermaking, leather, explosives, coal dusting, flue gas desulphurization, adhesives, insulation, and pH control). In the Burgersfort area site, chromite, and platinum deposits from the Merensky Reef are mined in the town. Furthermore, the District features the world's largest deposit of the platinum group metals (PGMs). Figure 35 provides an illustration of the mining value chain. Map 12 provides the spatial distribution of mining activities in SDM.

Map 05: Spatial Distribution of Mining Activities in SDM

Source: (SDM Spatial Development Framework, 2018)

Map 12 provides a spatial analysis of the mining belt activities that are mostly located on the eastern side of the district municipality. However, on the western side of the municipality mining activities do take place in Elias Motsoaledi and Ephraim Mogale though it is not competitive compared to the eastern side of the municipality.

Opportunities exist for the small businesses within the district. It is vital that they be supported by being linked to the mining value chain for business development. Mining houses and the local hotel industry require catering services (which again links with agricultural development because local farms could supply fresh vegetables and meat), cleaning services, and repairing of machinery. Manufactured inputs could also be supplied to the mines and the industry at large, thereby growing the district's manufacturing capability. Strengthening initiatives like Enterprise and Supplier Development will build economic and business capacity of the SMMEs within the district.

Although mining is such a large economic contributor within the district, its future needs to be considered as this has significant implications on future settlement planning and investments. Building strong manufacturing base within the district is critical for future economic sustainability.

## **Key Mineral Deposits**

The following commodities are found in Sekhukhune District:

Table 29: Key Mineral Deposits

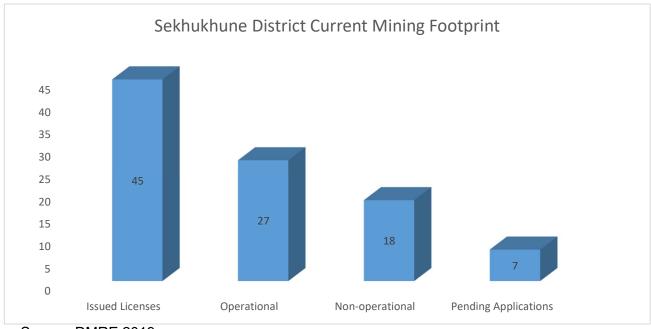

| Chrome dolomite |
|-----------------|
|                 |
| Dolomite        |
| Andalusite      |
| Granite         |
| Aggregate Stone |
| Cobalt          |
| Magnesite       |
| Titanium        |
| Magnetite       |
|                 |

Source: DMR 2019

## **Current Mining Activities**

The district's current mining footprint is based on a total of forty-five (45) issued licenses as per the Department of Mineral Resources and Energy, representing twenty-seven (27) operational mines and eighteen (18) mines non-operational due to commodity demand issues, unavailability of water and lack of off-take agreements for their commodities. In addition to the non-operational mines listed, there is total of thirteen (7) pending applications.

# **Future Mining Developments**

Despite the abundance of mineral deposits, the district seems not to be receiving a major investment appetite which may be attributable to a number of factors. A summary of mining license applications to-date indicates seven (7) pending applications which demonstrates a lower investment appetite facing the district as compared to other districts in Limpopo province. New mining license applications focus on the following minerals: chrome (2); PGM's (3); dimension stone (1); and aggregate, calcite, dolomite limestone (1).

# 2.4.3. Fetakgomo Tubatse Special Economic Zone:

Special Economic Zones (SEZs) within South Africa are geographically designated areas set aside for specifically targeted economic activities to promote national economic growth and exports by using support measures to attract foreign and domestic investments and technology. Policy makers seek to develop SEZs with the aim of attracting foreign direct investment, achieving higher exports, creating jobs, encourage skills development, SMME capacitation, harnessing the development of infrastructure, improving existing infrastructure and strengthening value chains.

In the case of the Fetakgomo Tubatse SEZ, a strong developmental rationale was emphasized by the Department of Trade, Industry and Competition (DTIC), which later culminated in the signing of a quadripartite agreement between the key development partners as a commitment to support the development of the SEZ. The agreement comprises of DTIC, Department of Economic Development, Environment and Tourism (LEDET), Sekhukhune District Municipality (SDM) and Fetakgomo Tubatse Local Municipality (FTLM) whose role is to ensure the development of the SEZ without fail.

Over and above the quadripartite agreement, Provincial Treasury has pledged their financial commitment towards the development of infrastructure for the SEZ, SDM has committed to fund the key infrastructure projects which are enablers to the successful implementation of the SEZ and the local municipality has also pledged their support through their Local Economic Development programmes and projects within the Municipality.

Partnerships with private sector through equity on land and assets as part of the first phase of the development has also enhanced the viability of the FTSEZ. A partnership with private sector is at an advanced stage, pending the finalisation of the transactional agreements where Fetakgomo Tubatse Industrial Park (FTIP) a subsidiary of LEDA which was registered to facilitate establishment of FTSEZ while waiting for SEZ designation, has in principle bought a going concern which translates into 51% of the currently existing land and assets.

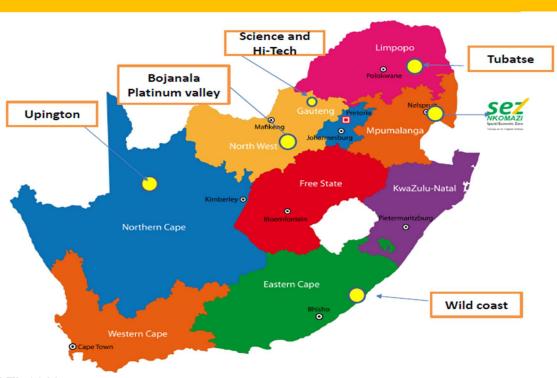

The proposed Fetakgomo-Tubatse SEZ is an industrial cluster initiative that falls within the planned Limpopo Platinum and Chrome cluster which has two components of industrial formations. This proposed SEZ will impact positively on more than a million people in the province due to improved economic activities within the Dilokong Spatial Economic Initiative as well as improving economic progress within other districts and municipalities. These economic activities will not only yield improvements of the wellbeing of provincial citizens, but will also contribute to the enhancement of requisite skills and of South Africa's role in regional integration.

The proposed FTSEZ is a key economic programme of the Limpopo Development Plan (LDP) designed to stimulate and propel industrialization, economic growth, and job creation. This proposed SEZ is strategically located in the industrial hub of the Steelpoort area, in-between 2 huge mining establishments, the Samancor smelter and the Lion Ferrochrome smelter, which are strategic landmarks for the establishment of the SEZ.

The **main objective** of this SEZ is to develop a low carbon green economy which will offer promising opportunities not only to fight climate change, but to enhance energy security and develop local industries. The strategic aim of the SEZ is to develop a green primary energy supply to a localized manufacturing of both upstream and downstream activities of the PGM and chrome value chains with a secondary backup from electricity.

PROPOSED SEZ UNDER CONSIDERATION

Map 06: Map showing proposed SEZs in South Africa

Source: DTI, 2018

## **Opportunities**

- Fetakgomo Tubatse will focus on the Platinum Group Metals (PGM) minerals group and related downstream opportunities, Agro-processing, automotives (electric vehicles and after-market), pharmaceuticals, clean energy production & distribution, and mining equipment manufacturing.
- It is thus envisaged that the Fetakgomo Tubatse SEZ will unlock economic opportunities, increase investor appetite, and create thousands of job opportunities in the Sekhukhune District.

There will also be a need to establish linkages between Fetakgomo Tubatse SEZ and Musina-Makhado SEZ particularly concerning the raw material that the metallurgical cluster will need. This has the potential to create transportation corridors linking the two SEZs, which will strengthen the integration between the Fetakgomo Tubatse SEZ and the Musina-Makhado SEZ.

# Strategic Implications, Challenges and Interventions

The mining and mineral beneficiation and processing offers key essential elements for mining and beneficiation which include economic linkages (backward linkages and forward linkages). These economic linkages have the potential to develop the mining sector by expanding on the supply and value chains during various stages of production. The mining and mineral beneficiation would then need to create a cocktail of economic incentives to lure mining houses to set-up ore beneficiation plants. Diversifying the local economy by focusing and directing investment in non-mining areas would be key to the district.

There is a need for effective activation and coordination of Social Labour Plans (SLPs) to ensure that sustainable infrastructure development and other essential services are provided thereby maximising investment promotion. A further key aspect would be to diversify the local economy by focusing and directing investment in non-mining areas within the district. Encouraging local ownership of strategic mining projects through the facilitation of joint venture agreements and consortiums between locals

and external investors would also be key within this industry. Furthermore, there is a need for engagement of local mining houses, local universities, and FETs to train local youths in mining-related courses.

There is a need to upgrade the existing 3 railway lines within the district. These three railway lines were originally developed to support the mining and agricultural activity within the district and have not yet been extended or re-routed to serve new mining operations (such as those along the Merensky Reef and Chrome layers) of which shortcomings in the railway network are resulting in extreme pressure being placed on the road network. Extending these lines will be essential considering new mining operations will be important considering the proposed SEZ in the area which is expected to be a game changer in the district.

Some of the factors that could affect Sekhukhune's mining sector negatively include drops in global demands for the minerals produced in the area, continued water scarcity in Sekhukhune and the increasing mechanization of platinum mining industry in the future. The latter will affect the potential employment opportunities generated by mining industry in Sekhukhune, regardless of whether the area contains significant mineral deposits or not.

The continued labour unrest within the mining sector, has been speculated to lower investor confidence in the mining industry. Further challenges are the illegal mining, poor mining beneficiation, community riots in mining, emerging and mushrooming local business forums and high unemployment rate. Currently, there isn't adequate training in relation to skills in the mining sector, hence the need for rehabilitation programmes to improve the level of skills and productivity in the district.

The skills development and industry support programme will enable a wide pool of artisans, chartered accountants, engineers, electricians, computer technicians, and social scientists etc. to be trained and fully equipped with information that would be of benefit to the economy in SDM. Furthermore, industry support through creating niche investment opportunities is expected to accelerate the participation of local SMME's in the industry thus enabling side-stream, upstream and downstream business opportunities.

The recent history of mining development in Limpopo has been affected by continuous conflicts mainly between the mining companies and communities within Sekhukhune Districts. In 2011 the provincial government mandated the Department of Economic Development, Environment and Tourism to develop and facilitate the Integrated Mining Development and Sustainability Framework that aimed at creating an inclusive economic growth amongst key stakeholders through creation of a mutually beneficial relationship by working together towards a common and shared vision. The implementation of this framework had since enhanced collaborative relationships between the government, mining companies and communities. The government continues, through the Limpopo Mining Forum to facilitate collaboration with mines and communities with mines committing to implement developmental projects in three work streams: Business and Industrialization; Skills Development and Employment Creation; and Community Development.

The province's mineral and mining value chains provide opportunities for local manufacturing, to deepen industrialization and enhance an inclusive economic development and the SEZ initiative will go a long towards achieving that. Through the government and mines collaboration, an upgrade of Malekana Steel Bridge in Fetakgomo Tubatse has been planned for a tune of R117m and the construction of the bridge is underway. The construction commenced on the 01st March 2023 and will run for 18 months with the anticipated completion date been 27th September 2024. The upgrading of the bridge will enhance transportation for economic purposes, especially the mining related activities.

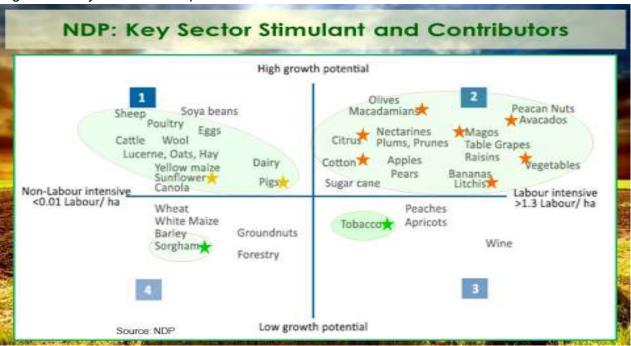

# 2.4.4. Agriculture

Sekhukhune District has a dual agricultural economy, with both large-scale commercial farming system and smallholder-based production system in the deep rural areas. The majority of the disadvantaged farmers within the district are not part of the mainstream agriculture and practice under a small size of farm holding in overcrowded and semi-arid areas. This kind of farming is characterized by low production, poor access to land and poor access to inputs and most importantly poor access to credit.

The Gross Value Added (GVA) of agriculture sector in 2022 was 1.2% and 15.2% in the district and Limpopo Province, respectively. This sector, being an important base for economic growth and employment in the district, indicates a setback in terms of achieving the district economic growth and job creation.

### Commodities produced within the district

Figure 28: Key Commodities produced in the district

Source: Limpopo Dept. of Agriculture 2019

According to the above table, Sekhukhune District is suitable for the production of Maize, Sorghum, Dry Beans, Cotton, Citrus, Table grapes, Vegetables (Tomatoes), Poultry and Livestock. Commodities which have high value and labour intensive as stipulated in Quadrant 2 are vegetables, citrus, table grapes and cotton. These commodities can create most required jobs within the district as they are labour intensive.

Cattle and poultry as indicated in quadrant 1, have high growth but non-labour intensive. Livestock in the District is mainly done under extensive conditions in the communal areas hence there is over grazing as the farmer's overstock. Cattle also face a risk of disease out- break and theft as they are not kept in designated camps.

There is also a risk for inbreeding which affect quality of the breed and leads to low production. Livestock farmers sell their stock informally in the community during weddings, funerals and traditional ceremonies. Most of them cannot sell to formal markets such as abattoirs and auctions as the cattle are under-priced due to quality issues (old cattle).

Drought also affects cattle farmers negatively as most of them loose their stock during droughts. The Limpopo Department of Agriculture provides animal health advice and infrastructure support to livestock farmers within the district through vaccinations, dipping and monitoring movement of livestock to control diseases.

Small scale poultry farmers also sell their live chickens informally to community members. Approximately 06 Large scale broiler producers (who owns 40 0000 capacity houses) are currently contracted to Kroons abattoir in Pretoria as there is no abattoir that is operating in the district or nearby. The Department will continue to support smallholders with poultry houses to improve their production capacity and quality.

Maize and sorghum as indicated in quadrant 4, are low growth and non-labour intensive, and they are mainly produced for food security. Sekhukhune district is endowed with good soil and water which have a great potential to strengthen the agriculture sector. The nature of agricultural activities by small holder farmers indicates a diversity of production mainly confined to livestock, and major cropping in tobacco, wheat, cotton, soya beans, citrus, paprika, pumpkin, peas, vegetables, grains,

table grapes, dry beans, watermelons, Lucerne. The agricultural capability of the district is highly dependent on the availability and consistency of the supply of water.

Citrus is one of the commodities, which contributes to the economic growth of the district, as it is labour intensive and produced mostly by commercial farmers. The Department support small holder farmers who will want to venture into citrus production. Citrus Grower Association also support farmers through capacity building and development of business plans. Orchard establishment is very expensive; therefore, more funds are requested from other stakeholders to assist farmers. The Department has started with development of orchard for small scale farmers in the district in particular in Ephraim Mogale Local Municipality.

#### **Market opportunities**

### Vegetables

Shopping malls that are constructed in the district and outside serve as markets for fresh produce. Most of the vegetable projects sell their produce to nearby shopping malls such as Bopedi Plaza, Tubatse crossing mall, Moratiwa Plaza, Steelpoort Plaza and Jane Furse Plaza. The main shops that procure from local farmers are Spar and Pick n Pay in major towns and local malls. McCain Food Manufacturing also offer contracts to vegetable farmers who produce under irrigation as long as they are able to meet their requirements.

#### Cotton

The district is one of the main producers of cotton under dry land and irrigation, with irrigation resulting in higher yields. Cotton areas are Ephraim Mogale and Elias Motsoaledi. The areas are also strategically located closer to Loskop ginnery which acts as a market for cotton. Loskop ginnery sell inputs and offer technical advice to cotton farmers. Cotton is drought resistant and most small-scale farmers produce it under dry land due to lack of irrigation infrastructure.

Challenges encountered by farmers include high input costs as seeds and chemicals are expensive with Loskop Ginnery being the sole supplier. They (farmers) rely more on financial support from Government to augment their production expenses. All cotton producers sell their produce to Loskop Ginnery, and they get better income because they spend less on transport costs (delivery).

#### Grains

Farmers who produce grains mainly supply it to Blinkwater Mill in Middleburg for milling/ exchange for maize meal. Some who are closer to Polokwane used to supply to Progress Milling. Maize meal is a stable food so it means all households who plant maize/ sorghum under dry land through Fetsatlala program will want to mill their grains and this poses a reliable market for the Mill. This will be linked to the Agri -Park model which aims to create market for farmers and one of the processing facilities which will be constructed in the Agri-Hub is the milling-facility.

Irrigation schemes along Olifants will also serve as a market for the milling facility hence the need for their revitalization.

# **Agro-Processing**

Most farmers within the district sell their products as raw materials and they earn lower prices, so value adding, and processing initiatives will improve the farm income as processed products are sold at higher prices. Sekhukhune is producing grains such as maize and sorghum which are sold to Millers outside the District so an opportunity exists for a milling facility in the district.

Vegetable's producers require support in pack houses so that they can package and grade their products as required by other markets. Large scale Poultry producers (40 000 capacity houses) also require value adding facilities for their chickens as they are currently selling to Kroons abattoir in Brits. Lebowakgomo abattoir which is in Capricorn can also serve as a market for broiler projects, however it is not yet operational. An opportunity exists for development of a poultry abattoir in the

district as current broiler farmers are selling their chickens outside the province. The envisaged Agrihub will serve as agro-processing facility, which will assist farmers within the district once constructed.

#### **Challenges and Interventions**

Small holder farmers within the district are still experiencing different challenges that the Limpopo Growth and Development Strategy (LGDS) is trying to mitigate. Infrastructure and the scale of development is still not significant enough to sustain these smallholder farmers, in particular, youth and women who are marginalized by many development systems within the district. In order to ensure a value chain approach, a need to improve the irrigation infrastructure of identified farmers remains critical. There are some farmers who are still using farrow irrigation, which wastes water.

Access to the market is also one of the setbacks faced by farmers within the district. The market channels created in collaboration with white commercial farmers are also not yielding adequate results. The lack of transparency in the performance of produce in the market remain prevalence in the market chain. Proper institutionalization and capacitation of these farmers can result in a coordinated production system.

The Department of Agriculture in the Limpopo Province is assisting farmers to understand the concept of clustering the development which will in the long run increase production capacity and assist farmers to have buying power along the value-chain. Although this model is not yet popular within the district, it will assist farmers to influence the cost of production, which is increasing on a daily basis.

The climatic conditions of the district allow farmers to plant grains under dry land conditions, and they still manage to get yield to address food security. Crops such as maize, sorghum and dry beans are critical for food production and some improved livelihood. Cotton is also another important crop that is grown successfully under dry land in the district. It is mainly produced in Ephraim Mogale and Elias Motsoaledi and sold to Loskop Ginnery in Marble Hall.

GLOBALG A.

Figure 29: The following is a summary of key challenges within the district:

Summary of Challenges which affect the Agricultural sector within the district are as follows:

- Poor infrastructure (e.g. Irrigation systems, fences, contours, etc.).
- High input costs including electricity costs which are high due to Eskom price increase
- Market access, fluctuating market prices and farmers failing to meet some the set requirements due to economies of scale.
- Lack of value adding facilities and poor access roads also affect marketing and transportation of farm produce.
- Natural Disasters (floods, droughts, disease outbreaks) especially droughts which led to water shortage, drop in agricultural production and loss of livestock due to poor grazing.
- Diseases such as Foot and- mouth affect livestock negatively as export for beef is not allowed from South Africa during disease outbreak.

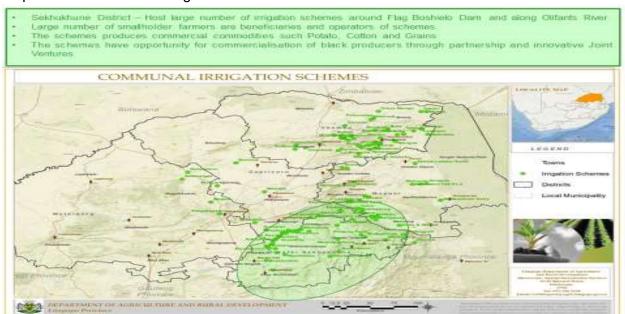

- Tedious application processes for water rights with Department of Water and Sanitation. The
  main water source in the district is the Oliphant River which only cater for few irrigation
  schemes as the water is also used for other purposes such as household and mining. DWS
  allocates less water for irrigation purposes as compared to household and mining.
- Lack of access to credit /capital. Farmers require capital for infrastructure and production inputs and most of them do not qualify for loans. They rely on grants from Government, which is limited, as such only few farmers are assisted.
- Limited technical and entrepreneurship skills. Most farmers require training and mentorship for proper farm management and marketing. This is aggravated by ageing and low literacy levels among farmers as this inhibit training.
- Conflicts among farmers and poor institutional arrangements which lead to discontinued production (fallow lands) and vandalism of infrastructure (e.g., Tswelopele irrigation scheme in Praktiseer).

## **Proposed solutions:**

- Continuous training and mentorship
- Limpopo Department of Agriculture offers technical advice to farmers and this will be more
  effective when coupled with mentorship from commercial farmers and commodity
  organizations. Tompi Seleka College of Agriculture continues to offer farmer training together
  with other Training and Research institutions such as Agricultural Research Council (ARC).
- There is a need for collaboration with stakeholders involved in training and capacity building as well as commercial farmers.
- Stakeholder involvements and collaboration in funding farmers.
- Government cannot fund the farmers alone. There is continuous need for funding from other
  institutions e.g., banks, funding institutions such as IDT, Land bank. There is a need for
  farmers to work and solve problems together as well as managing the projects effectively.
  These include their ability to safeguard the funded infrastructure.
- Explore other energy sources such as solar to reduce electricity costs.
   Eskom should advise farmers with efficient electricity usage and affordable electricity options according to the enterprise types and sizes.

# Strategic interventions

Map 07: Revitalization of irrigation schemes

The Oliphant's River act as the main water source for irrigation schemes situated in the lower and Upper Flag Boshielo dam. The district has seven (7) irrigation schemes which were established along the Olifants River covering a total of 2478 ha, owned by 989 farmers. Currently only 2 are operational and the other schemes are vandalised/underutilised. The total area of underutilised schemes is 2051 hectares.

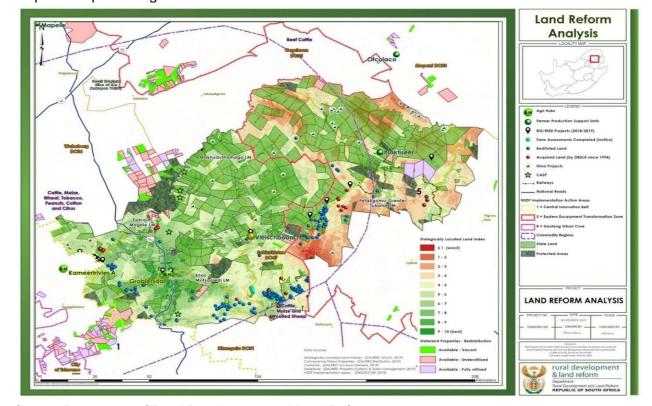

The priority of the district is to revitalise these schemes and to bring them back into production. In 2020 Mogalatjane irrigation scheme with a total of area of 132ha was revitalised with an estimated budget of R17.3 million.

The intention of the district is to ensure that all seven (7) irrigation schemes along the Olifants River are optimally utilised and are put back to production, ensuring that 2051ha is supported with infrastructure in the long term. The success of the envisaged projects depends on the collaboration and contribution from other stakeholders either offering material or non-material support. The irrigation schemes are mainly located in communal areas, so the involvement of Traditional leaders and councillors is very important.

Department of Rural Development and Land Reform (DRDLR) is the important stakeholder in the revitalization of these irrigation schemes. They have already funded some of the schemes with production inputs for cotton through One-Household-One Hector programme (1HH1H).

#### 2.4.5. Land Reform

There are various land reform initiatives in the area which include Agri Hub, Farmer Production Support Units, Farm Assessments, land Restitution and Land Acquisition.

Map 08: Map showing land Reform

Source: Department of Rural Development and Land Reform

A total of 622 565 ha of land is subject to land claims. This represents about 46% of the total area of the SDM. About 317 538 ha (56%) of the Fetakgomo Tubatse area is subject to land claims, followed by Makhuduthamaga with 165 666 ha (78%), Elias Motsoaledi with 8428 ha (23%) and Ephraim Mogale with 55 081 ha (27%).

Notably, there is a strong correlation between the land claimed and the land under 74 traditional authorities. The exception in this regard is the far-eastern extents of Elias Motsoaledi Municipality where there is a large cluster of claims between routes R579 and R555 on land which does not fall under traditional authority.

#### 2.4.6. Agri-Park

Agri Parks are areas designed for multiple activities that accommodate small farmers, commercial farmers, public area, processing area and natural habitat. They are aimed to allow small farmers access to local markets, provide fresh food and are an educational, environmental and aesthetic amenity for nearby communities. Agri-Parks are also aimed to put into effect the revitalization of

agriculture and Agro-processing value chain thereby generating growth and creating jobs. Furthermore, the programme is aimed at the eradication of rural poverty which is a critical challenge for the government. They are primarily on the processing of agricultural products, while the mix of 'non-agricultural' industries may be low or non-existent. They intend to provide a platform for networking between producers, markets, and processors, while also providing the physical infrastructure required for transforming industries.

The district is working with Department of Rural Development and Land Reform (DRDLR) on the Agri Park concept. DRDLR appointed a service provider Urban Econ to develop Agri Park Farmer Production Support Units (FPSU's) business cases. After extensive consultations with stakeholders and farmers business cases for Vleeschboom and Praktiseer were finalised in March 2017. Farmers together with Government stakeholders were asked to identify 4 FPSU sites in the district and Vleeschboom, Praktiseer, Marble Hall and Apel Gross were identified. 2 FPSU sites, Vleeschboom and Praktiseer were prioritised for development and Marble Hall and Apel Gross were parked for future development.

Elias Motsoaledi Local Municipality allocated 40 hectares of Portion 39 of Klipbank Farm 26JS for the Agri Park development. The site is reserved for establishment of Agri Hub which will serve the headquarters of the Sekhukhune Agri Park project.

### Notable achievements to-date

In terms of setting up the Vleesboom FPSU towards functionality, below is the progress. To-date phase one of the construction is complete, where the physical building is was completed in 2020. The building is now being utilised to conduct training, marketing awareness sessions, capacity building sessions, receive and dispatch of agricultural production inputs. Whereas, phase two has now commenced mainly on security upgrades, aesthetics and alternative power solutions.

Figure 33: Progress on the functionality of FPSU

Through the FPSU, over 604 jobs were created, about 526 beneficiaries were trained on various skills from agricultural to governance related, furthermore 3265.40 hectors of beneficiary enterprises benefited (2949 beneficiaries).

## Implications, key challenges and interventions

There is a need to add value to agricultural activities through establishing agricultural linkages, local manufacturing, and processing plants which utilise local raw materials and resources as primary inputs.

The processing of raw materials from agriculture products is essential for SDM in terms of expanding the manufacturing sector. The agglomeration of these activities can result in economies of scale that would increase both economic development and employment opportunities.

Agri-Park Linkages will assist the district by developing agro-processing capacity including supporting Department of Rural Development Agri Hubs and privately owned agro-processing facilities. They will enhance strategic development for the urban market centre and the development of strategic agro-processing sub-industries within the district.

Furthermore, the identification of strategic partners to assist with the funding and development of agriculture programmes could enhance agriculture production in the region. Additionally, developing incentives is also crucial towards fostering partnerships that are expected to uplift agriculture for the communities in the district.

The skills development and enhancement programme are necessary within the district as it will cover aspects such as incorporating youth into agriculture and enhancing hands-on and technical skills within the agriculture sector. SDM has a lot of agriculture but very few youths that are involved in the sector.

According to farmers in the area, the main reason why the sector doesn't contribute more to GDP is because of water scarcity. Other reasons could include the combined effects of land claims, which creates uncertainty and discourages further investments, as well as the low growth of global commodities.

The future of agriculture in Sekhukhune is however, impeded by a number of factors. These include water scarcity, distorted land ownership patterns, a growing number of land claims, infights between and within beneficiaries once funding is allocated, limited support services and inadequate infrastructure and services. The huge disparities between the commercial and subsistence farming worlds may also eventually cause some social tension.

The other area of potential tension lies in conflicting social and economic demands for water, an increasingly scarce resource in the district as well as inadequate investments for farming district.

Despite these potential difficulties, opportunities abound for agriculture in Sekhukhune, and the sector is likely to play a dominant role in the district's strategic plans and strategies

#### 2.4.7. **Tourism**

The National Development Plan (NDP) recognises tourism as one of the main drivers of employment and economic growth in South Africa. This is further embedded in the constitution where tourism is listed as a functional area of concurrent national and provincial legislative competence. The tourism sector is one of the low hanging fruits that draws a lot of foreign currency to South Africa. Tourism in Limpopo has been identified as a sector with a very strong competitive advantage in ecotourism linked to wildlife, culture and vast landscapes. Sekhukhune District hosts the scenic Flag Boshielo Dam area, the adjoining Schuinsdraai Nature Reserve, Potlake Nature Reserve, and the Maleoskop Resort and Conservancy.

#### **Sekhukhune District Tourism Sector**

Tourism can be defined as the non-commercial organisation plus operation of vacations and visits to a place of interest. Whether you visit a relative or friend, travel for business purposes, go on holiday or on medical and religious trips - these are all included in tourism.

# Trips by purpose of trips

As defined by the United Nations World Tourism Organisation (UN WTO), a trip refers to travel, by a person, from the time they leave their usual residence until they return to that residence. This is usually referred to as a round trip. S&P Global likes to narrow this definition down to overnight trips only, and only those made by adult visitors (over 18 years). Also note that the number of "person" trips are measured, not household or "party trips".

The main purpose for an overnight trip is grouped into these categories:

- Leisure / Holiday
- Business
- Visits to friends and relatives
- Other (Medical, Religious, etc.)

Table 31: Number of trips by purpose of trips - Sekhukhune District Municipality, 2012-2022 [Number Percentage]

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global

In Sekhukhune District Municipality, the Leisure / Holiday, relative to the other tourism, recorded the highest average annual growth rate from 2012 (94 400) to 2022 (105 000) at 1.08%. Visits to friends and relatives recorded the highest number of visits in 2022 at 456 000, with an average annual growth rate of -6.43%. The tourism type that recorded the lowest growth was Visits to friends and relatives tourism with an average annual growth rate of -6.43% from 2012 (886 000) to 2022 (456 000).

Visits to friends and relatives
 Other (Medical, Religious, etc)
 Business

Figure 31: Trips by purpose of trip - Sekhukhune District Municipality, 2022 [Percentage]

The Visits to friends and relatives at 70.26% has largest share the total tourism within Sekhukhune District Municipality. Leisure / Holiday tourism had the second highest share at 16.21%, followed by Business tourism at 8.56% and the Other (Medical, Religious, etc) tourism with the smallest share of 4.97% of the total tourism within Sekhukhune District Municipality.

# **Origin of tourists**

In the following table, the number of tourists that visited Sekhukhune District Municipality from both domestic origins, as well as those coming from international places, are listed.

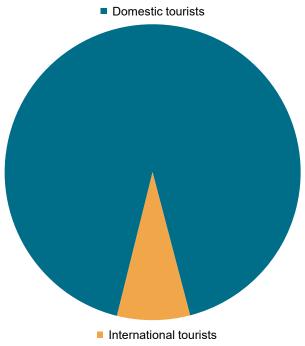

Table 32: Total number of trips by origin tourists - Sekhukhune District Municipality, 2012-2022 [Number]

|                       | Domestic tourists | International tourists | Total tourists |  |  |  |
|-----------------------|-------------------|------------------------|----------------|--|--|--|
| 2012                  | 1,010,000         | 83,700                 | 1,090,000      |  |  |  |
| 2013                  | 1,040,000         | 92,400                 | 1,130,000      |  |  |  |

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global.

The number of trips by tourists visiting Sekhukhune District Municipality from other regions in South Africa has decreased at an average annual rate of -5.09% from 2012 (1.01 million) to 2022 (597 000). The tourists visiting from other countries decreased at an average annual growth rate of -4.70% (from 83 700 in 2012 to 51 700). International tourists constitute 7.98% of the total number of trips, with domestic tourism representing the balance of 92.02%.

Figure 32: Tourists by origin - Sekhukhune District Municipality, 2022 [Percentage]

# Bed nights by origin of tourist

A bed night is the industry measurement of one night away from home on a single person trip. The following is a summary of the number of bed nights spent by domestic and international tourist within Sekhukhune District Municipality between 2012 and 2022.

Table 33: Bed nights by origin of tourist - Sekhukhune District Municipality, 2012-2022 [Number]

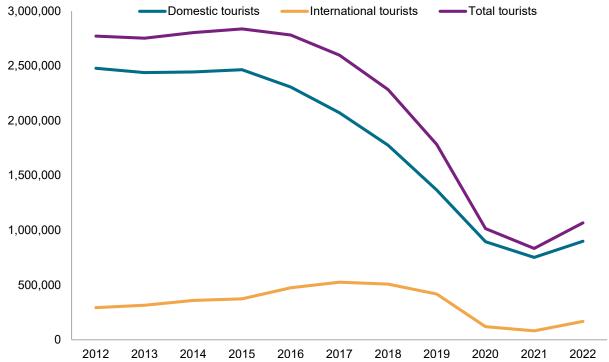

|                       | Domestic tourists | International tourists | Total tourists |  |  |  |
|-----------------------|-------------------|------------------------|----------------|--|--|--|
| 2012                  | 2,480,000         | 293,000                | 2,770,000      |  |  |  |
| 2013                  | 2,440,000         | 315,000                | 2,750,000      |  |  |  |
| 2014                  | 2,440,000         | 359,000                | 2,800,000      |  |  |  |
| 2015                  | 2,460,000         | 373,000                | 2,840,000      |  |  |  |
| 2016                  | 2,310,000         | 474,000                | 2,780,000      |  |  |  |
| 2017                  | 2,070,000         | 526,000                | 2,600,000      |  |  |  |
| 2018                  | 1,770,000         | 508,000                | 2,280,000      |  |  |  |

3,000,000 — Domestic tourists — International tourists — Total tourists

# **Tourism spending**

In their Tourism Satellite Account, STATSSA defines tourism spending as all expenditure by visitors for their trip to the particular region. This excludes capital expenditure as well as the shopping expenditure of traders (called shuttle trade). The amounts are presented in current prices, meaning that inflation has not been considered.

It is important to note that this type of spending differs from the concept of contribution to GDP. Tourism spending merely represents a nominal spend of trips made to each region.

Table 34: Total tourism spending - Sekhukhune, Limpopo and National Total, 2012-2022 [R billions, Current Prices]

|                       | Sekhukhune | Limpopo | National Total |  |  |
|-----------------------|------------|---------|----------------|--|--|
| 2012                  | 1.7        | 17.0    | 229.8          |  |  |
| 2013                  | 1.9        | 18.9    | 253.3          |  |  |
| 2014                  | 2.1        | 20.9    | 275.4          |  |  |
| 2015                  | 2.0        | 19.4    | 253.9          |  |  |

| Average Annual growth |            |         |                |  |  |
| 2012-2022             | 6.14%      | 2.84%   | 4.18%          |  |  |

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. @ 2023 S&P Global

Sekhukhune District Municipality had a total tourism spending of R3.09 billion in 2022 with an average annual growth rate of 6.1% since 2012 (R1.7 billion). Limpopo Province had a total tourism spending of R22.5 billion in 2022 and an average annual growth rate of 2.8% over the period. Total tourism spending in South Africa increased from R230 billion in 2012 to R346 billion in 2022 at an average annual rate of 4.2%.

## Tourism spend per resident capita.

Another interesting topic to look at is tourism spending per resident capita. To calculate this, the total amount of tourism spending in the region is divided by the number of residents living within that region. This gives a relative indication of how important tourism is for a particular area.

Table 35: Tourism spend per resident capita - Sekhukhune District Municipality and the rest of Limpopo, 2012,2017 and 2022 [R Thousands]

| DISTRICTS  | 2012    | 2017    | 2022    |
|------------|---------|---------|---------|
| Sekhukhune | R 1,543 | R 1,647 | R 2,467 |
| Mopani     | R 3,444 | R 3,872 | R 4,247 |
| Vhembe     | R 1,711 | R 1,994 | R 2,434 |
| Capricorn  | R 4,768 | R 5,276 | R 4,254 |
| Waterberg  | R 4,343 | R 4,592 | R 5,836 |

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global.

In 2022, Sekhukhune District Municipality had a tourism spend per capita of R 2,470 and an average annual growth rate of 4.80%, Sekhukhune District Municipality ranked fourth amongst all the regions within Limpopo in terms of tourism spend per capita. The region within Limpopo Province that ranked first in terms of tourism spend per capita is Waterberg District Municipality with a total per capita spending of R 5,840 which reflects an average annual increase of 3.00% from 2012. The district municipality that ranked lowest in terms of tourism spend per capita is Vhembe with a total of R 2,430 which reflects an increase at an average annual rate of 3.59% from 2012.

## Tourism spend as a share of GDP

This measure presents tourism spending as a percentage of the GDP of a region. It provides a gauge of how important tourism is to the local economy. An important note about this variable is that it does not reflect what is spent in the tourism industry of that region, but only what is spent by tourists visiting that region as their main destination.

Table 36: Total spending as % share of GDP - Sekhukhune, Limpopo and National Total, 2012-2022 [Percentage]

| 3 1  | Sekhukhune | Limpopo | National Total |
|------|------------|---------|----------------|
| 2012 | 5.8%       | 6.5%    | 6.4%           |
| 2013 | 6.1%       | 6.7%    | 6.5%           |
| 2014 | 6.4%       | 7.0%    | 6.7%           |
| 2015 | 5.7%       | 6.1%    | 5.7%           |
| 2016 | 5.6%       | 6.0%    | 5.8%           |
| 2017 | 5.0%       | 5.3%    | 5.2%           |
| 2018 | 5.3%       | 5.5%    | 5.5%           |
| 2019 | 7.9%       | 6.6%    | 7.2%           |
| 2020 | 4.9%       | 3.8%    | 4.3%           |
| 2021 | 4.7%       | 3.8%    | 4.7%           |
| 2022 | 5.7%       | 4.4%    | 5.2%           |

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global

In Sekhukhune District Municipality the tourism spending as a percentage of GDP in 2022 was 5.74%. Tourism spending as a percentage of GDP for 2022 was 4.39% in Limpopo Province, 5.22% in South Africa.

## **Potential Tourism Routes**

There are three potential tourism routes that have been identified in Sekhukhune:

# • The Mafulo a Matala Route

Mafulo a Matala, meaning "animals grazing on green land", is a route that will take tourists to all the natural beauty and wildlife of Sekhukhune Land. This route is for persons drawn to the African wilderness. The route combines the scenic beauty and wildlife of the area with adventure activities and attractions along the route. The Flag Boshielo dam together with the Schuinsdraai Nature Reserve is one of the most significant attractions on the Mafulo a Matala route. Schuinsdraai Nature Reserve is a popular water-recreation destination for families, where anglers can relax at the shores of the Flag Boshielo Dam.

#### • The Marota Route

The Sekhukhune District is named after King Sekhukhune who was the King of the Marota tribe (today commonly known as the Bapedi) in Sekhukhune Land during the 18th century. Sekhukhune Land has a rich cultural heritage that offers a gateway to authentic Africa. Every corner of Sekhukhune has an amazing tale to tell of this land of myths and legends, a true treasure indeed with world renowned Heritage sites like Tjate, Lenao la Modimo, Ledingwe Cultural Village and many more. The Marota Route affords the tourists the opportunity to experience the cultural heritage of the fascinating Sekhukhune area, reflecting the diverse cultures of the present-day inhabitants of the area, intrepid adventures from a colourful past and ancient civilisation of which only archaeological evidence remains.

#### • The Platinum Stream Route

The Platinum Stream is a tourist route designed to unite Sekhukhune's natural beauty and rich heritage with the mining activities in the area for those mining and history enthusiasts. The Platinum Stream flows along the R555 and the R37 routes, giving tourists the opportunity to visit some of Sekhukhune's significant mines.

#### **Future Tourism Attraction sites**

De Hoop and Flag Boshielo dams are used as tourism anchors to promote future eco and cultural-heritage tourism development in the future. The two dams are also expected to improve the state of water provision in the district which will eventually enhance tourism and other development opportunities in the area. Furthermore, the De Hoop and the Flag Boshielo Dams are used as tourism anchors to promote future eco and cultural-heritage tourism development in the future.

Department of Water and Sanitation and SDM have concluded the signing of Memorandum of Agreement (MOA) on De Hoop Dam Resource Management Plan (RMP) and its implementation on 04 August 2022. MOA is in connection with the following:

- The control, management of access and use of the De Hoop Dam and surrounding Stateowned land for recreational and tourism including eco-tourism purposes.
- The MOA will enable implementation of the De Hoop RMP. An institutional structure will be set up to support SDM/SDA as Implementing Agent (IA) in the management of the dam for secondary use.
- SDM has appointed SDA as the implementing Agent of the RMP and work is underway towards the implementation of the RMP, this will go a long way towards unlocking the tourism potential of the district.

# Heritage in Sekhukhune District

Heritage has also a key role in uplifting and positioning tourism development in an economy. Sekhukhune District hosts rich cultural heritage sites as outlined below. They however have challenges which need to be mitigated against by a deliberate act of government:

Table 37: Cultural Heritage site

| NAME OF THE                     | MUNICIPALITY                                       | LOCATION                           | SIGNIFICANCE /  | CURRENT STATUS/   | INTERVENTION  |
|---------------------------------|--|------------------------------------|---|---|---|
| ATTRACTION                      |  |                                    | ATTRIBUTES  | DEVELOPMENTS  | NEEDED/DEVELOPMENTS   |

## Implications, key Challenges and Risks

Sekhukhune District can do more to develop the district as an international tourist destination by emphasising the broader biodiversity, cultural diversity, scenic beauty, and range of tourism products, and making it easier for tourists to travel through the provision of good tourism routes and road connectivity.

The unique selling benefits (USBs) of local heritage sites and other tourism facilities in the district are not effectively profiled and marketed.

Leisure & Business Tourism can generate an income stream for the Sekhukhune district economy by hosting various business and leisure activities in the district. It can promote and market the Sekhukhune district to be the destination for leisure and business tourism activities within the district.

## 2.4.8. SMMEs Development

SMME Development is a very important aspect of the local economy of the Sekhukhune District. If properly developed and supported, this sector can provide many employment opportunities for the community within the district. Makhuduthamaga Local Municipality has a lot of informal trading activities taking place in the municipality than other Local Municipalities within the district.

## Formal and Informal employment

Total employment can be broken down into formal and informal sector employment. Formal sector employment is measured from the formal business side, and the informal employment is measured from the household side where formal businesses have not been established.

Formal employment is much more stable than informal employment. Informal employment is much harder to measure and manage, simply because it cannot be tracked through the formal business side of the economy. Informal employment is however a reality in South Africa and cannot be ignored.

The number of formally employed people in Sekhukhune District Municipality counted 87 700 in 2022, which is about 71.61% of total employment, while the number of people employed in the informal sector counted 34 800 or 28.39% of the total employment. Informal employment in Sekhukhune increased from 33 500 in 2012 to an estimated 34 800 in 2022.

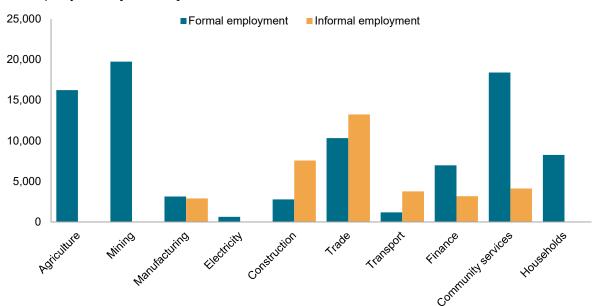

Figure 33: Formal and informal employment by broad economic sector - Sekhukhune District Municipality, 2022 [numbers]

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global.

In 2022 the Trade sector recorded the highest number of informally employed, with a total of 13 200 employees or 38.09% of the total informal employment. This can be expected as the barriers to enter the Trade sector in terms of capital and skills required is less than with most of the other sectors. The Manufacturing sector has the lowest informal employment with 2 900 and only contributes 8.35% to total informal employment.

Table 38: Formal and informal employment by broad economic sector - Sekhukhune District Municipality, 2022 [numbers]

|                    | Formal employment | Informal employment |
|--------------------|-------------------|---------------------|
| Agriculture        | 16,200            | N/A                 |
| Mining             | 19,700            | N/A                 |
| Manufacturing      | 3,140             | 2,900               |
| Electricity        | 637               | N/A                 |
| Construction       | 2,790             | 7,560               |
| Trade              | 10,300            | 13,200              |

| Finance            | 6,970             | 3,180               |
| Community services | 18,400            | 4,110               |
| Households         | 8,260             | N/A                 |

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global.

The informal sector is vital for the areas with very high unemployment and very low labour participation rates. Unemployed people see participating in the informal sector as a survival strategy. The most desirable situation would be to get a stable formal job. But because the formal economy is not growing fast enough to generate adequate jobs, the informal sector is used as a survival mechanism.

## Implications, key challenges, and interventions

The majority of SMMEs in Sekhukhune District tend not to be sustainable in the long run considering the constraining factors such as lack of business and financial management skills and informal businesses without trading zones. It is important that existing local businesses be supported in their development and growth. The success of the implementation of the existing programmes such as Contractor Development within the district will assist in developing business capacity through linkages with the big corporates.

One of the concerns raised by most SMME's during primary research was the relationship between SDM and the SMME's. They believe that more needs to be done to establish a strong relationship which will pave way for effective communication for their grievances to be heard. Therefore, establishing an SMME help desk in the district could curb the gap and enforce effective communication between SDM and SMME's.

The success of SMME's in the business environment is also reliant on continual support through training and regularly updating the SMME's database. This is essential as it provides an analysis of the business landscape of SMME's that have managed to survive during harsh economic times.

The SMME's are further affected by challenges relating to tough economic times, stiff competition with cheap substitutes from Foreign Nationals, lack of technical and business management skills; Insufficient capital and lack of access to funding; Lack of access to markets; and compliance with regulations.

Small Enterprise Development Agency (SEDA) facilitates capacity building, coaching and mentorships, technical training, and facilitation of funding co-ordinated by partners in the SMME Ecosystem. SDM has put skills development and SMME's and Cooperative Support through grand funding as one of the LED projects in the 2024/2025 IDP, the municipality will implement these projects in collaboration with SEDA, National Youth Development Agency and other stakeholders.

#### **Summary of Challenges**

- The economic potential of the district may be undermined by demographic, infrastructural and spatial challenges alluded to elsewhere in this chapter.
- The Sekhukhune economy is excessively reliant on public sector funding with community services being a major contributor to GDP in the area.
- Most revenue flows out of the Sekhukhune economy as residents and businesses source and sell their goods and services outside the district.
- Decline in global demands for the minerals produced in the area, continued water scarcity and the increasing mechanization of platinum mining could affect Sekhukhune's mining industry negatively in the future
- Insufficient beneficiation and value-adding activities occur within the Sekhukhune economy at present.
- Maximizing the use of ICT to gain access to untapped markets outside the region and taking advantage of globalization
- Commercial agriculture is coming under increasing pressure as rising input costs; a stronger local currency, lower commodity prices and external competition take their toll.

- Subsistence farming continues to dominate the agricultural sector in Sekhukhune, which is further affected adversely by global warming and declining interest in the sector.
- The district's tourism potential is not being fully exploited yet because of a lack of tourism infrastructure and poor related services.
- The skills profile in the district is low, due to the low level of education. This will result in the economy failing to manage any developmental intervention that the district may come up with.
- Insufficient funding to implement programmes and projects identified in the LED strategy.
- Inability of the district to attract investment in tourism and the development of attractive tourism packages to ensure local and international tourist spend more than just a day or two in Sekhukhune
- Integration and marketing of key tourism attraction with those of other districts within the province to ensure synergy

#### 2.4.9. Sekhukhune Development Agency (SDA)

#### Introduction to SDA

The Sekhukhune Development Agency (SDA), established in 2008 and operationalized in 2009, is a wholly owned entity of the Sekhukhune District Municipality. Positioned at an early developmental stage, the agency seeks to balance its developmental ambitions with operational challenges, often constrained by limited resources. SDA's statutory and legal framework includes compliance with the Companies Act No. 71 of 2008, Municipal Systems Act No. 32 of 2000 (and its 2011 amendment), Municipal Finance Management Act No. 56 of 2003, and a Provincial Gazette By-Law (No. 1863).

Despite its efforts, SDA has struggled to achieve its objectives over the past decade, primarily due to undercapitalization. Reliance on the municipality for operational costs and a lack of funding for capital projects have hindered progress. To address this, the agency is focused on public-private funding mobilization, building partnerships with entities like IDC, NEF, NDA, NYDA, and private investors. A new board strategy includes engaging financial mobilization companies on a risk-based, success-driven model.

#### Strategic Goals

SDA's goals are centred on driving economic growth and fostering sustainable development. These include:

- 1. **Economic Development**: Initiate and implement high-impact economic projects.
- 2. Financial Sustainability: Establish a stable and sustainable financial base.
- 3. Strategic Partnerships: Promote rural industrialization and form impactful partnerships.
- 4. Job Creation: Generate sustainable employment opportunities for local communities.
- 5. **Investment Attraction**: Encourage and secure sustainable investments for regional growth.
- 6. **Human Capital Development**: Attract and retain skilled professionals.

## **Priority Projects**

SDA's priority projects aim to unlock economic opportunities and enhance the region's development. These include:

- Policy and Implementation: Strengthening operational frameworks.
- De Hoop Resource Management Plan: Advancing recreational and economic projects.
- Yellow Lily Arum Festival: Establishing a signature annual event.
- Mixed-Use Precinct: Developing multi-purpose facilities.
- Enterprise Supplier Development Program: Supporting local SMMEs.
- Transport Planning and Management: Establishing this essential function.
- **Tourism Route Implementation**: Enhancing the region's tourism appeal.
- Alternative Energy Installations: Powering water treatment plants.
- Development of Land ERF 488: Advancing asset utilization.
- ICT and Broadband: Expanding connectivity.
- FT SEZ Park Implementation: Serving as an implementing agent for the SEZ park.
- Skills Development: Preparing locals for industrial and entrepreneurial opportunities.
- Investment Promotion: Hosting the CEO Sector Outreach Program.
- Cotton Industry Revitalization: Rejuvenating a key local industry.
- Branding and Marketing: Elevating SDA's profile and visibility.
- Mining and Land Rehabilitation: Addressing environmental sustainability.

SDA is committed to driving transformative economic development in Sekhukhune, leveraging strategic partnerships and targeted investments to realize sustainable growth and prosperity for the region.

# 2.5. BASIC SERVICE DELIVERY, INFRASTRUCTURE DEVELOPMENT AND SOCIAL SERVICES

The information on analysis of basic service delivery was taken from variety of sources including Statistics SA, communities within the SDM (through community consultation), internal departmental inputs, and other spheres of government.

#### 2.5.1. Access to Water

Sekhukhune District Municipality is both a Water Services Authority and a Water Services Provider in accordance with its powers and functions in terms of the Water Services Act, Act 108 of 1997. This makes its primary function in terms of service delivery to be that of the provision of water. The 811 villages within the district are supplied with water from 45 water supply schemes.

The Municipality is currently providing full water services in the main towns of Burgersfort, Marble Hall, Groblersdal, Steelpoort and Ohrigstad. These areas have access to other high-level services such as refuse removal and roads infrastructure.

The most villages in the vast rural areas are being provided with ground water as alternative sources and water tankers where necessary. Most of the rural villages in the Flag Boshielo Water Scheme receive water services in a much more improved way than other villages within the district.

In 2017-2018 financial year, a number of villages have begun to receive basic water provided by a main pipe from De Hoop dam, namely: Mpelegane, Maepa, Ratau, Maphopha, Rantho, Masha, Malekana and Maseven. This is a notable progress as De Hoop dam's provision is beginning to reach villages.

The following tables provide the history of water access by the households within the district. The tables include Census 2011/2022.

Table 39: Access to piped water: 2011

| Municipality      | Piped water access | No piped water access | Total   |
|-------------------|--------------------|-----------------------|---------|
| Ephraim Mogale    | 27 102 (84%)       | 5 181 (16%)           | 32 283  |
| Elias Motsoaledi  | 40 195 (66,7%)     | 20 056 (33,3%)        | 60 251  |
| Makhuduthamaga    | 47 802 (73,3%)     | 17 416 (26,7%)        | 65 218  |
| Fetakgomo Tubatse | 83 175 (78%)       | 22 877 (22%)          | 106 052 |
| Sekhukhune        | 198 272 (75.2)     | 65 530 (24.8)         | 263 802 |

Source: Census 2022

Households in Sekhukhune district with access to piped water was recorded as 24.8% in 2011 (65 530 households) which has increased to 25% (85 165) in 2022. Whereas households with no access to piped water was 75.2% (198 272 households) and the backlog has been reduced to 33.9% (115 404) in 2022. Majority of households with no access to piped water are found in Fetakgomo Tubatse followed by Elias Motsoaledi according to both Census 2011 and 2022.

The Municipality within Sekhukhune District with the highest number of households with piped water inside the dwelling is Fetakgomo Tubatse Local Municipality with 35 640 or a share of 24% of the households with piped water inside the dwelling within Sekhukhune District Municipality. The Municipality with the lowest number of households with piped water inside the dwelling is Ephraim Mogale Local Municipality with a total of 10 122 or a share of 28.2% of the total households with piped water inside the dwelling within Sekhukhune District Municipality.

Figure 34: Access to Piped Water and Backlog

Source: Census 2022

The Sekhukhune District has prepared a Water Services Development Plan (WSDP) that was first developed in 2005 and updated annually (last updated in 2015/2016 financial year). The raising of Flag Boshielo Dam by five meters has been completed by the then DWAE. The De Hoop Dam has also been completed to increase the district's capacity to provide water to its communities. These two dams will improve the state of water provision in the district, and these will eventually increase tourism and other development opportunities in the area.

The district has developed a Community Water Supplies Master Plan (Bulk Water Master Plan). This enables the district and its implementing agents to achieve its WSDP objectives. The intention is also to investigate alternative technical options for supplying specific areas with water, and to ensure coordination and implementation of water supply infrastructure. Early findings of these studies reveal that groundwater is a major water resource for most Sekhukhune households – and will continue to do so in the future.

#### a) Water Sources

The water sources found in SDM include Ground water, Wells, Rivers, Pools, Dams (20 small dams and 2 major Dams i.e., Flag Boshielo and De Hoop).

SDM relies on two major rivers where two large dams are located within its jurisdiction Flag Boshielo Dam on the Olifants River at full storage capacity of 185.2 million cubic metres (110%) in January 2020, source DWS. De Hoop Dam on the Steelpoort River at full storage capacity of 348.7 million cubic metres (81, 2%), January 2020; source DWS

#### Olifants River abstraction points are as follows:

- 15.7Ml/day of raw water at the abstraction point in Groblersdal WTW
- 11.5Ml/day of raw water at the abstraction point in Flag Boshielo WTW
- 60 MI/day of raw water at the abstraction point in Olifantspoort WTW (6MI/day is allocated for SDM villages

Conjunctive use of surface and ground water sources is preferred in Sekhukhune District. Promotion of conjunctive use of ground and surface water sources must be encouraged during the planning phase where feasible. Efficient and effective use of ground water sources must be integrated into surface bulk water supply schemes,

The cost of operating and maintaining local water treatment works and production boreholes should be compared to the cost of operating and maintaining regional surface water schemes, before ground water sources can be declared redundant, once surface water schemes have been commissioned.

The cost of water from existing groundwater schemes and local treatment works may be cheaper than water from surface water schemes, in this case the communities must be made aware of the water balance rather than acceding to their demand for surface water only. Ground water development must always continue even in areas where there is bulk surface water supply, Surface water and ground water sources must always augment each other, Rainwater harvesting must also be considered for contribution to the water balance.

#### b) Water Resources in the Sekhukhune District:

Table 42: Total water resources (kl/day)

| Water resource | Capacity developed | Potential to be developed | Total    |
|----------------|--------------------|---------------------------|----------|
| Ground water   | 54, 207            | 45, 718                   | 99,924   |
| Surface water  | 67, 787            | 76, 676                   | 144, 463 |
| Total          | 121, 994           | 122, 394                  | 244, 388 |

Source: Water Services Master Plan (2015)

Table 43: Total water balance (probable scenario) (kl/day) if all water infrastructure is functional

|           | 2015     | 2020     | 2025     | 2030     | 2035     | 2040     | 2045     |

Source: Water Services Master Plan (2015)

Water resources salient points:

- Water transfers out of the municipal area includes the existing Olifants-Sand River Water
   Transfer Scheme where water is transferred from Olifantspoort Weir to Polokwane LM.
- Each Water Scheme has a water safety plan covering the WTWs operated by SDM or LNW.
- Blue drop and green drop scores are recorded in the DWS geo data base, WSDP and 5
  year reliability water and sanitation plan.

#### c) Free Basic Water

Most Sekhukhune households can be defined as poor/indigent - where the total income is below R1, 500 per month. In 2019/2020, approximately 79% of the households in Sekhukhune was in this category. These are the households to which Free Basic Water (FBW) must be supplied and to whom the Equitable Share subsidy applies.

#### d) Status Quo on Bulk Water Supply Schemes

## Moutse West & East Bulk Water Supply Scheme (MW&EBWSS)

The scheme commenced with infrastructure planning in 2005 for feasibility study and technical designs. Construction commenced in 2011. The Groblersdal WTW was planned to be upgraded from 18MI/d to 36MI/d as part of the water provision to MW & EBWSS.

The project intents to provide bulk water supply to about 30 543 household in Moutse East and approximately 9 934 household in Moutse West. The project commenced in 2005/2006 for planning and 2010/2011 for construction.

The following villages are planned to benefit from the scheme:

**Moutse East**: Kgobokwane, Walkraal A, Manganeng, Ga-Matlala, Walkraal C, Stompo, Mpheleng, Mabuyeni, Joe Slovo Park, Magakadimeng, Ramaphosa, Moteti A, Theareng, Moteti B, Lusaka, Moteti C, Mzimdala, Ten Morgen, Five Morgen, Elokhishini, Tambo Square, Malaeneng, Ntwane/Mametse, Marapong, Thabakhubedu, Phookwane, Phukukane

**In Moutse West**: Malebitsa, Driefontein, Uitvlugt, Rathoke, Spitspunt, Metsanangwana, Tshikanosi, Makola, Matlerekeng, Mokgwaneng, Mamaneng, Matlala, Ramosheba

#### Challenges

♣ The continuous legal disputes regarding the professional fees between the Municipality and the Consulting Engineers

- ♣ There were also delays due to late delivery of material and approval of variation orders during the construction period which let to cost implications which affected the project budget.
- The accumulated delays let to the financial claims by both the Consulting Engineers and the Contractor.
- Previously disruptions from business forums
- Vandalised and dilapidated sections along the constructed bulk pipeline

#### **Proposed Interventions**

- Amicable solutions reached to settle the disputes and Consultant will be paid based on the work done.
- DWS construction to continue with current phases under implementation
- Consultant is busy assessing the work done and costing of the outstanding works to be executed
- DWS Construction to prepare the revised construction programme and submit to the Consultant and SDM for approval
- Remedial work under conditional assessment project to fix the vandalised and dilapidated sections,

#### Lebalelo Bulk Water Supply Scheme (LBWSS)

The scheme commenced with infrastructure planning in 2016 for feasibility study and technical designs. Construction commenced in 2017. The scheme depends on Mooihoek WTW as the water source at current capacity of 12Ml/d and planned to be upgraded to 24Ml/d. The Scheme also depends on ground water (9 boreholes) which yields a total 2.93Ml/d.

The following villages are planned to benefit from the scheme:

- Ga Maroga, Driekop, Ga Riba, River cross, Madiseng, Frans, Mandela, Motlolo & Mashamothane
- The above will be completed in 2020/2021 financial year.

#### Challenges

✓ The construction of the scheme is affected by the social challenges of subcontracting, mainly from the informal business forums within the communities.

#### **Proposed Interventions**

- ✓ The social facilitation must be improved to ensure that projects are not affected.
- Flag Boshielo Bulk Water Supply Scheme (FB-BWSS)

Flag Boshielo Scheme supply water to the following four Local Municipalities; Ephraim Mogale, Elias Motsoaledi and Makhuduthamaga which are within the district with a total estimated population of 131 000 and about 156 villages. The main bulk water infrastructure of Flag Boshielo Scheme is the dam, the Water Treatment Works, bulk pipelines of about 387km,10 pump stations and 88 storage reservoirs.

The dam wall was raised in 2006 to increase the catchment of raw water. The plant was initially designed to serve a population of 100 000, about 56 villages, with a capacity of 8 mega litres per day (MI/d). It is currently being upgraded to 16MI/d due to high demand based on extension of households which affected the basic provision of water services.

Table 44: The following villages are planned to benefit from the scheme:

| Western Side                     |           |            |  |  |  |
|----------------------------------|-----------|------------|--|--|--|
| Village                          | Household | Status     |  |  |  |

# Challenges

- ♣ The above village relies mainly on surface water sources from Flag Boshielo WTW which is under design capacity.
- ♣ The illegal connections are affecting the continues supply of water.
- The extensions and new settlements are not metered.

Lack Water Conservation & Water Demand Management (WC&WDM).

## **Proposed Interventions**

- Upgrading and completion of the WTW from 8MI/day to 16MI/day
- Authorized the illegal connections
- ♣ Budget for extension and new settlements
- ♣ The combination of different water sources can be used to supplement the water supply

## Mooihoek Bulk Water Supply Scheme (MBWSS)

The scheme commenced with infrastructure planning in 2005 for feasibility study and technical designs. Construction commenced in 2006 from phase 1 to 4. The scheme depends on Mooihoek WTW as the water source at current capacity of 12Ml/d and planned to be upgraded to 24Ml/d. The project intent to provide bulk water supply to about 40 000 household in MBWSS.

The following villages are planned to benefit from the scheme: Burgersfort, Dresden, Praktiseer, Manoke, Bothashoek, Alverton, Ga- Motodi & Makgemeng

#### Challenges

- ✓ Limitation of funds (RBIG which funding through indirect grant)
- ✓ Illegal connection on the main bulk pipeline

#### **Proposed Interventions**

- ✓ The funding must then be prioritized to ensure the completion of the scheme timeously
- ✓ Authorize connection on the take-offs from the main pipeline and install water meters.
- Nebo Plateau Bulk Water Supply Scheme (NP-BWSS): Nkadimeng Water Supply Scheme (NK-WSS)

The NK-WSS commenced with infrastructure planning in 2006 for feasibility study and technical designs. Construction commenced in 2011. The scheme depends on Nkadimeng WTW at the design capacity of 2.5Ml/d. The project is intended to provide water supply to 17 400 household 47 villages. The project commenced in 2005/2006 for planning and construction.

#### Challenges

- The Nkadimeng dam yield has dropped
- The illegal connections in the scheme
- The capturing of projects by local business forums
- Lack of operation and maintenance

#### **Proposed Interventions**

- Test the existing boreholes in the area and if suitable, incorporate them into the scheme for augmentation
- Awareness campaigns required and implementation of by-laws
- National Treasury needs to clearly provide explanation of the 30% subcontracting.
- The municipality needs to improve on operation and maintenance

# Nebo Plateau Bulk Water Supply Scheme (NP-BWSS): Malekana to Jane Furse Bulk Water Supply (ML-WS)

The ML-WS commenced with infrastructure planning in November 2006 for feasibility study and technical designs. Construction commenced in 2011. The scheme depends on Malekana WTW at the design capacity of 12Ml/d and Jane-Furse command reservoir at the storage capacity of 25Ml. The project is intended to provide water supply to 65 040 household 115 villages. The project commenced in 2010/2011 for planning and construction.

#### Challenges

- Dilapidated on pumps and motors along the pump stations
- Insufficient electrical capacity
- Expired contracts of both PSPs

#### **Proposed Interventions**

- Appoint PSP to perform conditional assessment to complete the commissioning
- Notify in writing PSPs of expired contract
- Inspect and verify the pipelines and installations to continue testing
- Attend to snag list items as per list items
- ♣ Confirm the alignment of pumps and motor bearings are in order.
- Test and commission of 25MI Jane Furse Reservoir
- ♣ Install additional telemetry and instrumentation required for pump protection.
- Repair damaged chamber between pump station 1 and the WTW and install new control valve.

# Nebo Plateau Bulk Water Supply Scheme (NP-BWSS): Vergelegen - Water Supply

This system is severely over-stretched. An investigation revealed higher than expected usage of water in the Jane Furse area of a total of 5.54 Ml/day. The higher than predicted water demand of Jane Furse Low-Cost Housing scheme at 3.45 Ml/day can be directly attributable to the installation of water-borne sewerage on this housing scheme. This has had the effect of increasing daily consumption from a basic use of around 25 l/capita to about 200l/capita/day.

The minimum water supply needed to sustain a water-borne system sewerage system is between 60 to 90 l/capita/day. The minimum water supply needed to sustain a water-borne system sewerage system is between 60 to 90 l/capita/day. This highlights the inappropriateness of water-borne sewerage for low-cost housing settlements without an accompanying additional water supply and proper metering and billing to keep usage within limits.

The design capacity of the Vergelegen WTW is 5.12 Ml/day and similar to the dam it was also operating well over its design capacity (108%) in 2005 and way beyond the sustainable yield of the dam. This led to the implementation of a temporary Flag Boshielo connection from Phokwane and the De Hoop Dam to Jane Furse (Nebo Plateau) Bulk Water Supply Phase 1.

## Challenges

- The silting of the Vergelegen dam affecting the raw water supply to the WTW
- # The non-implementation of water conservation and water demand management
- ♣ Illegal connection affects the continues water supply
- Delays in commissioning Malekane to Jane-Furse bulk water supply pipeline

#### **Proposed Interventions:**

- Engagement with DWS to maintain the Dam and reduce the silting
- Implementation of Water Conservation and Water Demand Management
- Authorize the illegal connection

## • Olifantspoort South Bulk Water Schemes (OSBWS)

The Olifantspoort South Bulk Water Schemes is planned to benefit about 16 275 households once the scheme is completed.

## Challenges

- The population has increased and affected the availability of water versus the water demand
- The funding to complete the scheme is not sufficient
- ♣ The villages under Fetakgomo area are experiencing illegal connection which affects the consistency of water supply

#### **Proposed Interventions**

- 1. The new technical report has been submitted to DWS for the coverage of new settlements and extensions for the southern side of the scheme (Atok areas).
- 2. The required funding is also reflecting in the technical report under costing of the new infrastructure
- 3. The authorization of illegal connection, consultation, and awareness to ensure that the water conservation and water demand management is implemented

## Groblersdal to Luckau Bulk Water Scheme (GL-BWS)

The Groblersdal-Luckau bulk water scheme (BWS) receives water from the Groblersdal Water Treatment works which abstract raw water from the Olifants River. Raw water is pumped from the river into the plant for purification. The capacity of the water treatment plant is 22ML/day and is currently being upgraded to 40ML/day. There are also several boreholes which augment water supply from the Groblersdal Water Treatment Works.

The Groblersdal-Luckau BWS receives treated water from the Groblersdal Water treatment Works and directs water to fifteen villages and one semi urban settlement that receives potable water through a network of pumping mains, gravity mains, command reservoirs, service reservoirs and pump stations within Elias Motsoaledi local Municipality in the Sekhukhune District Municipality. Most of the villages are located north-east of Groblersdal town adjacent to the road from Groblersdal town to Nebo.

The plant is also designed to pump water to Groblersdal town and the Moutse bulk water supply scheme, these 2 schemes are outside the scope of this study. The above scheme is planned to benefit households about 19505 once completed.

#### Challenges

- Ageing of old asbestos bulk pipelines and associated system components;
- Rapid growth of villages exhausting the system capacity;
- Pipeline isolation valves on most of the pipelines are not effective due to ageing;
- Vandalism of critical system components;
- Inadequate O&M budgets and operational teams to maintain infrastructure;
- Extensive water loss due to leakages in the reticulation;
- Unauthorized illegal connections on rising mains;
- ♣ Inadequate bulk water supply from the Groblersdal Water Treatment Work;
- Inadequate bulk infrastructure such as storage facilities and transmission pipeline;

#### **Proposed Interventions**

- The upgrading of bulk water pipeline and replace of asbestos pipes
- Modification and refurbishment of the Groblersdal WTW clear water pump station to reduce the effect of flooding
- Additional water storages and upgrading of electrical transformers
  - Cabornatites to Zaaiplaas Sub Bulk Water Schemes

The scheme is dependable on the completion of a 3.8Ml command reservoir and pumping main pipeline from Spitskop catchment (small dam). The scheme will cover the total of 1822 household once completed

# Challenges

- The above village relies mainly on alternative water sources such as boreholes and well fields which has limited yields to meet the water demand.
- The incomplete command reservoir affects the whole sub-scheme to function
- The construction of distribution reservoirs and supply water pipelines are practically completed and not functioning due to non-completion of command reservoir

## **Proposed Interventions**

- Completion of command reservoir must be prioritized and completed.
- The pumping main water supply pipeline and the pump station be completed
- The combination of different water sources can be used to supplement the water supply

## **Water Services Operations and Maintenance**

- The National Treasury requirement is 8% spend on asset value
- SDM has a draft Operational and Maintenance Plan dated April 2018, which will provide Asset Management Support.
- Reliable water service delivery is a major issue for revenue collection.

# **Water Challenges and interventions**

| Challenges  | Interventions  |
|---|--|
| <ul> <li>Unavailability of surface and ground water (drought affecting dams and Boreholes)</li> <li>Illegal water connections</li> <li>Community high expectations/lack of information to the communities (Possible service delivery protests)</li> <li>Mushrooming of Business fora in all communities.</li> <li>Encroachment on the existing infrastructure (Servitudes, Theft, vandalism and unauthorised connections)</li> <li>Water Use License approval by DWS</li> <li>Delays by Eskom to connect electricity and energise Projects</li> </ul> | Conjunctive use of ground and surface water sources. Implementation of Water Conservation and Water Demand Management (WCWDM), continues ground water management. Community awareness campaigns and Implementation of By-Laws Improvement of Customer Services for effective communication Implementation of approved SDM (Learner Contractor Development Programme and Small Business Enterprise) Continuous engagement with DWS to approve the Water Use Licences Engagement with ESKOM to prioritise the energising of projects with the planned period of construction |

#### 2.5.2. Sanitation

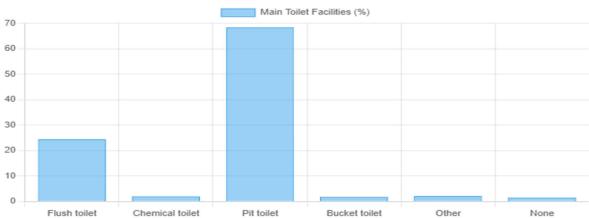

The provision of sanitation in Sekhukhune also faces considerable challenges at present. The situation is more of a concern than it was the case with water. Only 24.4% of Sekhukhune households flushing toilets in 2022. The sanitation backlog is primarily within the rural villages, comprising 73.7% in 2022 which shows improvement as compared to 78% in 2011 of households without adequate sanitation.

The SDM has different households that use different types of toilet facilities. Almost all towns in the district use flushing toilets while in the rural areas there are few households that use flushing toilets. The rest of the population in the rural areas of the district use pit latrines.

The following tables provide the history of sanitation access by the households within the district. The tables include Census 2022/2011 and Community Survey 2016.

Figure 35: Sanitation type Sekhukhune District: 2022

Main Toilet Facilities (%)

Source: Census 2022

Table 45: Household access to sanitation considering Census 2011 and 2016 community survey

| Municipality      | Flush/chemical toilets |        | Other   |         |  |
|-------------------|------------------------|--------|---------|---------|--|
|                   | 2011                   | 2016   | 2011    | 2016    |  |

|                   |                  |       |                  | Source | : Census 202   | 2     |                   |      | •     |      |       |      |

According to the tables above, Sekhukhune District Municipality had a total number of 22 687 flush toilets in 2011 which has increased to 83 138 in 2022. Ventilation Improved Pit (VIP) remain the largest sanitation service in the district with a number of 233 158 after SDM implemented a massive sanitation programme of VIP Toilets to various households in the 2016/17, 2017/18 & 2018/19 financial years whereby 25 395 VIP Sanitation units were built across the district as part of providing communities with sanitation.

Table 47 above shows that the local municipality within Sekhukhune with the highest number of flush toilets is Fetakgomo Tubatse Local Municipality with 34 849 followed by Elias Motsoaledi with its share of 24 847 flush toilets within Sekhukhune. The local municipalities with the lower number of flush toilets is Makhuduthamaga with 14 042 and the lowest being Ephraim Mogale Local Municipality with a total of 9 400 flush toilets within Sekhukhune District Municipality.

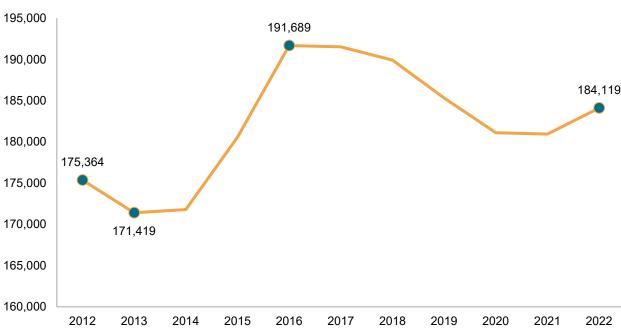

Figure 36: Sanitation Backlog

Source: South Africa Regional eXplorer v2423. Data compiled on 10 Oct 2023. © 2023 S&P Global

According to South Africa Regional eXplorer v2423, when looking at the sanitation backlog (number of households without hygienic toilets) over time, it can be seen that in 2012 the number of Households without any hygienic toilets in Sekhukhune District Municipality was 175 000, this increased annually at a rate of 0.49% to 184 000 in 2022.

The total number of households within Sekhukhune District Municipality increased at an average annual rate of 1.76% from 2012 to 2022, which is higher than the annual increase of 1.62% in the number of households in South Africa. With high in-migration into a region, the number of households increases, putting additional strain on household infrastructure. In the short to medium term this can result in an increase in the number of households not living in a formal dwelling, as the provision of household infrastructure usually takes time to deliver.

# **Challenges and Interventions**

| Challenges                                     | Interventions                                |

# 2.5.3. Municipal Health Services and Environmental Management

The Constitution of the Republic of South Africa, 1996 (Act No: 108 of 1996) allocates Municipal Health Services (MHS) as a Local Government function under Part B of Schedule 4, section 156(1)(a). On the other hand, the National Health Act, 2003, defines Municipal Health Services (MHS) as follows:

- Waste management
- Water quality monitoring
- Health surveillance of premises
- Surveillance and prevention of communicable diseases excluding immunisations
- Vector control
- Environmental pollution control
- Disposal of the dead
- Food control
- Chemical safety

For effective and efficient achievement of these elements the following challenges need to be addressed:

# > Understaffing:

The population of the Sekhukhune District is 1100 000. The District has 20 Environmental Health Practitioners (EHPs) and the standard norm as per World Health Organization is 1 EHP is to 10 000 people. As per this ratio, we need 90 EHPs in order to meet the standard.

#### Office Accommodation.

There is no infrastructure for office accommodation of the personnel.

# > Limited budget

Insufficient budget makes it difficult to fully render enforcement of the legislations which governs the above listed nine (9) functional areas.

#### > Tools of trade.

Lack of tools of trade hinders smooth delivery of Municipal Health Services

# 2.5.3.1. Waste Management

In terms of section 84 of the Municipal structures Act, 117 of 1998 section 84(1)(iii) a district municipality can only be involved with a waste disposal facility where that facility will involve /include more than local municipality in the district. Waste Management forms an important part of basic service delivery in Sekhukhune District Municipality. The district has developed the Integrated Waste Management Plan (IWMP). Refuse removal services is being provided mostly in urban centers, townships and recently in some rural areas within the district.

Waste recycling in the district is taking a good shape since the inception of Sekhukhune District Waste Management Forum constituted by various National and Provincial government departments, Local Municipalities and chaired by Sekhukhune District Municipality.

Involvement of private sector e.g., PRASA, PETCO, Collect A Can etc. enables effective recycling of waste and discussions are underway for local recyclers to reclaim recyclables from industrial premises.

To enhance waste recycling within the district, Sekhukhune District Recycling Forum has been established. The district has introduced School Recycling project wherein about 108 schools are participating in waste separation at source for recycling purposes. In support of Small Micro Medium Enterprises (SMMEs), recyclers are collecting recyclables from participating schools.

Furthermore, separation of office wastepaper for recycling done at SDM Bareki Mall offices and this has been encouraged to government departments within Sekhukhune District. The district view waste recycling as a reliable measure to waste management.

Table 47: Landfill sites in Sekhukhune District Municipality

| MUNICIPALITY | DISPOSA<br>L SITE | PERMITTED/ NOT AND PERMIT No. | ACCESS           | COMPACTIO<br>N | COMMENTS     |

| district   |  |

# Recycling of waste

Recycling of waste makes meaningful contribution to the reduction of waste quantities that end up buried at landfill sites thereby reducing its air space. This is in line with the National waste Management Strategy (NWMS) published under the National Environmental Management: Waste Act, 2008 (Act 59 of 2008) as amended.

The strategy puts recycling as a first goal to be achieved by public, private and individuals. Recycling can be more beneficial in cutting waste management costs if waste separation at source can be advocated and it also create employment opportunities and address poverty challenges.

Recycling at source enhances quality of recyclables as it minimizes the contamination of recyclables. However, the limited recycling infrastructure for separation at source and diversion of waste streams to material recovery and buy back centres is still a major hindrance to effective recycling.

Despite numerous resource challenges like lack of recycling bins, bailing machines, transportation etc recycling seemed to be a workable solution to waste as there has been an increase of waste pickers who plays a vital role in waste recovery and reclamation.

## Legal requirement and obligations

Section 16 of the National Environmental Management: Waste Act, 2008 (Act 59 of 2008) (NEMWA) provides that a holder of waste must, within the holder's power, take all reasonable measures to avoid the generation of waste and where such generation cannot be avoided to minimize the toxicity and amount of waste that are generated.

Government Notice N0, 718 Gazette No, 32368 provides that waste recycling is a listed activity and no person may commence the listed activity unless the competent authority has granted an authorization.

The NEMWA provides that the Minister must, within two years of the date of the Act, by notice in the *Gazette* establish a national waste management strategy which among others will give guidance on raising awareness regarding the impact of waste on health and the environment and the benefits of recycling in accordance with the waste management hierarchy and also the approaches for securing compliance with the requirements of the Act.

# Recycling within the district

Waste recycling in the district is taking a good shape since the inception of Sekhukhune District Waste Management Forum constituted by various National and Provincial government departments, Local Municipalities and chaired by Sekhukhune District Municipality.

Involvement of private sector e.g., PRASA, PETCO, Collect-A-Can etc enables effective recycling of waste and discussions are underway for local recyclers to reclaim recyclables from industrial premises.

To enhance waste recycling within the district, Sekhukhune District Recycling Forum has been launched by the Executive Mayor during Provincial Recycling Day on the 28 September 2017 and local fora are established.

The district has introduced School Recycling project wherein about 108 schools are participating in waste separation at source for recycling purposes. In support of in support of Small Micro Medium Enterprises (SMMEs), recyclers are collecting recyclables from participating schools.

Furthermore, separation of office wastepaper for recycling done at SDM Bareki Mall offices and this has been encouraged to government departments within Sekhukhune District.

The district view waste recycling as a reliable measure to waste management however challenges faced by the recycling in general are among the following:

- Lack of resources such as scales, bailing machines, recycling bins
- Lack of Infrastructure
- Vandalism
- Lack of knowledge on administration
- Lack of ownership and willingness
- High expectations

- Lack of market within the province
- Haulage distance to the market
- Recyclers not working as a team and form cooperatives
- Personal protective clothing
- Lack of basic services by local authorities

Pic 1: No proper storage area at Thabampshe Recycling Project

# Socio-economic impact

Socio-economic benefits from waste recycling in the district is gradually growing as recycling corporative are on the increase and job opportunities are realised. Small quantities of collected recyclables sold to various recycling companies generate income can feed families.

The bigger picture in recycling is to develop buy-back centres in each local municipality to fulfil the objectives of the NWMS that seek to do away with landfilling rather waste recovery for recycling. There are projects underway initiated and supported by the District Municipality focusing on converting waste to energy in Mamphokgo and Tompi Seleka.

Other examples of recycling projects are composting of wet waste generated in schools for ploughing of vegetables and landscaping. Sekhukhune District is water-stricken area, rainwater harvesting and water conservation are advocated to communities.

The municipality encourages sustainable and renewable clean energy projects for the benefit of communities.

# **Summary**

- The collection of materials for recycling reduces littering and minimizes the negative impact of litter on the environment.
- Creates a source of income for the unemployed who operates as collectors.

- The use of recyclable metal rather than raw materials to make products will result in less water and air pollution during the manufacturing process.
- Collection of recyclables result in less waste going to the landfill sites which saves scarce landfill air space.
- Separation at source must be encouraged as this practice will assist in lowering the contamination of recyclable thus resulting in less water used to clean the materials.

## **Summary of Challenges**

- Outdated Integrated Waste Management Plan
- Refuse removal do not cover most villages
- The district is still looking for available land for regional landfill sites
- Informal disposal of waste e.g., disposable nappies along rivers and roads
- Non-compliance of existing landfill sites in accordance with permit conditions.
- Insufficient budget for waste management in all Local Municipalities
- Limited awareness of communities on good waste management practices

# 2.5.3.3. Water quality monitoring and water supply in the district

Water scarcity is a huge developmental challenge within the Sekhukhune District and constrains both economic and social activity in the area. The issue is a manifestation of climate variability. However, it is also the result of a number of other factors, which include insufficient and variable rainfall, inequitable water resource management and the absence of drinking water, bulk water and irrigation infrastructure that would aid the distribution of water to rural villages. The quality of this scarce resource (domestic water supply) is still a challenge that Environmental Health Practitioners needs to monitor closely and urgently.

# **Challenges and Interventions**

| Challenges                                     | Interventions   |
|--|---|
| The Sekhukhune district is a water- scarce     | <ul> <li>Taking water samples and mapping<br/>water sources.</li> </ul> |
| Municipality.                                  | <ul><li>Lobbying to have accredited</li></ul>                           |
| <ul> <li>Some communities still use</li> </ul> | laboratories for both chemical and                                      |
| water from unreliable water                    | bacteriological analysis within the                                     |
| sources resulting in                           | district.   |
| waterborne disease                             | Providing awareness on water  |
| outbreaks.                                     | disease, water purification methods                                     |
| Contamination of water                         | and ways to keep water source clean                                     |
| sources  | Promoting water harvesting  |

## 2.5.3.4. Health surveillance of premises

This involves the identification, monitoring and evaluation of health risks, nuisances and hazards and instituting remedial and preventative measures.

- Residential, Business and Public premises are regularly monitored to identify and evaluate health risks and hazards and institute remedial and preventative measures.
- Environmental Impact Health Assessments.
- Assessing aspects such as ventilation and indoor air quality, lighting, moisture –proofing, thermal quality, structural safety and floor space.
- Ensuring the abatement and prevention of any condition on any premises which is likely to constitute a nuisance or health hazard.
- Assessment of an overcrowded, dirty or unsatisfactory condition in any residential, commercial, industrial or other occupied premises.

## **Challenges and Interventions**

| Challenges                         | Interventions                          |
|------------------------------------|--|
| A database of all these facilities | 3. Ongoing collection and updating the |
| has to be reviewed and this        | current database                       |
| needs a lot of human and           |  |
| financial resources.               |  |
| 2. Mushrooming of spaza shops      |  |
| within the district                |  |

# 2.5.3.5. Surveillance and prevention of communicable diseases excluding immunisations

This function involves the identification, monitoring and prevention of any disease which can be transmitted directly or indirectly from any animal or through any agent to any person or from any person suffering therefrom or who is a carrier to any other person. The district conducts health and hygiene promotion in the prevention of communicable diseases.

| Challenges                     | Interventions                            |
|--------------------------------|--|
| Some of these diseases are     | 2. Request information from the district |

| prioritise on diseases that    |  |
| are prevalent in the district. |  |

## 2.5.3.6. Environmental pollution control/ management

Across the globe, environmental stresses and major changes in climate conditions are influencing the lives and livelihoods of ordinary people ad communities everywhere. This is no less true of the Sekhukhune District. The recent draught in Sekhukhune, for instance, is widely regarded as the result of the much publicized El Niño and La Niña phenomena (Ziervogel et al, 2016).

The increasingly important role that climate plays in the Sekhukhune area has recently been highlighted in some few studies. What is becoming even more evident is that rainfalls patterns in the district are highly variable – a situation that tends to disrupt a wide range of socio—economic activities in the area such as rain-fed crop production, often with very little warning.

Key to Environmental Pollution Control aspects will be to manage the following using some of the Municipal Health Services By-laws to be promulgate the first two have be discussed in other function above:-

#### Land/Soil Pollution:

• Landfill/dumping and burning of waste, farming, mining, factories, etc.

#### Water Pollution:

 Mining and mining activities, industrial wastewater, municipal wastewater, agricultural wastewater, unprotected landfill sites, illegal dumping, etc.

Air Pollution: Air quality Management Functions

## 2.5.3.7. Compliance monitoring

The municipality AQO also has compliance monitoring and reporting requirements regarding AQMPs that are consistent with requirements at national and provincial levels. Compliance monitoring at municipal level deals specifically with AELs and uses licences as the primary means to ensure compliance with ambient air quality standards. The Atmospheric Impact Reports are an additional means of monitoring compliance and can be requested of any individual that is under reasonable doubt of contravening the AQA or causing negative impacts, as well as within the context of a licensing process. In addition, the municipality IS also responsible for compliance monitoring for dust generating activities as contemplated in the national Dust Control Regulations, as well as compliance monitoring with respect to any notice issued in terms of section 23 of AQA.

## 2.5.3.8. Ambient air quality monitoring

Sekhukhune district Municipality has a continuous ambient air monitoring station situated at Dilokong Hospital, it is measuring the following criteria pollutants Sulphur Dioxide, Carbon Monoxide, Nitrogen Oxides, Ozone and Particulate Matter <sub>2.5 and 10</sub>. Ambient air monitoring is an integral part of an effective air quality management system.

The district has developed an Integrated Environmental Management Plan (DIEMP) that needs to be approved by Council and there is an Air Quality Management Plan in place that is being reviewed to update things that have changed. The district has two (2) authorised Environmental Management Inspectors in its territory to preserve the biodiversity and its natural resources and there is a need for more due to vast growing developments within the district. The district will need to have 116 Environmental Health Practitioners to effectively deal with Environmental Health

issues as benchmarked and illustrated in the section 78 Process of the Municipal systems Act,32 of 2000 conducted by the Municipality. The resources for both Environmental Inspectors and Environmental Health Practitioners are still to be provided.

# 2.5.3.9. Disposal of the dead

In terms of section 84 of the Municipal structures Act 117 of 1998 section84 (1) (I) a district municipality can only be involved with a cemetery where the cemetery will involve /include a major proportion of the Local municipalities in the district. However, District Environmental Health Practitioners will be responsible for as mandated by the district By-law:

- Controlling, restricting, or prohibiting the business of an undertaker or embalmer, mortuaries and other places or facilities for the storage of dead bodies. Issuing certificates of Competency to Funeral Undertakers premises complying with legislation.
- Monitoring practices at cemeteries, crematoria and other facilities used for the disposal of dead bodies.
- Managing, controlling, and monitoring exhumations and reburials or disposal of remains.
- Investigating and performing pauper burials

| Challenges   | Interventions   |
|--|---|
| <ul> <li>Most existing cemeteries are not well sited as they are placed near water sources.</li> <li>Some communities still don't consult the local municipalities when choosing new cemetery sites.</li> <li>There are no sanitary facilities and waste storages in cemeteries</li> </ul> | Create awareness on the location of<br>cemeteries and provision of Sanitary<br>facilities |

#### **2.5.3.10.** Food control

Food Control is described by the World Health Organization (WHO) as a mandatory regulatory activity of enforcement by National or Local authorities to provide consumer protection and ensure that all foods during production, handling, storage, processing and distribution are safe, wholesome and for human consumption; conform to quality and safety requirements and are honestly and accurately labelled as prescribed by law.

The district monitors and evaluate Food control in formal (food retailers, open air markets, catering organisations etc.) and informal premises (vendors and hawkers)

| Challenges   | Interventions  |
|--|--|
| <ul> <li>Municipalities still appoint caterers and other food handlers without certificate of acceptability from the District Environmental Health Practitioners at minimal revenue to the district.</li> <li>Mushrooming of small shops in residential homes.</li> <li>Impersonation of EHPs</li> </ul> | <ul> <li>Train Municipalities and caterers on the importance of having certificate of acceptability COA.</li> <li>Requesting a zoning Certificates for shops</li> <li>Producing the SDM employee card</li> </ul> |

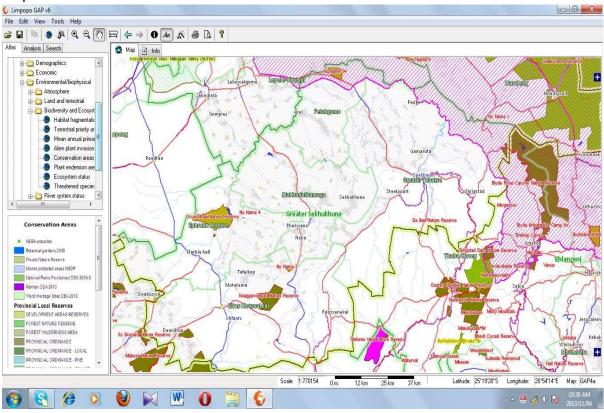

# 2.5.3.11. Biodiversity

## Topography and geology

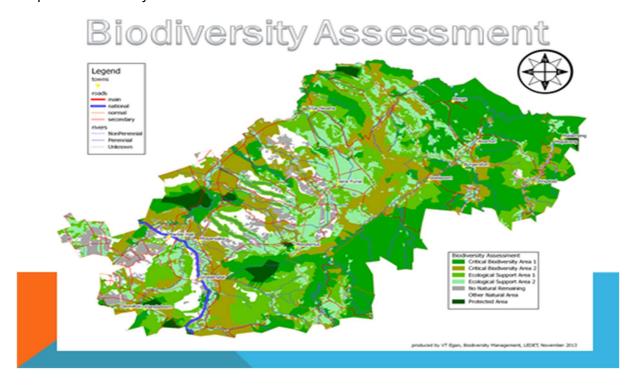

The district is characterised by heavy metal soils that are derived from predominating pyroxite, norite, and anorthosite formations. It forms part of the Bushveld Igneous Complex that has ultramafic layers.

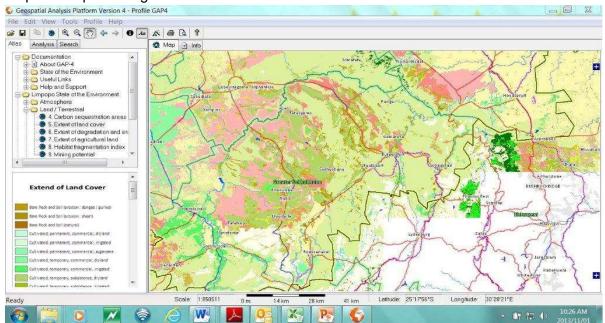

Map 11: Biodiversity Assessment

#### Extent of land cover

The land-cover map shows that Elias Motsoaledi Ephraim Mogale, Fetakgomo Tubatse and Makhuduthamaga are dominated by the natural grassland thicket, bushveld, bush clumps and high fynbos. In addition to the above mentioned extend of land-cover, Ephraim Mogale is bordered by the degraded forest and woodland, cultivated, subsistence dry land and forest plantations around Motseleope (Mining). There are also mining quarries in Fetakgomo Tubatse (Atok area), Makhuduthamaga and in Greater Tubatse.

Map 12: Map showing the extend of land cover

## The role of biodiversity in Sekhukhune

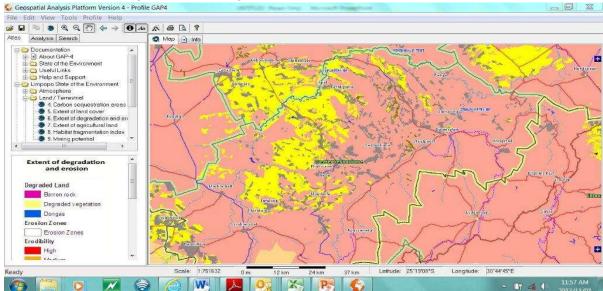

From the human viewpoint, the role of biodiversity in agricultural and natural ecosystems is to ensure food security and sustainable agricultural production through direct or indirect provision of food for humans and their livestock, provision of raw materials and services, such as fibre, fuel and pharmaceuticals and the maintenance of ecosystem functions. However, there is the risk in over-utilized (whether through overgrazing, mismanagement, increased cropping, mining etc.) systems that the provision of these natural products and services becomes compromised due to unsustainable harvesting of resources.

So far more than 2,200 species of vascular plants have been reported in the natural vegetation of the region (Siebert et al. 2002). Close to 70% of the plants in Sekhukhune are herbaceous species of which a large number are used directly for medicinal or cultural purposes or are edible. Because this has until recently been a botanically under-explored area, new endemic plant taxa and biogeographically important species are still being discovered regularly.

## Risks to the plant diversity in the Sekhukhune land region

The Sekhukhune region is rich in ultramafic-induced endemic plant species, which makes it a treasure house for biodiversity. Unfortunately, the substrate to which these plants are restricted is being used for mining. At present mining activities occupy approximately 15% of Sekhukhune, causing some endemic species such as Melhania randii (Figure 6) to be threatened with extinction. There are 58 endemic and approximately another 70 near-endemic plant taxa in Sekhukhune, mostly belonging to the two families Liliaceae (sensu lato) and Euphorbiaceae which have immense importance in traditional medicine.

Communal lands occupy at least 35% of Sekhukhune and belong to a population of mainly impoverished people, with subsistence farming and use of natural resources as their only means of survival. Cash income is predominantly from work in mines and on farms.

Map13: Map showing extends of degradation & erosion

# Grazing

The major source of plant production in grasslands, for grazing and grain for human consumption, is natural grasses. In many natural grasslands, biomass is attributed to relatively few species, even though many more may be present and the identity of the dominant species affects the quality of grazing. Heavily utilized grasslands had much lower species richness than pristine grassland. There were far more grasses which had a greater aerial cover in the pristine areas and most were of good grazing value; over-utilized areas were characterised by unpalatable grasses with lower cover.

Many grasses have good grazing value and others perform a multitude of useful ecological functions, for example to bind soil. Grass species composition is also an indicator of vegetation condition.

## · Grasses found in over-utilized grassland

Aristida ascensionist is very unpalatable, grows in disturbed areas and is one of the commonest grasses in degraded parts of Sekhukhune. It performs a useful ecological function as a pioneer which colonises degraded areas thereby reducing erosion.

# 2.5.3.12. Climate Change

There are various ways in which climate change will impact on human health. Projected increases in storm events may result in increased risk of drowning, injuries and population displacement impacts. A changing climate will also result in increased waterborne and communicable diseases as increasing air and water temperatures may create favourable conditions for the incubation and transmission of waterborne diseases. Projected temperature increases will also impact negatively on the young and elderly. People working in the informal sector usually work outdoors and will therefore be particularly vulnerable to increases in temperature.

Table 50: Climate Change implications

| No | Sector                       | implications   |
|----|------------------------------|--|
| 1  | Human Health                 | <ul> <li>Waterborne and communicable diseases (especially bilharzia)</li> <li>Vector and Rodent-Borne Diseases</li> <li>Increased air pollution</li> </ul>   |
| 2  | Agriculture                  | <ul> <li>Change in grain (maize, wheat &amp; barley) production</li> <li>Change in deciduous fruit production</li> <li>Change in other crop production areas</li> <li>Increased exposure to pests such as eldana, chilo and codling moth</li> <li>Increased risks to livestock (cattle and pigs)</li> <li>Reduced food security Increased heat stress</li> </ul> |
| 3  | Water                        | <ul> <li>Decreased quality of drinking water</li> <li>Decreased water quality in ecosystem due to increased concentrations of effluent and salt concentrations</li> <li>Increased impacts of flooding from litter blocking sewer system</li> </ul>   |
| 4  | Biodiversity and Environment | Loss of Grasslands   |
| 5  | Human Settlements            | Increased isolation of rural communities and displacement  |

#### Water borne and communicable diseases

♣ Natural disasters such as floods, hurricanes, and earthquakes pose an increased risk of contamination of water supplies with disease-causing agents. In turn, the health of

- communities relying on water from surface sources, and those with poor sanitation is at greater risk of, for example, diarrhoeal diseases, typhoid fever and Hepatitis A & E.
- Severe or repeated episodes of diarrhoea may lead to malnutrition and lowered immunity, with increased susceptibility to other infectious diseases.
- ♣ Floods may cause displacement and increased demand for safe water, sanitation and housing. Lack of proper accommodation will lead to overcrowding. Overcrowding is one of the environmental factors that influence the spread of diseases such as meningitis and influenza.

#### Vector and rodent borne diseases

Malaria is a life-threatening disease caused by parasites that are transmitted to people through the bites of infected mosquitoes. Malaria affects the northern part of Limpopo Province and affects around 10% of the population. A change in the climate could increase the geographical distribution of malaria in the province. High rainfall has also been associated with vector-borne diseases such as yellow fever, Malaria and Chikungunya.

The weather affects the distribution of rodent-borne diseases, which may also be associated with flooding. Rodent infestations are already a growing public health concern in many urban areas. There is a particular need to focus on rodent infestation prevention through universal service delivery such as ensuring the integrity of sewerage systems and efficient waste disposal services and domestic hygiene programmes. The latter is required also to prevent the indiscriminate use of pesticides in domestic settings. Of considerable concern in respect of an increase in the distribution of disease vectors is the likely increase in the use of pesticides, and the concomitant risk of an increase in poisoning, as well as longer-term health effects of both vector- and rodent-borne diseases.

#### **2.5.3.13. Air pollution**

Increased exposure to South African Criteria pollutants (ozone, Nitrogen oxides, carbon monoxide, Particulate matter 10 and Sulphur dioxide) is a particular air quality concern associated with climate change. Persons with respiratory diseases such as asthma, chronic obstructive pulmonary disease, allergic rhinitis and bronchitis are most vulnerable, as are the elderly and young children. Stricter pollution control, air quality monitoring and respiratory health surveillance are important in this regard.

# Actions to be taken:

- ♣ Given the degree of uncertainty associated with the consequences of climate change, it is imperative that public health, monitoring and surveillance systems be reviewed and strengthened to increase their ability to detect climate change and health trends at an early stage.
- Strengthen information and knowledge of linkages between disease and climate change.

- disruptions. Such campaigns may include encouragement of a culture of disaster preparedness.
- Identify communities that are vulnerable
- Develop mechanisms that will enable vulnerable communities to respond to the spread of vector borne diseases.
- ♣ Improve the bio-safety of the existing strategies that control the spread of vector borne diseases to incorporate the effects of the changing climate.
- Commission reliable air pollution monitoring systems to alert communities on atmospheric conditions and possible accidences of legislated standards.

# Planned awareness campaigns on waste management (littering of waste along the roads) for 2020-2021

Table 51: Awareness campaigns for 2020-21

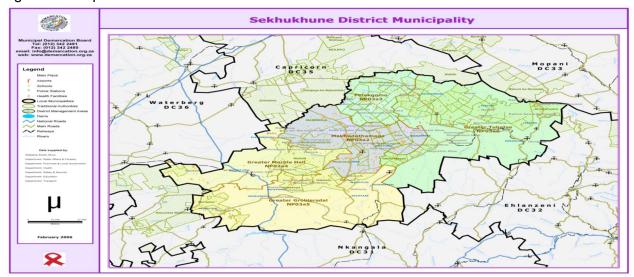

| Municipality       | Awareness campaigns planned for 2020-2021 |

| Fetakgomo/ Tubatse | 2   |
| Ephraim Mogale     | 3   |
| Elias Motsoaledi   | 2   |
| Makhuduthamaga     | 2   |
| Total              | 9   |

Source: LEDET (2019)

# **Natural environment**

According to Raper (1987) Sekhukhune-land is a small area in the North-Eastern South Africa, in the province Of Limpopo and Mpumalanga. The region was named after Sekhukhune I, who was the Chief of the Pedi tribe when rights were granted to them in 1885.

Figure 30: map shows the location of Sekhukhune district

# Climate

The climate is fairly typical of the Savanna Biome: warm, moist summers and cool, dry winters. Mean annual rainfall ranges from 400 mm in the valleys to 600 mm on the mountain slopes and mean summer temperatures from 25°C in the South. Fire is an important factor in the mountains and helps to maintain the strong grassy component of the vegetation.

The area is however under threat from factors such as mining for heavy metals, inappropriate land management, rural sprawl and unsustainable use of natural resources. This affects the level of goods and services provided by the ecosystem.

# Climate change and global warming

## Topography and geology

According to Wilson and Anhaeusser 1998 in Janine et all, geologically the area is dominated by ultramafic substrates of the Rustenburg layered Suite, topographically it is characterised by undulating hills, from the Steelpoort River Valley lying at about 900 metres, the Leolo Mountains rise to 1,932m.

The area is transacted by major chains of hills and has a North-South orientation, creating moderately steep slopes facing predominantly east or west.

The region is characterised by heavy metal soils that are derived from predominating pyroxite, norite, and anorthosite formations. It forms part of the Bushveld Igneous Complex that has ultramafic layers.

Figure 31: Plants Endemism

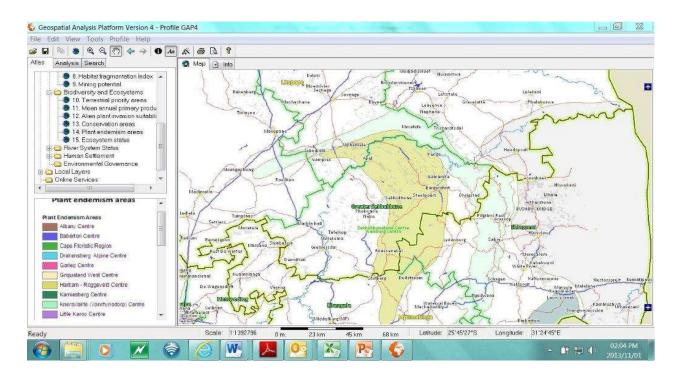

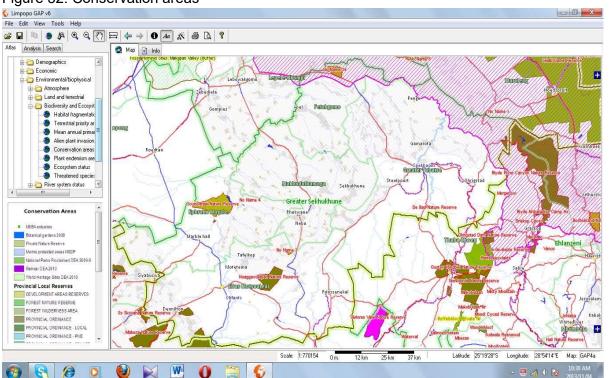

Figure 32: Conservation areas

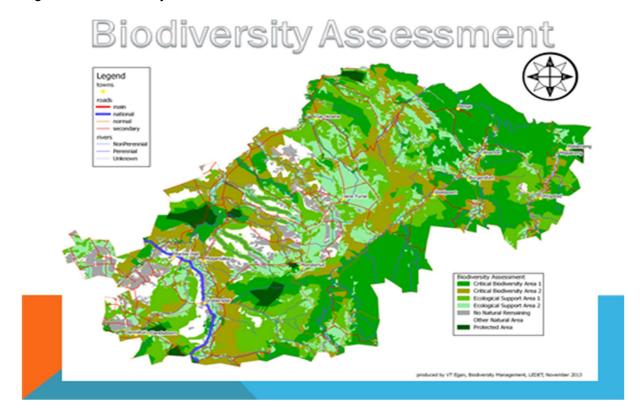

Figure 33: Biodiversity Assessment

#### **Extent of land cover**

The landcover map shows that Elias Motsoaledi Ephraim Mogale, Greater Tubatse, Makhuduthamaga, and Fetakgomo are dominated by the natural grassland thicket, bushveld, bush clumps and high fynbos.

In addition to the above mentioned extend of landcover, Ephraim Mogale is bordered by the degraded forest and woodland, cultivated, subsistence dry land and forest plantations around Motseleope (Mining).

There are also mining quarries in Fetakgomo (Atok area), Makhuduthamaga and in Greater Tubatse.

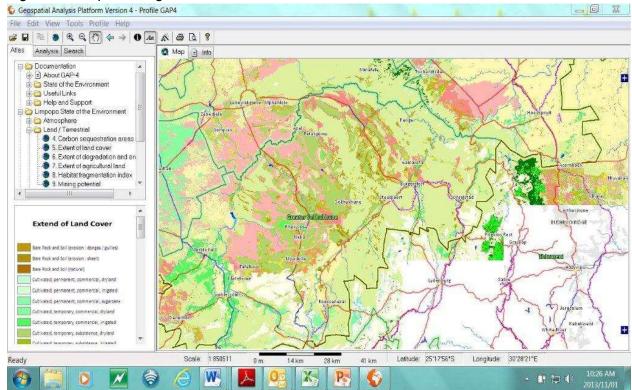

Figure 34: Map showing the extend of landcover

# The role of biodiversity in Sekhukhune-land

From the human viewpoint, the role of biodiversity in agricultural and natural ecosystems is to ensure food security and sustainable agricultural production through direct or indirect provision of food for humans and their livestock, provision of raw materials and services, such as fibre, fuel and pharmaceuticals and the maintenance of ecosystem functions. However, there is the risk in over-utilized (whether through overgrazing, mismanagement, increased cropping, mining etc.) systems that the provision of these natural products and services becomes compromised due to unsustainable harvesting of resources.

So far more than 2,200 species of vascular plants have been reported in the natural vegetation of the region (Siebert et al. 2002). Close to 70% of the plants in Sekhukhune-land are herbaceous species of which a large number are used directly for medicinal or cultural purposes or are edible. Because this has until recently been a botanically under-explored area, new endemic plant taxa and biogeographically important species are still being discovered regularly.

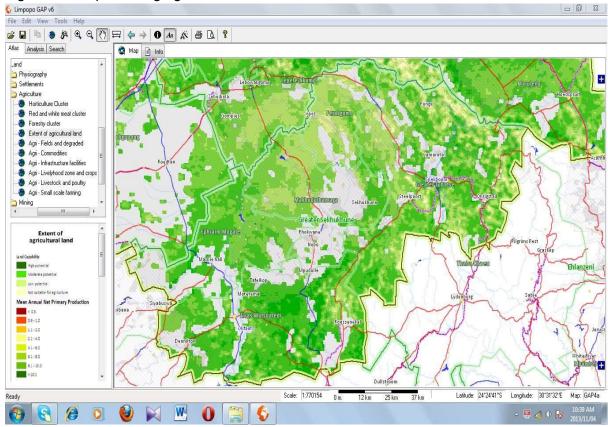

Figure 35: Map showing agricultural land cover

Risks to the plant diversity in the Sekhukhune land region

The Sekhukhune-land region is rich in ultramafic-induced endemic plant species, which makes it a treasure house for biodiversity. Unfortunately, the substrate to which these plants are restricted is being used for mining. At present mining activities occupy approximately 15% of Sekhukhune-land, causing some endemic species such as Melhania randii (Figure 6) to be threatened with extinction. There are 58 endemic and approximately another 70 near-endemic plant taxa in Sekhukhune-land, mostly belonging to the two families Liliaceae (sensu lato) and Euphorbiaceae which have immense importance in traditional medicine.

Communal lands occupy at least 35% of Sekhukhune-land and belong to a population of mainly impoverished people, with subsistence farming and use of natural resources as their only means of survival. Cash income is predominantly from work in mines and on farms.

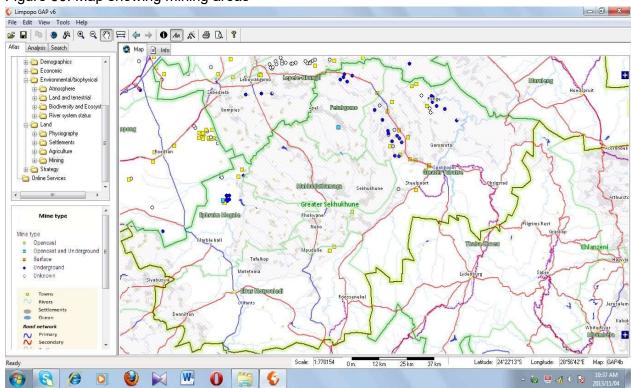

Figure 36: Map showing mining areas

Many decades of land mismanagement have caused immense erosion problems (Figure 44) and species composition changes, rendering the land under-productive relative to its potential. Heavy grazing leads to loss of palatable species and an increase in unpalatable ones e.g. Senecio microglossus (Figure 40). This often exacerbates erosion because the unpalatable plants tend to be dwarf shrubs which, unlike grasses, are not good soil-binders.

Map3 shows that the area of Sekhukhune District Municipality is dominated by degraded vegetation to the north of the district area. (Elias Motsoaledi).

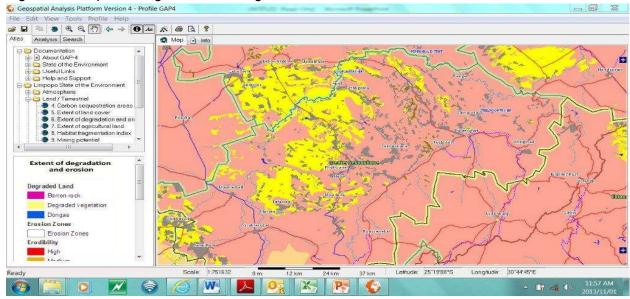

Figure 37: Map showing extends of degradation & erosion

#### STRESSES ON BIODIVERSITY

# Grazing

The major source of plant production in grasslands, for grazing and grain for human consumption, is natural grasses. In many natural grasslands, biomass is attributed to relatively few species, even though many more may be present, and the identity of the dominant species affects the quality of grazing. Heavily utilized grasslands had much lower species richness than pristine grassland. There were far more grasses which had a greater aerial cover in the pristine areas, and most were of good grazing value; over-utilized areas were characterised by unpalatable grasses with lower cover.

Many grasses have good grazing value and others perform a multitude of useful ecological functions, for example to bind soil. Grass species composition is also an indicator of vegetation condition.

# Grasses found in over-utilized grassland

Aristida adscensionis is very unpalatable, grows in disturbed areas and is one of the commonest grasses in degraded parts of Sekhukhune-land. It performs a useful ecological function as a pioneer which colonises degraded areas thereby reducing erosion.

Bothriochloa insculpta- is another common grass of over-utilized acres; it is not well grazed although it has good leaf production, but its aromatic taste deters animals. It colonises open areas quickly and is therefore useful for controlling erosion but is a strongly competitive subclimax grass and an indicator of disturbance.

Bothriochloa insculpta- is another common grass of over-utilized acres; it is not well grazed although it has good leaf production, but its aromatic taste deters animals. It colonises open areas quickly and is therefore useful for controlling erosion but is a strongly competitive subclimax grass and an indicator of disturbance.

Bothriochloa insculpta- is another common grass of over-utilized acres; it is not well grazed although it has good leaf production, but its aromatic taste deters animals. It colonises open areas quickly and is therefore useful for controlling erosion but is a strongly competitive subclimax grass and an indicator of disturbance. Eragrostis gummiflua, or gum grass, occurs more commonly in overgrazed parts, where it increases due to excessive grazing. It produces much seed and can therefore establish rapidly on ground exposed by mining or erosion. Because of its hard culms, only donkeys graze it.

## Grasses growing in well managed or under-utilized grassland

Brachiaria nigropedata is an extremely valuable grazing grass which is very susceptible to overgrazing and is a good indicator of the of grassland condition.

Digitaria eriantha - is endemic to southern Africa where it grows in undisturbed grasslands. It is one of the best natural and cultivated pastures in southern Africa and its dominance indicates good grassland conditions. It can be grazed after the growth period as standing hay. Eustachys paspaloides - is very palatable and grows in undisturbed open grassland or mixed bushveld. It is a climax grass and is one of the first grasses to disappear during overgrazing.

Hyparrhenia hirta - is the most popular thatching grass in South Africa. It is well grazed by livestock early in the growing season and after fires before the plants become old and hard; it is also drought resistant. It becomes dominant in under-grazed areas. When mature, it is tall and hard and can be cut for thatch, providing a well-insulated and attractive roof.

Melinis nerviglumis (Figure 18) is a densely tufted grass which is moderately palatable but is a good indicator of grassland condition since it grows in underutilized pastures. It is extremely common on shallow soils in rocky areas.

Panicum maximum (Figure 19) has high palatability, leaf production and seed production and can be used to make hay. It is an extremely valuable grazing grass in open woodland, but is very susceptible to heavy grazing, disappearing when grazing is intense.

Setaria sphacelata (Figure 20) is an economically important grass which is sometimes sown in pastures and used for making hay. A closely related species, Setaria lindenbergiana, grows in shade, where it can form dominant stands. It is also a palatable grass that makes good hay. It was utilized as a famine food in the past (National Research Council 1996) and the grain has been used to make bread (Fox and Norwood Young 1982). Since it is a decreasing species, it does not survive heavy grazing and over-utilization.

Themeda triandra is the most important grazing grass in open grassland regions of southern Africa, its true value being that it is abundant and can form dense stands. This grass resists fire and will increase through regular burning, so long as it is not overgrazed. It is therefore probably the best indicator in the region of the health of the ecosystem in terms of grazing.

Tristachya biseriata is a rare grass, endemic to South Africa. It is important for sheep and goats but is well grazed by all animals early in the season, becoming less palatable later. It mostly occurs in underutilized and infrequently burnt places.

For grazing capacity to be sustained, introduction of appropriate land management practices to certain areas is required, to avoid the further loss of biodiversity and subsequently valuable grazing species. Eventual dominance of unpalatable "increaser" species as well as alien invasive plants would render more of the grassland unpalatable.

#### **Traditional medicine**

In addition to decreased grazing capacity, many important plants are lost because of inappropriate management and overuse of the grassland. Traditional plant use in the "pharmacopoeia" of rural areas and its economic value, although difficult to estimate, is certainly significant and entirely dependent on natural biodiversity. Many plants used in traditional medicine are slow-growing and once lost, are unlikely to return to an area. Their presence depends on sustainable harvesting as well as on the maintenance of vegetation condition. These plants often have a low incidence of occurrence and are the component of vegetation that declines under heavy utilization. The medicinal species in degraded grasslands also occur in pristine grasslands.

#### **Food sources**

Rural populations often rely on a small number of staple crops as their major food source which they have to supplement with indigenous plants which are harvested to provide the additional dietary requirements of a balanced intake. A large amount of biomass is harvested green and cooked for everyday requirements. Many indigenous species have potential as food, but they have to be sufficiently abundant as well as accessible to come into everyday use. Various sources indicate the number of species of plants that can be used as food and their relative abundance. The enormous natural biodiversity of the study area provides people with the opportunity to use of different species from one area to another.

Indigenous species that are a source of food were more abundant in the pristine grasslands. Although some of these are only used in times of famine, higher biodiversity provides culinary choice as well as ensuring a greater diversity of essential nutrients in the diets of the rural population (Janine Victor *et al*).

#### Conclusion

Preservation of biodiversity is essential for continued utilization of the resources in traditional ways. Education about sustainable utilization needs to be promoted, to prevent plants from becoming increasingly scarce. Decline of plant populations could lead to local, or even global, extinction, resulting in irreversible loss of important grazing species, medicinally utilized species and other economically important plants.

This could in turn lead to further impoverishment of the rural people and a knock-on the economic impact on adjacent communities. However South Africa has excellent environmental legislation and a genuine commitment to preservation of biodiversity that encourages hope for the future. (Van As M 2012).

# 2.5.4. District Disaster Management and District Emergency Management Services

## 2.5.4.1. Disaster Management Services

The District Disaster Management Centre (DDMC) operates from AB Sikhosana Fire Station. The Centre is not yet constructed pending land acquisition challenges. The district in collaboration with the Provincial Disaster Management Centre developed the District Disaster Management plan during 2019. The plan is reviewed bi-annually.

The district disaster management services is responsible for the following critical functional areas:

- Integrated institutional capacity: The KPA ensures that there is a support in terms of personnel. Currently the are five disaster officers operating within the four local municipalities. There is one vacant post.
- Disaster risk assessment.: The KPA provides a uniform approach in assessing and monitoring disaster risks that will inform disaster risk management planning and disaster risk reduction undertaken by organs of state and other role players to discuss hazards identification, analysis and prioritization of hazards, explains which areas are most exposed to risk and why they are vulnerable.
- Disaster risk reduction: The KPA seeks to develop and implement integrated disaster risk management plans and risk reduction programmes in accordance with the approved framework.
- Disaster response and recovery.: The KPA discusses preparedness mechanism and response strategies in collaboration with other stake organs. They further ensure that early warning systems are developed and implemented to disseminate information.

Currently awareness campaigns on prioritised hazards are being conducted in communities that are prone to disaster risk in collaboration with all sector departments, local municipalities, and other key stakeholders. The district municipality has put aside R500 000 for disaster relief materials to alleviate the plight of communities that are affected by natural disaster such as Structural fires, Floods, Drought and Heat wave.

The Disaster Risk assessment process uncovered 34 hazards that are likely to impact negatively on the lives and properties of the citizens of the district. A case in point is the sinkholes/Dolomite

hazard affecting almost twelve villages in the Fetakgomo-Tubatse local municipality which requires immediate technical and financial capacity to mitigate them.

Sekhukhune District Municipality is one of the District in the Limpopo Province that does not have a District Disaster Management Centre (DDMC) to cater for almost 1.2 million citizens. This is in non-compliant with the Disaster Management Act 57 of 2002 as amended, which states that the district should establish a DDMC.

The disaster Management unit of the district has **five (5) officers** spread along four local municipalities.

| Challenges                                 | Interventions                     |
|--|-----------------------------------|
| Lack of Disaster Management Centre-        | Decentralise land acquisition     |
| Insufficient staff                         | Recruit additional staff          |
| Insufficient budget                        | Increase budget allocation        |
| Lack of Central Communication Centre (CCC) | Procure system for the department |

# 2.5.4.2. District Emergency Management Services

#### SANS 10090 Community Protection Against Fire

**SANS**: Community protection Against Fire- SANS Codes 10090-2003 **guide on the manning level for each shift**, it enjoins the service to operate at a matching force of 2 Fire appliances with 4 persons each to the total of 8, 1 Rescue unit with 2 persons and 1 person to cover for annual / sick leave. The meaning number of personnel per shift is **eleven (11)**. In total at a minimum each fire station should have **forty-four (44)** members.

Sekhukhune District needs **two-hundred-and-twenty (220)** personnel to run its five stations. The training academy is functional with **four (4)** officers, however two of the officers though they are fully qualified their ranking remain at junior ranking and the other **two (2)** are senior officers at divisional officer ranking. Fire Safety is manned by **four (4)** officers, **one (1)** of whom is a junior ranking officer.

#### Fire Operations, Training Academy and Fire prevention, safety, and protection

The role of the fire service in the district has expanded far beyond fire suppression. With this expansion, fire prevention, fire safety and public education have appropriately begun receiving increased emphasis as the proactive elements of a fire service delivery system. The district communities are dependent on the fire service to ensure their protection against dangers of fire, entrapment, explosion, dangerous goods incidents, and any emergency event that may occur in the community. The fire service through its fire safety division continues to effect fire safety law enforcement, fire safety code application and oversee fire safety at events through operational division.

The district has five (5) fire stations located in the four Local Municipalities namely:

- Thokozile Mahlako Nchabeleng Fire Station (in Burgersfort) located within Fetakgomo Tubatse L.M.
- Mashilabele Fire Station (in Mashilabele) located within Fetakgomo Tubatse L.M.
- Makhuduthamaga Fire Station (in Jane Furse) is located within Makhuduthamaga L.M.
- AB Sikhosana Fire Station (in Groblersdal) located within Elias Motsoaledi L.M.
- Ephraim Mogale Fire Station (in Marble Hall) located within Ephraim Mogale L.M.

#### **State Of the Fire Stations**

Thokozile Mahlako Nchabeleng and AB Sikhosana fire stations are built to required state of the art fire stations, however these two stations' structural integrity needs constant maintenance and repair. Their walls' structure and ceilings continuously experience water leakages from plumbing work. Some of their areas are bushy due to lack of constant landscaping attention, resulting in very dangerous snakes and other reptiles sneaking into their operational grounds.

**Makhuduthamaga Fire Station** operates from the old Jane Furse Memorial Hospital premises very much inhabitable for a fire station. The movement space of fire vehicles and other fire trucks is a recipe for scratches and bumps on the equipment. There is no dedicated water-source for refilling of the fire engines, hence refilling is done Ga-Nkwana.

**Ephraim Mogale** fire service point has been closed and the service moved to operate from AB Sikhosana Fire Station. This is the case since there is no dedicated structure from which personnel and the equipment can find safety and shelter. The current situation has a negative **impact** from this movement and has overpopulated the host station with both human and equipment. Response to Ephraim Mogale emergency calls has further delayed in time and distance more above Sekhukhune topographies. Currently the municipality has acquired land in Ephraim Mogale to build a fire station.

**Mashilabele** fire service was operating from Mashilabele Pay Point which is now dilapidated. Currently the fire services operate from Moses Mabotha Civic Hall which is very much inhabitable for personnel and equipment and is exposed to all forms of weather. Everybody there is cramped into one big room, male and female personnel. There are no washing utilities after response. In all these troubled fire service points swift accommodation requires to be sought.

# **AB SIKHOSANA FIRE STATION:**

| Registration | Model Description      | Vehicle Type               | Service status                 |

# Typical Core Functions of the Fire Service in terms of Fire service Act 99 of 1987

- Rendering a 24/7 Fire and Rescue services in the 4 local Municipalities
- Render a volunteer service in the district
- Fire Fighting
- Rescuing Services
- Elimination of Hazardous Materials
- Performing Fire Prevention and Fire Safety through Code Applications and Law enforcement
- Involved in Fire Safety Public Awarenesses programmes
- Facilitating Emergency Evacuations
- Fire and Life Safety Education
- Auxiliary Services (logistics, support services, HR e.g.)
- Facilitating Training Academy
- Performing Emergency Medical Services (where applicable)
- The fire service role has widened it involves tackling threats which are now facing, including terrorism, and threats such as flooding and other environmental disasters.

#### Fire Services' Point

| Station location              | Wards    | Settlements / villages | Farms         | Number of Fire Personnel |
|-------------------------------|----------|------------------------|---------------|--------------------------|
| Elias Motsoaledi LM           | 31 wards | 157 settlements        | 13 farms      | 18                       |
| Ephraim Mogale LM             | 16 wards | 78 settlements         | 1324<br>farms | 7                        |

| Fetakgomo Tubatse LM (2stats) | 39 wards | 387 settlements        | 1031<br>farms | 13 (5 / 8)               |
| TOTAL                         |          | ·                      | •             | 56                       |

## **Current shifts**

- a. The current composition of shifts at **Makhuduthamaga and AB Sikhosana** fire stations operate with **18** personnel each over 4 shifts:
- One (1) personnel is a shift leader ensuring that the shift executes its responsibilities
  at the station and during response and serving as well as a safety officer on scene. In
  Sekhukhune most of the shift leaders are junior officers.
- Three (3) personnel are operations personnel.
- b. The current shifts at **Thokozile Mahlako Nchabeleng** fire station operate with **8** personnel over 4 shifts:
- One (1) personnel is a shift leader ensuring that the shift executes its responsibilities at the station and during response and serving as well as a safety officer on scene. In Sekhukhune most of the shift leaders are junior officers.
- **One (1)** personnel— is operation personnel.
- c. The current shifts at **Ephraim Mogale** fire station operate with **7** personnel over 4 shifts:
- One (1) personnel is a shift leader ensuring that the shift executes its responsibilities at the station and during response and serving as well as a safety officer on scene. In Sekhukhune most of the shift leaders are junior officers.
- Two or One (2/1) personnel— is operations personnel.
- d. The current shifts at Mashilabele fire stations operate with 5 personnel over 4 shifts:
- One (1) personnel per shift is a shift leader ensuring that the shift executes its responsibilities at the station and during response and serving as well as a safety officer on scene. In Sekhukhune most of the shift leaders are junior officers.
- One (1) personnel- belongs to one of the 4 shifts.

#### **Current managing of stations**

- AB Sikhosana Fire Station manned by Station Officer
- Ephraim Mogale Fire Station manned by Station Officer
- Makhuduthamaga Fire Station manned by Station Officer
- Thokozile Mahlako Nchabeleng Fire Station manned by Leading Fireman
- Mashilabele Fire Station manned by Divisional Officer

#### **Staff Establishment Need**

| Position  | Current Posts | Vacant positions |
|---|---------------|------------------|
| Manager   | 1             | 0                |
| Deputy Chief of Fire                                  | 0             | 1                |

| Senior Firefighter                           | 3  | 77 |
| Firefighter                                  | 0  | 80 |
| Junior Fireman                               | 46 | 34 |
| Administrator Training Academy               | 1  | 0  |
| Administrator Fire Service                   | 0  | 1  |

# The fire risk exceeds the resources (human and material) available. Poor response time caused by

- distance travelled to emergency incidents
- Formal placement and progression of senior officials to manage stations and units.
- Provide communication tools to designated staff members and shifts.
- Lack of maintenance to the district state of the art buildings
- Lack of dedicated Human Resource staff to deal primarily with the fire service.
- Continuous maintenance of standby generators at AB Sikhosana and Tubatse Fire stations.
- Entry level salary versus qualification requirement

# Interventions

- Appointment of staff through in line with the approved Organizational Structure.
- Establishment of Fire stations or Fire Houses in Roosenekaal, Moroke, Moutse East and West, Monsterlus, Ohrigstad, Steelpoort and Leboeng
- To officially align the existing 4 Station Officers to supervise dedicated stations, request for an appointment of 1 more Station Officer to supervise the 5<sup>th</sup> station.
- To continuously request Human Resource in its ICT division to budget for provisioning of communication gadgets to permanent personnel.
- To continuously request Human Resource in its Auxiliary Services unit with the support of all supporting departments to provide their relevant services on assets.
- To insource fire service personnel to collaborate with Human Resource in dealing with fire service personnel issues.
- To continuously request Human Resource in its Auxiliary Services unit with the support of all supporting departments to provide their relevant services on assets.
- To continuously request Human Resource division to consider qualifications requirements needed at entry level for fire service and adjusting the level to 11, and not level 14 /a general entry level.
- To continuously request Human Resource in its EAP division to release

PPE for the safety and protection of fire service personnel.

To continuously request for a budget from MIG to start resourcing for procurement of the fire service equipment.

#### 2.5.5. Refuse Removal

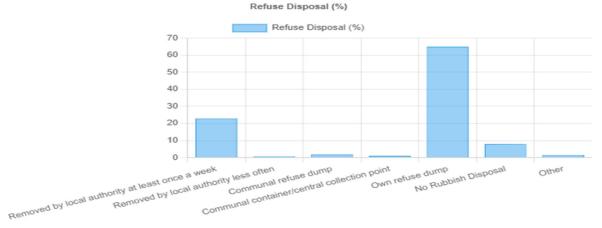

Refuse removal is being provided by local municipalities in urban centers like Marble Hall, Groblersdal, and Burgersfort. Permitted landfill sites are Marble Hall, Burgersfort, Jane Furse and recently (Malogeng and Mphanama) in Fetakgomo Tubatse. Waste disposal and collection has also started in some parts of Makhuduthamaga. There are some villages that conduct their own illegal dumping sites which could be a potential environmental and health hazard.

In many municipalities in South Africa, refuse removal is seen as a trading service. That is, municipalities provide this service and only recover the cost of providing the service without any profit. The rural nature of the district makes it impossible for the roll out of the sewer borne sanitation notwithstanding the fact that most of the rural households are currently not paying for municipal services.

A distinction is made between formal and informal refuse removal. When refuse is removed by the local authorities, it is referred to as formal refuse removal. Informal refuse removal is where either the household or the community disposes of the waste, or where there is no refuse removal at all. A further breakdown is used in terms of the frequency by which the refuge is taken away, thus leading to the following categories:

- Removed weekly by authority
- Removed less often than weekly by authority
- Removed by community members
- Personal removal / (own dump)
- No refuse removal

Figure 37: Households by Refuse Disposal - Sekhukhune

Source: Census 2022

Sekhukhune District Municipality had a total number of 77 742 (22.8%) households which had their refuse removed weekly by the authority, a total of 1 204 (0.4%) households had their refuse removed less often than weekly by the authority and a total number of 221 419 (65.0%) households which had to remove their refuse personally (own dump).

The region within Sekhukhune with the highest number of households where the refuse is removed weekly by the authority is Tubatse Fetakgomo Local Municipality with 31 382 of the households where the refuse is removed weekly by the authority within Sekhukhune. The region with the lowest number of households where the refuse is removed weekly by the authority is Ephraim Mogale Local Municipality with a total of 10 331 of the total households benefitting.

When looking at the number of households with no formal refuse removal, it can be seen that in 2011 the households with no formal refuse removal in Sekhukhune District Municipality was 236 000, this increased annually at 1.40% per annum to 272 000 in 2022.

The total number of households within Sekhukhune District Municipality increased at an average annual rate of 1.76% from 2012 to 2022, which is higher than the annual increase of 1.62% in the number of households in South Africa. With high in-migration into a region, the number of households increases, putting additional strain on household infrastructure. In the short to medium term this can result in an increase in the number of households not living in a formal dwelling, as the provision of household infrastructure usually takes time to deliver.

Source: Census 2011

In 2011, 23 213 households had access to refuse removal that is undertaken by local authorities. Most of these households were found in Fetakgomo Tubatse, followed by Elias Motsoaledi. Makhuduthamaga was the one with the least number of households that were receiving refuse removal service in 2011 and has since improved to be the third which is above the least spot now occupied by Ephraim Mogale local municipality in 2022.

Interventions implemented by local municipalities has shown some improvement in refuse collection as seen in table 47 (Census 2022) which recorded a totally different picture as compared to table 56 (Census 2011). A lot still needs to be done as the backlog is still very high which poses threat to the environment contributing negatively to sustainable development the government seeks to achieve.

FIGURE 38: HOUSEHOLDS BY REFUSE DISPOSAL - SEKHUKHUNE, LIMPOPO AND NATIONAL TOTAL, 2022 [PERCENTAGE]

The strategy implication is that for refuse removal work, it must be provided in tandem with other services like water, sanitation, and electricity so that an individual household is billed for the entire services provision.

## 2.5.6. Electricity

Currently, Eskom provides electricity in the Sekhukhune Area. Even though Eskom is the main provider of electricity, the Local Municipalities do sometimes implement electrification projects to assist in reducing backlogs. Ephraim Mogale Municipality provides electricity for its Marble Hall Town while Elias Motsoaledi provides electricity to both Groblersdal Town and Roosenekaal. Fetakgomo Tubatse and Makhuduthamaga Local Municipalities are not licensed to supply electricity.

#### **SDM Summary**

- The two MTSs that are within the municipality boundary are Leseding and Merensky.
- Eskom has 27 sub-transmission substations existing supplying approx. 163 727 customers (residential, mining, agricultural, redistributors & commercial) within the municipality area.
- The total number of substations that supply electrification load is 8 within the municipality area.

The electrification backlog in 2011 was estimated at 37 124 households. Given the current electricity capacity challenges, illegal connections, lack of resources and mushrooming of new extensions, it is unlikely that these backlogs will be eliminated within the reasonable period of time. All the villages in Ephraim Mogale and Elias Motsoaledi are electrified and the only backlog is for extensions (post connections).

Table 54: Electricity backlog per municipality

| Local Municipality | Backlogs (Household)                      |
|--------------------|---|
| Fetakgomo Tubatse  | 28 117 (13 811 – post connections)        |
| Elias Motsoaledi   | 3 837                                     |
| Ephraim Mogale     | 1 960                                     |
| Makhuduthamaga     | 2 965 (for lighting) 35 867 (for cooking) |
|                    |   |

Source: 2025/2026 LMs IDPs

However, the table below shows areas (may consist of few villages) that have no electricity. They need new interventions for electrification.

Table 55: Areas without capacity (still without electricity)

| Municipality      | Areas without capacity |
|-------------------|------------------------|
| Fetakgomo Tubatse | 7                      |
| Ephraim Mogale    | -                      |
| Elias Motsoaledi  | -                      |
| Makhuduthamaga    | 6                      |
| Total             | 13                     |

Source: ESKOM (2020)

#### Free Basic Electricity

Most Sekhukhune households can be defined as poor indigent-where the total income is below R1, 500 per month. In 2019/2020, approximately 79% of the households in Sekhukhune fall into this category. These are the households to which Free Basic Electricity (FBE) must be supplied and to whom the Equitable Share subsidy applies.

Table 56: Number of households receiving Free Basic Electricity by July 2018

| Municipality      | Number of households who were receiving FBE by July 2018 | Percentage of households in the municipality receiving FBE by July 2018 (proportion of official stats) |
|-------------------|--|--|
| Fetakgomo/Tubatse | 8366   | 2%   |
| Ephraim Mogale    | 2084   | 2%   |
| Elias Motsoaledi  | 2039   | 0%   |
| Makhuduthamaga    | 7993   | 3%   |
| Total             | 20 482   | 2%   |

Source: ESKOM (2018)

The table above shows the proportion of households receiving FBE in the District. At 3% of the total households recorded in 2016 Community Survey it is not that high, which may suggest that there are more households who are not receiving the FBE but deserving of it.

ESKOM had planned to provide electricity to households in the district according to the following table below, a portion of these households are supposed to be indigents and qualify for FBE:

Table 57: 2024/2025 Sekhukhune Electrification Draft Plan Summary

Source: Eskom 2024

The provision of electricity in most of the rural villages has assisted many households to use it for lighting. Statistics have shown that Ephraim Mogale and Elias Motsoaledi Municipalities have been provided with lightning in all their rural villages which makes them meet the millennium development goal. There is still a need to provide electricity for lighting in other municipalities like Makhuduthamaga and Fetakgomo Tubatse Municipalities.

Larger percentages of villages in the rural areas do not use energy for cooking. They still depend on the collection of firewood for cooking. Smaller percentage of people use energy for cooking. It is only in towns where almost all people use energy for cooking. Perhaps, 0, 1% of people use coal for cooking if there are such people. There are also few people who use other sources of energy for cooking like gas.

Firewood remains a dominant energy source used in rural villages for heating. It should also be indicated that even in towns, firewood is used by some for heating. Smaller percentage of people in towns uses electricity for heating. There is also a sizable number of gas usage especially for cooking in 2022.

## **Energy for lighting and cooking**

Access to electricity has tremendously improved from 1996 compared to 2011. 226 677 households in the district have access to electricity which represents 86% of the total households in the district. Only 14% of the households in the district do not have access to electricity representing 37 124 households. Notwithstanding the above, there are settlements that have grown which will also require post electrification connections. Greater Tubatse and Makhuduthamaga municipalities have the highest number of households that still require electrification. Out of these households that require electrification, 69 Villages are in Greater Tubatse and 32 in Elias Motsoaledi.

#### 2.5.7. Cemeteries

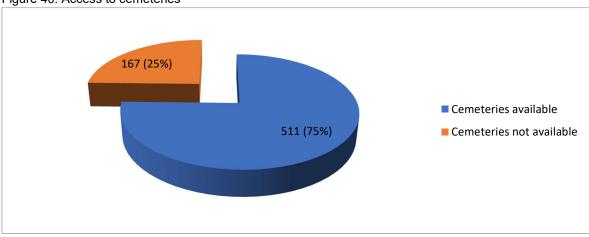

The table below shows numbers about availability (access) of cemeteries in villages. 'Yes', means available, 'No' means not available.

Table 61: Availability (access) of cemeteries in villages

|       | Makhuduth<br>amaga | Elias<br>Motsoaledi | Ephraim<br>Mogale | Fetakgomo<br>Tubatse | Total |
|-------|--------------------|---------------------|-------------------|----------------------|-------|
| Yes   | 147                | 78                  | 64                | 222                  | 511   |
| No    | 29                 | 60                  | 10                | 68                   | 167   |
| Total | 176                | 138                 | 74                | 290                  | 678   |

SDM ward committees

Figure 40: Access to cemeteries

SDM ward committees

Most of the villages in the district do have access to cemeteries. 75% (511) villages/suburbs recorded that they have access to cemeteries compared to 25% (167) villages/suburbs that recorded that they have no access to cemeteries. Some of the explanations given are that some villages will bury their dead in other villages where cemeteries are available.

The Majority of villages where there is absence of cemeteries are found in Elias Motsoaledi (60), followed by Fetakgomo Tubatse Local Municipality (68); Makhuduthamaga (29); and Ephraim Mogale (10).

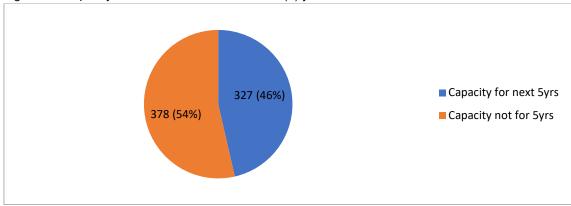

Figure 41: Capacity of cemeteries for the next five (5) years

SDM ward committees

The chart shows that 54% of the cemeteries shall not have capacity to accommodate further burials beyond the next five years. This calls for some government intervention to thwart off the crisis that is beginning to appear on the horizon.

# **2.5.8.** Housing

The government has made significant strides towards progressively fulfilling its constitutional obligation of ensuring that every South African has access to permanent housing that provides secure tenure, privacy, protection from the elements, and access to basic services. The national housing programme is not just about building houses but also about transforming our cities and towns and building cohesive and non-racial communities. In order to contribute to the end of apartheid spatial arrangements, government will roll out housing programme closer to places of work and amenities.

The government must continue to increase access to secure and decent housing for all through its newly adopted "Breaking New Ground" Strategy. Most Sekhukhune houses are currently cement or brick homes.

Source: Census (2001/2011/2022)

Since 2001, the number of households in the district has been on an upward trend. In 2011, there are 263 802 households in the district and in 2022, the number of households in the district was 340 753. The average household size was 3.9 in 2022 compared to 4,1 in 2011. This means that the extended family set up is beginning to change on a daily basis with modern lifestyles. The provincial household average size is 3.6 which mean Sekhukhune household average size is still relatively high by comparison in 2022.

Sekhukhune District Municipality had a total number of 12 600 (4.17% of total households) very formal dwelling units, a total of 259 000 (85.87% of total households) formal dwelling units and a total number of 16 300 (5.40% of total households) informal dwelling units.

Source: IHS Markit Regional eXplorer version 1750

The Local Municipality within the Sekhukhune District Municipality with the highest number of very formal dwelling units is the Elias Motsoaledi Local Municipality with 4 630 or a share of 36.80% of the total very formal dwelling units within Sekhukhune District Municipality. The Local Municipality with the lowest number of very formal dwelling units is the Ephraim Mogale Local Municipality with a total of 1 520 or a share of 12.10% of the total very formal dwelling units within Sekhukhune District Municipality.

#### Household size

The households' size in the rural areas differs with the households' sizes in the urban areas. The households' size in the rural areas is 4.76% while in the urban areas is 4.22%.

#### Housing type main dwelling

In 2011, 234 095 households are living in formal dwellings. There is also 10 107 households who still reside in traditional dwellings such as mud houses. Informal dwellings are also found in the district which stand at 17 861 in 2011. There is a need to formalise the informal dwellings (shacks) especially those found around main towns in the district.

Table 64: Main Dwellings

| MUNICIPALITIES   | Formal dwellings |        |        | Traditional dwellings |       |       | Informal dwellings |       |       |

#### Household tenure status

The rental housing market is growing rapidly in Sekhukhune District Municipality. In 2011, 28 825 households were recorded to be living in rented houses in the district. Not surprisingly, the majority of these households are found in Fetakgomo Tubatse Local Municipality especially with migrants into the mining industry. Ephraim Mogale and Elias Motsoaledi also recorded markedly improved numbers for rental stock.

Table 65: Household tenure status

| MUNICIPALITIES   | Owned and fully paid off |       | Owned but not yet fully paid off |         | Rented |        |
|------------------|--------------------------|-------|----------------------------------|---------|--------|--------|

## Housing demand information

# Limpopo outcome 8 targets, priorities, and outputs

- Upgrade 31200 households in well located informal settlements with access to basic services and secure tenure
- Development of 6240 well located and affordably priced rental accommodation units
- · Accreditation of one Local Municipality
- National Upgrading Support Programme expanded to 5 Municipalities.

#### Housing demand analysis

According to the 2011 census data, the demand for subsidised housing as of 2011 is estimated at 123,163 as shown in table 1 below. This number excludes the demand for workers hostels dwellers.

Table 66: Estimation of subsidized housing using Census 2011 data

|  | No of HS in | No of HS in | No of HS in |
|--|-------------|-------------|-------------|
|  | 2001        | 2007        | 2011        |

## Impact of planned allocations on the current demand over the next five years

The projected demand over the next 5 years is as shown in table 3. The table below shows that at the planned delivery rates, the demand for subsidised housing should fall to 67,415 by the end 2017/2018 financial year. It is important to note that the planned delivery for 2013/14 was not achieved. In an effort to address the gap in the delivery, the National Department of Human Settlements is being approached to increase the allocation for 2014/15 by 100% from 12,815 to 25630. The section that follows shows the proposed allocations to Municipalities based on the subsidy allocation model approved as part of the Multi Year Housing Development Plan.

Table 68: Subsidised housing need projected until 2018

| Financial year | Estimated demand at start of year | Number of units built in financial year | Estimated demand at end of year less units built |
|----------------|-----------------------------------|---|--|
| FY 12/13       | 123,163                           | 12,000                                  | 115,991  |

The provision of new housing is still a challenge not only in the district but the whole Limpopo province. The Multi Year Housing Plan developed by the Department of Local Government and Housing (DLGH) has identified challenges which are being faced by the department and municipalities', resulting in poor delivery of houses to beneficiaries.

This plan is aimed at addressing some of the identified key challenges which hamper housing delivery. The department carries the responsibility of providing housing in the province whereas municipalities are responsible for compiling housing waiting lists.

Most projects implemented over the years mentioned in the above table were never completed by developers. However, the department of COGHSTA is addressing blocked projects to meet NHBRC standards. The department is liaising with the local municipalities within the district regarding progress and issues relating to blocked.

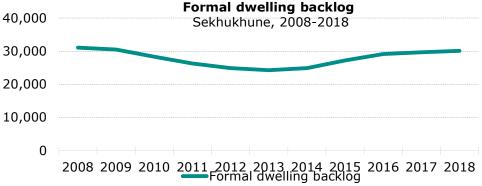

Summarised status of housing delivery, sites demarcation, township establishment and traditional leadership by the Limpopo Department of Cooperative Governance, Human Settlement and Traditional Affairs

Figure 41: Formal Dwelling backlog

Source: IHS Markit Regional eXplorer version 1750

When it comes to the formal dwelling unit backlog (number of households not living in a formal dwelling) over time, in 2008 the number of households not living in a formal dwelling were 31 100 within Sekhukhune District Municipality. From 2008 this number decreased annually at -0.32% to 30 100 in 2018.

#### **Challenges and Interventions**

| Challenges  | Interventions  |
|---|--|
| <ul> <li>Untraceable beneficiaries</li> <li>Beneficiaries whose livelihood has improved</li> <li>Beneficiaries who are not aware that they have benefited because wrong people have unlawfully benefited on their behalf</li> <li>Provision of houses to the needy households</li> <li>Lack of sufficient funding to address the demand</li> <li>Lack of Bulk Infrastructure</li> </ul> | <ul> <li>Continuous         verification of Data         base of beneficiaries         from Local         Municipalities</li> <li>Review and         implementation of         Indigent Registers</li> <li>Verification of Data base of         beneficiaries from Local         Municipalities</li> </ul> |

#### 2.5.9. Telecommunication

Telephone facility remains a challenge in the SDM's vicinity. It is commendable that many villages in the district have access to the use of telephone and cell phones but there are these other villages where there is totally no reception for both telephones and cell phones.

Sekhukhune population experiences a clear cut from the international communities due to lack of Information Communication Technology (ICT). The State of the Province report that was presented in 2005 has shown that Sekhukhune was still lagging in comparative terms with the other Districts in the province. The population fails to take advantage of the ever-expanding internet and e-mail telecommunication facilities especially for educational and business opportunities. This is potentially an important pathway to economic growth in the district. In addition, there are still villages in the district that cannot get proper signals for radios and televisions because of their geographic location. This is especially true of the mountainous villages like Tswereng. Mahlabeng, Rostok, Mooihoek, India, Ga-Makopa, Pelangwe, Phahlamanoge, Tjate, Kgautswane, etc.

Figure 42: Telecommunication access levels

SDM ward committees

36% of the villages recorded that they access cell phone, 31% access TV and 32% access radio as a means of tele-communication.

# Proportion of villages that recorded quality of reception as good, poor, or bad

The graph below presents the proportion of villages that recorded quality of reception on all communication (Cellular phone, TV and Radio) as either good, poor or bad.

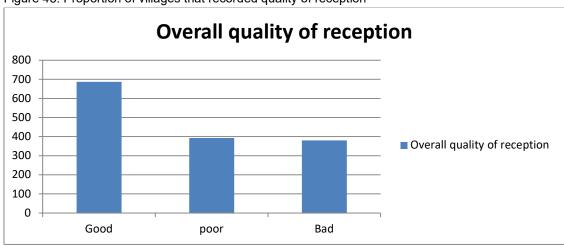

Figure 43: Proportion of villages that recorded quality of reception

SDM ward committees

At least 380 villages recorded that the quality of cell phone reception is bad compared to 687 villages that said the reception is good. 393 villages said reception is poor.

The district municipality and its locals must develop strategies that will lead to improved coverage of telecommunication in the villages. This will be achieved if stakeholders such as SABC and Cell phone Service Providers are brought on board.

The main challenge within the district is poor access to telecommunication networks. This affects the business development and its effectiveness within the district. This can be addressed through proper planning of network alignment by the Providers.

#### 2.5.10. Roads and Stormwater

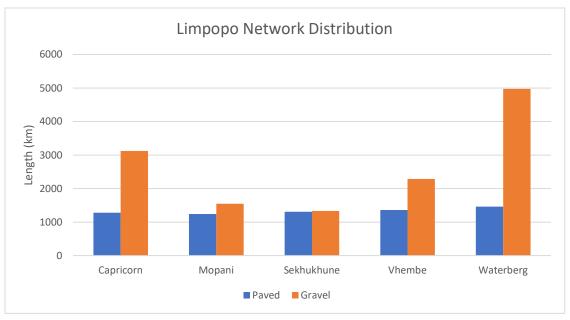

The development of the road and transport network in Sekhukhune is of vital importance given the planned economic trajectory of the district, as well as the potential offered by Dilokong Corridor. In general, the district is well connected to its surrounding areas to the East, West and South. However, geographic factors hindered connectivity impeded road construction there. There is a stretch of approximately 150km between Lebowakgomo and the R36 through the JG Strijdom tunnel without tarred road access northwards.

Within the District itself, there is a general lack of roads – and of tarred roads in particularly – connecting the inner section of Sekhukhune, which consists largely of scattered villages with minimum economic activity at present. The district has decided however, not to encourage continued scattered development at present – and future transport routes will therefore be concentrated along the major nodes of economic activity. It is hoped that this will encourage workers from the rural areas to urban areas – a philosophy in line with the NSDP principles.

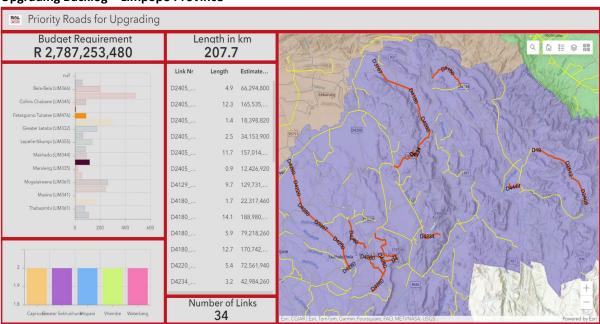

In contrast to the inner section of the district, the semi-urban areas of Sekhukhune are relatively well-serviced by the Provincial and National routes running through it. These routes, as will be seen later in this section, are supporting the area's main economic activities reasonably well at present. What remains to be seen, however, is whether the planned platinum mining expansion in the area will be adequately served by current infrastructure in the district. Roads and stormwater drainage is estimated at 30 727.

#### Limpopo provincial network distribution

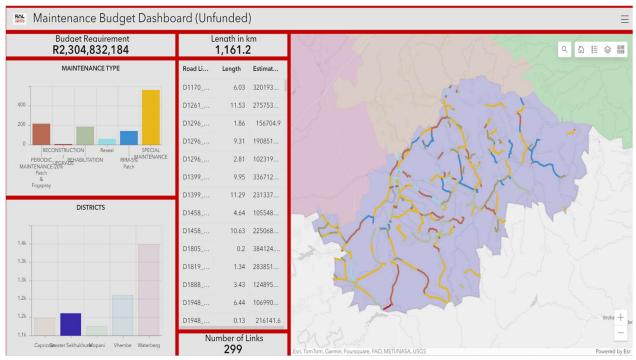

Provincial road network is 19 906km (33% is paved and 67% is gravel).

**Upgrading Backlog – Limpopo Province** 

**Maintenance Backlog - Limpopo Province** 

#### The Road Network in Sekhukhune

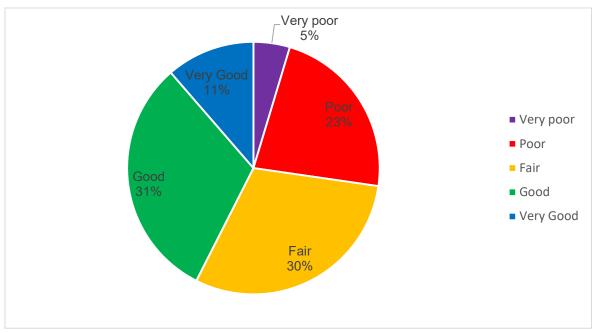

The Sekhukhune District has one major national road within it (the N11), as well as several provincial arterial routes including the R25, R33, R36, R37, R555, R573 and R579. There are also a limited number of tarred minor roads, such as those leading into Jane Furse. The remainders of the roads in Sekhukhune, however, are largely gravel roads that serve to connect the rural areas within the district. The following table summarizes the situation as per municipality.

Table 70: Road network in Sekhukhune (District Roads)

| Local Municipality | Length (km) | % of Network |
|--------------------|-------------|--------------|
| Fetakgomo Tubatse  | 580         | 39           |
| Elias Motsoaledi   | 223         | 15           |
| Ephraim Mogale     | 236         | 16           |

## THE RAILWAY NETWORKS

The Sekhukhune district has **three railway lines**, originally developed to serve mining activity in the area. These are:

- The railway line entering Sekhukhune in the south next to Stoffberg, which continues northwards for 30kms (it leads to an abandoned mine near the Mapochs mine).
- The line entering Sekhukhune in the west near Nutfield, which continues eastwards to Marble Hall.
- The line entering Sekhukhune in the east, passes near Ohrigstad and Burgersfort (past abandoned mine) and ends near Steelpoort (near the Tubatse Mine).

It became obvious that these lines, originally developed to serve past mining and agricultural activities in Sekhukhune, have not been re-routed to serve new (or future) mines in the area.

If this continues, the results will be that mining expansion in Sekhukhune will place additional burden on the road network in the area. Beyond commercial usage, a commuter rail link between Pretoria and south-west part if Sekhukhune (along the Moloto Road) will clearly be useful, given the high levels of male migrancy.

## Limpopo's Development Corridors and Sekhukhune Roads

The LGDP identified four development corridors, which will drive future economic development in the province. Of these, the Dilokong and Phalaborwa Corridors travel through the Sekhukhune District and are of immediate economic relevance for the area.

The Dilokong Corridor includes some important roads that fall within the Sekhukhune area. These are:

- Polokwane to Burgersfort (P33/1 and P33/2 via Mafefe)
- Flag Boshielo Dam through Lebowakgomo and Mafefe, linking the Sekhukhune District with the Phalaborwa and Kruger National Park.
- Chueniespoort via Boyne to Mankweng
- The Phalaborwa Corridor connects Hazyview (Mpumalanga) with Phalaborwa and Tzaneen through a number of small towns on the western side of the Kruger National Park. It includes two roads sections that fall within the Sekhukhune area:
- Route section P17/3-5, D726, P112/1-3, P43/2, D1308 and P54/1.
- Road section P146/1 from Klaserie to Blyde River, P116/1 from Hoedspruit to Ohrigstad via the Strijdom Tunnel and P181/1 from the Oaks to Burgersfort

### **Challenges and Interventions**

#### Challenges **Interventions** Poor conditions of corridors roads District Infrastructure Technical team owned by provincial/national roads in to engage sector departments, RAL the SDM jurisdiction include R555 and SANRAL to ensure they conduct (Steelpoort to Stoffberg), R579, N11, routine maintenance, rehabilitation R37 (Burgersfort to Polokwane), R33 and upgrading. (Stoffberg) etc. Request all stakeholder to attend Lack of coordination among the District meeting to ensure adequate municipalities, Sector departments, flow of information. RAL and SANRAL Implementation of Rural Roads Inadequate implementation of Assets Management Plans and budgeted road projects prioritise critical projects • Insufficient construction of bridges Involvement of Private Sector (mining houses) in the development of Lack of railway network in mining bridges and tarring of roads. areas (Shortage of alternative mode of transport) Introduction of railway line to reduce Traffic congestion (Heavy vehicles) the volume of heavy vehicles. Introduction of weighbridges Inadequate stormwater control svstem Full implementation of road and Lack of facilities for heavy vehicles stormwater master plan (e.g., weighbridges)

- Inadequate re-graveling of the district and local access roads
- Potholes existing on some of the roads
- Prioritisation of gravel roads that are frequently used and access to local amenities

## 2.5.11. Transportation

For goods and services to be transported throughout the district, organized transport system is required. The main transport systems are the following: busses, taxis and trucks. There are two types of bus companies which are private and public. Private buses are those that are owned by individuals not related to government and public are those that are owned by an organ of state or government itself.

### **Transport Safety and Compliance:**

**Public Transport Services:** 

- PRE established in terms of Act 5 2009.
- PRE is responsible for the adjudication of all types of applications within the district.
- Transport operation in the district provide public passenger transport services such as issuing of operating licenses for buses and minibuses
- Public Transport Services have been decentralised to local municipalities for easy access by operators.
- Dilokong Service Centre and Groblersdal Service Centre

#### Road Safety & Law Enforcement

- The district consists of one hundred and eighty three (183) Law Enforcement officers whilst the local municipalities have 76 traffic officers which gives the total of 259 and 44 Road safety ambassadors.
- The district consist of eight (8) National Rods; N11 which between Roedtan and Stoffberg, R37-Lebowakgomo to Burgersfort, R36 from Leboeng to Ohrigstad, R33 from Stofberg to Groblersdal, R573-Moloto Road to Moteti, R555-Ohrigstart to Stoffberg, R579-Apel Cross to Groblersdal and R25-Groblerdal to Verena.
- We are sharing boundaries with one province; which is Mpumalanga.

#### **Traffic Infrastructures**

The district has three (3) Provincial Traffic Stations and one (1) Provincial Traffic Control Centres.

### **Level of Development**

- Dilokong Traffic Station: The station has Registration and Licensing facility and Law Enforcement. It also provides services to mining industrial area; example Marula and Dilokong Mines to name few.
- **Moutse Traffic Station**: The station has Registration and Licensing facility and Law Enforcement. It provides services to local villages and three national roads.

- Nebo Traffic Station: The institution provide law enforcement and it is without Registering Authority facility.
- Rathoke Traffic Control Centre: The station provides services for overload control in support of road maintenance and reduction of accidence. It also provides test for light motor vehicles in all categories of vehicles and ordinary Law enforcement.
- **Public Transport Unit**: Deployment of Public Transport Unit to places where there are taxi conflicts within the district.0

## **Transport Regulation**

#### Law enforcement at local municipalities

All local Municipalities within the district are providing law enforcement, registration licensing and roadworthy tests and driving license test services, which is overseen by the district.

The SLA between the department and Municipalities provide 80/20% share out of revenue collection.

In addition to the above, there are also 7 private vehicle testing centres in Sekhukhune district, of which the role of the department is to monitor their compliance with the applicable legislations.

#### Status on Road Safety Interventions:

- Road safety awareness interventions
- Schools involved in Road Safety: conduct debates
- Driver of the year competition: trucks, busses and taxis
- Promotion at ranking facilities and Malls
- Community mobilization campaigns
- Radio talks at community stations

#### Status of Integrated Transport Plan:

- Sekhukhune: Developed an ITP in 2004, reviewed in 2007 on old guideline.
- Elias Motsoaledi: Developed an ITP in 2008 on old guideline.
- Ephraim Mogale & Makhuduthamaga: No ITPs
- Fetakgomo Tubatse: Developed an ITP in 2004 on old guidelines. The ITP was reviewed
  in 2015 in conjunction with the department but was not submitted to MEC for approval.
   Fetakgomo Tubatse has commenced with the review of their ITP to include the former
  Fetakgomo Municipality area.

#### **Public Transport**

Transport operation in the district provide public passenger transport services such as issuing of operating licenses for buses and minibuses conduct monitoring of bus subsidised for the routes

granted. Public Transport Services have been decentralised to local municipalities for easy access, at Dilokong and Groblersdal cost centre.

According to the District's integrated Transport Plan, the most common forms of public passenger transport are the buses and taxes. The taxi industry determines its routes largely by looking at factors like the location of towns and villages, dominant economic activities in the area and employed status within the district.

Transport routes in Sekhukhune are often limited by deteriorating roads conditions as well as local storm water problems caused by rainy season. The following are the findings of the review of the Sekhukhune District Current Public Transport Record (CPTR) and Integrated Transport Plan (ITP) in 2007. The report covered an overview of what is involved in public transport in the Sekhukhune District Municipality regarding facilities, the capacity utilization of ranks and routes, the waiting times of passengers and vehicles, the operational vehicle and the number of trips made per operational vehicle. The facility surveys were conducted at taxi ranks, bus terminals and train stations. The survey indicated that the Sekhukhune District Municipality does not have commuter rail services.

In 2018/2019, there were three bus terminals in the Sekhukhune District Municipality and have a total of 82 taxi facilities of which more than 75 per cent are informal. The 190 (approximately 50% outwards-bound) taxi routes in the SDM are as follows:

- 15% in Elias Motsoaledi LM,
- 3% in Fetakgomo LM,
- 17% in Ephraim Mogale LM,
- 43% in the Greater Tubatse LM
- 22% in Makhuduthamaga LM.

Of the subsidized bus routes in the SDM, 57% are in the Elias Motsoaledi LM and 43% in the Ephraim Mogale Local Municipality.

The main findings obtained from the analysis of route utilization are that there is a vast oversupply of taxis on most routes in the SDM. The route utilization survey noted 1462 taxis in the SDM area. Furthermore 1372 taxis were noted in the Elias Motsoaledi LM, 287 in Fetakgomo LM, 530 in Greater Tubatse LM and 1083 in Makhuduthamaga LM.

There are 28 buses in operation on the subsidized routes in the SDM area. There are metered-taxi activities in the Greater Tubatse LM, Light Delivery Vehicle (LDVs) are utilized for learners' trips as well as the areas where the quality of the road is not good.

### **Bus Industry**

There are two different types of bus operators in the Sekhukhune District, namely:

- Subsidized operators
- Non-subsidized operators

#### **Subsidized Bus Routes**

Table 74: Existing subsidized bus routes in the Sekhukhune District

| Municipality | 2020-2021 |
|--------------|-----------|
|--------------|-----------|

| Fetakgomo/ Tubatse | None                                     |

## **Air Transport**

There are no commercial airports or air transportation in the district. Present, there are only two registered airfields in the towns of Groblersdal and Marble Hall. They are used as emergency airfields. They are utilized mainly by the business and tourism sectors, as well as local farmers wishing to spray their cultivated fields. There is also an air strip in Elandskraal in the Ephraim Mogale Municipality, which is not maintained. The table below summarizes status of landing strips in the district.

Table 81: Landing strips

| Municipality      | 2020-2021       |  |
|-------------------|-----------------|--|

#### **Provincial Secretariat for Police Service**

## 1. Background

The district office has 3x officials who are responsible for doing oversight on the police service. Their oversight role is mainly done through the National Monitoring Tool to monitor the Police Stations and different tools developed by the province to monitor the specialised units and garages.

## 2. Components monitored and evaluated by the district:

8 specialised Units broken down as follows:

- Employee Health and Wellness (EHW): = 2
- Family violence, child, and sexual offenses (FCS): = 2
- K9 (Dog Unit): =3
- Local Criminal record Centre (LCRC): = 1
- Rapid Response Services (10111 and flying squad): =0

#### Provincial Secretariat for Police Service

- The district has no Police stations linked to the 10111-call centre.
- Stock theft and Endangered species: 1
- Vehicle Crime Investigation (VCI) : 1 Satellite
- Water Policing and diving : 0SAPS garages : 0Police stations : 21

#### Challenges

- Increasing of unregistered mini taxis due to lawlessness
- Damage to the road network due to increase on heavy vehicles
- Increase on road traffic fatalities due to lawlessness
- · Narrow roads due to none upgrading of roads
- Stray animals due to lack of fencing.
- Taxi conflict due to non-compliance to operating licenses
- Illegal transportation of workers (e.g., farm workers/School children) due to inadequate bus routes subsidy.
- · Lack of alternative routes for trucks
- Inadequate signage

#### Strategic Interventions:

- Deployment of law enforcement traffic officers for 24/7 on strategic routes.
- Deployment of public transport unit in strategic locations
- · Deployment of unmarked traffic vehicles to deal with moving violations
- Deployment of speed enforcement on strategic locations
- Upgrading of the main roads (e.g., R37, R579, etc.)
- The province will monitor implementation of average speed over a distance on the N1.
- Manage traffic contravention management system which will enforce compliance to traffic offenders.

- The province will also implement pillars approved by the National Road Safety Strategy 2016-2030 (NRSS), as follows:
- **Pillar 1: Road Safety Management**: strengthening relationship with stakeholders, eliminate fraud & corruption.
- **Pillar 2: Safer roads & mobility:** Identify & address high road safety risk & hazardous location. Have a system to coordinate lack of road signage & road markings with affected authorities.
- **Pillar 3: Safer Vehicles:** Increase traffic enforcement around vehicle roadworthiness. Enhance visibility through "Lights –on" programme.
- **Pillar 4: Safer Road users:** Improve Road users' behavior & implement 24/7 Law enforcement in critical routes.
- Pillar 5: Post-crash Response: Strengthening relationship with Road Accident Fund (RAF) at district level through Road Incident Management System (RIMS).
- Urge Municipalities, as planning authorities, to develop and implement Integrated Transport Plans.
- Establishment and resuscitation of Transport Forums
- Continue with Passenger Subsidy Programme

## 2.5.12. Sport, Arts and Culture

Sport, Arts and Culture play an important role in the physical, psychological, social, technical and tactical development of young and matured people. Sekhukhune District Municipality plays an advocacy role/ function whereby most of the programmes are driven by the provincial department of Sport, Arts and Culture. The communities within the district participate in various sport, arts and culture programmes that are meant to promote a healthy lifestyle in the society.

Table 82: Norms and Standards

| PROGRAMMES                  | NORMS AND<br>STANDARDS                     | BACKLOGS                           |

#### MANDATE OF THE DEPARTMENT

## **STRATEGIC OUTCOMES:**

Increased social cohesion and national identity through:

Cultural Affairs: Arts and Culture

 Promote culture, conserve and manage the cultural, historical assets and resources of the province (district) by rendering various services

## Museums and Heritage Services

- Heritage and Museums and resource management in the province.
- · Preservation of heritage site

#### Language Services

· Preservation and promotion of languages

## Library and Information Services

 Assist local authorities in rendering of public library services and providing of an archive service in the province

## Sport Development, Recreation and School Sport

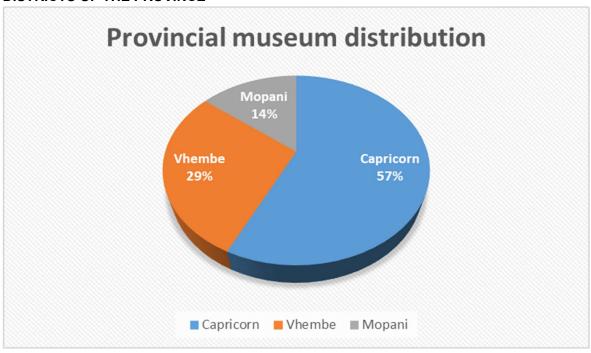

Provide assistance to provincial sport associations and other relevant bodies to stimulate
the development of sport. Facilitate development of facilities with a view to improving life
of the disadvantaged and promote and develop sport tourism through major events.

# SITUATIONAL ANALYSIS OF INFRASTRUCTURE PROVISIONING BY SPORT, LIBRARY SERVICES IN SEKHUKHUNE DISTRICTS

• The distribution of libraries indicated in the graph does not reflect the demography of the province.

- There are only 12 libraries in Sekhukhune District which does not match the population of the districts.
- There is a great need for equity in the provision of libraries in Sekhukhune district in all municipalities.
- The whole province has an estimated backlog of 220 new libraries if every ward has to have a fully functional library.
- The 1,1 million people in the district need libraries.
- The following is the demographics of all districts that are backing up the provision of libraries in Sekhukhune:

Sources: Dept. of Sports, Arts & Culture: Limpopo (2022)

#### STATUS OF ALL LIBRARIES: IN SEKHUKHUNE DISTRICT

In terms of norms and standards there should be 1 library per 10 000 households. Currently there are 11 libraries in the district and there is a need for 14 libraries.

Table 84: Number of Libraries and Backlogs

| NAME OF THE MUNICIPALITY | NUMBER OF LIBRARIES | BACKLOGS |

# SITUATIONAL ANALYSIS OF SPORT INFRASTRUCTURE PROVISIONING IN SEKHUKHUNE DISTRICT

- Given the situational analysis above, the Department, in collaboration with the Department
  of Sport, Arts and Culture at a National level consulted with Sekhukhune District and its
  local municipalities for the provision of sport infrastructure since 2017/18.
- The Provincial Department does not have Budget for Sport Infrastructure.
- Its role is to advocate for funding for municipalities in the area of sport infrastructure.
- The following slides gives a report and analysis of what has been done so far in the district:

#### Challenges:

- Poor maintenance of existing sport, arts, and culture facilities.
- Under-funding of sport, arts, and culture development programmes.
- Insufficient professional support for sport, arts, and culture programme by local municipalities.
- Inadequate capacity-building programmes
- Lack of professional facilities within the local municipalities.
- Lack of personnel at Sekhukhune Satellite Academy of Sport (Maleoskop)
- Lack of Arts and Culture Centers
- Lack of service level agreements between provincial department and municipalities

#### 2.5.13. Health

South Africa has huge health care resources compared with many middle-income countries, yet the bulk of these resources are in the private sector and serve a minority of the population thereby undermining the country's ability to produce quality care and improve healthcare outcomes. Many of the public facilities, especially hospitals and clinics need to be revitalized. National government should expand on progress made in upgrading facilities in many public hospitals and clinics as part of a physical infrastructure programme. The government is determined to end the huge inequalities that exist in the public and private sectors by making sure that these sectors work together.

As promulgated in the Constitution, Schedule 4-part A, health service is a functional area of National and Provincial legislative competence. In terms of section 155 (6) (a) the Provincial government must provide for the monitoring and support of local government in the province, albeit can be assigned to a municipality in terms of Section 156 of Constitution.

The government has identified the following priorities that must inform a major improvement in the health care system:

- Increasing bursaries of the health care professionals, including increasing the employment of community health workers, which will be linked to the improvement of the district health system.
- Improving working conditions and the provision of decent wages for health workers.
- Reduce the impact of HIV/AIDS on individuals, families, communities, and society by expanding access to appropriate treatment, care and support.
- Strengthen the fight against AIDS through collaboration with partners at all levels of society and accelerate implementation of the HIV and AIDS and STI plans.
- Strengthen the formal partnership against AIDS at all levels of our society including the strengthening the South African National AIDS Council (SANAC).
- Improve quality of health services and physical infrastructure revitalization.

Health services are critical in nurturing human development and tend to have important economic spin-offs as well. Countries that have invested significantly in primary health care (PHC), in particular, generally produce a healthier, and therefore more productive, workforce. There is also significant international evidence to illustrate that early investments in PHC result in less strain on the health budget (and, consequently, on social spending) in later years. This is an important debate for municipalities which are now largely responsible for PHC in South Africa.

Within Limpopo province, the provision of health facilities is generally inadequate in comparison with other provinces. More specifically, access to health facilities within Sekhukhune District Municipality itself is fairly poor. On average, there is 1 clinic for every 17,000 people within the district and approximately 97,500 people per hospital.

A better health is central to the well-being of the people within the district. It also makes an important contribution to economic development as healthy people live longer and are more productive. There are various diseases that affect the wellbeing of the communities within the district and these include HIV/AIDS, diabetes, Hypertension, Tuberculosis, etc.

### **Sekhukhune District Analysis**

The district is sub-divided into four local municipalities; namely, Elias Motsoaledi (population: 277 864), Ephraim Mogale (population: 149 488), Fetakgomo-Tubatse (population: 556 422) and Makhuduthamaga (population: 283 154). Health facilities: 7 hospitals (2x regional and 5x district) and PHC = 89 (86 clinics and 3 health centers).

The first line of referrals from the clinics and CHCs goes to district hospitals while district hospitals refer their patients to regional hospitals. Service delivery is driven through the following health programmes: TB & HIV, MCWH & N, Hospitals & PHC) in partnership with the Community Based Home Carers attached to clinics. Of the total district adjusted population of 1 229 286, 94% is uninsured. The unemployment rate is at 50.9% which is higher than the national average of 25.5%.

The district management team is operating with the acting District Executive Manager, 2/7 permanent appointed directors,4/7 CEOs appointed, 4/7 senior clinical managers appointed, 6/7 nurse managers appointed and 0/5 sub-district managers appointed. In addition, the district is having a vast shortage of professional nurses and support staff (particularly the cleaners and grounds men). There is a high vacancy rate of health professionals, especially medical officers (70%) and specialists (93%) and this is attributed to the ruralness of the district.

The district is experiencing vast shortage of ambulances which is at 1:29 729 instead of 1:10 000. The district terrain contributes to the shortage of ambulances as 90% of the roads are not tarred. The condition of the roads contributes to the repeated break down of ambulances which results in most of them being in and out of merchandise.

The district has high economic development activities because of the mining industry (producing platinum) and the business sector. It also has a high MVA rate due to the high traffic on the R37 and R555 roads. The high economic activities around the district, have resulted in a complete shift from the traditional housing structures to the modernised houses as an indication of improved socio-economic status. The district is unable to recruit and retain skilled Health Professionals because of geographical location. The high staff turnover rate amongst professionals, impacts negatively on service delivery because of the rural environment.

Despite the insufficient budget allocated for both personnel and material resources, the district is still delivering comprehensive and integrated services to the communities.

#### 3.2.2 Number of Health Facilities in Sekhukhune District

When it comes to access to healthcare facilities, there is an insignificant number of health facilities within the Limpopo province. Especially in Sekhukhune district, where on average there is 1 clinic for every 17 000 people and approximately 97 500 persons per hospital.

The map below shows how these health facilities are spatially located across the district. There are specific areas within the district without health facilities whereby the residents from those areas are served by mobile clinic weekly or Bi-weekly. However, coverage of health services alone is not sufficient to guarantee health outcomes. It is required that services are of a sufficient level of quality to be effective in reducing morbidity and mortality.

Table 90: Access to clinics

| Municipality      | Percentage within 5Km radius to clinics. |
|-------------------|--|
| Fetakgomo Tubatse | 48%                                      |
| Elias Motsoaledi  | 64%                                      |
| Makhuduthamaga    | 48%                                      |
| Ephraim Mogale    | 47%                                      |

Source: Department of Health: Limpopo 2023

The table and map above show that the district should pay attention to Fetakgomo Tubatse Municipality when allocating the district resources as this Municipality has the highest population in the district with only 2 hospitals servicing the area. This requires that more health facilities be planned for the Municipality.

#### **ACCESS TO HEALTH CARE**

Facilities working 24 Hours Strait Shift:

| FACILITY NAME                   | SUBDISTRICT                   |

#### **HIV/AIDS Prevalence**

In 2018, 97 300 people in the Sekhukhune District were infected with HIV/AIDS. This reflects an increase at an average annual rate of 1.72% since 2008, and in 2018 represented 8.14% of the district municipality's total population. The Limpopo Province had an average annual growth rate of 1.18% from 2008 to 2018 in the number of people infected with HIV, which is lower than that of the Sekhukhune District Municipality. When looking at South Africa as a whole it can be seen that the number of people that are infected increased from 2008 to 2018 with an average annual growth rate of 2.00%. The District HIV/AIDS council has been established. This will strengthen the capacity of the district to bring awareness to communities.

HIV+ estimates and AIDS death estimates **Sekhukhune**, 2008-2023 120.000 4,500 4,000 100,000 3,500 80.000 3,000 2,500 60,000 2,000 40,000 1,500 1,000 20,000 500 0

Figure 44: HIV + Estimates and AIDS death estimates

Source: IHS Markit Regional eXplorer version 1750

HIV+ estimates

Presenting the number of HIV+ people against the number of people living with AIDS, the people with AIDS added up to 4050 in 2008 and 1700 for 2018. This number denotes a decrease from 2008 to 2018 with a high average annual rate of -8.33% (or -2350 people). For the year 2018, they represented 0.14% of the total population of the entire District Municipality.

AIDS death estimates

According to Dept. of Health (2018), there is a comprehensive system of testing, administering of treatment and counseling servicing the district. The main challenge facing the department is that testing is voluntary. As a result, more effort is needed to convince people to come to the fore and be tested. This should be accompanied by prior counseling to enable people who will be diagnosed HIV/AIDS to live with themselves. The Treatment Plan which seems to be effective, should be communicated adequately to strengthen its effectiveness. Sekhukhune District should implement its HIV/AIDS strategy to guide public interventions in the area. The district also launched the Sekhukhune HIV/AIDS Council in 2018/19, and the key focus areas are education and awareness raising, support for people living with HIV/AIDS and care for children in distress.

#### **TUBERCULOSIS (TB) CONTROL**

Table 93: TB Treatment and death rate

| INDICATOR                                | 2017 | 2018 | 2019 | 2020 | AVERAGE |
|--|------|------|------|------|---------|

Source: Limpopo Department of Health (2022)

TB treatment success rate has improved to 77.2% in 2020 compared to 76% in 2019 however a target of 79% was not reached due a high defaulter rate; of which 13% is in Makhuduthamaga sub-district and 9% in Elias Motsoaledi. Fetakgomo-Tubatse has obtained 80% of treatment success rate and Ephraim Mogale 79.7% and they are the only sub-districts that have reached the target of 79%.

All sub-districts are having high TB death rate with Makhuduthamaga at 14,6% and Ephraim Mogale at 14.4% and the latter sub-districts being the highest and Elias Motsoaledi at 13.4% and Fetakgomo-Tubatse at 11.1% against the target of 10%.

### Challenges relating to health service within the district:

• Improvement of health services in terms of Customer Care (i.e., the turnaround time, treatment, Batho Pele principles and safety

- Lack of more funding for primary Health Care.
- Inadequate health infrastructure,
- Inaccessibility of health due to poor roads and inadequate transportation
- Insufficient health professionals in clinics and hospitals.
- Insufficient medication at clinics and mobile clinics.
- Stigma attached to the HIV/AIDS disease by communities.
- Awareness campaign to educate the community about the normality of living with the Virus.

### 2.5.14. **Education**

Education is one of the basic human rights in South Africa and among the important socioeconomic indicators for development. In this section, the levels of educations and number of schools will be profiled using the data from Census 2022. In this section, the education measure represents the highest level of education of an individual, using the 15 years and older age category (According to the United Nations definition of education, one is an adult when 15 years or older).

The LEGDP indicates that Sekhukhune has the least highly skilled individuals in the total province. The low skills reduce the ability of the district to be innovative and economically productive. While there has been an improvement, this has been far below that of the other DMs in the Limpopo Province. The lack of skills is frustrating the current and future development of the area. It is also the high percentages of persons with no schooling which require a buoyant entrepreneurial class to establish industries that those with low skills levels could be absorbed in.

The low percentage of the population having managed to obtain tertiary education qualification bear witness to the infrastructure that is available in schools. Most of the schools in the district do not have facilities like laboratories, libraries, computers, network connectivity, etc. Shortage of infrastructure impacts much on future educational development of this district.

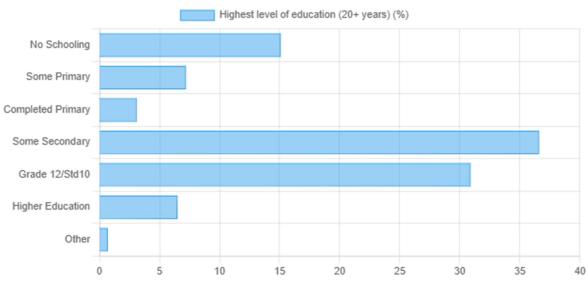

The following tables provide the educational status within the district according to Census 2022.

Table 95: Education status in Sekhukhune District - 2022

| Name              | Frequency | %     |
|-------------------|-----------|-------|
| No Schooling      | 107 553   | 15,1% |
| Some Primary      | 51 215    | 7,2%  |
| Completed Primary | 21 901    | 3,1%  |
| Some Secondary    | 261 385   | 36,6% |
| Grade 12/Std10    | 220 805   | 30,9% |
| Higher Education  | 46 657    | 6,5%  |
| Other             | 5 025     | 0,7%  |

Source: Census 2022

Source: Census 2022

Majority of people within Sekhukhune District Municipality have some secondary school. It is also equally noticeable that 107 553 persons have no schooling in 2022. This is concerning because those who cannot read and write will not be able to access better job opportunities in the market as in most training programmes there is a need to have basic writing and reading skills. There are also very insignificant numbers of the persons that have higher education in the district.

Table 96: Education profile per Local Municipality (2022)

|                   | Elias          | Ephraim        | Fetakgomo       | Makhuduthamaga |

Source: Census (2022)

As indicated in the tables above, the district has a relatively high illiteracy level, with 15.1% which is indicating an improvement compared to 2011 which was 28% of the population having no formal school education whatsoever. Only 6.5% of the population has obtained tertiary educational qualifications.

The Limpopo Provincial Growth and Development Strategy indicates that Sekhukhune has the least highly skilled individuals in the province. The low skills reduce the ability of the district to be innovative and economically productive.

The education levels in the district are lower than the comparative levels for Limpopo province. The literacy rate is one of the main development indicators of the economic status as the increased literacy rate results enhancement of country's human capital development. According to the Limpopo Provincial Growth and Development Strategy, Sekhukhune District has the least of highly skilled persons in the province.

There are approximately 107 553 people 20 years or older in the district who have no schooling. Only 6.5 % of the population have higher education. This will likely constrain the ability of the district to improve its socio-economic conditions significantly in the short to medium term. Given the development framework of the district to industrialize, the district is likely to decline on the requisite skills to support its industrialization and growth path.

When it comes to schools in the district, there is a total of 924 with 04 TVET Colleges which total to 928 schools in the district. The table below show the numbers per each local municipality. Fetakgomo Tubatse Local Municipality has the highest number of schools in the district with 377 and Ephraim Mogale has the lowest number with 82.

#### Number of Schools in Sekhukhune District

Source: Department of Education, Limpopo (2022)

There are very few special schools in the district, with Ephraim Mogale Municipality not having even a single Special School. There is a need to ensure that Special Schools are accessible to all the learners with special needs.

**Teacher: Learner Ratio** 

Table 98: Number of Teachers and Learners

| Municipality     | Total number | Total Number | Total Number | Student-      |
|------------------|--------------|--------------|--------------|---------------|
|                  | of Schools   | of Teachers  | of Learners  | Teacher Ratio |
| Fetakgomo        | 375          | 4575         | 14521        | 32:1          |

Source: Department of Education, Limpopo (2018)

One of the factors that contribute to low quality of education in the district is the learner/teacher ratio and class size. According to Organisation for Economic Co-operation and Development (OECD), smaller classes are beneficial as they allow teachers to pay attention and meet the needs of individual learners.

The learner/teacher ratio for public schools is higher than that of private schools. There has been an increase in learner/teacher ratio in public schools from 2016 to 2018. It is reported that public schools, particularly the ones in rural areas, lack educators. However, when it comes to student-teacher ratio in Sekhukhune district, a more rural local municipality Makhuduthamaga has a better student-teacher ratio when compared to the other locals. The table below shows that Makhuduthamaga also had a high school infrastructure backlog in the district.

### Number of classrooms constructed between 2016-2018

Table 99: Number of classrooms constructed

| Municipality      | 2016-2017 | 2017-2018 |  |
|-------------------|-----------|-----------|--|
| Fetakgomo Tubatse | 16        | 16        |  |
| Ephraim Mogale    | 5         | 5         |  |
| Elias Motsoaledi  | 3         | 3         |  |
| Makhuduthamaga    | 5         | 5         |  |
| Total             | 29        | 29        |  |

Source: Limpopo Dept. of Education (2018)

The above table shows that a total of 29 school classrooms were constructed in 2 consecutive financial years and this brings the constructed classrooms to a total of 58 classrooms for the said period. A high number of classrooms were constructed in Fetakgomo Tubatse and the least number of classrooms were constructed in Elias Motsoaledi. There is a need for the Department of Education to construct more classrooms within the district to address the existing backlogs.

Source: Limpopo Dept. of Education (2022)

Despite an attempt to provide good infrastructure in schools, there are still schools without proper school infrastructure, especially sanitation. Most of the schools in the district are using pit toilets. In some schools the toilets have collapsed because they are full and learners relieve themselves in the bushes. Sanitation has been a serious challenge in LDoE which sadly claimed the life of a learner. LDoE focused on eradication of pit latrines during this cycle to ensure that no learner will ever lose life in this manner.

Most of the schools are very old and needs renovations, replacement, upgrades and additions time and again.

Most of the schools have water system in the form boreholes which were drilled through norms and standards. The Department implements its infrastructure plans through Limpopo Department of Public Works, Roads, and Infrastructure (LDPWRI) to implement the infrastructure projects. In an attempt to enhance its capacity, the LDoE has also contracted the following entities as implement agents:

- ① The Independent Development Trust (IDT)
- The Mvula Trust, and
- ① The Council for Science and Industrial Research (CSIR)

Table 103: Rationalisation of schools

| DISTRICT         | TARGET FOR THE DISTRICT | MERGED |
|------------------|-------------------------|--------|
| SEKHUKHUNE EAST  | 51                      | 26     |
| SEKHUKHUNE SOUTH | 77                      | 26     |
| TOTAL            | 128                     | 52     |

#### SCHOLAR TRANSPORT

Table 104: Sekhukhune District Scholar Transport

| DISTRICT         | NUMBER OF SCHOOLS<br>BENEFITING | NUMBER OF LEARNERS<br>BENEFITING |
|------------------|---------------------------------|----------------------------------|
| Sekhukhune East  | 32                              | 3456                             |
| Sekhukhune South | 49                              | 3188                             |
| TOTAL            | 80                              | 6644                             |

### **Early Childhood Development (ECD)**

Table 105: Number of Early Childhood Development (ECD) centers

| DISTRICT            | LOCAL MUNICIPALITY | ECD CENTRES |
|---------------------|--------------------|-------------|
| Sekhukhune East     | Fetakgomo Tubatse  | 383         |
| Sekhukhune East     | Makhuduthamaga     | 155         |
| Sekhukhune South    | Elias Motsoaledi   | 118         |
| Sekhukhune South    | Ephraim Mogale     | 53          |
| SEKHUKHUNE DISTRICT | TOTAL              | 709         |

Limpopo Dept. of Education: 2025

Fetakgomo Tubatse has the highest number of ECDs (383) while Ephraim Mogale has the lowest ECDs. This is attributed to the fact that Ephraim Mogale is the Smallest Municipality within the district. Attention should be given to the unregistered ECDs so that they can be fully registered.

### **Summary of Education Challenges**

- Lack of tertiary institutions within the district makes percentage of people with post matric qualifications very low.
- Lack of support (Finance and capacity) to Early Childhood Development (ECD) in terms of unregistered and community-initiated NGOs.
- Mushrooming of ECD Sites
- Poor delivery of basic services like water, sanitation, and electricity to school.
- Lack of effective literacy campaigns and ABET Centers to reduce illiteracy level.
- Lack of learnership, internship and bursary schemes for students.

## 2.5.15. Social Development (Welfare)

The provision of social services is a competence of concurrent National and Provincial governments, as promulgated in schedule 4 Part A of the Constitution. Social development systems form the backbone of assistance to the vulnerable in most advanced societies. Most countries acknowledge that whilst they strive towards full economic and social development, the more vulnerable members of society – especially children and the elderly – would require some form of state assistance.

Social development systems are particularly important in Sekhukhune District due to its predominantly rural in nature and have high poverty levels. The majority of Sekhukhune population is young, unemployment is rife, and the district consequently exhibits an extremely high dependency ratio. Most of this population is dependent on government grants in order to survive.

The upper poverty line is defined by STATSSA as the level of consumption at which individuals are able to purchase both sufficient food and non-food items without sacrificing one for the other. This variable measures the number of individuals living below that particular level of consumption for the given area and is balanced directly to the official upper poverty rate as measured by STATSSA.

1,200,000 80% Number of people in poverty Percentage of people in poverty 78% 1,000,000 76% 800,000 74% 600,000 72% 400,000 70% 200,000 68% 66% 2022 2012 2013 2014 2015 2016 2017 2018 2019 2020 2021

Source: South Africa Regional eXplorer v2423. © 2023 S&P Global.

In 2022, there were 968 000 people living in poverty, using the upper poverty line definition, across Sekhukhune District Municipality - this is 24.43% higher than the 778 000 in 2012. The percentage of people living in poverty has increased from 70.39% in 2012 to 77.16% in 2022, which indicates an increase of -6.76 percentage points.

Source: South Africa Regional eXplorer v2423. © 2023 S&P Global

In 2022, the population group with the highest percentage of people living in poverty was the African population group with a total of 78.1% people living in poverty, using the upper poverty line definition. The proportion of the Asian population group, living in poverty, decreased by -2.78

percentage points, as can be seen by the change from 8.12% in 2012 to 24.02% in 2022. In 2022 47.64% of the Coloured population group lived in poverty, as compared to the 45.40% in 2012. The African and the White population group saw a decrease in the percentage of people living in poverty, with a decrease of -6.85 and -2.25 percentage points respectively.

CHART 2. PERCENTAGE OF PEOPLE LIVING IN POVERTY - LOCAL MUNICIPALITIES AND THE REST OF SEKHUKHUNE DISTRICT MUNICIPALITY, 2022 [PERCENTAGE]

In terms of the percentage of people living in poverty for each of the regions within the Sekhukhune District Municipality, Makhuduthamaga Local Municipality has the highest percentage of people living in poverty, using the upper poverty line definition, with a total of 80.9%. The lowest percentage of people living in poverty can be observed in the Greater Tubatse/Fetakgomo Local Municipality with a total of 74.9% living in poverty, using the upper poverty line definition.

#### Poverty gap rate

**Ephraim Mogale** 

Africa

South

72.0%

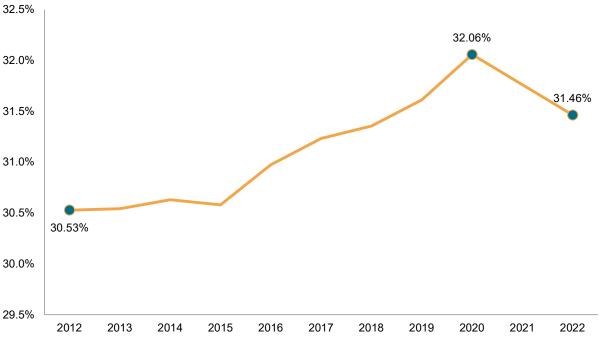

71.0%

Source:

The poverty gap is used as an indicator to measure the depth of poverty. The gap measures the average distance of the population from the poverty line and is expressed as a percentage of the upper bound poverty line, as defined by STATSSA. The Poverty Gap deals with a major shortcoming of the poverty rate, which does not give any indication of the depth, of poverty. The upper poverty line is defined by STATSSA as the level of consumption at which individuals are able to purchase both sufficient food and non-food items without sacrificing one for the other.

It is estimated that the poverty gap rate in Sekhukhune District Municipality amounted to 31.5% in 2022 - the rate needed to bring all poor households up to the poverty line and out of poverty.

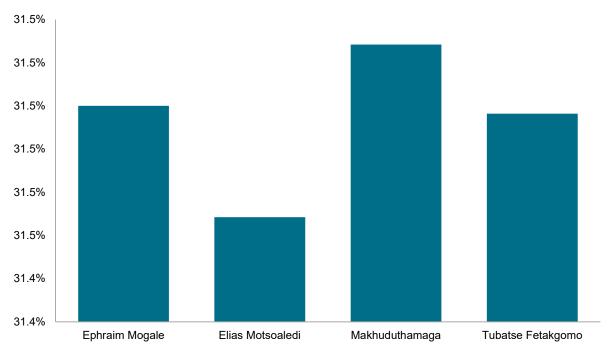

CHART 3. POVERTY GAP RATE BY POPULATION GROUP - SEKHUKHUNE DISTRICT MUNICIPALITY, 2012-2022 [PERCENTAGE]

Source: South Africa Regional eXplorer v2423. © 2023 S&P Global

In 2022, the poverty gap rate was 31.5% and in 2012 the poverty gap rate was 30.5%,it can be seen that the poverty gap rate increased from 2012 to 2022, which means that there were no improvements in terms of the depth of the poverty within Sekhukhune District Municipality.

CHART 4. POVERTY GAP RATE - LOCAL MUNICIPALITIES AND THE REST OF SEKHUKHUNE DISTRICT MUNICIPALITY, 2022 [PERCENTAGE]

Source: South Africa Regional eXplorer v2423. © 2023 S&P Global.

In terms of the poverty gap rate for each of the regions within the Sekhukhune District Municipality, Makhuduthamaga Local Municipality had the highest poverty gap rate, with a rand value of 31.5%. The lowest poverty gap rate can be observed in the Elias Motsoaledi Local Municipality with a total of 31.5%.

#### Inequality

Based on the outcomes of the Gini coefficient, if the outcome is equal to zero, it means that income is distributed in an equal manner within the defined area and there is no variance between the high and low-income earners. In contrast, if the Gini coefficient equals 1, income is completely inequitable, meaning that one or few individuals in the population earns all the income and the rest has no income.

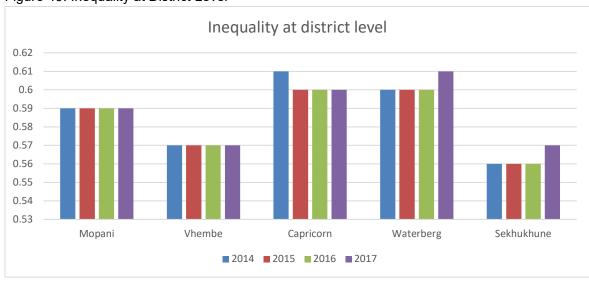

Figure 49: Inequality at District Level

Source: HIS Markit Regional Explorer 2018

Sekhukhune and Vhembe District has the lowest Gini coefficient in the province of 0.57 in 2018 when compared to the other district municipalities. The Sekhukhune's Gini coefficient has increased by a 0.01 when compared to 2016, meaning that the income inequality in the district increased marginally. The income inequality in Sekhukhune is lower that of the Limpopo Province and South Africa which recorded a Gini coefficient of 0.593 and 0.63 respectively. The district should develop relevant Policies that promote equalities in order to ensure that people have same share of power and wealth within the district.

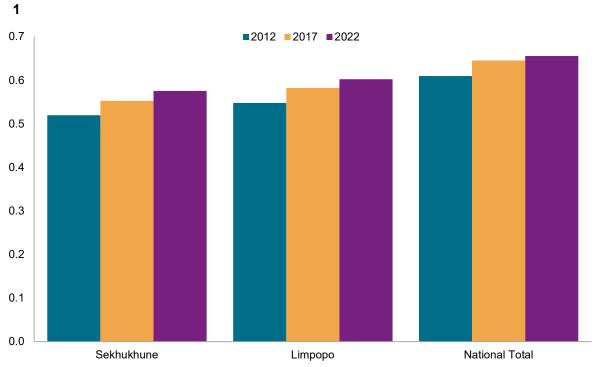

#### **HUMAN DEVELOPMENT INDEX (HDI)**

The Human Development Index (HDI) is a composite relative index used to compare human development across population groups or regions.

HDI is the combination of three basic dimensions of human development: A long and healthy life, knowledge and a decent standard of living. A long and healthy life is typically measured using life

expectancy at birth. Knowledge is normally based on adult literacy and / or the combination of enrolment in primary, secondary and tertiary schools. In order to gauge a decent standard of living, we make use of GDP per capita. On a technical note, the HDI can have a maximum value of 1, indicating a very high level of human development, while the minimum value is 0, indicating no human development.

CHART 5. HUMAN DEVELOPMENT INDEX (HDI) - SEKHUKHUNE, LIMPOPO AND NATIONAL TOTAL, 2012, 2017, 2022 [NUMBER]

Source: South Africa Regional eXplorer v2423. © 2023 S&P Global.

In 2022 Sekhukhune District Municipality had an HDI of 0.575 compared to the Limpopo with a HDI of 0.602 and 0.655 of National Total as a whole. Seeing that South Africa recorded a higher HDI in 2022 when compared to Sekhukhune District Municipality which translates to worse human development for Sekhukhune District Municipality compared to South Africa. South Africa's HDI increased at an average annual growth rate of 0.72% and this increase is lower than that of Sekhukhune District Municipality (1.02%).

CHART 6. HUMAN DEVELOPMENT INDEX (HDI) - LOCAL MUNICIPALITIES AND THE REST OF SEKHUKHUNE DISTRICT MUNICIPALITY, 2022 [NUMBER]

Source: SASSA (2019)

The table above presents the statistics on grants beneficiaries are obtained from the South African Social Security Agency (SASSA). The figures indicated in the table change every month due to new approvals, births and deaths. The SASSA shows that the state resources are spend in the form of child grants in the areas that are predominantly rural. Many of these beneficiaries are either fostered, old aged, dependent, need support one way or the other hence they receive different forms of grants. Issues contributing to high dependency rate on grants range from amongst others, orphans resulting from HIV/AIDS related deaths, child-headed households.

## Disability

95.88% do not have disability, which means that most of the population does not need any disability related care in both public and private buildings. 1.34% has physical disability followed by sight at 0.68%, emotional at 0.63%, deaf at 0.55 and multiple disabilities at 0.17%. The table below illustrates the types of disabilities found in the district:

Table 108: Disability Types

## Disability Development Programmes in Sekhukhune District Municipality

The Office of the Executive Mayor supports disabled persons community through celebrations of important calendar days covering a variety of disabilities and workshops:

- Support to District Disability Forum
- Deaf Awareness Campaign
- Eye Care Awareness Campaign
- Albinism Awareness Campaign

## **Disability Challenges**

- Ineffective Disability Forums
- Lack of clear Policies on advancement of disabled people's needs and aspirations
- Insufficient budget to implement awareness programs

Public places not accessible and user-friendly for people living with disability.

#### Female Headed Households

In the year 2011, 139 593 households in Sekhukhune District Municipality are headed by females. This represents 52.9% of the total households in the district. The provincial average is 50.4% and therefore the district one is slightly higher. Targeted social programmes that benefit women in particular, are required to alleviate challenges in these households. The highest number of these households is found in Makhuduthamaga, Elias Motsoaledi and Fetakgomo municipalities.

Table 109: Female Headed Households

Source: Census (2011)

These figures on the other end challenges the LED unit, together with its key stakeholders to derive and develop programs that seek to empower women as they are burdened with the responsibility of ensuring that families are taken care of.

#### **Child Headed Households**

In 2011, 2 949 child headed households were recorded in Sekhukhune District Municipality. This represents 1,1% of the households in the entire district. Ephraim Mogale and Elias Motsoaledi have recorded highest numbers of child headed households in the district. Makhuduthamaga also scored 1,1% of the households headed by children. Programmes to deal with this issue need to focus on the municipalities with the highest need.

Table 110: Child Headed Households

## Dependency Ratio<sup>1</sup>

Table 111: Dependency Ratio

| Municipality      | 1996   | 2001  | 2011   | 2022  |
|-------------------|--------|-------|--------|-------|
| Ephraim Mogale    | 91,7%  | 82,8% | 73,7%  | 66,5% |
| Elias Motsoaledi  | 92,5%  | 86,5% | 76,0%  | 64,2% |
| Makhuduthamaga    | 105,9% | 94,8% | 85,4%  | 74,4% |
| Fetakgomo Tubatse | 101,8% | 89,8% | 71,35% | 62,4% |
| Sekhukhune        | 99,6%  | 89,2% | 74,7%  | 66,1% |

Source: Census (2022)

Dependency ratios indicate the number of dependents (such as children and the elderly) relative to the working-age population. Looking at the trends, it's evident that dependency ratios of the district generally decrease over time in each municipality. This suggests a shift towards a population structure with fewer dependents compared to the working-age population and indicates a trend towards a more economically active population.

In 2022, the dependency ratio in Sekhukhune District Municipality stands at 66.1% as compared to 74.7% in the 2011 census. Within the district however, Makhuduthamaga Local Municipality is still highest with dependency ratio at 74.4% way above the district ratio. This is followed by Ephraim Mogale and Elias Motsoaledi at 65% and 64.2% respectively. There is however great reduction in Fetakgomo Tubatse dependency ratio from 101.8% in 1996 to 66.1%.

These shifts in dependency ratios have important implications as declining ratio suggests that a larger working-age population can now contribute to economic growth and productivity. However, it also highlights the need to address challenges related to aging populations and provide support for dependents.

Although Municipalities experience a decline in dependency ratio, they still face greater challenges in providing social services and support for vulnerable populations. To address these challenges, policymakers can consider implementing social support programs, developing labour market strategies to reduce unemployment rates, investing in healthcare and education, and improving infrastructure. By understanding dependency ratios and planning targeted interventions, authorities can better prepare for future demographic changes, promote economic development, and enhance the well-being of communities.

<sup>&</sup>lt;sup>1</sup> Dependency ratio tells us how many young people under the age of 16 and older people over 64 years who are not working that have to depend on those who are working age and paying taxes. The higher the dependency ratio, the more people that need looking after

The tables below indicate the existing facilities for vulnerable groups, old age home, aged service centres, substance abuse centres, disability centres and stimulation centres.

Limpopo Dept. of Social Development

### Challenges

- Low supply of basic services to service centres
- High level of grant dependence
- High level of poverty

## 2.5.16. Safety and Security

Section 206 (3) of the Constitution of the RSA. It mandates the Department to monitor the effectiveness and efficiency of the Police service and also to promote good relations between the police and the community

Combating crime forms one of the governmental strategic priorities within the medium-term period. Safety and security issues remain critical in crime prevention measures in the district. Communities lack policing facilities that would assist in either reporting or combating crimes in their areas. It means the responsibility of the state to make sure that police Stations are well equipped to deal with any type of crime that might be experience among communities.

Legal recourse is an important element of justice for those who suffered crime and other violations. There are six magistrate courts in Sekhukhune District. These are Magistrate Praktiseer (next to Burgersfort), Magistrate Sekhukhune (in Schoonoord), Magistrate Nebo in Phokwane), Magistrate Moutse, Magistrate Sempupuru and Magistrate Groblersdal (Groblersdal). These magistrate courts serve a population of 1,169, 762 people.

#### Norms and standards on SAPS services

Buffers were created around existing service points on 4km, 8km, 16km and 24km to give a basic indication of the distances that people need to travel. These buffers were created on the international norm that an average person can walk 4,5km in an hour. The areas served by stations (precincts) were clearly demarcated on maps.

Buffers of 4km, 8km, 16km and 24km were generated around existing service points, namely police stations; satellite police stations; fixed and mobile contact points.

Geographical set-up in terms of the map of the stations were used to generate the buffers.

What does it all mean? Based on the centre of an existing police service station, an ideal desired situation is that the next station should be 8km away, then another one 16km away, and lastly

24km away. But the next service station from the first should never be more than 24km away. The first 4km radius is just for walking distance purposes. The distances were also calculated taking into consideration the reaction time by police to reach affected area after community calls for service.

### Components monitored and evaluated by the district:

**9** specialised Units broken down as follows:

- Employee Health and Wellness (EHW): 2 (Burgersfort & Groblersdal)
- Family violence, child and sexual offenses (FCS): 2 (Burgersfort & Groblersdal)
- K9 (Dog Unit): 3 (Masemola, Burgersfort & Dennilton)
- Local Criminal Record Centre (LCRC): 1 (Groblersdal)
- Stock theft and endangered species: 1 (Marble Hall)

### Programme: Provincial Secretariat for Police Service

• Vehicle Crime Investigation (VCI): 1 Satellite (Groblersdal)

Police stations : 21

## **Functionality of the Community Policing Forums**

- All 21 Police Stations have functional CPF's who are paid stipends allowance as per their sittings.

### **Functionality of the Community Safety Forums**

 All 4 local municipalities have functional CSF's who are paid stipends allowance as per their sittings.

### Current police stations are 21 in number (SAPS, 2023), listed below:

- 1. Burgesfort
- 2. Leboeng
- 3. Mecklenburg
- 4. Apel
- 5. Masemola
- 6. Ohrigstad
- 7. Sekhukhune
- 8. Tubatse
- 9. Roosenekal
- 10. Rakgoadi
- 11. Driekop
- 12. Dennilton
- 13. Groblersdal
- 14. Hlogotlou
- 15. Marble Hall
- 16. Motetema
- 17. Nebo

- 18. Elandskraal
- 19. Matlerekeng
- 20. Zaaiplaas
- 21. Jane Furse

## Currently approved satellite police stations are 2 in number (SAPS, 2022):

- 1. Eeerstegeluk and
- 2. Penge.

However, the buildings do not belong to SAPS and as a result, SAPS is unable to control the operating hours on those buildings as they belong to other departments.

### There are 14 police contact points in the district of Sekhukhune (SAPS, 2023):

- 1. Kgautswane
- 2. Manganeng Kgwana Project
- 3. New Horizon
- 4. Ngwaabe Old Clinic
- 5. Phiring
- 6. Steelpoort
- 7. Luckau
- 8. Magagamatala
- 9. Masoing
- 10. Taung
- 11. RDP Leeufontein
- 12. Atok
- 13. Mohlaletsi
- 14. Mphanama

## Backlog on police stations is in two areas (SAPS, 2023):

- Driekop Police Station: it's operating 24 hours, but the building is not according to a standard of a police station.
- Penge Police Station: operating through the use of a building belonging to Penge Mine.
   SAPS is unable to control operating hours on that building as it belongs to another institution.

### Proposed new satellite and fixed contact stations are 7 in number:

- De Hoop Dam
- Leeufontein
- Lehlaba Centre (Riba Cross Lehlaba)
- Manotwane
- Phatantswane Clinic
- Tafelkop
- Ntwane

Manotwane satellite police station building was donated by the Department of Health, but due to financial constraints SAPS is unable to renovate it.

#### **Crime statistics**

The National Development Plan (NDP) states that the high crime levels have slowed South Africa's social and economic development. The NDP further states that an integrated approach to safety and security will require coordinated activity across a variety of departments, the private sector and community bodies.

Table 118: Overall Crime Index - Sekhukhune District Municipality and the rest of Limpopo, 2012/2013 2022/2023 [Index Value]

|                     | Sekhukhune | Mopani         | Vhembe | Capricorn | Waterberg |

| 2012/2013-2022/2023 | 0.53%      | <i>-0.</i> 93% | 0.20%  | 1.01%     | -1.54%    |

Source: South Africa Regional eXplorer v2423. © 2023 S&P Global

In 2022/2023, the Capricorn District Municipality has the highest overall crime rate of the subregions within the overall Limpopo Province with an index value of 72.5. Waterberg District Municipality has the second highest overall crime index at 65.9, with Vhembe District Municipality having the third highest overall crime index of 61.8. Mopani District Municipality has the second lowest overall crime index of 54.8 and the Sekhukhune District Municipality has the lowest overall crime rate of 51.5. The region that decreased the most in overall crime since 2012/2013 was Waterberg District Municipality with an average annual decrease of 1.5% followed by Mopani District Municipality with an average annual decrease of 0.9%.

#### SAFETY AND SECURITY: PROBLEMATIC POLICING AREAS

#### Increase in GBV cases

Burgersfort, Mecklenburg, Dennilton, Hlogotlou, Tubatse, Motetema and Jane Furse

### Stock theft:

Matlerekeng and Rakgoadi

#### **Theft General:**

Burgersfort, Apel, Driekop, Jane Furse, Marble Hall, Groblersdal, Sekhukhune.

#### **Burglary at residential**

Apel, Nebo, Sekhukhune, Mecklenburg, Jane Furse

Table 119: Across various police stations, the crimes cut across many categories such as the following: Community reported serious crimes

Contact sexual Sexual assault and Arson offences sexual offences Assault with intent to Contact related crimes Sexual offences inflict grievous bodily harm Crime detected as a detected as a result Attempted murder result of police action of police action Shoplifting Attempted sexual Driving under the Stock-theft offences influence of alcohol or drugs Bank robbery Theft of motor Burglary at non-Drug related crime vehicle and motorcycle residential premises Illegal possession of firearms and Theft out of or from Burglary at residential ammunition motor vehicle premises Car-hijacking TRIO crimes Malicious damage to property Truck hijacking Commercial crime Murder Robbery of cash in Common assault Property related transit Common robbery crimes Robbery at non-Contact crimes Rape residential premises Robbery at residential premises Robbery with aggravating circumstances

Source: SAPS (2023)

It is thus important for SAPS and other stakeholders to put more efforts in addressing the aforementioned issues by adding more Police Stations or Satellite Stations. The district should also in collaboration with other Stakeholders (including relevant sector Depts.) develop a Community Safety Plan and be able to conduct safety audits.

The District's IDP consultations with communities found that the issue of crime was a recurring theme. The most important issue raised by communities and stakeholder groups (such as business, farmers, traditional leaders, and civil society organizations) concern:

- The presence of gangs in some communities.
- The lack of electricity and proper lighting exacerbated the problem of crime.
- There should be more police stations in the area as people sometimes have trouble accessing distant stations.
- Lack of satellite Police Stations.

## Challenges

- Revival and capacitation of Community Policing Forums (CPFs)
- Establishment of additional satellite police stations in the Municipalities
- Lack of crime prevention and awareness campaigns

#### 2.6. INSTITUTIONAL DEVELOPMENT AND ORGANISATIONAL TRANSFORMATION

## 2.6.1. Institutional Capacity Analysis

#### Mandate

The mandate of the municipality authorised by the Minister of Corporative Governance, Housing and Traditional affairs are as follows:

- Provide water and sanitation services
- · Provide emergency services
- Provide municipal health services
- Coordinate municipal planning and land use management
- Provide disaster management services

### **Service delivery Priorities**

- Improve the quality of water and wastewater (Compliance to blue and green drop)
- Stabilize water supply provision
- Extension of water and sanitation infrastructure to areas without;
- · Promote health and prevent diseases
- Save lives, protect property and the environment
- Provide proactive protection to major centres of economic infrastructure in the municipality from fire.
- Prevent and mitigate on incidents of disaster in nature
- Effective land use management and spatial redress
- Economic growth and job creation
- Enhanced municipal planning capacity and Implementation of SPLUMA

#### Analysis of the staff establishment

The analysis was done with departments guided by the steps in the organisational design review plan for 2024/2025 financial year.

Table 110: Staff establishment for 2024/2025

| Department                      | Number of posts | Number of vacancies | Number of newly created | Number of filled positions |
|---------------------------------|-----------------|---------------------|-------------------------|----------------------------|
| Budget & Treasury               | 100             | 38                  | 6                       | 54                         |
| Corporate Services              | 169             | 24                  | 5                       | 140                        |
| Planning & Economic Development | 14              | 4                   | 2                       | 8                          |
| Community Services              | 277             | 117                 | 51                      | 103                        |
| Infrastructure & Water Services | 734             | 163                 | 95                      | 476                        |
| TOTAL                           | 1 294           | 346                 | 159                     | 781                        |

### Methodology used in analysis

The analysis considered the organisational design (OD) and job evaluation (JE) principles that emphasise the need to ensure that functional relationships between divisions have been taken into account to avoid duplication and overlap of functions across the municipality, financial implications, functional location, principles on the establishment of the division to ensure that each functional area has properly defined tasks, particularly with regard to the principle of equal pay for work of equal value, span of control, clear lines of reporting to avoid dual reporting and the need to ensure effective use of existing capacity, as well as the promotion of efficient and economic use of resources.

#### Strength

In terms of financial management, the municipality has a pool of officials with good accounting skills. Adequate capacity for institutional social development assisting in calming community unrest and protest.

The office of the Municipal Manager is strengthened with performance management and legal services. Council Secretary and Deputy Director in the Executive Mayor's Office are reporting to Administration.

The current staff establishment have signed job descriptions for all positions. For the newly created posts the job descriptions were developed in the first quarter based on the work-study investigation, job analysis, information from departments and more inputs from respective divisional heads and job experts. The jobs are subjected to job evaluation process to determine appropriate level of the post based on the relative size and value of the job.

#### Weaknesses

- The current staff establishment lack adequate support for LED, e.g. economic research and unfunded vacant positions in the division.
- Inadequate process control capacity to deal with water and wastewater, issues of blue & green drop coordination.
- Inadequate budget to fill vacant critical positions in some divisions
- Inability to provide tools of trades to staff members.

**Operate within constraints-**Various constraints put limits on the municipality and its design, change in legislations, prototypes structures, government priorities & regulations, stakeholders, technological systems, complex processes, finances, and other resources that constraints the strategy.

#### Plans to improve the Human Capital

To enhance capacity there is a need to continuously train employees to keep up with the trends in the labour market. Furthermore, there is a need to re-skill, retrain, job rotation, and job enrichment (vertical), job enlargement (horizontal) on- boarding of new employees, managing diversity, career development counselling, coaching, and mentoring. The other aspect will be placement only in cases of request to enhance productivity and career pathing. Above all, conduct employee satisfaction survey to diagnose the underlying issue in order to enhance employee's morale.

### 2.6.2. Organizational Development (OD)

#### Introduction

Organisational development is a long term plan effort to assist with the development of organisation change and learning capacity. In order to assist with the promotion of efficiency, effectiveness that led to improved productivity. Organisational development strives for appropriate models for organisational standards and benchmarks. It further enhances the organisation by aligning organisational strategy with organisational design to improve service delivery model

### Legislative framework used

### Challenges to be addressed by the OD Unit

- Change management processes
- Continuous diagnoses of respective departments
- Implement OD interventions

## **Organizational Structure**

#### 2.6.3. Human Resources Administration (HRA)

#### Introduction

Human resources management is unique in that it is multidisciplinary. It applies the disciplines of Economics (wages, markets, resources), Psychology (motivation, satisfaction), Sociology (organisational design, culture) and Law (minimum wage, labour relations, employment equity, etc.). For the Municipality, human resources is embedded within the work of all mangers, and most individual contributions due to the need of managing people (subordinates, peers and superiors) as well as teams to get things done. The Municipality is a local community service entity. Service is delivered by people. Low quality human resources lead to low quality community services. Effective management of knowledge inherent in people within the Municipality translates into optimum performance required to attain service excellence and sustenance for the benefit of the local community.

The HRM Strategy will be implemented through [state applicable number] strategic thrusts. Each of the strategic thrusts consists of priority programmes and projects, each of which is at a different stage of preparation, planning, and implementation. Implementation of these projects will contribute to the attainment of the HRM objectives. The proposed strategic thrusts are:

- Review the organisational structure to match IDP outcomes
- Develop placement and match criteria
- Capacitate HRM unit
- Develop HRM delegations of functions
- Design a staff member wellness programme
- Design and implement a records management system for HRM]

| Functions     | Status quo  | Challenges                        |

|   | or phrasing shall be referred to the Local Labour Forum for adjudication. Resolutions from the Local Labour Forum shall be incorporated into the policy.   |   |
|   | How the policies were developed:   |   |
| Approval of Overtime and Emergency work | Human Resource Policies were developed using the following principles:  • Alignment with organisational objectives and values  • The policy will contribute to efficiency and effectiveness in the Municipality  • The policy addresses the following:  - Adaptation to environmental circumstances influencing the Municipality  - Enhancement of the Municipality's organisational environment  - Acknowledgement of current practises and processes  Conditions for remunerated overtime  • Staff members shall not be required or permitted to work overtime for period exceeding  (a) Ten (10) hours in a week; and  (b) Three (3) hours on any working day.  • No staff member shall perform overtime before the relevant person with delegated authority has granted the necessary approval in writing.  • A staff member's monthly compensation for overtime shall not exceed thirty per cent (30%) of the staff member's gross monthly salary.  • In cases where the monthly overtime compensation exceeds the above limits, the Head of Department where overtime is performed may grant the staff member time-off, based on one hour for every excess hour worked.  • Time-off can only be taken if a staff member has accumulated eight hours, and shall not constitute more than five working days during a given financial year.  • A staff member performing overtime duty shall not be compensated for travelling time, hence overtime shall be arranged in a manner that the start and end times coincide with times during which public or other alternative transport is available.  • If a staff member performs authorised overtime duty at a place other than his / her normal place of work, the travelling time between the two places shall be regarded as overtime duty.  • Remunerated overtime shall not be approved for a continuous period of more than four months. | <ul> <li>Practical alignment of Ministerial Determination, Skilled employees and service delivery.</li> <li>General Management of Overtime and Emergency Services from Supervisor level.</li> <li>Capacity of supervisors to implement relevant prescripts.</li> <li>On-going rising costs.</li> <li>Generally unable to align compliance with service delivery.</li> </ul> |

| Functions | Status quo   | Challenges |
|-----------|--|------------|
|           | A staff member shall not do overtime as per conditions   |            |
|           | below, unless in cases where circumstances prevent the   |            |
|           | staff member to meet these conditions, and the relevant  |            |
|           | Head of Department has ensured that such   |            |
|           | circumstances are brought to the attention of the HRM  |            |
|           | Unit when a claim form for such hours is submitted. The  |            |
|           | Municipal Manager shall then be approached to approve  |            |
|           | such deviation from conditions:  |            |
|           | (a) If a staff member did not book overtime duty on a  |            |
|           | Saturday, the staff member shall not be allowed to book  |            |
|           | overtime duty for Sunday.  |            |
|           | (b) If a staff member took vacation, sick or special leave on  |            |
|           | a Friday, that staff member shall not be allowed to book   |            |
|           | overtime duty for either the Saturday or Sunday.   |            |
|           | (c) If a staff member did not start overtime duty immediately  |            |
|           | following normal knock-off time during the week.   |            |
|           | • The decision to remunerate overtime with cash, or with   |            |
|           | time off, shall be made by the Municipal Council from time to time.                                    |            |
|           |  |            |
|           | <ul><li>Time off for emergency work</li><li>Emergency work means the performing of work that</li></ul> |            |
|           | cannot be completed during normal working hours, on  |            |
|           | instruction of the Head of Department, provided that such  |            |
|           | work is required to be done immediately owing to   |            |
|           | unforeseen circumstances and one day or less prior   |            |
|           | notice has been given to this effect.  |            |
|           | • In cases where staff members are expected to perform   |            |
|           | overtime duty before approval is obtained due to   |            |
|           | circumstances beyond the Municipality's control; such  |            |
|           | duty shall for the purpose of this policy be viewed as   |            |
|           | emergency work.  |            |
|           | • In such cases staff members shall be granted time off in   |            |
|           | respect of the first day that such overtime duty was   |            |
|           | performed prior to obtaining approval.   |            |
|           | • The time off will be granted on the basis of one hour for  |            |
|           | every excess hour worked.  |            |
|           | Heads of Department shall be responsible for managing  |            |
|           | of these hours.  |            |
|           | Authorisation and information for remunerated overtime   |            |
|           | Authorisation for remunerated overtime duty shall be in  |            |
|           | accordance with the Municipality delegations.  |            |
|           | The following information shall be provided when an  |            |
|           | application for overtime is submitted for approval:  |            |
|           | (a) The circumstances that necessitated the performance of   |            |
|           | the overtime duty.   |            |

| Functions | Status quo  | Challenges |
|-----------|---|------------|
|           | (b) The steps, which were taken to prevent the performance    |            |
|           | of overtime duty such as redistribution of duties among staff |            |
|           | members or temporary utilisation of staff members.            |            |
|           | (c) Information about any voluntary unpaid overtime duty      |            |
|           | performed by staff members with regard to the task in         |            |
|           | respect of which remunerated overtime duty is performed       |            |
|           | and about general work in the department.                     |            |
|           | (d) Clearly defined and measurable outputs for the overtime   |            |
|           | work in respect of every individual staff member for which    |            |
|           | overtime is requested.  |            |
|           | (e) The names and ranks of the staff members who will be      |            |
|           | required to perform overtime duty.                            |            |
|           | (f) The duration of the overtime duty.                        |            |
|           | (g) The estimated expenditure and total hours on the          |            |
|           | planned overtime duty, as well as a clear differentiation     |            |
|           | between normal and double-time, indicating the amount         |            |
|           | that will be needed next to each of the above-mentioned.      |            |
|           | (h) If the performance of overtime is aimed at the            |            |
|           | completion of work, which has fallen in arrears, an           |            |
|           | investigation of the circumstances shall be done before       |            |
|           | overtime is authorised.                                       |            |
|           | (i) Specific indication about the responsible manager who     |            |
|           | shall supervise the remunerated overtime, if authorised.      |            |

#### **Status Quo: Human Resource Development**

The division manages issues relating to workplace skills planning and facilitates skills development for the community through a variety of interventions such as Internships, Learnership and Work Integrated Leaning. The division also manages the Bursary Scheme of the Council of Sekhukhune District Municipality. Currently only Internal Bursaries.

## Skills needs within the municipal area

The inception of Local Government sphere has *de-facto* opened a life-long unnoticed challenge of capacity among the public service and municipal employees. The passing of the Skills Development Act no.97 of 1998 is aimed at capacitating the above-mentioned employees through training to redress legacies of the past.

The Sekhukhune District Municipality develops the Workplace Skills Plan annually in consultation with its employees and councilors to analyze the skills needs. This exercise is done in the form of a questionnaire that is distributed among the stakeholders and consultative meetings and through the Gap-Skill System. The following are the critical skills among the staff members:

- Engineering
- IT
- Legal
- Municipal Finance

The councilors need capacity building in the fields that are much related to areas of oversight responsibility. Those areas or fields are the following:

- Supply Chain Management
- Executive Leadership Management
- Municipal Governance
- Public Policy
- Project Management
- Service delivery.
- Water Infrastructure Development and Maintenance.

These needs are consolidated and form part of the WSP that should be approved by council. They are then submitted to LGSETA that will assist in training to address the scarce skills challenge.

#### Challenges to be addressed by Human Resource Development

- Development of a credible workplace skills plan to guide training in the district.
- Development of a skills development programme for unemployed members of the community.
- The need to do comprehensive skills audit of the entire workforce

In terms of the Systems Act of 2000 as amended sec 68 states that (1) a Municipality must develop its human resource capacity to a level that enables it to perform its functions and exercise its powers in an economical, effective, efficient, and accountable way, and for this purpose must comply with the Skills Development Act, 1998 (Act No.81 of 1998), and Skills Development Levies Act (Act No. 28 of 1999).

### 2.6.5. Employee Assistance Programme (EAP)

#### Introduction

The main purpose of EAP is to assist employees with personal and work - related problems and health (physical, psychological, emotional, and social) related problems. The aim thereof is to enhance performance as well as production of employees in the workplace. The focus is also on reactive and proactive wellness programs. Reactive wellness programs focus on existing problems of employees. Proactive wellness programs are preventative programs that prevent problems from occurring in future.

The main purpose of Occupational Health and Safety (OHS) is management of health and safety measures affecting employees working conditions in the workplace in relation to compliance to Occupational Health and Safety Act. This is done in order to ensure that employees work in a healthy and safe working environment.

OHS deals with the identification, investigations and assessment of injuries on duty and occupational disease and facilitation of compensation, implementation of medical surveillance/checkups programme, buildings and workplace inspections, municipal project audits, risk assessment (planned task observations), provision of personal protective equipment, facilitation of safety committees, conducting health and safety awareness programmes, servicing of fire equipment's such as fire extinguishers and fire hose reels and so on.

| FUNCTIONS OF EAP   | STATUS QUO OF EACH<br>FUNCTION   | CHALLENGES REGARDING EACH FUNCTION  |
|--|--|---|
| EMPLOYEE ASSISTANCE PRO  | OGRAMME  |   |
| Assist employees with personal and work-related problems and health problems | Render counselling to employees, conduct home, workplace, hospital and institutional visits.   | Clients' inability to disclose their problems and to express their feelings |
| Substance abuse programme  | Attend employees who have alcoholism and drug problem, there by rendering counselling to them and their families, referral to Rehabilitation centres for treatment of alcoholism and or/drugs, and reintegration into their work and family environment after rehabilitation. Facilitate monthly substance abuse program - alcohol and drug anonymous group (group counselling for substance abusers) to support | Relapse on the part of substance abusers after rehabilitation.              |

### **GENERAL ANALYSIS**

# **System Maintenance**

- Six (6) systems are monitored and maintained.
- User account revision schedule is developed and in place. SOLAR & VIP User accounts were revised.
- System reports developed quarterly, and service providers monitored.
- Patch Management and Change Management Procedures developed.

# **Security Upgrade of Server Rooms**

- Air conditioners in good condition.
- Access registers are in place.
- Biometric Access installed
- Response alarm installed
- Fire Suppression Systems and Cooling System
- Environmental controls in the server rooms need to be installed.
- Risk Management in process to acquire security cameras.

## **Business Continuity**

- Back-up Policy and Procedures in place and revised.
- Back-ups are still done manually.
- Monthly back-up reports, logs and registers in place.

#### **Wireless**

- 90% of network is always available and downtimes kept under an hour and need to be upgraded to make provision for an Intranet.
- Poor wireless connectivity at 19 remote sites (16 Water depots and 3 Fire Stations).
- Monthly and Quarterly reports are in place.
- · Network Monitoring Report Developed.

## **Risk Management**

- ICT Risk Register Revised and in place

## **ICT Policy Compliance**

- ICT Policy compliance report in place.
- Policy compliance monitored and the following policies were tabled to Management for approval and recommendation by Council.
- ICT Governance Framework.
- Help Desk Policy
- Server room access policy
- ICT Steering Committee Terms of Reference
- ICT User access management policy
- ICT steering committee charter
- ICT Cloud Policy
- ICT Firewall policy
- ICT Security policy
- ICT telecommunication policy
- Incident Management Policy
- Back-up Procedures.
- Change Management Policy and Procedures.

### Challenges to be addressed by the ICT Unit

- Sekhukhune District Municipality is a vast area and many residents still do not have access
  to basic ICT functions like e-mails and internet. To bridge the digital divide and empower
  the Sekhukhune Community, the ICT Unit needs to investigate and research on ways and
  means to improve this situation.
- There are a few systems utilized for various reasons in the Sekhukhune District Municipality. Some of these systems do not fully integrate with each other which are either

- causing loopholes or duplication of efforts. Sekhukhune District Municipality is therefore operating on a flat file system and systems are disintegrated.
- Various risks were identified by the Risk Unit, i.e., Security Risks in the safeguarding of SDM information. These risks need to be revised and addressed as soon as possible. To improve information security an End-user Computing policy was developed and tabled to management for further consideration.
- The ICT Unit received quite a number of both Internal and External Audit Queries which should be resolved to ensure proper ICT Governance is applied. The ICT Unit improved tremendously on Governance and attended to queries diligently.
- The current ICT Disaster Recovery needs to be revised and the infrastructure to execute the Plan is being developed. The back-ups are still being done manually, and this process needs to be automated to increase reliability. Over and above that, the ICT Unit needs to also secure the testing environment where back-ups, patches, upgrades, and system changes can be tested before it is rolled out into the live environment. Discussion took place around options available, and a Shared Services Approach was decided on.
- There is several redundant hardware that needs to be replaced.
- Upgrading of network in all District municipal Depots and Satellites offices.
- Installation of technological access security system in all municipal offices and depots
- A proper ICT Strategy together with a proper Procurement Plan is needed to ensure that projects can be completed.
- A proper Disaster Recovery Plan must be developed.

## 2.6.7. Auxiliary Services (AS)

## Introduction

Auxiliary Services is one of the eight units within Corporate Services Department in Sekhukhune District Municipality (SDM); the functions of Auxiliary Services include:

- Records Management
- Fleet Management
- Facility Management

#### **Records Management**

The purpose of records management is to ensure safe storage of records, easy retrieval, filing, archiving information, record disposal. Other functions within records management are messenger services, photocopying and printing services.

Records Management is regulated by National Archives and Records Service of South Africa Act No 43 of 1996, The Promotion of Access to information Act (Act.No.2 of 2000, The Promotion of Administrative Justice Act No.3 of 2000 and The Electronic Communication and Transaction Act No 25 of 2002).

| FUNCTION        | STATUS                          | CHALLENGES |
|-----------------|---------------------------------|------------|
| Postal Services | Postage services is operational | None       |
|                 | Registry post 2000 mail monthly |            |

| FUNCTION                      | STATUS                        | CHALLENGES                |  |
|-------------------------------|-------------------------------|---------------------------|--|
| Messenger services            | 80% messenger services        | No dedicated personnel to |  |

| Disposal of records           | 500 project documents         | None                      |  |
|                               | inspected and disposed        |                           |  |
| Archiving                     | More than 20 000 project      | None                      |  |
|                               | documents are archived at     |                           |  |
|                               | different repository          |                           |  |
| Printing and copying services | Coping and printing more than | None                      |  |
|                               | 100000 per month              |                           |  |

# Documents stored at Registry

- Tender documents
- Personnel files
- Voucher files (Budget & Treasury)
- Project Files in PIU

# **Fleet Management**

The main purpose is to ensure that the municipal fleet is properly managed, which includes kilometers, fuel and tracking of the vehicles.

Fleet management is regulated by the Traffic Management Act of 1998 and municipal developed policy.

The services provided within fleet management are indicated below:

| FUNCTION                   | STATUS  | CHALLENGES  |
|----------------------------|---|---|
| Management of all fleet    | <ul> <li>SDM owned vehicle</li> <li>Leased water services operation vehicles.</li> <li>Leased emergency services vehicles.</li> <li>Settlement of Emergency vehicles</li> </ul> | None  |
| Rental payment             | Leased vehicles are paid monthly  | Late payment to service providers and as delays in maintenance. |
| Fuel management            | Fuel and kilometres are monitored weekly and monthly.   | Misuse of fuel card though control measures are in place        |
| Licencing of vehicles      | Licencing is done on SDM owned vehicles. In the case of leased vehicles, the service provider is responsible for licencing.   | None  |
| Tracking system management | Tracking of vehicle is monitored and paid monthly   | None  |

## **Facility Management**

- Facility Management is provided in all five regions of the district, the main function is to manage the municipal property at different regions and depots.
- The mandate of the municipality with regards to Facility management is derived from the following legislation.
  - Occupational Health and Safety Act, of 2000 amended.
  - The municipal Finance Management Act of 2003
  - Municipal System Act, 32 of 200 amended
  - Government Immovable and movable Asset Management Act no 19 of 2007
  - National Building and regulations
- The following documents are relevant, and were used as key inputs for this policy:
  - (a) MFMA Local Government Capital Asset Management Guideline published by the National Treasury Department (2008)
  - (b) DPLG "Guidelines for Infrastructure Asset Management in Local Government" (2007)
  - (c) NIMS, approved by the National Cabinet (2006).
  - (d) International Infrastructure Management Manual co-authored by Institute of Municipal Engineering of Southern Africa IMESA (2006).
  - (e) The Occupational Health and Safety Act 85 of 1993

The Act requires the employer to provide and maintain as far as reasonable and practical a work that is safe and without risk to the health of employees. This means the employer must ensure that the workplace is free of hazardous ergonomics and substances, microorganisms etc, which may cause injury or diseases where this is not possible, the employer has to inform the employees of the risks and dangers, and how the se may be prevented. The SDM is legally obliged and committed to create a healthy and safe working environment for all its employees.

| FUNCTION    | STATUS   | CHALLENGES   |
|-------------|--|--|
| Rental      | Rent of 4 building is done and monitored monthly                     | None   |
| Maintenance | Maintenance of 56 facilities is done when needed                     | Most of the building are not for SDM and it's difficult to maintain them |
| TV and DSTV | Subscriptions of TV licences and DSTV are paid and monitored monthly | None   |

# 2.6.8. Legal Services

#### Introduction

The Legal Services Unit currently comprises of three Legal Officials responsible for Legal administration issues.

| Functions of Legal Services division  | Status quo on the function             | Challenges regarding the function   |
|---|--|---|
| Litigation Management which includes Updating all court matters and review all progress on outstanding litigation and liaise with and manage external lawyers                   | 10 pending court matters               | Non-cooperation from User department especially Infrastructure and Water Services when information regarding cases is required which impacts on time management issues in handling court cases. |
| Legislative review updates. Function involves review and update management on new legislations and advice management on legal implications on internal policies and procedures. | 4 legislative review reports produced. | None  |

# 2.6.9. Labour Relations

# Introduction

Labour Relations Division is governed by different legislations i.e., Labour Relations Act 66 of 1995, South African Local Government Bargaining Council Main Collective Agreement, SDM Labour Relations Strategy approved by Council on 21 June 2012, Basic Conditions of Employment Act, Employment Equity Act etc.

| FUNCTION                      | STATUS                                       | CHALLENGES          |
|-------------------------------|--|---------------------|

# **Labour Relations Strategy**

The Labour Relations Strategy aims to maintain relationships between the employer and its employees. It deals with issues such as the following:

- Discipline.
- Misconduct.
- Grievances.
- Collective bargaining.
- · Strikes.
- Picketing.
- Management of labour relationships
- Conflict resolution.
- Dispute Resolution.
- Awareness training workshops on Labour legislation.

# 2.7. FINANCIAL VIABILITY

### 2.7.1. Introduction

The financial objective of the SDM is to secure sound and sustainable management of the financial affairs of the district and to assist the five local municipalities within the SDM to be financially viable. The Audit reports issued by the Auditor General for the past years have indicated a lot of financial challenges ranging from disclaimer audit reports, low revenue collection, inadequate asset management and internal controls. Recently the Audit Opinions were more favourable as they were unqualified.

### Compliance with MFMA and Budget for 2022-2023

## Section 63 – Assets and Liability Management

The municipality has a GRAP compliant asset register which is updated on a quarterly basis.

## Section 64 - Revenue Management

The municipality has credit control and debt management policy and the tariff policy which are reviewed annually. The municipality derives its revenue from government grants and billing of water consumption. Billing is done on the 25<sup>th</sup> of every month through the SOLAR financial system. A draft revenue enhancement strategy is being developed awaiting council approval.

## Section 82 - Delegations

Compiles reviews and approved a Register of Delegated Powers and Functions annually.

## Section 83 - Competency Levels of professional Financial Officials

Municipality offers supports personnel to improve competency levels

## Section 111 - Supply Chain Management

The Supply Chain Management Policy was first adopted by the Council in 2005 and is reviewed annually with the adoption of the budget. The municipality has established a three-part bid committee system.

#### Section 165 - Internal Audit Unit

An internal audit unit has been established and functional with sufficient officials. The unit has an audit charter which was approved and adopted by the council in 2008 and is reviewed annually.

## Section 166 - Audit Committee

An Audit Committee has been established and effective. It is scheduled to meet at least four times a year. The audit committee has an audit committee charter which was approved and adopted by committee and noted by council in 2008 and reviewed annually.

## Conformity exists within the following stipulations on report and reportable matters:

- Section 71 Monthly budget statement to Provincial and National treasury (xx Municipality to sign off monthly reports to PT & NT for full compliance.
- Section 72 Midyear budget and performance assessment by accounting Officer.
- Section 75 Prescribed information placed on official website.

### Section 121 and 127 - Annual Report that includes:

- The annual financial statements
- The annual report

Table 111: The AFS has been compiled in terms of GAMAP/GRAP

| Financial Year | Audit Report |
|----------------|--------------|
| 2018/19        | Qualified    |
| 2019/20        | Qualified    |
| 2020/21        | Qualified    |
| 2021/22        | Qualified    |
| 2022/23        | Qualified    |
| 2023/24        | Qualified    |

## Section 129 - Oversight reports on Annual Reports

The Municipality has established an oversight Committee which considers the adoption of the annual report.

## Financial system

The installation of a comprehensive financial system is complete. The system will ensure:

- Improved control and management of Supply Chain Management processes
- Accurate expenditure reporting
- Accurate and up to date cash flow monitoring
- More stringent financial controls
- A reliable picture of the state of the district municipality's finances

## **Underlying Budget principles for 2022/2023**

- To eliminate budget deficit and ensure that the budget is cash backed
- Prioritise key services for provision of water and sanitation as well as funding contractual obligations
- Only critical posts to be filled in order to manage and stabilise personnel costs and keep the costs at less than 41% to total operating expenditure
- Implement cost reflective tariffs in order to reduce reliance on government subsidies and grants
- Take into account national imperatives such as mSCOA and budgeting for asset maintenance and refurbishment
- Reduce spending on non-priority spending including overtime, travelling costs, catering, security and fleet management.

In preparation of the 2025/2026 medium-term revenue and expenditure budget, the following considerations were made having taken into account various legislated publications by the National Treasury as guidance on how municipal budgets are to be compiled for the 2025/26 MTREF.

### **Annual Revenue Budget Projections and Assumptions**

- Government grants and subsidies, the annual revenue on government grants and subsidies is as per the Division of Revenue Bill published in Government Gazette No.52061 of the 7th February 2025 following the tabling of the national budget by the finance minister on the 12<sup>th</sup> of March 2025.
- Tariffs on service charges, the municipality has set and budgeted for a 4.4% cost reflective annual tariff increment. The tariff increased is aligned with the consumer price index for the 2025/2026 financial year. The 2026/202 and 2027/2028 annual were both set at 4.5% and 2.5% having considered the consumer price index projections in both the two outer financial years.

- Interest on short-term investments, the annual revenue budget on interest from short-term investment projections were informed by both the actual and interim interest earnings on short-term investments as at 31 and the 2022/ December 2024 and the audited annual total interest earnings on short-term investments as at 30<sup>th</sup> June 2024.
- Interest in outstanding debtors, the total cumulative debt book balances as at 28
  February were the determining factors having considered also the payment history on
  individual debt balances to-date.
- Other Income, other income projections were informed mainly by the sales of tender documents in the current year as well as fines and penalties charged by the municipality at mid-year of the 2024/25 financial year and 2023/24 financial year as audited.

| Total Annal Revenue Budget                       | - 1 997 112 231.28                                  | - 1868 201 151.24              | - 2 140 701 608.04             | - 2 234 925 623.24             |  |  |

- The municipality's total annual revenue budget amounts to R 1.8 billion for the 2025/2026 financial year, the total annual revenue increases to R 2.1 billion in 2026/2027 and R 2.2 billion in 2027/2028 financial years respectively, the total annual revenue budget for each financial year excludes the schedule 6B allocations on the Municipal Infrastructure Grant, Regional Bulk Infrastructure Grant and Water Services Infrastructure Grant.
- Included in the R 1.8 billion annual revenue budget for the 2025/26 financial year is R
   1.4 billion in total operational revenue and R 720 million in capital conditional grants, of the R 407 million total on capital conditional grants R 404 million is the total annual

allocation for the municipal infrastructure grant and rural road asset management grant.

## Tariffs for 2025-2026

Tariffs on service charges, the municipality has set and budgeted for a 4.4% cost reflective annual tariff increment. The tariff increased is aligned with the consumer price index for the 2025/2026 financial year. The 2026/202 and 2027/2028 annual were both set at 4.5% and 2.5% having considered the consumer price index projections in both the two outer financial years.

Table 113: Tariff categories for 2023/2024 & 2024/2025

| CATEGORY                   | SERVICE | 2022/2023 | 2023/2024 |

| 7.  | Tsimanyane         | 14. | Jane Furse    |

### 2.7.2. Asset Management

### Introduction

The role of Asset Management is critical to any business environment whether private or public sector. In the past municipalities used a cash-based system to account for assets, whilst the trend has been to move to an accrual system. With the cash-based system, assets were written off at year end and no costs were attached to subsequent period in which assets would be used. With the accrual system, assets are incorporated into the books of accounts and systematically written off over their anticipated lives.

This necessitates that record of asset costs are kept and key asset management functions required are:

- Recognition of all existing assets
- Safeguarding assets
- Maintaining assets
- Establishing accounting and information systems that account for the assets of the municipality
- Valuation principles in accordance with GRAP
- Establishing and maintaining systems of internal controls over assets
- Establishing and maintaining MSCOA compliant asset register
- Clarifying responsibilities and accountabilities of asset management processes
- Verification of Assets/ Projects Under Construction
- Maintenance of Projects and Work in Progress Register

Effective asset management functions are guided by the following statutory and legal framework:

- Constitution of the Republic of South Africa, 1996
- Public Finance Management Act, of 1999
- National Treasury Asset management framework
- Municipal Finance Management Act, of 2003
- Local Government Financial Best Practice Manual
- Disaster Management Act, of 2002
- National Water Act, of 1998
- Water Service Act, of 1997
- Municipal System Act, of 2000
- Municipal Structures Act, of 1998

| Functions of Asset                | Status quo on the    | Challenges regarding the function     |
|-----------------------------------|----------------------|---------------------------------------|
| Management division               | function             |                                       |
| Update FAR and MAR                | 100% Immovable &     | Review of FAR is in progress to clear |
|                                   | 100% movables        | non-functional and not existing       |
|                                   |                      | assets                                |

| FAR & MAR G/L reconciliation      | Updated              | None                                  |
| Disposal of damaged, obsolete     | Done                 | There are no proper records of        |
| & redundant items                 |                      | replaced or redundant                 |
|                                   |                      | O & M assets                          |
| Record keeping                    | Updated files        | None                                  |
| Conditional assessment            | Updated              | None                                  |
| Impairment tests                  | Updated              | None                                  |
| Maintenance of Work in            | Updated              | None                                  |
| Progress register (WIP)           |                      |                                       |
| New additions of Assets           | Updated              | None                                  |
| Physical verification/ inspection | Updated              | None                                  |
| and condition assessment of       |                      |                                       |
| Project/ Assets Under             |                      |                                       |
| Construction                      |                      |                                       |
| Review Residual value             | Updated              | None                                  |
| Safeguard assets                  | Verified bi-annually | *Departments shifting assets without  |
|                                   |                      | informing Asset Unit, negatively      |
|                                   |                      | impact recon of FAR & Office          |

| Functions of Asset Management division | Status quo on the function | Challenges regarding the function  |
|--|----------------------------|--|
|  |                            | inventories *No reporting of damaged or stolen assets  |
| Implement stores procedures            | Done                       | Not all O& M materials are procured through the Stores Vote and delivered at Stores for accountability to AG       |
| Inventory reconciliations              | Done                       | None   |
| Barcoding of Assets                    | Outstanding                | There are still movable assets which to date are still not barcoded, and those assets are mainly 2020/21 additions |
| Council Write offs                     | Outstanding                | Poor/broken assets verified in 2020/21 financial year which are fully depreciated were not written off             |

#### **STATUS QUO**

#### **MOVEABLE ASSETS**

Moveable assets are all bar coded and linked to responsible custodians with signed office inventory lists in all departments. Verification is being conducted bi-annually, newly acquired assets are bar coded upon receipt, condition of assets is recorded during verification. Monthly reconciliations and calculations of depreciation are conducted. Office inventory lists are updated during verifications and upon delivered a new item. Some of our assets allocated to depots are too old and require an effective strategy to replace them.

#### **IMMOVABLES ASSETS**

Completed immovable assets were unbundled, the Fixed Asset Register is updated and GRAP compliant. Removed last sentence

The primary objective of our new three year plan is to continue conducting full verification to review the FAR, unbundle, and assess assets condition for impairment purposes, electronic verification of Movable assets and tagging O & M items for effective tracing of replaced and redundant materials.

Updated monthly information files are available for current developed and unbundled projects (WIP & completed) as part of our three year plan.

Verification of projects are conducted bi-annually and established changes are incorporated in the Fixed Assets Register.

#### **CHALLENGES**

 Not all O& M materials are procured through the Stores Vote and delivered at Stores for accountability to AG

- Skills shortage (for unbundling of completed projects and technical assessment of assets)
- Unavailability of previous projects information (As-built drawings, completion certificates/reports and payment certificates)

## 2.7.3. Budget and Reporting

### Introduction

The role of Budget unit is to compile; coordinate and monitor budget of the municipality. This is an on-going process where it requires great skills and extensive attention to details.

The main aim of this Unit is: -

- To ensure accurate reporting for improvement in decision making.
- Preparation of the municipal budget and monitoring of the budget.
- To effectively manage funds and keep municipal debts at minimal level.
- To ensure accuracy and consistency in our municipal budget.

Table 115: Challenges and backlogs facing Budget & Reporting

| Key Performance | Function/Priority   | Status Quo   | Challenges   |
|-----------------|---|--|--|
| Area            | , , , , ,   |  | 3.1  |
| Financial       | To ensure sufficient  | A capital replacement  | Unable to budget for   |
| Management      | reserve funds to address  | reserve fund is established.                                 | sufficient capital   |
|                 | asset renewal by creation   | Minimal own funding (ring-                                   | replacements on dilapidated  |
|                 | of capital replacement  | fenced) to address assets                                    | infrastructure assets due to   |
|                 | reserve fund  | renewals.  | insufficient budget on own   |
|                 |   |  | funding  |
|                 | To ensure timely submission of Annual Financial and improved Audit Opinion                  | AFS submitted by 31st<br>August                              | <ul> <li>Monthly reconciliation of<br/>account balances not<br/>done on time.</li> <li>Limited skills relating to<br/>accounting standards<br/>and preparation of AFS</li> </ul> |
|                 | To ensure preparation and implementation of funded and credible budget for the municipality | Two budgets made<br>(Original budget,<br>adjustment budget). | Unfunded budget and limited cash reserves to fund creditors .  |

# Budgeting issues of strategic importance for 2022-2023

- To have enough cash reserves to fund capital replacements and creditors and over the MTREF
- To implement cost containment measures and reduce nonpriority spending
- Operating expenditure increases limited to inflation cost
- Only to fund critical new positions related to service delivery
- To implement cost reflective tariffs over the MTREF

## 2.7.4. Revenue Management

### Introduction

Revenue Management is the application of disciplined analytics that predict consumer behaviour at the local government level and optimize service availability and price to maximize revenue growth. The primary aim of Revenue Management is providing the mandated services to the right consumers at the right time for the right price. The essence of this discipline is in understanding consumers' perception of service value and accurately aligning service prices, placement and availability with each consumer segment.

The Revenue Management Process entails:

- Data Collection
- Segmentation
- Forecasting
- Optimization
- Dynamic Re-evaluation

Effective revenue management functions are guided by following statutory and legal framework:

- Division of Revenue Act
- Public Finance management Act, of 1999
- Municipal Finance management Act, of 2003
- Local Government Financial Best Practice Manual
- National Water Act, of 1998
- Water Service Act, of 1997
- Municipal System Act, of 2000

| Functions of Revenue Management Division | Status Quo of the function       | Challenges regarding the functions   |
|--|----------------------------------|--|
| Data Collection                          | Functional                       | Certain customers don't cooperate during data collection   |
| Billing                                  | Billing is happening as expected | Faulty meters, illegal connections, insufficient material for new connections including repairs and maintenance, and insufficient water supply |
| Credit control                           | Partially functional             | Resistance from communities for payments (especially villages)   |
| Receipting                               | Functional.                      | None   |
| Indigent management                      | Functional                       | None   |

# **Status Quo**

## **Data Collection**

The Revenue Management process begins with data collection. Relevant data are paramount to a Revenue Management System's capability to provide accurate, actionable information. A system must collect and store historical data for inventory, prices, demand, and other causal

factors. Any data that reflects the details of services offered their prices and consumer payment rate, stored, and analysed.

## **Billing**

Billing process takes the form of the automated billing on eVenus, interest and sundry billing will be in the form of journals.

Included in the billing process are the following processes:

- refunds, (clearance, deposit)
- · change of ownership,
- adjustments, (over and under billing)
- change of service, cancellation of service, (Adjustment of service)
- · handling of queries,
- processing of service order (meter readings sheets)

### **Credit Control**

The municipality's collection process follows the under-mentioned steps:

- Telephone Collection.
- Written reminder.
- Final Notice.
- Communication with Water Service departments for service termination or restriction
- Legal action/ hand-over to the municipality attorneys or debt collectors.
- Listing of debtors with Credit Bureau.
- Recommendation for write off as bad debt.

## Receipting

- Ensuring that the cash receipts processes are performed efficiently (using the best methods to secure cash receipts)
- Ensuring that cash received is banked and recorded on a timely basis.
- To ensure that cash from debtors is received and recorded
- To ensure that receipts are recorded at the correct amount

## Challenges

- Data Management & cleansing
- Indigent Management
- Service Delivery

## 2.7.5. Supply Chain Management

## Introduction

Supply Chain Management Unit is established in order to procure goods and services and select contractors to provide assistance in the provision of municipal services.

The Supply Chain Management Unit should ensure that bid documentation, evaluation and adjudication criteria and general conditions of a contract, are in accordance with any applicable legislation and that any Treasury guidelines on Supply Chain Management are properly taken into account when procuring goods or services.

# Legislative Requirement

- The Constitution of the Republic of South Africa Act 108 of 1996
- The Preferential Procurement Policy Framework Act 5 of 2000
- The Broad Based Black Empowerment Act 53 of 2003
- Municipal Finance Management Act, No.56 of 2003
- CIDB Act
- Promotion of Access to Information

| Functions of supply chain management division | Status quo of each function  | Challenges with regard to the function |
|---|------------------------------|--|
| Demand  | Functional but requires      | Timeliness of submissions              |
|   | improvement                  | from end-users' side still             |
|   |                              | need to improve.                       |
| Acquisition                                   | Functional but requires      | Tracking of work in progress           |
|   | improvement                  | and timely feedback to end-            |
|   |                              | users needs to improve.                |
| Reporting                                     | System needs improvement     | Exporting information to               |
|   | on vendor register reporting | excel must be possible                 |
|   | functions                    | Classification of suppliers            |
|   |                              | per targeted groupings to be           |
|   |                              | affected                               |
| Inventory                                     | Functional but requires      | not enough shelves to store            |
|   | improvement                  | material                               |
| Contract Management                           | Functional but need to       | Termination of contract                |
|   | improve                      | should be communicated                 |
|   |                              | with the Contracts officer             |

## **STATUS QUO**

### **Bid Committees**

All Supply Chain Management Committees that have been established are:

- Specification Committee (Goods and Services)
- Specification Committee (Infrastructure)
- Evaluation Committee (Goods and Services)
- Evaluation Committee (Infrastructure)
- Adjudication Committee
- Quotation Committee

All Committees are fully functional, although the high staff turnover in SCM (including suspensions) have required regular changes and affected continuity and effectiveness to some extent.

#### Advertisement of Tenders

- Briefings are being conducted before the closing date of tender.
- Tenders are advertised on CIDB (if applicable), SDM Website and National Treasury E-Portal
- Seven days quotations are advertised on the notice board, e- Tender Portal and SDM website
- Tender documentations are submitted via the tender box, which is opened on the relevant closing date(s) of the tenders.

## **Tender Document Management**

The tender documents are kept at registry.

## Challenges

- System reporting improvements will be required. Challenges with generating some reports were experienced during the 2017/18 audit process. Improvement is needed mainly in vendor register reporting and vendor classification in terms of targeted groupings.
- Implementation of the procurement plan challenges. However, improvement is noticed in Bid Adjudication meeting attendance.
- Project scheduling still needs to improve to avoid concentrated high volume batches of work for the Bid Committees, which in some instances require a straight sitting of up to four weeks.

## 2.7.6. Expenditure Management Unit

### Introduction

Expenditure management Unit is responsible for the management of the expenditure of the municipality and to ensure accurate payment of salaries and salary related costs. Reasonable steps are taken to ensure that the institution has and maintains an effective system of expenditure control including procedures for approval, authorisation, withdrawal and payment of funds. And that the unit has and maintains a management, accounting and information system which:

- Recognises expenditure when it is incurred;
- Accounts for creditors of the municipality;
- Accounts for payments made by the municipality
- Process salaries and salaries related costs on time.

Creditors' accounts are paid within 30 days from date of submission of the correct invoice, unless prescribed otherwise for certain categories of expenditure.

To ensure effective and efficient payment of liabilities within set time frame and in compliance with MFMA and that payments by the entity are made directly to the person to whom it is due unless agreed otherwise only for the reasons as may be prescribed; and either electronically or by way of non-transferable cheques, if cash payment and payments by way of cash cheque may be made exceptional reasons only.

| Functions for expenditure Management                   | Status Quo for each function | Challenges for each function  |
|--|------------------------------|---|
| Effect payments within 30 days                         | Functional                   | <ul> <li>Suppliers not registered and/non-compliant status on the Central Supplier database (CSD) causes delay of payments.</li> <li>Submission of invoices with incorrect information.</li> <li>Submission of invoices already paid.</li> <li>Delays in resolving invoice queries</li> <li>Lack of privacy for those processing bank transactions.</li> <li>Historical bulk water supply creditors have not been paid due to budget constraints and long outstanding queries.</li> </ul> |
| Monthly Payment of salaries and salaries related costs | Functional                   | Late submission of overtime, standby and travelling claims for reimbursement.   |

### Irregular or fruitless and wasteful expenditure

On discovery or realisation of any irregular expenditure or any fruitless and wasteful expenditure, the Budget and Treasury Office report in writing to the municipal manager, the Executive Mayor and National Treasury the particulars of the expenditure; and any steps that have been taken to recover the expenditure and prevent a recurrence of same.

## Invoices receiving

Invoices and payments certificates are registered in the register when submitted and are stamped with the stamp marked received and the date received.

Invoices and payment certificates are further checked for completeness and manual authorisation by the respective departmental directors.

## **Invoices payments**

Payments are electronically processed on the financial system and money transfers are made to service providers using Electronic Funds Transfer.

## **Overall Challenges**

 Non-adherence to timelines regarding verification, authorization, and submission of payments requests to Expenditure unit for payment processing.

## **Expenditure Management Issues of Strategic Importance for 2020-2021**

- Adhere to service standards and MFMA for payment of liabilities
- Timeous and accurate payment of salaries and related costs within set time frames.
- Filling of vacant posts

## 2.8. GOOD GOVERNANCE AND PUBLIC PARTICIPATION

#### 2.8.1. Introduction

The SDM has achieved remarkable progress in institutionalizing and implementing its communication and consultation mechanisms and processes. The District Communication Strategy has been reviewed in 2014. The medium for communication is highlighted and includes Mayoral Community Outreaches, District newsletters, Annual Report, Local and National Newspapers, Provincial and Local radio stations, Flyers, Ward Committee system, Community Development Workers (CDWs), as well as loud hailing.

The district improves good governance and public participation through focus on internal audit, risk management, public participation, communications and performance management among others.

In December 2009, the Sekhukhune District Municipality approved its new governance and institutional model. The governance model comprises of the Legislature and the Executive. The Legislature is made up of the Speaker of Council, the Council's Chief Whip and Section 79 Portfolio Committees, Standing Committees, Section 80 Committees, and the Executive. The Executive consists of the Executive Mayor and Section 79 Portfolio, Section 80 Committees and the Executive Mayor and Members of the Mayoral Committee (MMCs), as well as the administration, led by the Municipal Manager.

The district's governance model is underpinned by the following key principles:

- Delineation of powers to separate legislative and oversight roles and executive roles and responsibilities;
- Governance and institutional arrangements should deepen democracy, facilitate citizen empowerment and enhance stakeholder participation and involvement;
- Decision-making powers and accountability should be strengthened, clearly defined, allocated and decentralized, where appropriate
- Expeditious and efficient decision-making should ensure the facilitation of effective governance; and
- Institutional structures of the district to be considered as part of a single group, based on politically led strategic and policy perspectives.

The separation of legislative and executive roles delegates executive functions to the Executive Mayor and defines the roles of the legislature as that of oversight of the Executive. This function is performed by the Council (in plenary), the Municipal Public Accounts Committee and the Section 79 Portfolio Committees, under the chairpersonship of non-executive councilors. These committees monitor and scrutinize the delivery and outputs of the Executive and may request the MMCs or Heads of Department (HoDs) to account for service delivery and performance.

The Council, when meeting in plenary, provides an important platform for meaningful debate on issues that affect and require the attention of the district. It has three essential but interrelated roles and issues of legislation, oversight and to ensure community and stakeholder participation.

## Legislature

The Council's legislative functions include the approval of the by-laws, policies, the Integrated Development Plan (IDP), tariff for rates and service charges and the budget. The Council's role in this respect is to consider reports from the Executive Mayor on each of these functions, to consider public discussions and comment, stimulate debate in multiparty portfolio committees and to provide the public platform for District-wide interaction. On the basis of the comments, the Council is in a position to approve or amend reports or to refer the reports back to the Executive Mayor.

The council seeks to ensure community and stakeholder participation. The Council, led by the Office of the Speaker, has to facilitate community and stakeholder consultation and participation. Individual ward councillors, in conjunction with elected ward committees, play a critical role in facilitating these participatory processes.

### **Chief Whip**

The Council's Chief Whip plays a pivotal role in the overall system of governance to ensure and sustain cohesiveness within the governing party and maintain relationships with other political parties. The main functions of the Chief Whip are to:

- Ensure proper representation of political parties in the various committees;
- Maintain sound relations with the various political parties represented in the Council; and
- Attend disputes between political parties and build consensus.

#### **Section 80 Portfolio Committees**

These committees perform an oversight role by monitoring the delivery and outputs of the Executive. They are entitled to request departments and MMCs to account for their functions. In line with this responsibility, these committees may summon departments to appear before the committee and present any required documentation and information. The Portfolio Committees do not have any delegated decision-making powers.

#### The specific functions of Portfolio Committees include:

Reviewing, monitoring, and evaluating departmental policies;

- Reviewing plans and budgets;
- Considering quarterly and annual departmental reports;
- Examining the link between the policy (sector plans) and budget (business plans);
- Monitoring the implementation of plans;
- Exploring options to increase value for money, and
- Holding the political executive accountable for performance against policies and District priorities.

# The following are the five Portfolio Committees:

- Budget and Treasury (BTO)
- Community Services
- Corporate Services
- Infrastructure and Water Services
- Planning and Economic Development

## **Section 79 Standing Committees**

The Standing Committees are permanent committees, established to deal with Council-related matters. They have some delegated decision-making powers and are required to submit reports to Council. Councillors chair all Standing Committees, except the Audit Committee, which is chaired by an independent person in line with the prescriptions of the Municipal Finance Management Act (MFMA).

The following standing committees have been put in place:

- Municipal Public Accounts Committee
- · Petitions, Rules and Ethics Committee
- Chairperson's Committee
- Programming Committee
- Audit Committee

## The Executive

The Executive Mayor, assisted by the Mayoral Committee, heads the executive arm of the district. The Executive Mayor is at the centre of the system of governance and the executive powers are vested in him by the Council to manage the daily affairs of the district. This means that he has overarching strategic and political responsibility. The following are the portfolios allocated to Members of Mayoral Committee:

- MMC: Planning and Economic Development Cllr. Matlala MA
- MMC: Corporate Service Cllr. Nkosi SM
- MMC: Infrastructure and Water Services:
  - Cllr. Mathale M.
  - Cllr. Ngobeni C.
  - Cllr. Sefala R.

- Cllr. Machipa M.
- MMC: Budget and Treasury Cllr. Leshaba B.
- MMC: Community Services Cllr. Mafefe O.
- MMC: in Office of the Executive Mayor Cllr. Leokana M.

### The Leader of Executive Business

The Leader of Executive Business provides the interface between the executive and legislative branches. The roles and responsibilities of the Leader of Executive Business are to:

- Represent the executive branch in terms of Council matters and serve as the link between the executive branch and the legislative branch;
- Ensure that executive business is effectively delegated to Council, via the Programming Committee:
- Consult with the Speaker when the Speaker intends to call a special meeting of the Council, outside of the scheduled Council meetings;
- Consult with the Speaker for the purpose of allocating time for the discussion of matters of public importance on the Council agenda, and
- Determine which matters are referred to the Speaker and thereafter to Section 79 Committees and Council.

#### Administration

The Municipal Manager is also the accounting officer, as defined by the Municipal Structures Act. The responsibilities of the Municipal Manager include managing financial affairs and service delivery in the municipality. He is assisted by the Management Team composed of the following departments:

- Municipal Manager's Office composed of the Chief Operations Officer with the Internal Audit Unit, Risk Management Unit, and Performance Management Unit
- Corporate Services
- Budget and Treasury
- Planning and Economic Development
- Infrastructure and Water Services
- Community Services

### **Municipal Owned Entity**

The Sekhukhune District Municipality has established the Sekhukhune Development Agency (SDA) as its own Municipal Owned Entity to drive high impact economic development programmes. The entity is headed by the Chief Executive Officer with a Board of Directors in place to provide management oversight.

#### **Human Resources**

The district is committed to an efficient human resources system and has reviewed several policies to ensure the effective development of staff.

#### 2.8.2. Internal Audit

#### Introduction

Primary role of Internal Audit is to assist the municipality to accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the **effectiveness of risk management**, **control** and **governance processes**. The Internal Audit is mandated by the following legislative frameworks: Local Government: Municipal Finance Management Act, King Code on Corporate Governance and other prescripts applicable to the Public Service.

### **Internal Audit Functions:**

- Develop Risk Based Internal Audit Plan
- Evaluate internal controls systems
- Review effectiveness of risk management
- Review financial information
- Evaluate governance and compliance
- Evaluation and Assess Performance Management System
- Evaluating Information and Communication Technology environment
- Perform Ad-hoc request
- Coordinate external audit activities
- Facilitate Audit Committee sittings
- Co-ordinate Sekhukhune Municipal and Risk Forum
- Conducting external assessment review
- Monitoring of Internal Audit Implementation plan
- Coordinate Financial Misconduct Disciplinary Board meetings

| FUNCTIONS                                 | STATUS QUO  | CHALLENGES  |
|---|---|---|

#### **Status Quo**

### Control

It assists the organization in maintaining effective systems of internal control by evaluating their effectiveness and efficiency.

### **Governance Processes**

We assess and make appropriate recommendations for improving the governance process in its accomplishment of the following objectives:

- Promoting appropriate ethics and values within the Municipality;
- Ensuring effective organizational performance management and accountability;
- · Communicating risk and control information to appropriate areas of the organization; and
- Coordinating the activities of and communicating information among the Council, external and internal auditors, and management.

These are achieved through performing the following types of Internal Audits:

- Risk Based Audits
- Performance Audits
- ICT Audits
- Consulting and Advisory Services
- Management request

## Challenges to be addressed by Internal Audit Unit

Incomplete Risk Assessments

- Risk identification not accurate
- Internal control environment weaknesses.
- Limited resources
- Lack of consequence management
- Cost versus benefit in implementing control measures
- Inadequate combined assurance model
- Slow turnaround time in reduction of risks
- Fraud risk assessment not conducted
- Risk appetite and risk tolerance not developed and communicated
- Inadequate inter-departmental relations in activities
- Un-favourable Audit Opinion
- Non-compliance with Legislations.
- · Inconsistent practices
- Lack of policies and committee structures
- Non-Compliance with Municipal Planning and Performance Regulations
- Poor performance not penalized
- Good performance not assessed and rewarded to employees below level 2
- Un-reliable information
- Loss control in relation to information and communication technology
- Fallible ICT Systems
- Lack of ICT Master plan
- · Inadequate back systems
- Lack of investigative skills/resources
- Inadequate skills internally to investigate cases
- Slow turnaround time in concluding referred cases
- Un-coordinated activities
- Lack of supporting evidence
- Slow implementation of Internal Audit Findings

## 2.8.3. Risk Management

### Introduction

The Public Sector Risk Management Framework guidelines and the ISO31000 note that **'everyone in an organization has the responsibility for internal control'**. Section 62(1) c and 95 (c) of the Municipal Finance Management Act (Act 56 of 2003) stipulates that an Accounting Officer (Municipal Manager) of a municipality is to ensure that a municipality has and maintains an effective, efficient, and transparent system of financial and risk management and internal control.

The above is further enhanced by the Municipal Systems Act (MSA) of 2000, and King IV Report on Corporate Governance for South Africa 2016, both of which to expect of the administration to design a process necessary and appropriate for provision of reasonable assurance regarding achievement of the municipality's set objectives.

Risk Management is regarded as part of the strategic levers of the municipality's institutional planning geared towards attainment of effective and efficient Corporate Governance regime.

# **Functions of the Risk Management Unit**

- Conduct risk assessment at strategic, operational, processes and projects levels
- Develop insurance program options, procure insurance cover, and manage insurance claims and underwriting
- Manage compliance with legislations and policies
- Implement and manage Anti-Fraud and corruption Strategy
- Develop, implement, and monitor Business Continuity Management Plan
- Conduct Security Threat Risk Analysis at operational sites
- Oversee Security Management SDM-wide
- Provide secretariat duties to the Risk Management Committee

| PROJECT                    | STATUS QUO   | CHALLENGES                                  |

| and work procedures.                     |

# 2.8.4. Public Participation, Council Secretariat and Councillor Support

### Introduction

Municipalities are by law required to foster public participation and ensure its citizenry is engaged in matters of governance. SDM place public participation and accountability at the centre of its work. The Municipality has adopted a Public Participation Policy Framework which encompasses an ongoing public participation programme.

Purpose: To facilitate public participation, public relations, and participatory democracy.

Functions of Public Participation, Council Secretariat and Councillor Support:

- Coordinate public participation and stakeholder engagement in the district.
- Coordinate public participation and stakeholder engagement for Provincial and National Sector Departments
- Provide support for the council
- Maintain records for council
- Provide secretariat services to the council
- Coordinate capacity building & councilor welfare
- Coordinate oversight visits of council committees
- Compile oversight visits reports to Council

| FUNCTIONS         | STATUS QUO   | CHALLENGES             |
|-------------------|--|------------------------|
| Coordinate public | The Public Participation Unit is in the  | -Lack of mobile and    |

## Status Quo

## Ward Committees/Community Development Workers (CDWs)

Ward Committees are important structures that are at the heart of communities and are used to enhance community participation in the affairs of the municipalities. The SDM has successfully launched 117 ward committees in the district. There is still a challenge of ensuring that they are motivated to effectively assist their communities. The other major challenges are lack of resources, transportation in vast wards, low literacy levels and in some cases lack of clarity in terms of their roles and responsibilities in their respective areas. It is within the ward committee system that the district expects community participation to be effective particularly during the IDP consultation period. It is therefore imperative that ward committees should get support and capacity building through training.

Apart from the ward committees, there are the CDWs that are an integral part of the ward committee system in this exercise of assisting communities to achieve their needs. CDWs help communities and the municipalities to fast-track delivery of services and the eradication of poverty. The province has deployed about 115 CDWs to the District to assist communities on developmental issues. The only challenge which is there with this structure is that it excludes some communities while other communities have more than one CDW in a word.

## 2.8.5. Communications, Executive Support, Customer Care and Special Programmes

## Introduction

As mentioned above, the SDM has achieved remarkable progress in institutionalizing and implementing its communication and stakeholder engagements mechanisms and processes. The District Communication Strategy was first adopted by the Council in 2016. and it was last reviewed in 2021.

The new Council, elected during the November 2021 local government elections, has also reviewed and adopted the communications strategy. The medium for communication includes, State of the District Address, Mayoral Community Outreaches, Events, District newsletters and promotional materials, Annual Report, Local and National Newspapers, Provincial and Local radio stations, Flyers, Ward Committee system, social media, Community Development Workers (CDWs), as well as loud hailing.

The district has established a functional district communicator's forum which coordinates, aligns, and streamlines government programmes involving sector departments, municipalities and other government Institutions.

As the world is battling with the COVID-19 pandemic, SDM has also embraced the online channels such as social media and Zoom Video Conferencing to communicate messages.

#### Status Quo

### Community Feedback Meetings

The district engages stakeholders like traditional leaders, business, labour, civil society, sector groups etc. in matters affecting them in their different areas of responsibilities. This community feedback programme assists in the improvement of communication and interaction between the district, local municipalities, and the broader community on issues of service delivery and development. Local municipalities are visited during FORA, Imbizo and IDP consultations. These Fora are helpful in bridging the gap between communities and the municipality in service delivery related issues. The Office of the Executive Mayor under Executive Support division continues with the engagement of civil society on issues of moral decay through Moral Regeneration Movement (MRM). In this movement, structures have been established from Local levels up to the district level to address challenges affecting the moral fibre of our society. The division goes further to support Strategic Events organized and hosted most specifically by our Traditional Leaders in the

celebration of their heritage events in commemoration of their fallen heroes and heroines in different respective communities.

## Media Liaison (Electronic and print Media)

The SDM utilizes both electronic and print media (internal and external newsletters) to improve and broaden communication in its jurisdiction. It also uses national and local Radios. Although loud hailing is an effective way of conveying messages to communities, the SDM also uses radio for advertising meetings, workshops, conferences, summits, and other functions.

Communication is also done through print media in the form of external and internal newsletters, local, regional, and national newspapers and websites. The district produces newsletters on a quarterly basis and when a need for special print medium communication arises.

An exciting initiative in the past 3 financial years has been the innovation and commitment to support local content in the form of bulk media buying for both print and electronic media. A total of eight (08) media houses benefitted, four community radio stations and two newspapers and the relationship is growing.

#### **Promotional Materials**

Promotional materials like notepads, pens, posters, flyers and banners are used by the district to reinforce the flow and the dissemination of information to the broader society of Sekhukhune. Some of these promotional materials are distributed during District events to encourage and motivate effective community participation.

The communication unit has been able to implement the decision on austerity measures to cut expensive promotional materials such as t-shirts.

#### Youth Development

The SDM has adequately addressed youth development through the appointment of special personnel to deal directly with youth issues. It is in this office where developmental issues like unemployment, lack of housing, poverty, shortage of skills, high levels of crime and violence, social and family disintegration and other social ills like HIV/AIDS that affect youth are addressed. It is within this background that youth development strategy should be developed to assist young people to deal with issues that affect them as unemployed, unskilled, vulnerable, and underresourced. Resources should be channeled towards the development of young people's projects for their upliftment to stop the escalation of crime and violence.

SDM approved youth development policy and strategy in the 2017/2018 financial year which will assist in setting up structures and processes to streamline youth development in the district. The youth policy has been reviewed during this 2024\2025 financial year with the inclusion of the establishment of the Youth Board. SDM is assisting grade 12 with bursary and tertiary applications. Even though the municipality doesn't have funds for bursaries, we try to assist with information from various sector departments and private sector. Opportunities are also given in EPWP and experiential learning programs.

# **Women Empowerment**

Women empowerment is a phenomenon that is high on the agenda of the SDM. At present the district has two women Mayors, out of five. The SDM is one of the Districts in Limpopo that has elevated the status of women in municipal governance. Women should be encouraged to partake in developmental projects that would assist them to get out of the poverty line that they found themselves in. This means that resources should be channeled in the direction of women empowerment projects to empower them economically and politically. SDM took the initiative to bring Dikgoshikgadi and Mmakgoshi to assist in women development in the villages lead by them and bring skills to the women. Departments have helped to bring opportunities to different villages around the district by working together with the office of the Executive Mayor and the local municipalities.

# Challenges encountered in women's empowerment

- Under-Funding of programmes targeting women in the communities
- Lack of growth for women in our communities
- Lack of resources to support community initiatives and programs for women development.

# Children's Development programmes

The Office of the Executive Mayor's Special Programmes support children's development through support to Early Childhood Development Centre's with groceries, learning materials and annual celebration of children's day. SDM has given young children the opportunity to know what is going on in the offices of the district. Executive Mayor has also assisted the less fortunate children by working with social development in getting them their grants and a safe home to live in. As an ongoing project the municipality has provided toilets for a few care centers where children go after school and during school holidays. Through the office of the premier has given children opportunities to speak out and we hear their cry and their expectations. SDM is in a process of forming a district forum in the financial year 2025/2026.

# Challenges encountered in children's programs are

- The unorganized children sector makes it difficult for mobilization of support.
- Under-Funding of programmes targeting children
- Lack of early childhood facilities in our communities
- Lack of resources to support community initiatives and programs on children's development.

### **Aged Development Programmes**

The aged programme has been established in the district as a means to sustain Mandela Day Programmes and to promote healthy lifestyle of the elderly \ older persons.

### Mandela Day Programme.

This programme is used to encourage communities to honour Mandela Day by working together to assist the needy communities by building or renovating their facilities. Sekhukhune District visits its four local municipalities on a rotation basis to host Mandela Day to its vulnerable people. The district organised communities to assist in painting, putting in windowpanes, fixing roofs and assist in gardening and yard cleaning on the identified date. After the job well done on the day, older persons play indigenous games and Golden Games as a way of promoting healthy lifestyle among the older persons.

# Disability Programme (People with disability)

The district organizes people with disability annually to educate them about their rights, support them in the form of workshops in disasters, road awareness, albinism, and recently nurses and doctors were capacitated in sign language as one of the official languages of South Africa.

- Celebration of Mandela Day, Human Rights, and International Day for older people with Social Development.
- International Disability Day is also celebrated in the district.
- Ongoing support to the disabled, pension committees and events for the elderly

# **Military Veterans Programme**

Military Veterans Programme is a programme initiated through the Military Veterans Act 84 of 1976 to deal with the welfare of military veterans. This piece of legislation together with other pieces of legislation administered by line-function departments do not exclude the dependents of military veterans. A Military Veteran is any South African citizen who has retired from active service rendered to any of the military organisations, statutory and non-statutory, which were involved on all sides of South Africa's Liberation War from 1960/01 and those who served in South African Defence Force before 1960 as well as those who became members of the new South African National Defence Force after 1994. The objective of this programme is to recognize and honour military veterans in life and memorialize them in death for their sacrifices on behalf of the nation. It is also to mainstream their issues daily for citizen to acknowledge and recognize the role they have played in society.

# **Traditional Leadership**

Historically, the institution of traditional leadership has been relegated to the periphery of development. Land was developed by the traditional leaders to participate in the decision-making exercise of their own destiny. Their communities blamed them for their unscrupulousness and their lack of vision for the future. The new political dispensation has brought another side to this institution that shows that they have been the makers of their own history in the past and they should be given an opportunity to play their role. The SDM has played a significant role in making sure that traditional leadership is broad on board to assist in bringing service delivery to their communities.

The SDM is confident to pronounce that the relationship between itself, the institution and all local municipalities is healthy. The challenge is on who should be the custodian of development in their areas of jurisdiction. They do not agree with democratically elected municipal structures in the delivery of services. They prefer partnership rather than exclusionary types of development. Ongoing workshops are held with all the 81 traditional leaders in the district to find common ground around the interpretation and application of SPLUMA as a government policy guiding Land Use Development.

# Sport, Arts and Culture

# Mayoral Sports, Heritage Celebration and Language Promotion

Mayoral Sports has been used as one of the development tools of the district sports federations under the district sport confederation. The indigenous games serve to promote and integrate youth and elderly programmes. The youth indigenous programme integrates with the Golden Games played by elderly or older persons from the ages of 60 years and older. The indigenous games and the Golden Games are played until the National Level.

The Executive Mayor 's Cup is inclusive of all the local municipalities. The above-mentioned competition starts from ward level until the district level whereby different codes compete for district pride. The Executive Mayor's Cup is the flagship project in sports development in the district.

### **Arts and Culture**

Heritage Celebration and the Language Promotion programmes are the flagship Projects in the District. Heritage Celebration is organised annually in a rotational basis of our local municipalities. The above-mentioned programmes develop arts and culture in the district with the Language Promotion programme reinforcing the promotion of the indigenous languages of the district. Our language policy developed in 2014 indicated the official languages of the district being: Sepedi, IsiNdebele, I siSwati, English, and Afrikaans. Language Promotion Programme promotes the three indigenous languages of Sekhukhune District Municipality.

The two flagship projects are held annually in September. In the past, language promotion was implemented in partnership with Love LIFE Organization. Few schools were involved, and that resulted in the programme shifted to Arts Centres. The seven (7) Arts centres involved schools and the communities from all the local municipalities. The arts centres compete annually with all the genres that promotes our district indigenous languages.

### Intergovernmental Relations

The Constitution of the Republic of South Africa has declared that the government should have three layers which are Local, Provincial and National spheres. These three spheres should be interdependent, interrelated, and independent. It is therefore indicated that all organs of state should promote and facilitate intergovernmental relations within the context of cooperative governance hence the District Development Forum and IDP Representative Forum. This is done

to encourage information sharing and dealing with common challenges that are facing all municipalities in the district.

# Challenges of this area

- Under-Funding of programmes targeting vulnerable groups
- Special programmes still seen as a peripheral issue.
- Communication not reaching all the targeted people.

### **Customer Care and Batho Pele**

### Call Centre:

SDM has established a 24-hour call centre situated in Groblersdal which serves as a one stop telephonic complains system. The call centre mainly addresses queries relating to Billing, fire, emergency services and all water and sanitation related queries.

# Challenges of this area

- The system is manually operated that makes it difficult to track and trace the calls.
- The system doesn't have a backup. As and when the electricity is off, the telephones are all down
- It is ageing. Telkom can no longer fix it because the parts are no longer available.

### **Batho Pele**

This initiative was introduced by the late former President Mandela Administration on October 1, 1997, to stand for the better delivery of goods and services to the public. Batho Pele aims at enhancing the quality and accessibility of government services by improving efficiency and accountability to the recipients of public goods and services.

Within Customer Care, SDM has the Batho Pele desk that works with President and Premier hotline queries. The desk rregularly consults with customers.

- Set service standards.
- Increase access to services.
- Ensure higher levels of courtesy.
- Provide more and better information about services.

### Challenges of this area

Customer Satisfaction Survey is never conducted

### **District and Local AIDS Councils.**

Aids Council is an advisory and Multisectoral body that support SDM in coordination of health calendar programmes and in advocating for mitigation and prevention of HIV/TB and STIs. Aids Council is established in terms of Limpopo Province AIDS Council Policy (LPAC) Framework

2021.Amongst the functions of the District Aids Council is to coordinate Multisectoral Implementation planning sessions with Civil Society, Private, Business and Government Sectors. Main function of the DAC is to help in spreading preventative messages as to curb and reduce high HIV prevalence as well as STIs and TB infections within our communities in the district through Health and Social outreach programmes.

# Status quo.

SDM District AIDS Council was established and launched in 2021. Aids Council structures are namely:

- ❖ District Aids Council Committee that is chaired by the Executive Mayor as stipulated by the framework. Membership of the DAC is constituted by Local Mayors, delegated MMCs Councillors, Heads of Sector Departments /delegated officials, Municipal Manager, Director Community Services Department, Chairpersons of Civil Society Sectors (CSS) and Chairperson of the Civil Society Forum (CSF) as co-Chair of the District Aids Council.
- ❖ District Aids Council Technical Committee that is chaired by the Municipal Manager as stipulated by the framework. Membership of the DAC
- ❖ TC is constituted by Local Municipal Managers, Heads of Sector Departments /delegated officials, District Executive Manager Department of Health as Deputy Chairperson, Director Community Services Department, Programmes Managers of the Funded Organisations and CSF Co-Chairperson for Technical Committee.
- ❖ Monitoring and Evaluation Committee is responsible to ensure effective coordination and implementation of Multisectoral District Implementation Plan (MDIP) that is presided over by Monitoring and Evaluation Officer. Membership of the M&E is comprised of Employees Assistance Practitioners/Wellness Officers representing Sectors Departments, Funded NGOs Monitoring and Evaluation Officers.
- ❖ Resources Mobilisation Committee (RMC) is responsible for sourcing out financial assistance from potential sponsors and funders for District Aids Council programme. This committee is chaired by Resource Mobilisation Officer and comprised of Civil Society Forum Co-Chairpersons for Resource Mobilisation from District and Local Aids Councils. This committee is also responsible to coordinate consumable and non-consumable material resources prior meetings, District Aids Council Summits, Workshops and HIV /AIDS Symposiums
- ❖ Stakeholders Engagement Committee is responsible to coordinate preparatory meeting pre and post Health Calendar days Commemorations and events namely World Aids day, TB day ,STIs/Condom Week Campaigns, Candlelight Ceremonies and other mitigation and response campaigns. Help

in identifying stakeholders DAC summits, HIV/AIDS Symposium and other related gatherings.

- ❖ Civil Society Sectors Committee (CSS) is comprised of all elected Civil Society Sectors Chairpersons representing their sectors in terms of South African National AIDS Council (SANAC) Civil Society Sectors Guidelines on Tier 1. Mandate of the CSS is to coordinate activities/campaigns, meetings and quarterly reports for consideration by the Civil Society Forum.
- Civil Society Forum Committee (CSF) is composed of elected members of the Civil Society Sectors as per SANAC Civil Society Sectors Guidelines on Tier 2. Mandate of the forum is to advocate and account for HIV, TB and STIs during District Aids Council meetings.

# Challenges encountered by the District Aids Council Coordinating team

Activities of all structures mentioned above are coordinated by two (2) Officials in Special Programme Unit and without a dedicated Member of Mayoral Committee responsible for District Aids council Functions as outline in Portfolio delegation in page 223 and 224 respectively.

- Lack of adequate operational staff as per South African National Aids Council staffing and organisational structure framework and not in compliance with Limpopo Provincial Aids Council Meeting resolution.
- ➤ Lack of coordination budget for the structure especially for coordination of Civil Society Sectors as they are required and expected to be given subsistence and travelling allowance when attending meetings.
- ➤ Late submissions of quarterly reports by sectors and Local Municipalities.
- Poor attendance of meetings across the structures emanating from lack of transport allowance for members representing Civil Society.
- Inadequate personnel.

# 2.8.6. Performance Management System (PMS)

### Introduction

PMS is a system of managing performance. It provides a set of tools and techniques to plan, monitor, measure and review performance of the organization and individuals. The system ensures that all parts of the organization work together to achieve the goals and targets of the organization. Performance Management System and the IDP process are seamlessly integrated. Whereas the IDP fulfills the planning stage of Performance Management, Performance Management System, on the other hand, fulfills the implementation management, monitoring, and evaluation of the IDP. PMS should provide diagnostic signals of the potential risks that are likely linked to implementation of the IDP.

### **Status Quo**

PMS in SDM is doing fairly well and compliance is adhered to at all times. Though there are normal administrative challenges like in all institutions, SDM does strive to always comply with legislative requirements. The municipality procured PM System that seek to improve the processes in terms of performance management. The implementation of the system was effected from 2023/2024 financial year whereby reports and portfolio of evidence is uploaded on the it.

# Challenges

- Improvement in terms of audit opinion.
- Setting unrealistic targets.
- Late submission of reports.
- Negative perceptions and attitudes with regard to performance in general.

# CHAPTER 3: STRATEGIES PHASE

### 3.1. VISION

"An innovative leader in integrated economic development and sustainable service delivery".

### 3.2. MISSION STATEMENTS

To improve the quality of life for all communities through:

- provision of a democratic and accountable government;
- promotion of inclusive and egalitarian economic transformation;
- promotion of a safe and healthy environment;
- fostering of community involvement and stakeholder engagement; and
- Strengthening institutional capacity.
- Promotion of social cohesion

# 3.3. CORE VALUES OF THE MUNICIPALITY

The district regards its core values as the cornerstone that should guide the municipality in conducting its affairs. While the core value were represented by the abbreviation HEART is now changed to HEART + EAR and below is the full meaning of the newly identified core values:

- H-onesty: We tell the truth and back it up with action. We commit to be truthful in everything
  we do
- **E-**xcellence: We strive to provide exceptional level of service to our communities. Excellence lies in our hearts to evoke it in the community by exemplifying and giving back.
- A-ccessibility: We provide means that enable communities to reach services easily. We strive to optimise the use of technology, retail facilities and expanding points of services to remote areas.
- **R-**espect: We treat people with courtesy, politeness, and kindness irrespective of their profession, ethnicity, religion, and cultural background.
- **T-**ransparency: We conduct our activities and share information to our communities in an open and transparent manner.

4

- **E-**thical leadership:
- A-ccountability:
- R-esponsiveness:

# 3.4. MOTTO

Re a aga / Siyakha – meaning 'we are building'.

# 3.5. SLOGAN

Destination for economic growth and development.

### 3.6. MAYORAL STRATEGIC PRIORITIES

- 1. Provision of water and sanitation services in a sustainable manner
- 2. Local economic development, growth and job creation through agrarian reform, mining, tourism and repositioning of SDA
- 3. Good governance and sound financial management
- 4. Sustainable land use management and spatial transformation
- 5. Community development, social cohesion and nation building
- 6. Public participation, stakeholder engagements and partnerships

### 3.7. INFRASTRUCTURE AND WATER SERVICES

The Sekhukhune District Municipality is committed to ensuring sustainable, reliable, and efficient water and sanitation services for all communities within its jurisdiction. As a critical service provider, the municipality recognizes the importance of strategic planning, infrastructure development, regulatory compliance, and governance enhancement in achieving this goal. Through a coordinated and collaborative approach, we strive to address existing challenges, improve service delivery, and uphold the highest water quality and environmental standards. This document outlines the strategies to fulfil our mandate and ensure equitable access to clean water and sanitation services for all residents.

However, the District Municipality faces significant challenges in ensuring a sustainable, reliable, and efficient supply of water and sanitation services to all communities, as outlined in the SWOT analysis. Addressing these challenges requires a comprehensive approach that integrates planning, infrastructure development, regulatory compliance, and governance enhancement. Below are the strategies the district intends to apply to resolve the challenges.

# STRATEGIC APPROACHES

# 1. Prioritizing Source Development and Infrastructure Planning

Ensuring water security begins with developing sustainable water sources before implementing any infrastructure. Aligning key sector plans such as the Water Services Development Plan and the Water Services Master Plan with the Integrated Development Plan (IDP) ensures a coordinated and strategic approach to service delivery. The municipality can ensure long-term water availability by emphasizing source development before embarking on infrastructure expansion projects.

# 2. Reducing Water and Sanitation Infrastructure Backlogs

To address existing backlogs in water and sanitation infrastructure, the municipality must review and implement Water Conservation and Water Demand Management Strategies. Public awareness campaigns will be strengthened to promote responsible water usage. Additionally, strict enforcement of by-laws will help curb water wastage and illegal connections, further contributing to improved water service delivery.

### 3. Ensuring Water Quality and Compliance with Effluent Standards

Providing safe and potable water requires stringent regulatory measures. Strengthening the Regulations and Governance Unit will ensure adherence to water quality norms and standards. By improving regulatory oversight, the municipality can guarantee that final effluent discharges meet national compliance standards, thereby safeguarding public health and the environment.

# 4. Achieving Compliance with Green and Blue Drop Norms and Standards

Compliance with green and blue drop standards is essential for maintaining high-quality water and sanitation services. Stakeholder engagement during the project planning phase is critical to fostering collaboration and support. The active involvement of executive leadership, including the Executive Mayor, Municipal Manager, and MEC, will ensure that policy implementation aligns with national water quality objectives. Additionally, local mayors and law enforcement agencies will be engaged to support compliance and enforcement initiatives.

# 5. Achieving Compliance with Green and Blue Drop Norms and Standards

Enhancing governance and strategic planning is essential for sustainable water service delivery in the Sekhukhune District Municipality. Key initiatives include finalizing and adopting an Asset Management Plan, implementing an Operations and Maintenance (O&M) Plan, and integrating a system dashboard to monitor infrastructure projects. The municipality aims to improve data management through cloud-based asset systems and secure file storage while exploring alternative energy sources to ensure uninterrupted water supply. Additionally, efforts will further focus on filling funded vacancies, implementing a retention strategy, and enforcing SPLUMA and the District Development Model (DDM) for better planning. To maintain high water quality standards, the municipality will develop and execute Blue and Green Drop Action Plans while fast-tracking service provider appointments and ensuring procurement plan adherence. Established ring-fenced Water Services Authority (WSA) and enhanced collaboration via Inter-Governmental Relations (IGR) structures will further strengthen governance.

### **SUMMARY OF STRATEGIES**

| PROBLEM<br>STATEMENT                                | OBJECTIVE   | STRATEGIES   |
|---|---|--|
| Unstable supply of water and sanitation services to | To ensure a sustainable, reliable, and efficient supply | Prioritise source development prior to implementing any water services infrastructure.   |
| communities   | of water and sanitation services to all communities     | Align the Water Services Development Plan, the Water Services Master Plan, and all other sector plans and incorporate them into the IDP. |
|   | within the<br>Sekhukhune District<br>Municipality       | Prioritise source development prior to implementing any water services infrastructure.   |
|   | To reduce water and sanitation infrastructure           | Review and Implement existing Water Conservation and Water Demand Management Strategies and plans.                                       |
| ba  | backlog   | Improving Awareness Campaigns  |
|   |   | Enforcement of By-Laws   |
|   | To provide water of good quality and                    | Strengthening of Regulations and Governance Unit   |

| PROBLEM                                     | OBJECTIVE   | STRATEGIES   |
|---|---|--|
| STATEMENT                                   |   |  |
|   | discharge final effluent that meets norms and standards.                        |  |
| Non-compliance to To ensure compliance with | Identification and engagement of stakeholders during the project planning stage |  |
|   | green and blue drop<br>norms and standards                                      | The intervention of EM & MM Office, including the MEC  |
|   |   | Involvement of the Local Mayors, including law enforcement (Police)  |

### **COMMUNITY SERVICES**

The Sekhukhune District Municipality is dedicated to providing essential community services that promote public health, safety, and resilience. Municipal Health Services focus on maintaining sanitation standards, preventing disease outbreaks, and ensuring environmental well-being. Emergency Management Services respond rapidly to medical, fire, and rescue incidents, ensuring swift and effective assistance in critical situations. Disaster Management Services work proactively to mitigate risks, enhance preparedness, and implement response and recovery strategies to safeguard lives and infrastructure.

However, the district has faced significant challenges in delivering effective services to the communities. These include the non-availability of disaster management centres, which limits the municipality's ability to coordinate and respond swiftly to emergencies. Additionally, there is a lack of skilled personnel to render services across the district, and this affects the efficiency of emergency response, municipal health services, and environmental health monitoring. The shortage of skilled personnel results in slower service delivery, inadequate health and safety standards monitoring, and increased strain on existing resources.

As such, strategies for addressing these challenges require urgent investment in disaster management infrastructure, recruitment and training of personnel, and improved resource allocation to enhance service delivery and community resilience.

| PROBLEM<br>STATEMENT | STRATEGIES                           | KPA/KPI/PROJECT                  |

### SPATIAL RATIONALE

The Sekhukhune District Municipality is committed to sustainable land use management and spatial transformation to promote balanced and inclusive development. Spatial planning is crucial in guiding growth, infrastructure development, and resource allocation to create well-structured and sustainable communities. It plays an important role in developing IDP by focusing on integrated planning, which aligns infrastructure investments, land use, and environmental considerations to create well-structured and resilient communities. The

municipality also aims to provide effective and efficient geographic information systems (GIS) to enhance decision-making, support spatial analysis, and ensure accurate planning for future development. Through these efforts, the district seeks to achieve coordinated, inclusive, and sustainable spatial development that benefits all communities.

The Sekhukhune District Municipality faces several challenges in achieving effective spatial planning and development. Uncoordinated and non-integrated planning hinders sustainable land use and infrastructure development, leading to inefficient resource allocation and fragmented service delivery. The lack of strategic district planning coordination further exacerbates these issues, as there is limited alignment between local, district, and provincial planning frameworks. Additionally, the municipality operates with an outdated Geographic Information System (GIS), which affects accurate data analysis, spatial mapping, and informed decision-making.

To address these challenges, the municipality must adopt integrated spatial planning approaches that align municipal, provincial, and national development frameworks. A functional District Spatial Planning Coordination forum will enhance stakeholder collaboration and ensure alignment with the Integrated Development Plan (IDP). Upgrading and modernizing the GIS system is also critical, enabling real-time data analysis and efficient spatial planning. Furthermore, strengthening intergovernmental relations and stakeholder engagement will facilitate a more coordinated and strategic approach to spatial planning, ensuring sustainable development and improved service delivery across the district. Below are summarised strategies to remedy the challenges encountered in the district.

| PROBLEM<br>STATEMENT             | OBJECTIVES   | STRATEGIES  | KPA/KPI/PROJECT   |
|----------------------------------|--|---|---|
| Uncoordinated planning           | To ensure sustainable land use management and spatial                      | Ensuring proper alignment of land use management within the district.   | Finalization of District Spatial<br>Development Framework<br>(SDF)                      |
|                                  | transformation by<br>June 2026   | Support to Local Municipalities on land use management such as Functional Joint District Municipal Tribunal (JDMPT), Precinct Plans, Implementation of SDFs and SPLUMA, and By-Laws review) | Provide Support to Local Municipality   |

|                   | Difficulty in accessing land for development from some Traditional Leaders |
|                   | Increasing land invasion and informal settlements.                         |
|                   | Occupation of prime agricultural land of communities                       |
|                   | Environmental degradation  |
|                   | Unregulated development  |

### LOCAL ECONOMIC DEVELOPMENT

### INTRODUCTION

The Local Economic Development (LED) Unit of the Sekhukhune District Municipality plays a vital role in driving economic growth, job creation, and sustainable development within the district. Its primary focus is to enhance the integration of development plans and communication, ensuring that economic initiatives align with broader municipal, provincial, and national strategies. Additionally, the unit seeks to promote temporary job creation opportunities, providing much-needed employment and income for local communities. Recognizing the district's rich mineral resources, the LED Unit also works to add value to activities in the mining sector, fostering beneficiation, skills development, and economic diversification. Through these efforts, the municipality aims to create an inclusive and resilient local economy that benefits all residents.

The Sekhukhune District Municipality faces several challenges in achieving sustainable local economic development. Silo planning, where departments and stakeholders work in isolation, leads to poor coordination and ineffective implementation of development initiatives. This fragmentation hinders economic growth and limits the impact of various programs. Additionally, the district struggles with a high unemployment rate, which affects livelihoods and contributes to socio-economic instability. Despite the region's rich mineral resources, mining communities remain underdeveloped, lacking infrastructure, economic diversification, and sustainable livelihood opportunities.

The municipality must promote integrated planning and stakeholder collaboration to address these challenges and ensure alignment between government, private sector, and community development initiatives. Expanding skills development and entrepreneurship programs will help equip residents with the necessary expertise to access job opportunities and participate in the local economy. Furthermore, fostering partnerships with mining companies to enhance local beneficiation, improve infrastructure, and support small businesses within mining communities can drive long-term economic transformation. The municipality can create a more inclusive and sustainable economy that benefits all residents by implementing these strategies. Below are strategies the district intends to apply to alleviate the challenges encountered.

| CHALLENGES                                | OBJECTIVES   | STRATEGIES  | PROGRAMMES /  |

### SEKHUKHUNE DEVELOPMENT AGENCY

### INTRODUCTION

The Sekhukhune Development Agency (SDA) is a strategic entity established to drive economic development within the Sekhukhune District Municipality. With a clear mandate to stimulate economic growth, attract investment, and promote sustainable development, the agency plays a crucial role in transforming the district's economic landscape. To effectively carry out its mission, the SDA operates with the support of the District Municipality, receiving an unconditional grant that enables it to implement key developmental initiatives. A clear and implementable business plan guides the agency's operations, ensuring that projects are well-structured, result-driven, and aligned with the broader economic development goals of the district. Through targeted interventions in various sectors, including mining, agriculture, tourism, and infrastructure development, the SDA aims to create employment opportunities, foster entrepreneurship, and enhance the overall economic well-being of Sekhukhune communities.

The Sekhukhune Development Agency (SDA) faces several challenges that hinder its ability to drive economic growth and development effectively. The undiversified economy limits opportunities for sustainable job creation, as the district relies heavily on a few key sectors, such as mining, without fully exploring other potential industries like agriculture, manufacturing, and tourism. The urgency further relies on grant from parent municipality, making it difficult for the agency to implement long-term economic development initiatives. The slow economic growth and high unemployment rate further exacerbate poverty levels, reducing the overall quality of life for residents. Lastly, non-compliance with statutes can hinder regulatory approvals, funding opportunities, and investor confidence, delaying development projects.

To address these challenges, the SDA should focus on economic diversification by promoting alternative industries such as agro-processing, renewable energy, and tourism to reduce

reliance on mining. To reduce grant dependency, the agency should develop revenue-generating initiatives, including public-private partnerships and investment attraction strategies. Stimulating economic growth and job creation can be achieved by supporting small and medium enterprises (SMEs), facilitating skills development programs, and implementing infrastructure projects that enhance economic activity. Lastly, strengthening governance and compliance through regular audits, capacity-building for staff, and adherence to statutory requirements will ensure accountability and enable seamless project implementation. By implementing these strategies, the SDA can position itself as a key driver of economic transformation and sustainable development in the district. Below are SDA's strategies intending to apply to overcome the challenges encountered.

| CHALLENGES  | OBJECTIVES  | STRATEGIES   | PROGRAMMES /<br>PROJECTS  |
|---|---|--|---|
| Undiversified economy   | To act as an engine for economic growth by diversifying and expanding the SDM economic base.  | By venturing into<br>green economy and<br>manufacturing<br>initiatives   | Waste Management<br>Outdoor Energy Storage Units<br>(OESU)  |
| Grant dependency<br>on parent<br>municipality                                       | To secure a stable and sustainable financial base for the future development of the agency.   | Development and implementation of an investment strategy.  | Development and commercialize ERF 488 in Groblersdal Ext 5 to generate sustainable revenue for the Sekhukhune Development Agency (SDA |
| Slow economic<br>growth and high<br>unemployment rate                               | To initiate catalytic projects  | By venturing into<br>Private Public<br>Partnerships  | Implementation of De Hoop<br>Resource Management Plan<br>(RMP)  |
|   | To develop businesses that create sustainable job opportunities   | Facilitation of enterprise and Supplier Development Programmes and projects                                    | Development and commercialize ERF 488 in Groblersdal Ext 5 to generate sustainable revenue for the Sekhukhune Development Agency (SDA |
| Non-compliance with statutes  | To enhance the capacity of the Board by providing the necessary tools, resources, and training to perform oversight functions effectively,        | By aligning the organization's operations with the applicable laws, regulations, and best practices.           | Board governance training in<br>partnership with the Institute<br>of Directors South Africa<br>(IODSA)                                |
| Reliance on grants<br>not able to source<br>funds from Investors                    | To prepare a credible, realistic, and funded budget.  | By Spending the budget according to the approved budget and service delivery implementation plan.              | Funded Budget   |
| Non-compliance with<br>GRAP, misstatement<br>and lack of review to<br>detect errors | To prepare monthly, quarterly and annual financial reports in accordance with laws, policies and regulations and obtain Unqualified Audit Opinion | -Prepare GRAP<br>compliant AFS<br>-Develop asset<br>management policy<br>and manage assets<br>-Risk management | GRAP compliant AFS  |

| STRENGTH  | WEAKNESS  |
|---|---|
| Clear mandate of the Agency   | Dependency on the shareholder for sustainability of the Agency. |
| New readily Committed Board and hardworking staff.                        | Lack of revenue to implement high impact projects               |
| Support from District Municipality in the form of an unconditional grant. | Lack of systems/reliance on municipal ICT and finance systems   |
| Clear and implementable business plan                                     | Lack of visibility- No office space, No website                 |

| OPPORTUNITY                                      | THREAT  |
|--|---|
| Abundance of Land and Rich Mineral               | Incapacity to generate revenue                    |
| Resources.                                       |   |
| Good climatic conditions for farming and energy  | Lack of strategy on beneficiation in the Mining   |
| harvesting                                       | and Agriculture industries                        |

| (Tubatse)  |   |
| Legislated platform to execute access to private | High level of unemployment inequality and         |
| and public funding                               | poverty   |
| Economic opportunities (Beneficiation in mining  | Neglect and lack of exposure of our culture and   |
| and Agri, development of smelters, tourism.      | heritage.   |
|  | Lack of both financial and non-financial support. |

### INSTITUTIONAL DEVELOPMENT AND ORGANISATIONAL TRANSFORMATION

Institutional Transformation and Organizational Development play a pivotal role in ensuring that the Sekhukhune District Municipality operates efficiently, equitably, and in alignment with its strategic objectives. A key focus is on facilitating skills development to enhance employee capabilities and improve service delivery. The municipality also prioritizes intergovernmental relations, fostering collaboration among different spheres of government to drive coordinated development. Maintaining a healthy and safe working environment, along with employee wellness programs, ensures that the workforce remains productive and motivated.

To uphold fairness and inclusivity, the municipality is committed to democratizing the workplace and advancing fair labour practices, while promoting labour peace through sound engagement with worker representatives. Strengthening ICT services and infrastructure is essential to improving operational efficiency and service delivery, alongside the development of a well-designed organizational structure that optimizes human resource utilization. Additionally, fleet and facility management services are enhanced to support municipal operations effectively.

A critical aspect of institutional transformation is sound records management, ensuring proper documentation and information accessibility. The municipality also focuses on developing job descriptions, conducting job evaluations, and implementing Employment Equity to create a balanced and inclusive workforce. Furthermore, efforts to integrate systems and ICT infrastructure support, along with the regular review and implementation of the Integrated Development Plan (IDP) and the District Development Model (DDM), are crucial for driving sustainable municipal growth.

Lastly, the implementation of Performance Management Systems (PMS) ensures accountability and continuous improvement within the municipality. Through these comprehensive strategies, the Sekhukhune District Municipality aims to build a high-performing, innovative, and people-centred institution that meets the evolving needs of its communities.

However, the District faces several operational and structural challenges that impact efficiency, service delivery, and workplace functionality. Outdated tools of trade, such as computers and laptops beyond their lifespan, along with unlicensed municipal software, hinder productivity and data security. Additionally, the lack of network maintenance, disaster recovery support, and electronic records management systems weakens ICT infrastructure, while non-segregation of duties on municipal systems increases security risks. The municipality also struggles with salary disparities, an aging workforce, and insufficient skills transfer, contributing to inefficiencies. Furthermore, limited budgets, non-compliance with occupational health and safety regulations, and the absence of medical surveillance and stress management programs pose risks to employee well-being. Challenges such as labour unrest, inadequate biometric security, misuse of municipal fleet, uninsured facilities and fleet, and a lack of archiving strong rooms further exacerbate operational inefficiencies.

To address these issues, the municipality should invest in modern ICT tools and infrastructure, ensure software licensing compliance, and implement network maintenance and cybersecurity measures. Establishing a decentralized municipal firewall and strengthening disaster recovery sites will enhance system resilience. Implementing skills transfer programs, addressing salary disparities, and enforcing compliance with occupational health and safety standards will improve workforce stability. Additionally, the decentralization of Personal Protective Equipment (PPE) provision, investment in medical surveillance and trauma management programs, and the development of electronic records and archiving systems will enhance service delivery and employee well-being. Strengthening fleet management policies, enforcing biometric security for attendance tracking, and addressing labour concerns through structured engagements will further support institutional transformation. Lastly, ensuring timely submission of performance reports and optimizing operational office space will contribute to a more effective and accountable municipal administration.

To overcome these challenges, the Sekhukhune District Municipality should **invest in modern ICT infrastructure**, including upgraded computers, licensed software, and enhanced network maintenance to improve efficiency and security. Strengthening **cybersecurity measures**, such as decentralizing firewall security and ensuring proper system access controls, will mitigate risks. Implementing **a structured skills transfer program** and addressing **salary disparities** will improve workforce capacity and motivation, while **succession planning** can help manage an aging staff.

Compliance with occupational health and safety regulations, along with the decentralization of Personal Protective Equipment (PPE) provision and the introduction of medical surveillance and trauma management programs, will ensure employee well-being. Establishing an electronic records management system and dedicated archiving facilities will enhance document security and accessibility. To optimize resources, the municipality should improve fleet management policies, ensure insurance coverage for

municipal assets, and implement a biometric security clocking system to improve attendance tracking. Addressing labour unrest through effective engagement and budgeting strategically for operational needs will foster stability. Finally, enforcing timely performance reporting and ensuring adequate operational office space will enhance service delivery and overall municipal efficiency. Below are strategies the department intend to apply to overcome the challenges.

| CHALLENGES   | OBJECTIVES   | STRATEGIES  | PROGRAMMES /  |
|--|--|---|---|
|  | _  |   | PROJECTS  |
| Budget constraints, delays<br>in recruitment processes,<br>skills shortages in key<br>sectors                | To ensure effective staffing and capacity building   | Developing and<br>Implementing a<br>Recruitment Plan                        | -Recruitment and selection<br>of skilled personnel<br>- Implementation of an<br>employee retention<br>strategy              |
| Resistance to change, lack of policy awareness, time-consuming approval processes                            | To ensure compliance with regulatory frameworks and enhance governance                           | Developing and<br>Reviewing Policies  | - Development and review of HR and operational policies - Implementation of policy compliance monitoring system             |
| Low participation levels,<br>logistical constraints, lack<br>of interest from<br>stakeholders                | To improve understanding and compliance with municipal policies                                  | Conducting Policy<br>Workshop and<br>Awareness for Staff<br>and Councillors | Hosting policy awareness<br>workshops     Developing training<br>materials and guides                                       |
| Resistance to organizational restructuring, misalignment of roles, inadequate                                | To create a clear<br>and effective<br>municipal<br>structure for<br>improved service<br>delivery | Developing Organizational Structure and Job Descriptions consultation       | Review and update the organizational structure     Develop job descriptions and conduct job evaluations                     |
| Budget limitations, delays<br>in supply chain processes,<br>maintenance costs                                | To equip municipal personnel with the necessary tools for effective service delivery             | Procuring Tools of<br>Trade for Staff and<br>Councillors                    | - Procurement of laptops,<br>software, office equipment,<br>and vehicles  |
| High setup and maintenance costs, lack of technical expertise, limited ICT infrastructure                    | To ensure data security and continuity of municipal operations                                   | Developing a<br>Functional ICT<br>Disaster Recovery<br>Site                 | - Establishment of a disaster recovery site - Implementation of data backup systems   |
| Limited budget, low<br>employee engagement,<br>insufficient medical and<br>psychological support<br>services | To promote the physical, mental, and emotional well-being of employees                           | Facilitating and<br>Implementing<br>Employee<br>Wellness Programs           | - Implementation of medical surveillance programs - Stress and trauma management workshops - Health and wellness screenings |
| Budget constraints for salary adjustments Delays in approval processes                                       | To ensure fair<br>and transparent<br>job grading and<br>remuneration                             | Participating in Job<br>Evaluation<br>Resistance to<br>change               | - Conducting job evaluation assessments - Benchmarking job grading with industry standards                                  |

| CHALLENGES  | OBJECTIVES   | STRATEGIES   | PROGRAMMES /<br>PROJECTS  |
|---|--|--|---|
| Resistance to performance evaluations Limited capacity to implement PMS effectively   | To improve accountability and service delivery within the municipality           | Implementing Individual and Institutional Performance Management System              | - Cascading Performance<br>Management System<br>(PMS) to all employees<br>- Conducting performance<br>reviews and assessments                               |
| Limited budget allocation Lack of participation from employees Mismatch between training and operational needs              | To enhance employee capacity through continuous training and development         | Developing and<br>Implementing<br>Workplace Skills<br>Plan (WSP)                     | - Conducting skills audits - Facilitating training and development programs - Implementing skills transfer initiatives                                      |

|   | Failure to integrate transferred staff         |
|   | Low staff morale level                         |

# **FINANCIAL VIABILITY**

Ensuring sound financial management is essential for the long-term sustainability and effective functioning of the municipality. Financial viability focuses on maintaining a stable revenue base, ensuring efficient budget utilization, and promoting transparency and accountability in financial governance. This includes prudent expenditure management, revenue enhancement strategies, and strict compliance with financial regulations to optimize service delivery. Strengthening financial controls, enhancing revenue collection, and reducing grant dependency are key priorities to ensure that the municipality can meet its obligations while driving socio-economic development. By implementing robust financial policies and adopting innovative funding strategies, the municipality can achieve financial stability and sustain essential services for the benefit of all communities.

The Sekhukhune District Municipality (SDM) faces several financial challenges that threaten its sustainability and efficiency. Unauthorized expenditure and discrepancies between SDM system reports and the Treasury database indicate weak financial controls and reporting inconsistencies. The non-attendance of audit findings leads to recurring financial mismanagement issues, while loss of revenue affects the municipality's ability to fund essential services. Additionally, inadequate budget spending results in underutilized resources, and non-adherence to applicable laws exposes the municipality to compliance risks and potential financial penalties.

To address these challenges, SDM should strengthen financial governance by enforcing strict internal controls, conducting regular financial reconciliations, and ensuring alignment between municipal and Treasury reports. Implementing a structured audit action plan will help resolve audit findings effectively, while enhancing revenue collection mechanisms—such as improving billing systems and enforcing debt recovery—can mitigate revenue losses. To optimize budget utilization, SDM should improve expenditure planning and monitoring, ensuring funds are used efficiently for service delivery. To conclude, compliance training and regular financial audits will help enforce adherence to financial regulations, reducing risks and promoting financial accountability.

| CHALLENGES              | OBJECTIVES | STRATEGIES           | PROGRAMMES / PROJECTS  |

# CHAPTER 5 INTEGRATION PHASE

#### 7. SECTOR PLANS

Section 26 of Municipal Systems Act (32 of 2000) requires municipalities to develop plans to address specific sectors of development within their jurisdiction. These plans are supposed to be developed every five years in a cycle congruent with that of IDP, in which context any sector plan older than five years is deemed outdated to its context of implementation. The following table reflects the status of Sector Plans in the SDM:

Table 116 - Policies/Strategies

| PLAN                             | AVAILABLE / NOT                              | FINANCIAL YEAR       | STATUS            |

#### 5.1. SPATIAL RATIONALE

#### SPATIAL DEVELOPMENT FRAMEWORK (SDF)

The Sekhukhune District Municipality Spatial Development Framework was adopted in 2004, first reviewed in 2008 and was again reviewed in 2018 to align with SPLUMA. In terms of the Municipal Systems Act, SDF is a component of an IDP. The act requires that it be compiled to give effect to the IDP. It is a legal framework that is desired to implement an IDP. It sets out objectives that reflect the desired spatial form of the district.

The spatial development framework guides and informs all decision of the municipality relating to land use development and land planning. It guides and informs the direction of growth, major movement routes, special development areas and conservation of areas by:

- Indicating desired pattern of land use
- Addressing the spatial reconstruction of the location and nature of development in the district.
- Providing strategic guidance in respect of the location and nature of development in the district.
- Indicating where public and private land development and infrastructure development should take place.
- Indicating desired or undesired utilization of space in a particular area within the district.
- Delineating urban edge.
- Identifying areas where strategic intervention is required.
- Indicating where priority spending is required from a district point of view/scale for municipal but for district wide projects.
- SDM has recently compiled a review of the SDF. The reviewed SDF is in place and has identified the following spatial development objectives and principles:
  - To actively protect, enhance and manage the natural environmental resources in the municipality in order to ensure a sustainable equilibrium between the mining, tourism and agricultural industries in the area.
  - To optimally capitalize on the strategic location of the district by way of strengthening internal and external linkages within provincial and regional context.
  - To utilize the natural environmental and cultural historic features in the district as anchors from which to promote ecotourism and conservation.
  - To maximally utilize the mining potential in the district by way of the development of the Dilokong Corridor.
  - To promote commercial farming and food production along the Olifants River and Steelpoort River drainage systems in the district.
  - To facilitate small scale and subsistence farming activities throughout the remainder part of the municipal area.
  - To promote industrial/commercial development in the district with specific emphasis on Agro-processing in the agricultural belt (Groblersdal), and mining/ore-processing in the mining belt (Tubatse).
  - To create a strong east-west movement/development corridor in the district functionally linking the tourism precincts, mining belt and agricultural belt to one another, and to the markets of Gauteng Province along the Moloto Corridor.
  - To supplement the district east-west corridor by way of three functional north-south corridors:

N11: Agriculture, CommerceR583: Institutional, Residential

R33: Mining

- To ensure equitable access to social infrastructure and to promote Local Economic Development by way of an evenly distributed range of Multi-Purpose Community Centres to be established throughout the district.
- To consolidate the urban structure of the district around the highest order centres by way
  of infill development and densification in Strategic Development Areas.
- To establish a functional hierarchy of towns and settlements in the district based on the regional function and spatial distribution of these centres.

#### LAND USE MANAGEMENT SYSTEM (LUMS)

Land use management system is a permutation of tools and mechanisms developed together in order to manage, control, influence and regulate the use of land. This system includes the IDP with spatial development framework as its component that scales down to a land use scheme and ultimately to the building plans. LUMS are put in place to effect a uniform system and procedures for land development and land use management and address the plethora and imbalances of the past.

The adopted LUMS are in place in all four local Municipalities in the district and they are aligned with SPLUMA.

#### 5.2. INSTITUTIONAL DEVELOPMENT AND ORGANISATIONAL TRANSFORMATION

#### PERFORMANCE MANAGEMENT POLICY AND FRAMEWORK

#### Introduction

The Sekhukhune District Municipality (SDM) accepts that performance management is central to building a developmental local government geared to meet the needs of communities in a sustainable and accountable manner.

As part of meeting its legislative requirements and policy provisions, the SDM has developed a performance management system (PMS) that provides a platform for communities to hold it accountable but also facilitates for effective management and cultivation of a result-based management culture and ethos amongst its political office bearers and employees. The

performance management system of the SDM is development oriented and provides the framework to manage and review employee performance and foster employee development.

#### Purpose of the policy

The purpose of institutionalizing a PMFP is to serve as a primary mechanism to:

- Enable SDM to Plan, Monitor, Measure Report, and Review and Improve Organizational,
   Departmental and Individual Performance.
- Facilitate the creation of a performance culture and improve service delivery through the successful implementation of PMS.
- Improve the implementation of the IDP.
- Ensure integration and alignment of programmes across municipalities, departments and other sphere of Government.
- Promote accountability between various stakeholders.
- Help the municipality to improve Service delivery through the development of effective PMS.
- Alert the organization of failure to achieve the objectives of the IDP and government commitments.
- Develop meaningful interventions mechanisms to address failure.
- Create a culture of best practice and encourage shared learning among stakeholders.

The following principles have successfully been the core foundation of PMS processes:

Table 117: Principles of PMS

| Principle             | Intervention   |
|-----------------------|--|
| Ownership and Support | The PMS should be owned by the municipality and        |
|                       | supported by other spheres of government               |
| Participatory         | The system must place the SDM community at the         |
|                       | centre of local government processes                   |
| Linkage/Integration   | The Performance Management System must be              |
|                       | linked to the IDP Framework. PMS and IDP               |
|                       | complement each other, therefore PMS planning          |
|                       | phase must occur within the IDP/Budget planning        |
|                       | phase  |
| Compatibility         | The PMS must be developed and implemented within       |
|                       | available capacity and resources. It must be user-     |
|                       | friendly enabling the municipality to manage it within |
|                       | its existing institutional and financial resources     |
| Alignment             | The system must align to other municipal activities    |
|                       | and allow for joint responsibility and accountability  |
| Fair and objective    | Performance management will be founded on              |
|                       | fairness and objectivity in the recognition of poor or |
|                       | good performance                                       |
| Decision making       | PMS decision making processes will not be used to      |
|                       | victimize or give an unfair advantage to an individual |
|                       | or group of people                                     |

| Principle          | Intervention   |
|--------------------|--|
| Politically Driven | The political principals must buy in and participate and |
|                    | take a lead in development and implementation of the     |
|                    | system   |

#### **Roles and Responsibilities**

The SDM performance management framework assigns roles and responsibilities to various political structures, political office bearers and municipal administration:

Table 118: Roles and responsibilities of various stakeholders in PMS

|   | and responsibilities of various stakeholders in PMS   |
|---|---|
| MUNICIPAL<br>STRUCTURES   | ROLES AND RESPONSIBILITIES  |
| The Council of<br>SDM   | <ul> <li>Set vision, mission and strategic direction of the municipality;</li> <li>Approve the Performance Management Framework and Policy;</li> <li>Submit annual report to Auditor General/ MEC;</li> <li>Receive reports from performance audit committee;</li> <li>Monitor Municipal Performance;</li> <li>Receive performance reports from the Executive Mayor;</li> <li>Appoint Audit Committee;</li> <li>Approve the Remuneration Policy for section 56 employees and Incentive Scheme for all employees; and</li> <li>Approve budget for rewarding and recognising good performance.</li> </ul>             |
| The Executive<br>Mayor  | <ul> <li>Facilitate development of IDP and PMS;</li> <li>Receive monthly reports on implementation of PMS;</li> <li>Review performance of the municipal manager;</li> <li>Report on organizational performance to the Council quarterly;</li> <li>Recommend the allocation of performance scores of Section 56 employees to Council and;</li> <li>Receives performance reports from the Performance Audit Committee.</li> </ul>   |
| Municipal Manager   | <ul> <li>Ensure alignment of PMS with other systems;</li> <li>Oversee the implementation of the PMS and submitting the required performance reports on regular basis to Council and other structures;</li> <li>Ensure that the system is implemented in line with legislative and policy frameworks;</li> <li>Mediate over disagreements between supervisors and employees; and</li> <li>Assigned the responsibility of developing the PMS.</li> </ul>  |
| The Members of the Mayoral Committee                                    | Oversee the implementation of PMS in their departments as per the Executive Mayor's sub-delegation of his roles and responsibilities and the new governance model.  |
| Section 79<br>Committees  | Play oversight role on implementation of PMS  |
| Senior Manager<br>delegated by<br>Municipal Manager<br>to implement PMS | <ul> <li>Communicating the vision, mission and strategic direction;</li> <li>Overseeing the process of design and implementation of scorecards and commitment plans;</li> <li>Communicating the strategic and operational plans;</li> <li>Communicate their performance agreements/commitments to staff;</li> <li>Facilitating on-going review of performance against set targets;</li> <li>Ensuring that the system is implemented in line with legislative and policy frameworks; and</li> <li>Mediating over disagreements between supervisors and employees (if delegated by the municipal manager).</li> </ul> |

| MUNICIPAL                       | ROLES AND RESPONSIBILITIES   |
|---------------------------------|--|
| STRUCTURES                      |  |
| Chief Financial<br>Officer      | <ul> <li>Decentralise budget regarding performance management to the respective responsible managers (Directors);</li> <li>Ensure that all Directors have budgeted for performance management linked expenditure; and</li> <li>Ensure that allocated financial resources reflect the strategic priorities of the district municipality.</li> </ul>   |
| Director: Corporate<br>Services | <ul> <li>Is custodian of the individual PMS;</li> <li>Ensures implementation of Council decisions on rewards and recognition of good performance;</li> <li>Engages organised labour on the implementation of PMS in the District municipality and other related issues;</li> <li>Provides training on the system; and</li> <li>Advice on HR systems and practices that are integrated to the Performance Management System.</li> </ul>   |
| Every Director and supervisors  | Performance management is a line function responsibility. Every director and supervisor is primarily responsible for the implementation of SDM's PMS in his/her department or area of responsibility. Each director and supervisor is responsible to:  • Jointly, with an employee, develop performance scorecards and other performance instruments that will help achieve the Department's objectives;  • Conduct regular monitoring and coaching sessions on performance;  • Collate the required evidence to support achievement against performance measures and targets;  • Timely identify areas requiring performance improvement and develop and implement performance improvement plans for unsatisfactory performers; |
|                                 | <ul> <li>Conduct mid-year and annual performance reviews;</li> <li>Develop and implement, jointly with employees, personal development plans; and</li> <li>Speedily address grievances in terms of the grievance procedure.</li> </ul>   |
| Employees                       | <ul> <li>Equal participation with supervisors in developing performance plans/scorecard and other performance instruments;</li> <li>Take responsibility for her or his own personal development;</li> <li>Understanding of the Department's strategic objectives and how he/she can contribute to achieve these objectives; and</li> <li>Provide feedback to supervisor on obstacles to achieving agreed objectives/standards.</li> </ul>  |
| Internal Audit<br>Committee     | Internal Audit Committee is required to develop and implement mechanisms, systems and processes for auditing the results of performance measurements as part of its internal auditing processes. This legislative requirement entails an assessment of the following:  (i) The functionality of the municipality's performance management system;  |
|                                 | (ii) whether the municipality's performance management system complies with the Act; and (iii) The extent to which the municipality's Performance measurements are reliable in measuring performance of municipalities on indicators referred to in regulation 9 and 10.   |
|                                 | Internal Audit is further required to:  (a) Audit the performance measurements of the municipality on a continuous basis;  |
|                                 | and (b) Submit quarterly reports on their audits to the municipal manager and the performance audit committee.   |

| MUNICIPAL<br>STRUCTURES        | ROLES AND RESPONSIBILITIES  |
|--------------------------------|---|
| Performance Audit<br>Committee | As permitted by legislation (MPPMR, 2001) the Performance Audit Committee may determine its own procedures after consultation with the Executive Mayor of SDM.  The Performance Audit Committee shall be established for the purposes of:   |
|                                | <ul> <li>Reviewing the quarterly performance reports;</li> <li>Reviewing the municipality's performance management system and make recommendations in this regard to the Council; and</li> <li>At least twice during a financial year submit an audit report to the SDM Council.</li> </ul> |

#### Accountability structure during the review process

Table 119: Accountability structure during the review process

| Lines of Accountability                 | Review Role/Input   |
|---|---|
| Supervisor and Municipal Manager        | Review performance of employees reporting directly to them (quarterly)                  |
| Line/Functional Managers                | Review performance of their respective functional areas (Monthly)                       |
| Standing/Portfolio Committees           | Manage and review performance of sectors and function respective to their portfolios.   |
| Executive Management (Section 57) Teams | Review performance of the organization constantly (monthly)                             |
| Executive or Mayoral Committee          | Review performance of the administration  |
| Council                                 | Review the performance of the Municipal Council, Its Committees and the Administration. |
| The Public                              | Review the performance of the Municipality and Public representatives (Councilors).     |

It is critical to note that Organizational Performance is integrally linked to that of the staff and Council performance. The two cannot exist independently without concerted and aligned PMS processes. The relationship between staff performance and Council performance starts from the planning, implementation, monitoring up to review of PMS.

#### 5.3. BASIC SERVICE DELIVERY

#### **INTEGRATED TRANSPORT PLAN (ITP)**

The Sekhukhune District Municipality undertook a project to update the Integrated Transport Plan (ITP) for its area of jurisdiction, whereby the final draft report was completed in March 2007. The report is still pending the Council approval. The ITP was prepared, as required in terms of section 27 of the National Land Transport Transition Act, No.22 of 2000 (NLTTA), as amended. The ITP attends to the public and private modes of transport, infrastructure, facilities and services. The Integrated Transport Plan constitutes a transport sector input into the IDP process.

For implementing the NLTTA, the Minister of Transport published the minimum requirements for the preparation of the ITP (Government Gazette No. R25245 dated 1 August 2003). This

publication provides for the minimum requirements for the structure and contents of the ITP document.

A data collection process preceded the ITP. The aim of that process was to gain an idea of the current situation in the Sekhukhune District Municipality (SDM) in terms of transportation utility. One of the data collection processes is called the Current Public Transport Record (CPTR). The final updated CPTR report was completed in November 2006. This included a survey of taxi operations at taxi ranks.

Subsequently, the Operating Licensing Strategy, Rationalization Plan and Public Transport Plan for the SDM were updated and are components of the Integrated Transport Plan.

Further research was done into road infrastructure development plans and operational plans, such as Road Safety, Travel Demand Management, freight and commodity flow data collection and demographic data. The ITP and Land Development Objectives should be complementary.

The ITP indicates that SDM should focus its efforts and resources on the following strategic components of transportation:

#### a) Capacity and Skills Development

- Training of officials in integrated transportation planning and land-use planning
- Recruitment of transport planners and engineers
- Procurement of consulting engineering services for consistent and continuous advice and for undertaking ad hoc projects

#### b) Addressing the Service Backlog

- Motivate subsidized public transport coverage in the SDM with the objective of reducing the cost of travel
- Install public transport infrastructure such as shelters, lay-bys and inter-modal facilities
- Upgrade the road infrastructure and the streets between residential and business nodes, giving special attention to the Greater Tubatse Area.

#### c) Travel Demand Management (TDM)

- Manage congestion through TDM measures such as signalization, bus lanes, reversible lanes in urban areas and the upgrading of intersections
- Develop a non-motorized transport plan and implement projects.

#### d) Road Safety

- Develop a Central Communications Centre for incident management
- Perform road safety audits
- Address hazardous locations
- Motivate law enforcement at strategic locations

#### e) Conduct Education and Communication Campaigns

The way forward is to submit motivations for the prioritized projects in the Integrated Transport Plan (ITP) and the Integrated Development Plan (IDP). The construction and maintenance of public transport facilities and roads are in most cases labour-intensive and are appropriate mechanisms to promote job creation.

#### INTEGRATED WASTE MANAGEMENT PLAN (IWMP)

The Sekhukhune District Municipality has developed the integrated Waste Management Plan that is waiting for approval by council. The purpose of this Integrated Waste Management Plan (IWMP) is to enable Sekhukhune to progressively develop an Integrated Waste Management System (IWMS) capable of delivering waste management services to all households and businesses.

Implementation requires that Sekhukhune move away from traditional "end of pipe" solutions (the dominant practice in South Africa) that focus on waste after it has been generated: Collection – Transport – Landfilling.

National policy requires municipalities to implement an IWMS where the focus is on prevention and minimization of waste, recycling of waste and treatment that is able to reduce the potential harmful impacts of waste. Only after these efforts, should remaining waste be disposed of at a landfill.

Integrated Waste Management is based upon waste generators acting responsibly by separating their waste at source (the point of generation) and then properly recycling, storing and disposing of the different parts of the waste. The government must ensure that there is waste management service delivery system providing a network of collection and disposal options so that generators can effectively exercise their responsibilities. Thus, Integrated Waste Management combines personal responsibility with government service delivery. Appropriate education and training are required for everyone.

A key element of the IWMS is home use of organic waste (composting or animal feed) as this eliminates the need for collection, transport, treatment and disposal of as much as 50% of the waste stream.

Non-organic recyclable material, when separated at source has higher value, is more easily routed to end users and can be recovered at a far higher efficiency rate than when it is salvaged at a landfill site. In the IWMS will create new forms of safe employment with better remuneration while education and training enable salvagers to take advantage of new career path.

#### Alternative solutions

The Feasibility Study describes two options for the waste management system in Sekhukhune. Only option 2 contains key elements for an IWMS. Option 1 presents a strategic with "end of pipe" services and shows the potential costs of waste management in Sekhukhune without incorporating integrated strategies.

An overview of all options is shown in table 138 below:

Table 120: Strategy Options

|          | Core elements Waste Management Strategy   |                                    |  | Integrated strategies                   |  |  |
|----------|---|------------------------------------|--|---|--|--|
|          | Collection  | Transport                          | Disposal   | Recycling                               | Treatment  |  |
| Option 1 | House to house service provided by the Municipality House to Collecting points and transport with trucks and donkey cards (rural areas) |                                    | Rehabilitation<br>and/or operation<br>of 7 landfill sites<br>according to<br>DWAF's MR | On the landfills by private contractors | No<br>composting<br>MBWT may<br>be<br>considered |  |
|          |   | provided by<br>the<br>Municipality | and closure of<br>15 dumpsite  |   |  |  |

#### Overview of feasibility options

These projects have two fundamental economic flaws:

Income is derived from the sale of salvaged recyclables only. The value gained by the municipality in reduced land fill costs is not seen as linked to the project and the salvages do not receive any portion of this value.

In end of pipe salvaging, waste is first mixed at source and then transported by the municipality to the land fill where it then has to be separated and transported once again.

The added costs significantly reduce the revenue available to the salvagers.

#### INTEGRATED ENVIRONMENTAL MANAGEMENT PLAN (IEMP)

The Sekhukhune District Municipality has drafted the Integrated Environmental Management Plan that is waiting to be approved by the Council. The Integrated Environmental Management Plan (IEMP) is a plan with a holistic framework that can be embraced by all sectors of society for the assessment and management of environmental impacts and aspects associated with an activity for each stage of the active life cycle, taking into consideration a broad definition of environment and with the overall aim of promoting sustainable development.

The founding principles of the IEMP are the following:

- Integrated approach.
- Informed decision making.
- Holistic decision making
- Alternative options.
- Continual improvement.
- Community empowerment.
- Equity.
- · Accountability and responsibility.

- Adaptation.
- Dispute Resolution.
- Global Responsibilities.
- Environmental Justice.
- Institutional Co-ordination.
- Polluter Pays.

This document is not yet approved by Council. To avoid long term accumulated negative effect, the district has started implementing some of the recommendations mentioned in the document. The plan is developed from the involvement of interested and affected parties as well as the responsible authority in ensuring the protection of its citizens while taking forward economic development. It should be emphasized that consultation with the other regulatory authorities and sectors is pivotal in ensuring association with the plan for proper integration.

The SDM IDP, Limpopo State of the Environment Report, Limpopo Employment, Growth and Development Plan (LEGDP) and the IDPs of the five Local municipalities (which are under the direct control of the district) provided the framework for the development of this three-year (2001-2010) Integrated Environmental Management Plan (IEMP).

The development of this plan was based on the following protocol:

- Identification of the environmental activities and priorities performed by sectors of the municipality and its five local municipalities.
- Clustering of common functions.
- Setting goals and objectives.
- Documentation of strategies.
- Identification and development of the environmental programmes.
- Development of projects.
- Development of the management strategy for all the levels of the projects.
- Identification of role players.

This IEMP has set the basis upon which the development of the SDM environmental policy and the SDM State of Environmental Report is formulated. This policy will be important in guiding the other ecosystems' plans.

#### AIR QUALITY MANAGEMENT PLAN (AQMP)

The Sekhukhune District Municipality (SDM) in line with the Department of Economic Development, Environment and Tourism in the Limpopo Province (LEDET) has developed a Draft Air Quality Management Plan (AQMP) for the SDM.

The overall goal with the Plan is to manage, reduce and/or eliminate the generation and significant negative environmental impact(s) of all known air pollutants in their area of jurisdiction.

The AQMP will be used to reform the by-laws regulating air quality in order to protect the quality of the air in the SDM and to minimize the impact of air pollution emissions on neighboring districts yet allowing ecologically sustainable and justifiable economic and social development. By

compiling an AQMP, the SDM will comply with the relevant requirements of the National Environmental Management Air Quality Act 39 of 2004.

The object of the National Environmental Management Air Quality Act 39 of 2004 is;

- (A) To protect the environment by providing reasonable measures for –
- (i) The protection and enhancement of the quality of air in the Republic;
- (ii) The prevention of air pollution and ecological degradation; and
- (iii) Securing ecologically sustainable development while promoting justifiable economic and social development; and
- (B) Generally, to give effect to Section 24(b) of the Constitution in order to enhance the quality of ambient air for the sake of securing an environment that is not harmful to the health and well-being of people.

The specific objectives of generating this Plan are to:

- Ensure the identification of significant air pollutants;
- Control the emission of air pollutants;
- Implement planned Air Quality Management strategies;
- Achieve acceptable air quality levels throughout SDM;
- Promote a clean and healthy environment for all citizens within SDM;
- Minimize the negative impacts of air pollution on health and the environment; and
- Promote the reduction of greenhouse gases so as to support the district's climate change protection programme.

#### WATER SERVICES DEVELOPMENT PLAN (WSDP)

#### Residential consumers of water:

- 42% of Rural consumer units are below the RDP standard;
- 100% of Rural farmland units are estimated to be below the RDP standard;
- Although no reliable information is available it is estimated that 90% of rural scattered and 20% of rural dense consumer units are below the RDP standard.
- Residential consumers of sanitation

#### The following situation exists within rural areas:

- Rural Dense: 40% below the RDP standard;
- Rural Village: 75% below the RDP standard;
- Rural Scattered: 90% below the RDP standard;
- Rural Farmland: 95% below the RDP standard.

#### Strategic Gap Analysis

- Monitoring of water supply quality is to be introduced on all schemes. Data to be collected on a Sub-Scheme basis. Little or no data is currently available.
- Ground water quality is to be implemented on all groundwater schemes where there is onsite sanitation (dry or wet). No data is currently available.
- Lack of a single database for water schemes.
- Groundwater data being held up due to non submission of GRIP database.
- Transfer of Schemes and ex. DWAF staff to WSA and local Wasps is proving to be problematic, due in part to an oversupply of unskilled operational personnel on the one hand and a shortage of skilled personnel, engineers, technicians and scientists on the other.
- Shortage of engineers and technicians to design, implement, manage, monitor and evaluate schemes.

#### Implementation Strategy

- An O and M budget allocation for on-going refurbishment and defective and badly maintained infrastructure has been allowed.
- Focus will be placed on labour-intensive construction methods for refurbishment, maintenance and water supply projects.
- A water demand management programme is to be initiated.
- The sanitation programme to be increased to meet the sanitation targets of 13 068 units per year.
- Abstraction rates and water quality to be monitored for all groundwater resources.
- Effective control of discharges from all WWTW within SDM to be developed and initiated.
- A management model to be developed for the 605 villages, over 40 sub-water scheme areas and thousands of boreholes within the SDM. The fundamental approach for SDM must be decided within the Section 78 process.

#### **DISASTER MANAGEMENT PLAN (DMP)**

The Sekhukhune District Municipality has adopted the Disaster Management Plan in 2007 and reviewed it in 2021. The main purpose of the Disaster Management Plan (DMP) is *inter alia* to implement appropriate disaster risk reduction measures to reduce the vulnerability of communities and infrastructure at risk. The DMP is in line with national policy (National Disaster Management Framework), which requires the following:

- The compilation of a Disaster Management Framework (policy).
- The execution of detailed disaster hazard, vulnerability and risk assessment.
- The compilation of disaster risk reduction measures.
- The compilation of appropriate Standing Operating Procedures (SOP's).
- Establishment of a District Disaster Management Centre (DDMC).
- Establishment of a Disaster Management Advisory Forum.
- Capacity Building, training and awareness programmes.

Hence, to accommodate the above-mentioned requirements, the DMP for Sekhukhune District Municipality (SDM) comprises various plans, namely;

- District Disaster Management Framework (policy).
- Disaster Hazard, Vulnerability and Risk Plan.
- Disaster Risk Reduction Plan.
- Disaster Response and Recovery Plan (SOP's and checklists).
- District Disaster Management Centre Plan.
- Guidelines to establish the Disaster Management Advisory Forum and Volunteer Contingent

#### 5.4. LOCAL ECONOMIC DEVELOPMENT

#### LOCAL ECONOMIC DEVELOPMENT STRATEGY

The Sekhukhune District Municipality adopted its first strategy in 2004 and was first reviewed in 2007 and recently reviewed in the 2018/19 financial year. The LED Strategy intends to create an enabling environment for economic development and investment to take place, thereby tackling the triple challenge of unemployment, poverty and inequality which is in alignment with the National Development Plan (NDP).

The LED Strategy facilitates the establishment of channels and mechanism to ensure the economic development reaches the true beneficiaries. Moreover, the Strategy focuses on SDM's development needs and opportunities, as well as its competitive and comparative advantages, which will help to facilitate economic development and job creation, thereby encouraging private sector investment.

The SDM LED Strategy is contextualised through the review of the policy environment, reviewing policies from all spheres of government that affect the compilation of the LED. The study conducted a situational analysis to assess the current realities of the area, making use of a competitor analysis with other District Municipalities bordering SDM. A comprehensive overview of the local economy was undertaken, providing a synopsis of the key economic sectors, potential linkages, and key growth points within the District Municipality. The overview of the situational analysis identified the high potential for economic development which entails:

- Sourcing skills needed in agriculture and other sectors from local communities
- Promoting self-reliance of households
- Coordinating availability of accurate data for forwarding planning
- Supporting the development of agriculture and Agro-processing through the Agri Park program
- Encouraging enterprise development through the Enterprise and Supplier Development Programme
- Supporting the establishment of Tubatse Special Economic Zone
- Developing marketing and investment attraction initiatives and plans

The strategic interventions identified resulted in programmes and projects being identified through the use of a project prioritisation matrix and stakeholder consultation process. Projects identified in the study were based on the creation of job creation opportunities, promotion of value chain integration resulting in stimulation of other development initiatives and SMME growth in the District Municipality.

The findings of the study identify potential sectors for economic development in the district which include agriculture, tourism and mining. For instance, the Tubatse SEZ and AGRI-PARK initiative structures an economic foundation for development throughout the district. In addition, the District Municipality is a host to the Flag Boshielo and the De Hoop Dam which are key essential highlights within the district.

The strategic framework for the LED is anchored on existing development initiatives and potential linkages that targets the following strategic interventions which include:

- Institutional Development
- Improving the Enabling Environment
- Agriculture & Agro-processing
- Mining & Mineral Beneficiation
- Tourism Development
- Sustainable SMME Development
- Infrastructure Development & Support Structures
- Marketing Interventions

The study also concluded with an implementation guideline and a monitoring and evaluation framework which aids to enhance the efficiency and effectiveness of the strategy. In addition, the monitoring and evaluation strategy determines the contribution and effectiveness of each strategy as projects, thereby enabling KPI's to be linked to specific strategies.

#### 5.5. FINANCIAL VIABILITY

#### The following budget related policies were also reviewed alongside the budget:

- 1. Tariff policy and structure
- 2. Indigent policy
- Free Basic Water policy
- 4. Credit control and debt collection policy
- 5. Investment and cash management policy
- Asset management policy
- 7. Funding and reserve policy

#### **Water and Sanitation Tariff Policy**

#### Purpose:

- To set clear guidelines in the identification of responsibility for the setting and implementation of a tariff policy for the Municipality;
- To set guidelines for the identification of different categories of users;
- To set guidelines for the determination of tariffs for the different categories of users and services rendered;

 The policy will further lay down the broad principles, which will result in the adoption of a by-law for the implementation and enforcement of the Tariff Policy. Service tariffs imposed by the municipality shall be viewed as user charges and shall not be viewed as taxes.

#### Scope of the policy

- The policy is applicable to water and sanitation services provided by Sekhukhune District Municipality
- This policy is also applicable to all sundry tariffs as provided for in the Schedule of Tariffs
  of the Municipality.

#### Free Basic Water Policy

The purpose of the policy is to outline the Free Basic Water Policy for SDM area of jurisdiction.

As part of government strategy to alleviate poverty in South Africa a policy for the provision of a free basic level of services has been introduced. In response to this commitment, the Department of Water Affairs and Forestry (DWA) commenced the implementation of phase 1 of a national free basic water strategy in February 2001. The free basic water policy is not new to the South African water sector. Indeed, in terms of the Water Services Act 108 of 1997, provision was made for those people who cannot afford to pay for a basic water supply.

The primary intention of the policy is to ensure that no one is completely denied access to a water supply because they are unable to pay for the water service. Underlying this policy is recognition that the supply of water at a 'basic' level assists in alleviating poverty, improves community health and frees women from time wasted on carrying water.

#### **Indigent Policy**

#### Objective

Because of the level of unemployment and subsequent poverty in the municipal area, there are households which are unable to pay for normal municipal services. The municipality therefore adopts this indigence management policy to ensure that these households have access to at least basic municipal services and is guided in the formulation of this policy by the national government's policy in this regard.

#### Criteria for identification as indigent:

- Households were verified total gross monthly income of all occupants over 18 years of age does not exceed the pension grant as determined by the government.
- The threshold for qualifying as an indigent in a single household where more than two
  occupants receive old age pension grants shall be the twice old age grant determined by
  the government.
- Any occupant or resident of the single household referred to above does not own any property in addition to the property in respect of which indigent support is provided

- The account of a deceased estate may be subsidised if the surviving spouse or dependents of the deceased who occupy the property, also apply and qualify for indigent support.
- For a household to qualify for subsidies or rebates on the major service charges (see part 3 below), the registered indigent must be the fulltime occupant of the property concerned, may not own any other property, whether in or out of the municipal area.
- Child welfare grants are exempted as part of total income per household as the child is under 18 years of age.

#### Application of the policy

- The subsidies on the specified service charges will be determined as part of each annual budget and in terms of the municipality's policies on tariffs
- In respect of water, a 100% subsidy up to 6kl per household per month including basic charge will apply, however, if consumption exceeds 6kl per metering period (month) the consumer will be charged at normal tariffs for actual consumption on the quantity exceeding 6kl plus basic charge.
- In respect of sewerage charges, the relief granted shall not be less than a rebate of 50% on the monthly amount billed for the service concerned.

#### **Credit Control and Debt Collection Policy**

#### Objectives:

- The Council of SDM, in adopting this policy on credit control and debt collection, recognises its constitutional obligations to develop the local economy and to provide acceptable services to its residents.
- It simultaneously acknowledges that it cannot fulfil these constitutional obligations unless it exacts payment for the services which it provides and for the taxes which it legitimately levies in full of those residents who can afford to pay, and in accordance with its indigence relief measures for those who have registered as indigents in terms of the council's approved indigence management policy.
- Ensure that all money due and payable to SDM in respect of fees for services, surcharges on such fees, charges, tariffs, interest which had accrued on any amounts due and payable in respect of the foregoing and any collection charges are collected efficiently and promptly.

#### **Funding and Reserve Policy**

The funding and reserve policy is aimed at ensuring that the municipality has the sufficient and cost-effective funding in order to achieve its objectives through the implementation of its operating and capital budgets. This policy aims to set guidelines towards ensuring financial viability over both the short and long term which includes reserves requirements.

The policy shall apply to the Council and all officials who have formal, administrative duty to prepare manage and control the municipality's budget and expenditure.

#### **Asset Management Policy**

The objectives of Asset Management Policy can be summarised as follows:

- To ensure effective and efficient control, utilization, safeguarding and management of SDM's property, plant and equipment
- To ensure that asset managers are aware of their responsibilities in regard to property,
   plant and equipment
- To set out the standards of physical management, recording and internal controls to ensure property, plant and equipment are safeguarded against loss or utilization
- To specify the process required before expenditure on property, plant, and equipment in SDM including:
  - The criteria to be met before expenditure can be capitalised as an item of property, plants and equipment
  - The criteria for determining initial costs of different items of property, plant, and equipment
  - Classification of property, plant, and equipment

The utilization and management of property, plant and equipment is the prime mechanism by which a municipality can fulfil its constitutional mandates for: delivery of sustainable services, social and economic development, promoting safe and healthy environment, providing the basic needs to the community.

#### Investment and cash management policy

The Council of SDM is the trustee of public revenues, which it collects, and it therefore has an obligation to the community to ensure that the municipality's cash resources are managed effectively and efficiently. Therefore, the council must invest the revenues knowledgeably and judiciously. The aim of the policy is therefore to gain an optimal return on investment, without incurring undue risks, during those periods when cash revenues are not needed for capital or operational purposes. The effectiveness of the policy is dependent on the SDM's cash management program which must identify the amounts surplus to the municipality's needs. All monies due to SDM must be collected as soon as possible, either on or immediately after the due date and banked on a daily basis.

#### **Supply Chain Management Policy**

All procurement policies (including those addressing preferential procurement), procedures and practices must be consistent with legislative requirements, in particular part 1 of chapter 11 and other provision of the MFMA. The SCM policy is implemented in the context of the MFMA of 2003 and SCM regulations, read together with the Constitution, preferential procurement policy framework Act of 2000, and the BBBE Act of 2003. The principal objective of the policy is to provide guidelines, governing processes and procedures within the supply chain management:

- Procuring goods and services
- Disposing goods, assets and immovable property no longer needed
- Selecting contractors to provide assistance in the provision of municipal services other than that where Chapter 8 of the Municipal Systems Act applies

#### 5.6. GOOD GOVERNANCE AND PUBLIC PARTICIPATION

#### PUBLIC PARTICIPATION FRAMEWORK

The public participation policy framework has been adopted by the Council and is reviewed annually. The objectives of the policy are as follows;

- Meet the legal requirements around community participation that are spelled out in the Municipal systems Act No. 32 of 2000.
- Build an open, transparent and accountable system of governance.
- Develop a culture of community participation through creating conditions for local communities to participate in the affairs of the municipality.
- Assist vulnerable groups to participate effectively in the system of local government.
- Provide clear, sufficient and timeous information concerning community participation to communities.
- Communicate decisions of Council.
- Communicate public notices of meetings for communities in a manner that promotes optimal public participation.
- Set up systems and mechanisms that will ensure compliance with regulations and guidelines that may be issued by the National or Provincial Government.

The Public Participation policy framework spells out the roles and responsibilities of;

- Council,
- Executive Mayor,
- The Speaker,
- Portfolio and Standing Committees,
- Ward Councilors,
- Management and Administration,
- The Public (Ward Committees) and
- Community Development Workers
